● Mr. FOUNTAIN. Mr. Speaker, I call to the attention of my colleagues an article by columnist George F. Will in yesterday's Washington Post which describes some of the many contributions to a fuller accounting of the history of the Congress contained in a three-volume work, "Circular Letters of Congressmen to Their Constituents, 1789–1829," published last summer by the University of North Carolina Press, Chapel Hill, N.C.

On June 8, 1978, I had the privilege and honor of presiding over a Capitol ceremony in which copies of this major compilation, edited by Prof. Noble E. Cunningham of the University of Missouri were presented to the leadership of both the House and the Senate. A transcript of that presentation ceremony, along with a fuller explanation of the historical significance of this important work, appeared in the CONGRESSIONAL RECORD for June 16, 1978.

The article follows:

"DEAR CONSTITUENT . . ." (c. 1800)

(By George F. Will)

It was time to fulfill the literary function that is central to republican government, so the congressman began a letter to his con-

stituents: "Although no definitive measure of importance hath hitherto taken place in Congress, yet in pursuance of my duty and inclination, I beg leave to furnish you with a short abstract of the state of public affairs. . . ."

The University of North Carolina has published three volumes of "circular letters," newsletters sent by congressmen to constituents between 1789 and 1829. To read them is to sense something we have lost, and to glimpse the elusive relationship between style and substance in politics.

Although the styles of the letters vary, they all seem suited to an age before broadcasting, when the eye was more important than the ear, and people did not expect and require public utterances to be plain and graceless. I will leave aside my firm conviction that the rushing typewriter, with its clackety-clack rhythm, is an enemy of well-crafted sentences.

But I will insist that when those early congressmen dipped quill pens into inkwells they were undertaking a highly regarded art—expository prose—and they aimed for a stately tone appropriate for matters of high moral dignity. The less elevated style of today's political discourse is, perhaps, appropriate for today's servile state that sees itself merely as an undignified broker between clamorous interests.

The subjects taken up in the republished letters include how to cope with Algerian pirates, and Indians, and whether to tax stills or the liquor distilled. There also are perennial themes. A writer boasts about voting against a measure that increased congressmen's compensation to "eight dollars a day and the same for 20 miles travel." In 1818 a congressman expresses fastidious dismay: "All works undertaken by this government are carried on in a manner not remarkable for economy." Another representative, anticipating today's populist dislike of lawyers, criticizes the session just ended because "there was too large a proportion of professional gentleman, and others not sufficiently conversant with the manner in which the main body of the yeomanry of this country gain their substance."

In the 1790s, when the government was just developing its sea legs, many letters were full of alarm. Americans were "furiously hurling ourselves into the vortex of tyranny." Americans were losing "the Security of their Liberties, for which they have so valiantly fought and so profusely bled." A congressman mentioned "the election of John Adams" and exclaims: "O afflictive words! . . . O the depravity of times! O the corruption of the manners!"

By the 1820s a congressman's report was more apt to be a matter-of-fact: "In giving you a sketch of our session, I have to remark that it commenced in a calm, which approached to indifference."

Communication to and from the central government was difficult in the days before mass and instant communication. When these letters were being written, congressmen were insulated from their constituents by a psychological distance that owed something to the philosophic understanding of representation that is the essence of republican government. So it was natural for congressmen to conclude a report as austerely as John Tyler of Virginia did in 1818:

"I have thus briefly, Fellow Citizens, presented you the reasons which have governed me in the course which I have pursued upon those subjects of greatest importance to our future destiny. Should I have been so fortunate as to have coincided with you in opinion, it will be to me a source of gratification . . . [But] should my course not meet with your approbation, I have the consolation to know that I have honestly pursued the dictates of my best judgment, and acted the part of an independent Representative."

When, if ever, have you been adressed by a politician possessing such serenity and dignity? Tyler's course was determined by "reasons," by his 'judgment," not his constituents' instructions. He was pleased to present his conduct for approval, after the fact. Given the limited possibility for communication with a constituency during a session of Congress, he could hardly have done more. Given his understanding of his office, he would not have wished to do more.

Tyler expressed the essential, indispensable spirit of republican government, and it seems archaic because we have, in fact, dispensed with it.●

MEDICARE AND MEDICAID

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. FORD of Tennessee. Mr. Speaker, over 10 years ago, Congress enacted medicare in an effort to provide a comprehensive program to meet the health care needs of our Nation's elderly.

Although beset with some problems, the program has, for the most part, provided the means for those persons 65 or older to seek and receive quality health care. One exception is the important, and frequently neglected area of primary care—dental care.

When medicare was enacted, the Congress did not include a dental component in the program. Instead, Congress voted to include adult dental care uner the medicaid program—as a State option. Theoretically then, the elderly poor would be able to obtain dental care—but only if they lived in a State which had a dental program under medicaid.

Unfortunately, only 34 of the 53 States and territories with medicaid programs provide adult dental benefits. And of these 34, 31 have imposed restrictions on benefits, such as no denture coverage, or coverage only in emergency conditions. In addition, because of the optional nature of adult dental services, they are among the first to be curtailed or eliminated when States find it necessary to cut back on medicaid services.

It is a well-documented fact that dental disease and its related problems are pervasive among the elderly and, unfortunately, going untreated in many cases. According to the National Center for Health Statistics, of the 22.4 million Americans aged 65 and over in 1975, 11.4 million were edentulous (or without teeth). Of this group, 6.2 percent did not have dentures. In addition, evidence of periodontal disease was found in over 90 percent of elerly persons with their natural teeth.

Coupled with this high rate of need is the low utilization rate. In 1975, nearly 70 percent of the elderly population did not see a dentist. For those who did seek dental care, 93 percent of the cost of providing dental care was paid with private funds. The remaining 7 percent was paid with Government funds through medicaid, and totaled $38 million or $1.24 per capita. The $38 million expenditure equals only one-half of 1 percent of all dental care expenditures.

It is also well known that the majority of people over age 65 live on limited, fixed incomes, often below the poverty level. Findings of a study conducted by the American Dental Association demonstrate that—

The small amount of spendable income available to most elderly does not tend to support frequent utilization of dental services.

Clearly, the Government has an obligation to help these people secure quality dental care. Without attention to their oral health, their ability to socialize, to speak, or to obtain proper nutrition is directly affected.

Today I am introducing a bill to assist the elderly in receiving this needed dental care.

This bill would amend medicare part B to include coverage for comprehensive dental care services, including dentures, provided by licensed dentists.

Although these title XVIII dental care improvements initially will result in higher program costs, the expenditures should decline as elderly persons receive the preventive and comprehensive dental care they so urgently need at present. According to survey research data released by the American Dental Association in July 1977, "the percentage of Americans wearing dentures is dropping dramatically * * * Long-term efforts by the dental profession to eliminate needless loss of teeth are yielding results," with only 24.7 percent of the 30-and-older age group in 1975 wearing one or two complete dentures, compared to 35.2 percent in 1960.

In fact, as those individuals who have been exposed to fluoridated water over the past 30 years reach age 65, the number of people requiring extensive dental care will decline.

Mr. Speaker, my bill is cost-effective and necessary. It would help meet one of the greatest needs in the total health care of our elderly.

I realize it is too late in this session of Congress for full consideration of this legislation. However, it is important to emphasize this significant gap in current medicare coverage. I introduce the bill now with the hope that it can be reviewed and acted upon in the 96th Congress. An explanation of this legislation follows:

EXPLANATION OF PROPOSED DENTAL CARE AMENDMENTS TO PART B OF MEDICARE

1. Section 1 would delete the present statutory exclusions of dental prosthetic devices, (dentures) and dental care services under Section 1861(s)(8) of Title XVIII.

2. Section 2 would provide a new subsection, Section 1861(s), which would define a "dentist" as an eligible provider for newly mandated dental services under Part B of Medicare. Essentially this new definitional section would enable only qualified and licensed dentists to provide dental services which they are legally authorized to provide by the State in which they perform them.

3. Sections 3 and 4 of the bill would explicitly mandate comprehensive dental services, including dentures, for Medicare beneficiaries under Part B of Title XVIII, Social Security Act.

4. Section 5 would clarify existing author-

ity for coverage of dental services rendered by a dentist, as defined in Section 1861(s), in an inpatient hospital setting.

5. Section 6 would make these amendments effective the first day of the month following the month in which this legislation is enacted.●

A COLLEGE WORK-EXPERIENCE PROGRAM THAT WORKS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BROWN of California. Mr. Speaker, with the multitude of educational programs in this country, it is difficult to single out any particular program or program director for special recognition. There are exceptions, however, for exceptional programs. One such example is centered in the congressional district that I represent, at the Riverside campus of the University of California.

For over a decade, Prof. Ron. Loveridge of University of California, Riverside, has been encouraging elected officials and governmental agencies at the Federal, State, and local levels to accept students in a work-experience program. The students are carefully screened, and must complete outside reading and prepare papers, as well as do the work of regular employees, in exchange for college credits. The agencies and offices which accept interns generally get free, or inexpensive and energetic assistance in their own work, as well as a fresh point of view about that work. The net result has been an enrichment in the education of the students involved, and a contribution to the community at large from the work of these students. One individual deserves the major credit for the success of this program, Ron Loveridge. Other colleges would do well to emulate this program.

Mr. Speaker, as one who has benefited from this program, and who hopes to gain even more benefits in the future, I perhaps should disqualify myself from praising Dr. Loveridge. But since both of California's Senators have similar conflicts of interest, and many other offices in Washington, D.C., have benefited from this college intern program, I will not. Let me simply say that I fully concur with the California State Legislature, which recently passed a joint resolution commending the UCR intern program, its contribution to the State legislature, and the "patience and hard work" of Ron Loveridge. I would only add the thanks of those of us in Washington who have also benefited.

The story of how this resolution came to be is interesting in its own right, and helps explain why this program is a success. I recommend the following article from the September 1978 issue of UCR News:

CALIFORNIA LEGISLATURE RESOLUTION

It happened the way most people imagine political plots are hatched.

A special interest group makes a connection with a local legislator through the ol' boy network. A bill is secretly prepared and its passage assured by deals made with other politicians who have benefited—and will continue to benefit—from the interest being served by the measure.

But in this case, the special interest group is comprised of interns from UCR, working with legislators in Sacramento. Their purpose: to honor political science professor Ron Loveridge, who has spent over a decade placing UCR students in such internships.

The political intrigue began several months ago when Rupert Francisco, a 1977 UCR graduate, decided it was time to thank Loveridge for his efforts. Francisco, who had interned in Sacramento for a quarter during his senior year and then was selected for a fellowship with the state Assembly, contacted Eric Norland, then an intern with Assemblyman Walt Ingalls (D-Riverside). Both students had been placed in their positions by Loveridge.

"Rupert suggested the idea, then asked me if I could arrange for him to see my boss," Norland, of Corona, recalls.

The "ol' boy network" paid off and Norland arranged a meeting with Ingalls, who enthusiastically supported a joint resolution of the Legislature. Ingalls also obtained the support of State Sen. Robert Presley (D-Riverside), who had also had Loveridge interns placed with him.

The whole thing was handled on a hush-hush basis by Francisco, Norland and Charles Schultz, of Hemet, a member of Ingalls' staff who himself had served as an intern from UCR. They secretly researched Loveridge's background with help from the Political Science Department and drafted the resolution.

It commends Loveridge "in appreciation of his many years of providing to the Legislature the extraordinarily high caliber of interns" from UCR.

Noting that 125 UCR students have served in Sacramento since Loveridge began placing them in 1966, the resolution attributes "the good work of University of California at Riverside interns . . . to the patience and hard work exemplified by Professor Loveridge."

The commendation also recognizes his work with the California State Assembly Fellowship Program, which provides college students with 10 months of experience working with the Legislature.

Loveridge, who recently stepped down after three years as chairman of the Political Science Department, commented simply, "I was quite surprised."●

RETIREMENT OF ROBERT L. F. SIKES

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. CORMAN. Mr. Speaker, the House will lose the valuable leadership of one of its most experienced and influential Members with the retirement of BOB SIKES.

Elected to every Congress since 1941, BOB has led the Congress, the Nation, and his district through a period of major change. His experience has been an important resource for each of us and a stabilizing force on the House.

BOB's greatest public service has been in directing the development of a strong national defense.

He has served on the Appropriations Subcommittee for Defense and Military Construction and chaired the Military Construction Panel during the challenging period of 1965–77. His cool and decisive performance under pressure will long be remembered and a mark by which others will be measured.●

THE CASE OF THE RYNSKY FAMILY WHO ARE DETAINED IN THE SOVIET UNION

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SANTINI. Mr. Speaker, I am pleased to join in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policies.

In 1975, 35 nations signed the Helsinki Final Act, which committed the 35 signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

Unfortunately, the Soviet Government has regarded the human rights provisions of the Final Act as empty promises. This is most apparent now in the Soviet Union's restrictive emigration policies.

We who take freedom from such harassment for granted must do all we can to change these practices.

Today, I would like to bring to my colleagues' attention the case of Edouard Mikhailovich Rynsky and his family in Moscow. He, his wife, Natalya, his daughter, Yelena, and his mother, Mariya, have applied five times for emigration visas since October 1974, and have been refused. The refusal has been based ostensibly on "state interests." However, Mr. Rynsky had quit his job as a design engineer engaged in elevator design projects (with a second-class security clearance) in 1972, 2 years prior to applying for his immigration visa. He found another job as an engineer with a passenger elevator operation and maintenance agency, in no way associated with sensitive matters. Since 1974, he has been employed as a mechanic at a small factory. Although trained as a mechanical engineer, he has been unable to find employment in his field since applying for exit visas for his family.

Edouard Rynsky and his family desire to be reunited with his sister who is now living in the United States. They have no idea how long they will have to wait—days, months, or years—before they will be allowed to emigrate. It is my hope that this vigil for freedom will result in early emigration to Israel for this family.●

ANALYSIS OF PROPOSAL BY MR. HOWARD JARVIS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MURTHA. Mr. Speaker, I believe each Member of the House recently received a Mailgram from Mr. Howard Jarvis of the American Tax Reduction Movement. I think it is important that the RECORD contain a summary of that proposal by the House Budget Committee.

Therefore, I would first like to insert part of the original telegram from Mr. Jarvis. Second, I will insert the analysis prepared by Chairman ROBERT GIAIMO:

JOHN MURTHA,
Johnstown, Pa.:

Recently I proposed the "Freedom for Taxpayers" national tax plan. I have promised the American people a detailed report on which candidates for the U.S. Senate and the House of Representatives support this tax and spending reduction plan. And I have promised meaningful support to candidates pledged to support this plan for the people.

The elements of the plan are:

1. 20% annual cut in Federal spending phased in over a four year period, ($25 billion per year equals 5% of yearly federal budget).

2. 10% annual cut in federal taxes phased in over a four year period.

(a) Reduction of income tax by 25%.

(b) Reduction of capital gains tax to 15%.

3. 2% reduction in the national debt each year.

4. Indexing.

WASHINGTON, D.C. *October 5, 1978.*

Hon. JOHN P. MURTHA,
U.S. House of Representatives, Cannon Office Building, Washington, D.C.

DEAR JOHN: This is in response to your request for an analysis of the Jarvis tax proposal. A detailed analysis of this plan is impossible due to the unclear and contradictory information provided by the Jarvis Mailgram. Adoption of the Jarvis proposal would commit the Nation's economic policy to four years of large but undesignated cuts in Federal services along with apparently substantial but unspecified cuts in personal taxes.

Similar to the Kemp-Roth 33 percent reduction in personal income taxes over a three-year period, the Jarvis plan appears to call for a reduction of income taxes by 40 percent over a four-year period regardless of subsequent economic conditions and activity. However, the wording of the proposal leaves the nature of this cut in doubt. For instance, Part 2 of the plan calls for a 10 percent annual cut in Federal taxes phased in over four years. If this means a total cut of 40 percent by 1982, revenues would fall by approximately $44 billion in 1979, and $51 billion in 1980 based on current estimates. However, Part (B) of this provision states that income taxes are to be reduced by 25 percent. If this means a 25 percent cut a year in individual income taxes, receipts would fall by approximately $48 billion in 1979, and $56 billion in 1980. A clear contradiction and lack of understanding exist in this ambiguous provision. Provision 2–B of the plan calls for a reduction of the capital gains rate to 15 percent—another cloudy statement raising such questions as these: Are all capital gains to be taxed at a statutory or effective rate of 15 percent, or are 15 percent of capital gains to be subject to ordinary tax rates? What is to be done regarding minimum and alternative taxes? Are corporate tax rates and provisions to remain unchanged?

Unlike Kemp-Roth, the Jarvis proposal also calls for a 20 percent annual cut in Federal spending phased in over the four year period, apparently as a 5 percent reduction per year. However, no mention is made as to where such enormous budget slashes are to come. And while a 5 percent reduction in Federal expenditures amounts to approximately a $25 billion cut in 1979 and $27 billion cut in 1980, the proposed tax cuts are substantially larger and thus the plan will plan inflation and increase the Federal deficit.

With respect to the third provision calling for a 2 percent reduction in the national debt each year, the other aspects of the plan appear to preclude this. A reduced national debt is the result of an improved overall economy where Federal tax surpluses make debt reductions feasible. The decreased receipts and resulting increased deficit of the first two provisions of the Jarvis plan make an annual debt reduction impossible.

The final element of the Jarvis plan calls for indexing to automatically adjust taxes for inflation. Such a policy accepts rather than tries to control inflation by institutionalizing and validating inflationary expectations.

The Jarvis "Freedom for Taxpayers" plan is an ambiguous and economically unsound proposal. I believe present Congressional legislation deals more effectively and realistically with tax reduction, both personal and corporate, and with spending limitations while continuing the fight against inflation.

Sincerely yours,

ROBERT N. GIAIMO,
Chairman.●

LEONARD SHANE, A TRUE HUMANITARIAN

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTERSON of California. Mr. Speaker, if ever there was a man deserving of recognition for his humanitarian activities, it is Mr. Leonard Shane.

Leonard Shane, who is the founder and board chairman of Mercury Savings & Loan Association of Orange County, Calif., will be honored on November 9 by the Orange County Chapter of the National Conference of Christians and Jews as "Humanitarian of the Year."

I am proud to say that Leonard Shane is a personal and good friend of mine and I congratulate him for this honor bestowed on him.

Leonard Shane has received nearly 200 awards for community service. He has served on the Los Angeles Parks and Recreation Commission, the Los Angeles Coliseum Commission, the Jewish Federation Council of Orange County, and on the United Jewish Welfare Fund of Orange County.

His concern for his fellow human beings is genuine and unselfish. His charitable trait is matched only by his acumen for business. As long as there is poverty and despair in the world, he will be in the forefront of the struggle to overcome them.

He is truly worthy of this honor given to him and I ask my colleagues to join me in recognizing Leonard Shane, a man whose concern and community involvement go far beyond what is reasonably asked or expected of anyone.●

ENVIRONMENTAL HEALTH PERSONNEL ACT OF 1978

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ROGERS. Mr. Speaker, I introduced on October 6, 1978, the Environmental Health Personnel Act of 1978.

This bill emanates from my concern about the status of the environmental and occupational health work force. Numerous studies have indicated that there is a possibility that there will be shortages in some professional disciplines, such as toxicology and epidemiology, and other critical environmental health disciplines. Next, in their efforts to execute environmental and health laws mandated by Congress, the Environmental Protection Agency, the Department of Health, Education, and Welfare, and the manpower assessment, projection, and development concerns to a rather low status. Further, executive budget constraints have had an adverse effect on the amount of dollars for prospective environmental health personnel. Budget constraints have also caused a reduction in in-house training efforts formerly offered by EPA for State and local environmental health personnel. Additionally, the public sector is often hard-pressed to attract and retain qualified environmental health technicians, researchers, administrators, and program designers. Finally, there has been relatively little interagency cooperation in regard to the assessment, projection, and development of environmental health personnel needs.

This bill would attempt to remedy the above problems. It would amend the Public Health Service Act to stimulate training in environmental and occupational health disciplines; it would focus, at the local level, on the relationship of environmental pollutants and disease; and it would assist in meeting manpower needs. The bill also would direct the Administrator of EPA to play a central role in analyzing and projecting environmental personnel needs within EPA and nationwide. The Administrator of EPA, the Secretary of HEW, and the Secretary of Labor would be required to consult with each other in the performance of their respective functions.

There is a considerable body of evidence to the effect that human illness can be abated to a significant degree by effective pollution control programs. It is essential that this Nation have an adequate supply of trained personnel to design and implement those programs. However, there is evidence that the supply of such personnel is insufficient and that the situation will get worse unless expeditious action is taken. I think this legislation will help accomplish this. I respectfully urge your consideration of this legislation and hope you will support it

when my successor reintroduces it next Congress:

H.R. 14264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) This Act may be cited as the "Environmental Health Personnel Act of 1978".

(b) The Congress finds that—

(1) an unfortunate by-product of this Nation's highly industrialized and technological society has been the generation of a wide variety of extremely potent and dangerous pollutants, many of which are released or escape into the environment;

(2) much human illness can be abated or prevented, at a substantial cost savings to the public and to the Government, by efficacious environmental health programs (including pollution control programs);

(3) in order to ensure the success of programs to eliminate or control environmental pollution, qualified, well-trained personnel are needed to participate in all aspects of the pollution control process, including health effects research, research in the environmental health sciences, and all other phases of the administration and implementation of pollution control programs, and

(4) recent studies indicate that existing health manpower programs are inadequate to solve or assess shortages of specialists in environmental health and that Federal and State efforts to determine and forecast environmental health personnel needs and to assist in the provision of such personnel must be substantially augmented.

SEC. 2. (a)(1) Subsections (a) and (b)(1) of section 792 of the Public Health Service Act are each amended by striking out "make grants" and inserting in lieu thereof "make grants and enter into contracts".

(2) Subsection (c) of such section is amended by striking out "grants under this section" and inserting in lieu thereof "grants and contracts under subsections (a) and (b)".

(b) Section 792 of such Act is amended by adding at the end the following:

"(d) The Secretary may make grants to and enter into contracts with public or nonprofit private educational entities (other than entities which may receive a grant or contract under subsection (a) or (b)) to assist them in meeting the costs of special projects to develop new programs or expand existing programs in environmental health and programs in occupational health. For the purpose of making payments under grants and contracts under this subsection there are authorized to be appropriated $2,000,000 for the fiscal year ending September 30, 1980.

"(e) The authority of the Secretary to enter into contracts under this section shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance by appropriation Acts.".

(c)(1) Section 749 of such Act is amended by adding at the end the folowing:

"(d)(1) The Secretary may make grants to public or nonprofit private educational entities (other than entities which may receive a grant under subsection (a)) to enable such entities to provide traineeships to train students enrolled in programs in environmental or occupational health which are offered by such entities.

"(2) No grant for traineeships may be made under paragraph (1) unless an application therefor has been submitted to, and approved by, the Secretary. Such application shall be in such form, be submitted in such manner, and contain such information, as the Secretary by regulation may prescribe. The amount of any such grant shall be determined by the Secretary.

"(3) Traineeships under a grant under paragraph (1) shall be awarded in accordance with such regulations as the Secretary shall prescribe. Such traineeships shall provide for tuition and fees and such stipends and allowances (including travel and subsistence expenses and dependency allowances) for the trainees as the Secretary may deem necessary.

"(4) In making grants under paragraph (1), the Secretary shall consult with the Administrator of the Environmental Protection Agency and other appropriate individuals respecting the environmental and occupational health services for which there are a need for trained personnel.

"(5) For payments under grants under paragraph (1), there are authorized to be appropriated $4,500,000 for the fiscal year ending September 30, 1980."

(2)(A) Paragraph (3) of section 748(b) of such Act is amended by striking out "individuals who" and all that follows in such paragraph and inserting in lieu thereof the following: "individuals who are pursuing a course of study in—

"(A) biostatistics or epidemiology,

"(B) health administration, health planning, or health policy analysis and planning,

"(C) environmental or occupational health,

"(D) dietetics or nutrition, or

"(E) preventive medicine or dentistry."

(B) Paragraph (3) of subsection (b) of section 749 of such Act is repealed.

(d) Subsection (e)(1) of section 788 of such Act is amended by adding at the end the following: "For the purpose of making payments under grants and contracts under subsection (d) for projects and programs in environmental health education (including faculty development and continuing education) there are authorized to be appropriated $4,000,000 for the fiscal year ending September 30, 1980.".

(e)(1) Clauses (i) and (iii) of section 472(a)(1)(A) of such Act are each amended by inserting after "biomedical and behavioral research" the following: "(including environmental health sciences research)."

(2) Section 472(a)(1)(A)(iii) of such Act is amended by inserting "the Environmental Protection Agency, the National Institute for Occupational Safety and Health, and other" before "public institutions."

(3) Paragraphs (1) and (2) of section 473(a) of such Act are each amended by inserting after "biomedical and behavioral research personnel" the following: "(including environmental health sciences research personnel)."

(4) Section 473(b)(3) of such Act is amended by inserting before the period the following: ", the Director of the National Institute of Environmental Health Sciences, the Director of the National Institute for Occupational Safety and Health, and the Administrator of the Environmental Protection Agency."

(5) Section 475(a) of such Act is amended (A) by striking out "and" after "Alcoholism,", (B) by inserting after "Drug Abuse," the following: "and the National Institute for Occupational Safety and Health and the Administrator of the Environmental Protection Agency, and (C) by inserting "(including environmental health sciences research)" in paragraphs (1) and (2) after "biomedical and behavioral research".

(f)(1) Section 1502(8) of such Act is amended (A) by striking out " and environmental factors" and inserting in lieu thereof ", occupational, and environmental factors", and (B) by inserting after "health" a comma and the following: "the development of environmental health personnel programs,".

(2) The first sentence of section 1513(b)(2)(B) of such Act is amended inserting after "unique needs" the following: "(including the prevention of diseases and other human conditions which may reasonably be anticipated to result from exposure in the health service area of the agency to contaminants and other health hazards in the environment)".

(3) Section 1524(b)(1) of such Act is amended by adding at the end the following:

"(E) Each SHCC shall have at least one representative who by training or experience is an expert in the field of environmental or occupational health."

SEC. 3. (a)(1) The Administrator of the Environmental Protection Agency (hereinafter in this section referred to as the "Administrator") shall, on an ongoing basis, assess, identify, and give advice with respect to current and projected personnel needs (including needs for education and training programs, continuing education, and retention of personnel) for the administration and implementation on a Federal, State, and local level of the environmental protection laws under the jurisdiction of the Administrator and for the administration and implementation of environmental protection programs of States and political subdivisions and to enable entities subject to such requirements to comply with them. In carrying out this paragraph the Administrator shall consult with—

(A) persons with expertise in the administration and implementation of such laws and in compliance with such laws,

(B) persons engaged in providing training for such administration, implementation, and compliance, and

(C) the Bureau of Labor Statistics of the Departmtnt of Labor, the Bureau of the Census, and other persons who can provide advice respecting the methodology to be used to determine the personnel needs described in the first sentence and to avoid duplication in the gathering of data to determine such needs.

For the purpose of advising the Administrator in the performance of his functions under this paragraph, the Administrator shall establish an advisory board. The advisory board shall be made up of persons engaged in the implementation or administration of programs administered by the Administrator, representatives from other Federal agencies engaged in pollution control activities, representatives from State and local pollution control agencies, representatives from industry, representatives from environmental interest groups, and such other persons as the Administrator determines are appropriate to advise him in carrying out such functions.

(2) Not later than one year after the date of the enactment of this Act and annually thereafter the Administrator shall report to the Congress the activities undertaken under paragraph (1), the findings made by the Administrator with respect to the personnel needs described in such paragraph, the costs of meeting such needs, the activities undertaken by the Administrator and others to meet such needs, the effects which would result if such needs are not met, and any recommendations for legislation which the Administrator determines is required to meet such needs. The report required by this paragraph may be included in the report required by subsection (h).

(b) The Administrator shall coordinate within the Environmental Protection Agency the development and implementation of policies, programs, and activities for personnel development, education, and training to meet the needs identified under paragraph (1) of subsection (a).

(c) The Administrator shall provide technical assistance to Federal entities, States, and political subdivisions of States to assist such entities in the development of programs to train personnel to meet personnel needs identified under paragraph (1) of subsection (a) and to retain personnel required to meet such needs. The Administrator may make grants to States and political subdivisions of States to assist them in the de-

velopment of such training programs. Such grants shall be made on such terms and conditions and in such amount as the Administrator prescribe.

(d) The Administrator shall assess—

(1) the needs of States and political subdivisions for personnel for the administration and implementation of environmental protection programs, and

(2) the effectiveness of the authority of the Administrator under subchapter VI of chapter 33 of title 5, United States Code, and other laws to assist the States and political subdivisions in meeting such needs, and the effectiveness of the implementation of such laws in assisting in meeting such needs.

The Administrator shall, within six months of the date of the enactment of this Act, complete such assessment and report the results of it to the Congress together with such recommendations for legislation as the Administrator deems appropriate. The Administrator shall take such administrative action as may be required as a result of the assessment.

(e) The Administrator shall consult with institutions of higher education, boards of education, and other educational entities respecting the education and training in environmental health sciences and related disciplines needed to provide sufficient personnel for the administration and implementation of Federal, State, and local environmental protection programs. The Administrator shall provide for information and counseling for individuals (1) respecting the availability of positions in environmental health sciences and related disciplines and the training required by such positions, (2) to encourage individuals to undertake such training, and (3) to encourage and assist individuals in advancement in careers in environmental health sciences and related disciplines. The Administrator shall provide, without charge, programs of continuing education and training for officers and employees of the Environmental Protection Agency and of agencies of States and political subdivisions engaged in the administration and implementation of environmental protection laws.

(f) The Administrator shall advise Federal, State, and local agencies involved in the administration of programs to train and employ unemployed persons respecting positions in the implementation of environmental protection programs in which such persons may be employed, shall encourage such agencies to train such persons for such positions, and shall provide, through interagency agreements or otherwise, for the training and employment of such persons in appropriate positions in programs administered by the Administrator.

(g) The Administrator shall exercise his education and training authorities under the Clean Air Act, the Toxic Substances Control Act, the Noise Control Act of 1972, title XIV of the Public Health Service Act, the Solid Waste Disposal Act, and the Federal Water Pollution Control Act to meet the personnel needs identified under subsection (a)(1). The Administrator shall, in consultation with the Secretary of Health, Education and Welfare, review and assess, on an ongoing basis, the educational programs administered by him. The Administrator shall include in the report required by subsection (h) any recommendations for legislation for the revision of such programs.

(h) Not later than one year after the date of enactment of this Act and annually thereafter the Administrator shall report to the Congress on the implementation of this section. Each such report shall include a comprehensive description of the activities undertaken pursuant to this section, an assessment of the effects such activities have on meeting the needs identified under subsection (a)(1), and recommendations for such legislation as the Administrator determines is required to improve his ability to meet such needs.

(i) For purposes of carrying out this section there are authorized to be appropriated $5,000,000 for the fiscal year ending September 30, 1980.

SEC. 4. The Secretary of Health, Education, and Welfare, in carrying out the provisions of the Public Health Service Act, as amended by section 2 of this Act and the Administrator, in carrying out section 3, shall consult respecting their activities and policies under such provisions and shall coordinate their activities to improve the effectiveness of the activities undertaken under such provisions, to avoid conflicts in the performance of such activities (especially activities involving grants and contracts for education and training), and to improve the Federal effort to provide personnel for environmental protection programs.●

U.S. BUSINESS: PARTNER IN APARTHEID

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RANGEL. Mr. Speaker, I would like to bring to the attention of my colleagues an article that appeared in a recent issue of Newsday. The author, a former Ambassador to Ghana, discusses the question of U.S. investment in South Africa and presents strong arguments for withdrawal of U.S. companies from South Africa. Clearly, regardless of one's position, this is an issue that the U.S. Government and Congress must address in assessing its relationship with South Africa. The article follows:

U.S. BUSINESS: PARTNER IN APARTHEID

(By Franklin H. Williams)

The most articulate social protest movement since the Vietnam War is accelerating from coast to coast—the drive to force American business out of South Africa. Discounted until recently by U.S. business leaders, it has gathered such momentum that Henry Ford II himself conducted a well-publicized "fact-finding mission" last January to his company's South African plants.

After due consideration, and a cordial luncheon with Prime Minister Vorster, Ford delivered his decision at a news conference: the company will remain in South Africa. He quickly added that, of course, Ford will follow enlightened labor guidelines which will serve, in effect, as a beacon in the surrounding darkness of apartheid. The South African press was jubilant. The next morning's edition of the Johannesburg Star carried the headline "Thank you, Mr. Ford!"

As Mr. Ford's exercise in public relations illustrates, the sybaritic of the straightforward "we do business in South Africa because it's profitable" are gone. An increasingly sophisticated counterattack on the disinvestment movement, backed with an almost unlimited supply of money from vested interest groups and the South African government, is being launched in the media. Most thoughtful people find the three main arguments of this campaign beguiling. Reasonable at first hearing, reassuring to an American public still recovering from the moral shock of Vietnam and Watergate, all there are seriously flawed.

1. Economic growth in South Africa, which depends heavily on foreign investment, will change conditions to the point where blacks will inevitably take their rightful place both economically and politically.

History shows otherwise. The astonishing growth of the South African economy during the past 20 years has done nothing to arrest the steady decline in black living conditions. Medical statistics suggest a social disaster. Tuberculoss, for example, a direct indicator of the standard of living, has reached epidemic proportions among blacks, while diseases of malnutrition such as pellagra and kwashiorkor, unknown prior to South Africa's recent boom, are on the rise. More than half the black children die before the age of 5.

Government per capita spending for black education (rarely available beyond elementary school and never free of charge) is below the 1950 level.

The University of Natal estimated early this year that 25 per cent of the economically active black population is now unemployed, rendering them "redundant" under South African law and subject to resettlement in one of the desolate "homelands." There is no national system of social welfare for blacks, and the population density in these barren areas is already three times as great as the areas set aside for whites.

Statistics are a game anyone can play. With billions at stake, entrenched interests in South Africa play it very well, suggesting that at least for a substantial portion of the black skilled population, wages have risen thanks to foreign investment. Fair analyses of statistics which take into account inflation, cost of living (although higher for blacks) and growth of population paint another picture entirely. During a period of particularly spectacular economic expansion, 1958–70, which saw a 400 per cent increase in South Africa's foreign reserves, economist John Sackur found that while white incomes more than doubled, incomes for blacks in white urban areas remained static. If the more than half the black population now living in the "homelands" is considered—mainly the "redundant" dependents—African real income actually dropped 30 per cent during this period.

Something is obviously very wrong in Paradise. There are two key reasons why blacks have not been swept upward along with whites on South Africa's rising economic tide. Stated simply, apartheid, widely considered a social system, is at its base an economic system, rooted in the exploitation of cheap black labor. A separate and unequal work force is germane to South Africa's prosperity. Second, most foreign investment is capital intensive, depending more on technology and equipment than on employing large numbers of unskilled black laborers in desperate need of training and jobs.

2. Social change is best accomplished from within the country. American companies operating there have a prime opportunity to set an example and, while doing so, improve the lives of thousands of blacks.

In visual terms, the entire South African society may be seen as a massive spider web, woven by whites for their own benefit and strengthened by foreign technology. All institutions are an intricate part of that structure by custom and law (enforced with such ferocity that one out of 95 South Africans is in jail). That is the macro-truth. The happy language of official U.S. policy instructing our companies to follow "enlightened employment practices within the laws of South Africa" may be a bit like telling the enmeshed fly how to dance.

Given all this, just how enlightened have our South African subsidiaries been, anyway? In actual practice, few made even a feeble stab at fair labor practices until 1977, when the disinvestment movement began to look serious. The Rev. Dr. Leon Sullivan, a member of the General Motors board of directors.

pronounced this overt collaboration with apartheid appalling. After 18 months of persuasion, and with the full blessing of the South African ambassador to the United States, 12 American companies agreed in March, 1977, to adhere to six principles that ease the companies toward racial equality. A miracle of compromise, the Sullivan code of conduct (now signed by 98 companies) stops short of the one factor that could actually make a difference to black workers—recognition of black labor unions.

The omission is significant. By leaving out the right to collective bargaining accorded to whites, the Sullivan code is as guilty as any creation of the South African government in insisting upon a solely white definition of fairness. White unions, unopposed, continue to reserve the best jobs and pay for themselves, earning five times the amount of blacks on the average. None of the other principles (except "integrated facilities") can be enforced effectively without this basic worker's right, and the code has been viewed as an exercise in tokenism by blacks and moderate South African whites—even the British foreign minister.

3. The Carter administration has pledged to support African solutions to African problems, and according to many American leaders—black and white—black South Africans don't want American business to withdraw.

Most South African blacks understandably feel cautious in the shadow of the noose, since South Africa dropped all pretense of free speech last October, when scores of journalists and leaders of all races were detained without trial and banned. It is also a matter of law that any South African advocating economic sanctions or foreign business withdrawal can be prosecuted and hung for economic sabotage under the Terrorism Act. Still, there have been several strong indications lately from such impeccable sources as our own ambassador to South Africa, William Bowdler, that soothing assumptions about black opinion are dangerously far from the truth.

In a "limited official use" cable to the State Department in March, 1977, Bowder said that black community and labor leaders "leaned toward withdrawal. Conceding that immediate consequences would be loss of U.S. market share to foreign or local competitors, main point, they claimed was one of morality." He concludes that the "role of American firms here will become increasingly controversial and rationale for continued presence will seem less and less persuasive to growing number of blacks."

The largest nationwide organization in South Africa corroborated the ambassador's analysis on July 12. In an announcement all but ignored by the American press, the 15 million-member multiracial South African Council of Churches adopted a lengthy policy statement which concluded in stronger terms than any legal body in South Africa has ever done, that "foreign investments and loans have largely been used to support the prevailing patterns of power and privilege in the country . . . We urgently call on foreign countries and organizations, for the sake of justice, to revise radically their investment policies . . . in regard to South Africa . . ."

Donald Woods, the noted white editor who dramatically escaped from South Africa late last year, dismisses the notion of foreign investors remaining in South Africa because they feel it is the "right" thing to do. "The argument that these investments benefit blacks by giving them employment is one that has been rejected by all—and I repeat all—the most widely respected and representative black leaders since 1962," he said in a recent article. An adamant admirer of the United States, Woods believes that "they are therefore turning increasingly anti-West and anti-American because of American and Western hesitance to take stronger steps against apartheid. By contrast, they point to the fact that Russia has no investments or diplomatic representatives in South Africa."

While we mouth the same dreary excuses for doing business as usual, the people of South Africa prepare for catastrophe. In accordance with a manual distributed to whites free of charge by a government civil defense agency, many white homes are fully stocked with emergency rations and guns. Their children attend the Youth Preparedness Program Summer camps to learn survival techniques and sharp-shooting. Surely, the party is over and the United States should go home before, once again, we are caught in a crossfire propping up the wrong partner.

THE VIETNAM–CAMBODIA CONFLICT

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WOLFF. Mr. Speaker, I rise today to call the attention of the House to the continuing conflict between Vietnam and Cambodia, to the threat it poses to regional stability in Southeast Asia, and to the fact that we, as Members of Congress, are again confronted with a situation in Indochina where we lack both reliable intelligence and critical analysis of current developments.

While our attention is presently focused elsewhere, on SALT, the Camp David accords and the Israeli-Egyptian negotiations for a treaty of peace, and particularly the tragedy unfolding in Lebanon, we must not overlook the fact that developments in Indochina have and will continue to affect U.S. interests in Southeast Asia.

At the same time, we should reflect on the fact that all too frequently our Asian policy has suffered from serious cultural misunderstandings and a decided lack of historical perspective.

In an attempt to remedy this situation and to provide the Congress and the American people with some historical perspective on and understanding of Vietnamese-Cambodian relations, the Subcommittee on Asian and Pacific Affairs commissioned and is publishing under its auspices a Library of Congress study entitled "The Vietnam-Cambodian Conflict."

Mr. Speaker, as chairman of the Subcommittee on Asian and Pacific Affairs, I am concerned lest the current conflict between Vietnam and Cambodia escalate and result in a destabilization of not only the Indochina peninsula but all of Southeast Asia to the detriment of American interests.

Strategically, Southeast Asia is a region of critical importance to the United States and its allies. The region is a vital source of raw materials for the free world. The Straits of Malacca provide access to the Indian Ocean for our 7th Fleet and link our ally Japan with the oil of the Middle East.

Commercially, our trade with Asia today exceeds our trade with Europe and, as the economies of the region continue to develop, our trade prospects can likewise be expected to increase. And, assuming a continuation of stability in the region, Southeast Asia promises to be a fertile field for American investment.

But we cannot assume that stability will continue. Given the PRC's support of Cambodia and Soviet backing for Vietnam, the region is faced with the possibility of superpower intervention and attendant destabilization.

Mr. Speaker, I cannot emphasize too strongly the need for reliable information and sound analysis of the present situation in Southeast Asia. For, without an adequate understanding of the Vietnam-Cambodia conflict, its present nature, and future potential, we, as Members of Congress, may find ourselves in a situation in which we are condemned to repeat the mistakes of the past.

The issuance of "The Vietnam-Cambodia Conflict" by the Subcommittee on Asian and Pacific Affairs is but a small step in the direction of increasing public awareness and understanding. Clearly, more remains to be done.●

VIGIL FOR FREEDOM

HON. CHARLES THONE

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. THONE. Mr. Speaker, the ongoing "vigil for freedom", cosponsored by Congressman BRODHEAD and the Union of Councils for Soviet Jewry, serves to remind us of the struggle facing Soviet Jews. This is an important reminder, for if we forget the plight of those people not as fortunate as ourselves, we may find our own freedoms gradually slipping away. By working to free these Soviets, through the vigil and within the guidelines of the Helsinki Final Act, we are working to preserve our own freedoms.

Amner Zavurov of Shakhrisyabs is one Soviet Jew caught in the struggle to survive while attempting to emigrate. Zavurov and his brother received permission for their families to emigrate in August, 1975. But, as their belongings were being processed by customs officials, permission was revoked and Amner's internal passport confiscated, making it impossible for him to work. The Soviets had created a catch-22 for Zavurov. Without the passport which they had taken from him he could not hold a job and was arrested for parasitism. Other charges included failure to have an internal passport and holliganism. After a trial, Soviet style, he was sentenced to 3 years in prison. His distraught wife attempted suicide and the family continues to wait.

Certainly, I hope the Soviet officials will awaken to the fact that they are among the signatory nations committed to the basic principles of human rights as outlined in the Helsinki Final Act. Perhaps such an awakening, in addition to our vigil for freedom, will result in early release of the Zavurovs and other families in similar situations.●

MANAGING DIRECTOR OF ECOWAS, DR. ROMEO HORTON, GIVES MAJOR ADDRESS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. STOKES. Mr. Speaker, I recently had the privilege to meet with Dr. A. Romeo Horton, a distinguished African leader and the managing director of the Economic Community of West African States (ECOWAS) Fund. The Economic Community of West African States was created in 1976 by 16 governments, both French and English speaking. The community has established a fund with an authorized capital of $500 million to be paid by participating states on agreed upon amounts. The purpose of the fund is to promote the economic and industrial development of the community. The fund may provide guarantees in respect of foreign investment and provide financing for and facilitate the financing of projects for ECOWAS.

Mr. Speaker, when ECOWAS was established, Dr. Aboubakar Diaby Quattara was named executive secretary and Dr. A. Romeo Horton was named as managing director of the fund.

Dr. Quattara, a graduate of the Ecole des Hautes Etudes Commerciales in Paris, holds a Master of Business Administration from Syracuse University in New York and a doctorate degree in business administration from Harvard University. He joined the International Bank of West Africa (BIAO) in 1965; and became its managing director and the first African senior executive a year later. He, along with several officials of the BIAO from Senegal, Mali, Cameroon and the Ivory Coast, found the African Center of Cultural and Technical Research (CARECT) of which he is still president.

Dr. Horton is a graduate of Morehouse College in Atlanta, Ga. and holds a master of business administration from the Wharton School of Finance and Commerce of the University of Pennsylvania. He was awarded the LL.D. degree from Morehouse.

He promoted the founding of the Bank of Liberia in 1953; and has served as its president since the bank's inception. He was Liberia's first assistant economic adviser to the president of Liberia, the first secretary of commerce, industry, and transportation, the first dean of the college of business and public administration of the University of Liberia.

He was chairman of the committee of nine African countries responsible for the negotiation, planning and drafting of the charter culminating in the establishment of the African Development Bank. He currently serves as chairman and/or member of the board of directors of several Liberian and foreign-based corporations; and just prior to his nomination to head the ECOWAS fund was executive secretary of the Liberia Direct Baptist Missionary Conference.

At the first meeting of the board of directors of the ECOWAS fund held in Lome, Togo, on July 27, 1977, Dr. Horton delivered a moving address in the final business of the meeting.

Mr. Speaker, at this time I ask that excerpts of this address be included in the RECORD as it provides an excellent insight into the desire by African leaders for cooperation and development of the economic community of these 16 countries.

The excerpts follow:

CLOSING REMARKS OF THE MANAGING DIRECTOR

Honourable Chairman, Directors and Alternates, my dear Colleague, Mr. Executive Secretary and Distinguished Delegates to this first Board of Directors' Meeting of the ECOWAS FUND, Distinguished Representatives of sister organizations, and other special Guests, Excellencies, Ladies and Gentlemen:

I come before you at this moment, filled with a sense of history in the making as together we stand at the threshold of launching what is today, despite the present attendant problems, the largest and most viable economic unit in West Africa.

The Economic Community of West African States, of which the Fund for Cooperation, Compensation and Development is perhaps the most vital and potentially productive and rewarding organ, now consists of 16 proud, sovereign and independent nations covering about 2,400,000 square miles, with a population of almost 130 million people and abundantly rich in human and natural resources.

In addition to the ever-increasing skilled labour population of the various member countries, the West African region can boast of large quantities of some of the world's most sought-after mineral and agricultural resources; from rubber and cocoa to bauxite and iron ore; from palm products and coffee to uranium and oil; from timber and cotton to gold and phosphate; from bananas and copra to chrome and copper; from abundant marine products and livestock to diamonds and marble; from groundnuts and citrus fruits to manganese and silica. These are but a few of the many resources with which Nature has endowed our region and together they can provide the sturdy launching pad for a formidable thrust into the outer reaches of economic self-sufficiency. The Fund has been set up to serve as the booster rocket in the pursuit of this goal.

The facts regarding the economic potential of this region, Mr. Chairman, Honorable Directors and my dear Colleagues, are clear, abundant and speak eloquently for themselves. They cannot be ignored or go unheeded any longer, nor can they be allowed to remain largely irrelevant to the development needs of our people. Indeed, I feel it is an unpardonable indictment against ourselves to have a region so rich and people so poor. "It is not in our stars but in ourselves that we are underlings." (William Shakespeare). "He who is behind in a race must remain behind or run faster than the man ahead". (B. E. Mays).

Our huge agricultural potential and our many feasible industrial possibilities combine with an increasingly strong network of viable private and public financial institutions, as well as our credibility on the international money market, provide a basis for a supra-national Financial Institution such as the ECOWAS Fund to undertake the speedy economic integration and progress of the Community.

No one needs remind you, however, Mr. Chairman and Honourable Directors, that weighed against these plus factors are the many adverse and anomalous conditions which, up to now, have frustrated our desires and short-circuited our efforts:

These conditions are both obvious and complex, but I stand before you today convinced that none of these are insurmountable. Let me, for the sake of the record, mention what some of these anomalies are:

1. While it is true that some of the countries in the region have fairly strong economies and most can even be said to have abundant wealth, only a very small percentage of the population has been brought into the money economy.

2. While the land area is vast and in many of the countries, the soil condition for agriculture production are good, there is still an enormous amount of foreign exchange being spent on import because of an acute food shortage in the Community.

3. Vast sums of money are being spent by member countries out of their development budgets to pay for experts from non-member countries, while there are hundreds, yea thousands of highly skilled and professionally qualified Community citizens, many of whom are, for various reasons, gainfully employed in developed countries who, in most cases, could do the same jobs as good or better.

4. Although we provide the rest of the industrial world with much of the raw materials that sustain their economies, our member countries are constantly told that our markets are too small for the production of finished goods and therefore, we have, up to this point in our history, remained in an uncomfortable, humiliating and restrictive recipient relationship with the so-called donor countries, condemned to producing and exporting all our valuable primary products and importing their finished products at exorbitant prices.

It is my conviction that the emergence of a true and just new economic order will not come about as the result of altruism on the part of the developed countries. It is unrealistic to believe that, just as it is unrealistic to believe that there can be any true equality between donor and recipient or that our political emancipation has any real substance without economic self-reliance through community co-operation and integration.

I believe, Mr. Chairman and Honourable Directors, that only through our own harmonious and concerted efforts, realizing that an inspired and motivated people are the single most essential catalyst for development, can we maximize the return benefits from our resources to our people. The Fund, in this instance, working in close cooperation and coordination with the Secretariat, with other institutions within and without our region, can play a major role in this process and under your particular direction, the Fund intends to fulfill this role.

Our task is difficult but not at all impossible. This I believe and I have a vision of the future in which it will be possible for a Government official or a businessman in one country to pick up his telephone and dial directly to his associate in any of the ECOWAS countries and in the rest of Africa and the world.

I have a vision in which a well-built network of trans-national and community highways will criss-cross the region and reliable electricity and potable water will flow into the homes, hotels and office buildings in every town and village.

My vision is of community-owned modern and efficient transportation, including ships, planes, buses and trucks safely and speedily ferrying passengers and community-produced goods easily from one country to another on schedule.

I also visualize the day when there will be a complete harmonization of tariffs, customs duties and the removal of other import restrictions and visas; when citizens of ECOWAS can cash cheques in a bank in one country and use the same money in all the other Member States, because we will then have a single, hard and readily convertible common currency.

Indeed, I envisage a functional West African Common Market, with an increased

population of over 150 million with huge agro industries and giant factories to supply the capital and consumer goods which we need to feed ourselves and export our finished products to the rest of the world.

I have a vision today that by the proper and maximum use of our human resources, through the expansion of modern health facilities and services; through sound and relevant education and technical training; through the creation of job opportunities in every country, we can perform a miracle and transform our region from its present state of subsistence economies into a vibrant and stable economic community. We are told by the Sacred Book that "where there is no vision the people perish".

This is my vision: to replace poverty with prosperity and under-development with technological and social advancement. My vision is based on the conviction and knowledge that the great men who conceived the idea and produced the reality of ECOWAS are true Africans who love their people and seek for them a new and better life. Those of us, therefore, whose challenging but exciting task it is to implement their mandates embedded in the Treaty and Protocols, must move ahead surely and with speed to accomplish the noble aims and objectives contained in those sacred documents to which we all have subscribed and are committed.

It has been said that in signing the Treaty and Protocols, the distinguished Members of the Authority have signed a blank cheque. If this is so, I regard it as a blank cheque to be filled in by men of competence, dedication, honour, integrity and vision, such as yourselves, who have the perspective and ability to plan and program, and the sincere determination to build a strong, viable and industralized Community, whose economic stability will ensure the peace and progress of the region.

In short, Mr. Chairman and Honourable Directors, you have given us the tools and now we must do the job.

After due contemplation, deliberation and consensus, we can now go bravely forward, putting the dark past behind us, knowing that our cause is noble; that our goals are realistic; that our purpose is defined; and our unity strong so that together we can, once and forever, break the shackles which have too long held us bound in economic enslavement and allow our people to stand tall and walk with dignity into the beautiful and brilliant sunshine of progress and prosperity.●

TRIBUTE TO BOB SIKES

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. ROYBAL. Mr. Speaker, it is a pleasure to join with my colleagues today in paying tribute to Congressman BOB SIKES who is retiring at the end of the 95th Congress. As third ranking Member of the House of Representatives, BOB has played an important role in shaping several decades of our Nation's legislative history.

Elected in 1940, Congressman SIKES also has the distinction of serving in Congress longer than any Representative or Senator from the State of Florida. In addition to his longevity of service, BOB must be recognized for his outstanding efforts on behalf of the First District of Florida and for his dedicated service to the people of America.

It is a personal pleasure to have worked with BOB as a colleague in the House, and more specifically as fellow members of the House Appropriations Committee. I want to take this opportunity to wish this fine Congressman a long and enjoyable retirement filled with good health and happiness.●

NUCLEAR PROBLEMS ABOUND IN NORTHWEST

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BONKER. Mr. Speaker, nuclear energy is no bargain in the Pacific Northwest. The price tag for five nuclear powerplants now under construction in Washington State has soared from $4.5 billion to about $8.5 billion, and work schedules have slipped a total of 11 years. This situation is the responsibility of the Washington public power supply system.

Unfortunately, a recent series of articles in the Seattle Post-Intelligencer offers few assurances that the situation is going to improve. The Justice Department, the Interior Department and the Bonneville Power Administration have all investigated the supply system's performance. Incomplete records, sloppy accounting procedures, inadequate employe training and poor audit trails are among the findings.

Although the supply system was established to serve the construction needs of local public utilities in the Northwest, the electricity that these five projects are supposed to produce will serve several States via the Federal transmission system of the Bonneville Power Administration. Mistakes and mismanagement will thus prove costly to a region much larger than any one locality.

The newspaper articles are reprinted below:

COSTS SOAR AND WORK LAGS AT FIVE NUCLEAR PLANTS

(By Dan Seligman)

Total delays of more than 11 years and cost increases of about $4.5 billion have been encountered by the public agency that is building five nuclear power plants in the state.

The cost of completing the plants has doubled, and they are now among the most expensive nuclear projects under construction in the nation, public documents show.

Federal auditors have examined the rising costs at one plant. They have found incomplete records and sloppy accounting procedures. In a preliminary report issued two years ago, the Bonneville Power Administration concluded, "although we did not find any direct evidence of fraud or collusion, the complete lack of control procedures provided ample opportunity for such acts to occur."

Subsequent reports by BPA and others have made similar criticisms, though BPA officials told The Seattle Post-Intelligencer the costs may be coming under control, slowly.

The precise impact of the increased costs and delays on Pacific Northwest electric rates is still not known. But electric bills for residences and businesses in the state are expected to go up steadily to help pay for the plants.

Utility customers in Snohomish County, for example, may be faced with increases in their residential bills of 50 percent within the next two or three years.

The nuclear plants—two at Satsop in Grays Harbor County, southwest of Olympia, and three at Hanford in Eastern Washington—are being built by the Washington Public Power Supply System.

The Supply System is the construction arm for 22 of the state's publicly-owned utilities. Its members include Seattle City Light, the Tacoma Department of Public Utilities and the Snohomish County Public Utility District.

The Supply System can sell electricity to any utility inside or out of the state, and dozens of utilities from the entire Pacific Northwest have purchased shares in one or more of the nuclear plants. Among the utilities with a financial stake in the Supply System's projects are Puget Power and the Washington Water Power Co., which serves Spokane.

Officials of the Supply System said they are doing a good job at completing one of the most ambitious construction programs ever undertaken in the state.

"Show me somebody who is doing better," John Goldsbury, president of the Supply System's board of directors said. "On the national average, we sit right in the middle."

Neil Strand, Supply System managing director, said the increased costs are due primarily to inflation, changing licensing and safety requirements, the rising costs of nuclear fuel and other factors for which the Supply System cannot be blamed.

He said the Supply System's costs are not out-of-line with nuclear construction costs elsewhere in the country. "We are dedicated to controlling these costs to the extent possible," Strand recently told his board of directors in a prepared statement.

Supply System records show the total amount of money needed to complete the five plants has gone from about $4 billion to about $8.5 billion.

Each of the plants has been delayed by more than two years and the projects are now scheduled to begin operating between 1980 and 1985, one plant each year.

Supply System officials acknowledge that the most frequent sources of delay in the nuclear industry, environmental lawsuits and financing troubles, have not caused the schedules of the Supply System projects to slip.

Instead, they said their plants have been subjected to other problems, including a labor strike that slowed work on one plant for about 10 months.

Supply System reports show that:

Project 1 at Hanford has increased from $633 million to $1.6 billion.

Project 2 at Hanford has increased from $394 million to $1.4 billion.

Project 3 at Satsop has increased from $756 million to $1.5 billion.

Project 4 at Hanford has increased from $1 billion to $1.9 billion.

Project 5 at Satsop has increased from $1.2 billion to $2.1 billion.

Most of the original estimates were made after the contracts for the reactor and other key equipment were signed, but shortly before excavation or plant construction began. The estimates included money for escalation and contingencies.

According to the U.S. Department of Energy, which monitors construction costs in the nuclear industry, the Supply System is now building plants that are more expensive than most other plants of comparable size under construction in the country.

The Supply System's costs are between 30 and 50 percent higher than the national average for plants due to begin operating in the 1980's, the "U.S. Central Station" report for June shows.

In some cases, the disparity in costs between the Supply System and other utilities appears to be even greater.

The Tennessee Valley Authority, Duke Power Co. of North Carolina, and Commonwealth Edison Co. of Illinois all have nuclear power plants under construction at half the announced cost of the Supply System's projects, according to data from those utilities.

Supply System officials said they can explain the difference between their agency's costs and those of other utilities.

L. S. Sandin, manager of project planning and measurements, said the Supply System discloses its true costs of construction sooner than many other utilities because the Supply System is a public agency. He said other utilities, many of them privately-owned corporations, use different accounting methods and therefore can defer costs so they will not show up until years later.

In addition, Sandlin said, there are certain advantages for a utility like the Tennessee Valley Authority. It builds plants in a region where there is a cheap labor market.

TVA also hires its own engineers and construction workers while the Supply System is forced to hire private companies to perform similar duties, Sandlin said. Those and other advantages give TVA a $300 million edge over the Supply System for each plant.

Another Supply System official, Jerry Read, said the Department of Energy does not take into consideration certain unique expenses the Supply System is forced to pay. He cited the high sales tax as an example, though he acknowledged that if the Supply System built plants in a state with a sales tax half that of Washington, the cost differences would be only a small proportion of the total Supply System costs.

Supply System officials said they have to contend with the cumulative disadvantages of building plants in this region. The costs of the projects do not reflect adversely on the competence of the agency, they said.

Project 2 at Hanford, however, has been the subject of a U.S. Department of Justice investigation and three other federal reports, all conducted between October 1976 and April of this year.

The Justice Department investigation was initiated after a former Supply System employee, T. S. Soundarajan, made public allegations about collusion in the estimating process of construction work at Project 2.

The Justice Department found no evidence of collusion and concluded that no criminal wrongdoing had occurred.

The Bonneville Power Administration then conducted a preliminary investigation of its own.

A subsequent report, prepared by the Interior Department's Office of Audit and Investigation, found that the Supply System was still not doing a good job of controlling costs and keeping complete records of how it spent public funds.

A third report, this one released by BPA in April, again criticized the Supply System and its architect-engineer, Burns and Roe Inc., for similar reasons.

The audit said that records of "change orders" continued to be kept inadequately. A change order is a written request from the Supply System to a contractor for more work.

The change orders under question were the responsibility of both the Supply System and Burns and Roe Inc., the audit said, though neither the agency nor the company could fully justify some of the money spent.

More than 2,600 change orders worth about $200 million have now been processed by the Supply System for Project 2.

"The audit trail is incomplete," the BPA audit said. "(The trail) does not substantiate that the propriety of change order processes has been maintained. The incomplete audit trail is caused by a lack of coordination and control of the change order process, inadequate procedures, non-performance of required work procedures and a lack of employee experience and training."

Since the audit was made public, the Supply System has reformed its own procedures for handling change orders, officials of the Supply System said.

Thomas Wagenhoffer, special assistant to BPA administrator Sterling Munro, said BPA has increased its "oversight" of the Supply System as a result of the investigations and reports.

Through a series of accounting agreements, BPA has agreed to purchase the electricity from three of the Supply System's plants, including Project 2.

Wagenhoffer said he has seen major improvements in recent months in the way the Supply System is supervising construction of its nuclear plants. Many of the problems at Project 2 appear to have been resolved, he said.

But BPA continues to have an active interest in making sure the Supply System stays on its present timetable and within its current budget, Wagenhoffer said.

A Close Look at Hanford Project Two Problems

(By Dan Seligman)

Seattle City Light is among those Pacific Northwest utilities with a financial stake in a nuclear power plant that has more than tripled in cost from $394 million to about $1.4 billion.

But under a complex series of accounting agreements, city consumers will not bear the full brunt of those rising costs.

Instead, the costs of producing electricity from the nuclear plant will be mixed with low-cost electricity from federal dams on the Columbia River and sold back to Seattle and other utilities at less than one-third the cost of generating electricity from the nuclear plant.

Work on the plant—Project 2, at Hanford—has been hampered by a series of construction problems, including a dispute with a major contractor, the discovery of cracked welds and other defects in the reactor building, a lengthy labor strike and an investigation by federal authorities into forged inspection reports.

The plant is now more than three years behind schedule. It is due to begin operating in late 1980.

As The Post-Intelligencer reported yesterday, federal auditors have examined the plants' records and found that the owner, the Washington Public Power Supply System, and its chief architect-engineer, Burns and Roe Inc., could not justify fully some of their expenses.

The plant is one of five nuclear project being built by the Supply System, which is the construction arm for the state's publicly owned utilities. Seattle City Light is a member of the Supply System and Gordon Vickery, City Light superintendent, sits on its board of directors.

Vickery has hired a special consultant to advise him of construction problems at Project 2 and to report on the status of Projects 1 and 3, two other nuclear power plants being built by the Supply System in which Seattle has an interest.

The consultant, Walt Yatch, works out of Hanford and keeps Vickery informed of the progress at each plant, Deputy Supt. Joe P. Recchi said.

Recchi said Vickery is "concerned" about the delays and cost increases of the three plants.

The public records show that the cost increases and delays have been more severe at Project 2 than at the other two plants.

The records show that:

Work on the project was halted during part of a four-month pipefitters' strike in 1976. The strike had a "drastic effect" on the cost of the plant, Supply System reports state.

Progress at the plant was slowed down for months after the strike was settled because many of the original workers had taken jobs elsewhere. New employees had to be hired and trained, and the overall impact of the strike was to slow down work at Project 2 for about 10 months, a Supply System spokesman said.

The main contractor at the plant was forced off the job by the Supply System in January 1976 because the company allegedly failed to do the work in the proper amount of time.

The contractor, Bovee-Crail Construction Co. of Paramount, Calif., had been working on Project 2 for about three years.

Bovee-Crail Co. subsequently filed a $24.5 million suit against the Supply System, charging it with unfair termination of the contract.

The nuclear power plant was so poorly designed, the firm's lawyers said, that Bovee-Crail could not do the work as directed.

The Supply System has contested the allegations and filed a $25 million claim of its own against the company.

Both claims are still pending in U.S. District Court in Spokane.

Cracks in the welds inside the nuclear power plant containment were found in October 1977. A British welding expert, was brought in to review the problem and corrections were completed in March.

Other problems in the containment have also been discovered and about $13 million has now been spent to fix those problems.

Forged inspection reports were discovered in February by the Supply System. They were reported to the U.S. Nuclear Regulatory Commission, which then ordered the Supply System to stop work on a portion of the plant while it investigated the falsifications.

The NRC issued a report in May that said the forgeries were made by "lower echelon" employees in an attempt to duplicate lost records.

The forgeries, the NRC said, were limited in number and did not appear to be as serious as first indicated. There was no intention the part of the employees to defraud the Supply System, the report said.

The "stop work order" was removed seven days after the forgeries first were reported.

Those problems, Supply System officials said, have all slowed down construction at the site and increased the costs of completing the 1,100 megawatt project.

Neil Strand, managing director of the Supply System, said his agency originally adopted a schedule that was too optimistic. When the Supply System received its construction permit in 1973, it planned to build the plant in four years, one of the fastest timetables ever attempted in the nuclear industry.

Other utilities in the nation adopted similar timetables and they have fallen behind their previous estimates, too, Strand and other Supply System officials said.

Seattle City Light and the other utilities with a share of Project 2 have assigned their interest in the plant to the Bonneville Power Administration, the agency that sells electricity from 29 federally owned dams on the Columbia River and its tributaries. Originally, Seattle had a seven percent share of the plant.

BPA will "mix" the costs of the nuclear plant with the overall costs of operating the federal hydro system. It will then sell electricity back to the region's utilities at the new, averaged rate.

As a result, Seattle no longer has a specific, "identifiable" share of Project 2, Recchi, the deputy superintendent, said.

Recchi said Project 2, as well as Project 1 at Hanford and Project 3 at Satsop in which Seattle has a financial stake, are now considered "regional resources."

BPA will also mix the costs of those plants with the federal hydro resource, Recchi said.

Recchi said the city still has a financial

interest in seeing that the three plants start generating electricity as soon as possible.

The Seattle City Council decided not to participate in two other Supply System nuclear plants, Project 4 at Hanford and Project 5 at Satsop.

Neither of those plants is being built with assistance from the Bonneville Power Administration. Utilities that purchase shares of the plants cannot assign them to BPA, though they have signed agreements instead with the region's aluminum companies.

The agreements allow the Supply System to sell surplus power to the companies.

FIVE NUKE PLANTS CARRY OUT MISSION—AT A PRICE

(By Dan Seligman)

When the Washington Public Power Supply System was set up in 1957, it had a mission: to provide electricity for its member public utilities.

The Supply System is now building five nuclear power plants in the state. It is carrying out its mission.

But public records obtained by The Post-Intelligencer shows:

The cost of completing the five plants has increased from about $4 billion to about $8.5 billion.

The plants have been delayed a total of more than 11 years.

The plants are now among the most expensive nuclear projects under construction in the nation.

Officials of the Supply System said they are building nuclear power plants because the region needs the energy, the best sites for dams already have been used, and conservation will not reduce substantially the public's demand for more energy, they said.

Nuclear power, they said, is the best option for the Pacific Northwest.

"We're building nuclear power plants because they are economical," Neil Strand, the Supply System's managing director, said.

When the plants begin operating in the 1980s, the Supply System will have the capacity to generate more than 6 million kilowatts of electricity, equivalent to half the entire capacity of the federal dams on the Columbia River.

Supply System officials said they believe the electricity will be used by the region's consumers. (The Supply System, a public agency, has the legal power to sell electicity to any public or private utility, inside or out of the state.)

"The expectation of a continued, rapid expansion of the region's economy is very reasonable," the Supply System's annual report states.

"A vital key to this expansion is a continuing, reliable source of energy. The Supply System, with its strong base—is moving ahead to match the expected energy demand."

Supply System officials said they are not committed to building only nuclear power plants. When solar energy becomes feasible, the Supply System will consider building solar plants, they said.

The Supply System's headquarters are in Richland, south of the Hanford Reservation where the Supply System is building three plants. The other two plants are at Satsop, southwest of Olympia.

The Supply System also owns and operates a small, hydro-electric project at Packwood Lake in the Cascade Mountains and the Hanford Generating Project, a set of steam turbines attached to a military reactor at Hanford.

The Packwood Lake project was completed in 1964 and the Hanford Generating Project in 1966. Those two projects are the Supply System's only completed facilities.

For almost 20 years, the Supply System attempted to get permission from the Federal government to build a dam on the Snake River in Hells Canyon, Idaho. But when Congress passed the Hells Canyon National Recreation Act of 1975, dams on that portion of the river were prohibited.

The Supply System, unlike most other government agencies, has no taxing power. It gets its money to build the plants by selling revenue bonds.

Every four months, the Supply System borrows between $150 and $200 million from banks, insurance companies and other investors.

The money to pay the interest and principal back to the bond holder comes from the revenue paid to the Supply System by the utilities that have agreed to use the energy. The utilities get from their customers the money to pay the Supply System.

The Supply System has gone into debt by several billion dollars and will go into debt even further to pay for the costs of the nuclear plants. The debts eventually will be paid off by the region's consumers.

There is no legal limit to the amount of money the Supply System can borrow, James D. Perko, assistant director of finance said. Only financing power is limited by what the bond market will bear and by the needs of the region.

The region's needs are growing rapidly and even more plants will be needed to avoid shortages by the late 1980s or early 1990s, Hank Kosmata, Supply System manager of planning and analysis said.

"I was at the groundbreaking ceremony for Bonneville Dam in 1934," Ed Fischer, a Clark County PUD commissioner said.

"Critics said there was enough surplus power to electrify every jackrabbit west of the Continental Divide. Now, on a cold winter day in December, our total demand (in Clark County) is greater than the output of Bonneville Dam."

Fischer said predicting energy demand in the 1980s is like shooting at a "moving target."

But he said that any surpluses from the nuclear power plants could be sold off to other utilities in the area, or to the region's aluminum companies. "If we need it, we'll use it, otherwise we'll assign it to someone else," Fischer said.

The major technical and policy decisions of the Supply System are made by a board of directors, composed of 22 officials, one from each of the member utilities.

Nineteen of the utilities are public utility districts within the state. The three remaining members—the cities of Seattle, Tacoma and Richard—all have their own electrical utility department.

For the PUD commissioners, serving on the Supply System's board of directors is sometimes their third job. John Goldsbury, for example, the board of director's current president, owns and manages a store, Morrison Refrigeration and Heating Inc., in Pasco. He also serves as one of the elected commissioners for the Benton County PUD.

The board meets four times a year. In between the quarterly meetings, an executive committee, which includes Gordon Vickery, Seattle City Light superintendent, takes responsibility for managing the Supply System's business.

Minutes of the board and the executive committee show that most of the resolution involving finances and timetables for the nuclear power plants are passed with little or no recorded discussion, and almost no dissent.

Goldsbury acknowledged that the minutes "aren't that thorough." He said a secretary takes shorthand of the meetings but they are not typed up for the public to read. The result is that the records of the Supply System meetings are "extremely condensed" and "only highlights" are recorded, he said.

The structure of the Supply System works well because it has attracted people with a "sincere interest" in the energy field, Goldsbury said.

"Some people used to say, "that old bunch of farmers will never build a nuke."

"But there are good businessmen on the board and we make good, sound business decisions."

When the Supply System opened its first office in Kennewick, it had a staff of only a few people.

The staff expanded as the construction program grew, and the Supply System now has about 1,300 employees.

The Supply System is presently studying the possibility of building two coal or nuclear plants in Lewis County, southeast of Tacoma, but a final decision has not been made, a spokesman for the Supply System said.●

CLAWS OF THE BEAR

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GOODLING. Mr. Speaker, I should like to bring to my colleagues' attention a recent article which appeared in the Wall Street Journal, September 8, 1978. This article examines Soviet involvement in the recent coups in Afghanistan and South Yemen and concludes that the United States, unlike other Mid East nations, has failed to draw the proper conclusions from these events.

Our attention has lately been focused on the Middle East peace settlement and the successes at Camp David. There are, however, events in that region of the world that, despite every exertion of will by Sadat, Begin, and Carter, could turn a Mid East peace to ashes in our mouth.

While it is generally believed that the Soviet Union has lost ground in the Middle East in the last years, the article below gives us reason to reconsider this assessment, due to the recent coups in South Yemen and Afghanistan.

Short of having the Politburo itself on hand, it is difficult to imagine a more obvious Communist presence than what we find in South Yemen during the coup. The Soviets were there training the Army—perhaps even flying aircraft against the government, the Cubans were there as fighter pilots, and the East Germans were there creating the South Yemen version of the KGB. The establishment of a hard line pro-Soviet regime in South Yemen, which is located at a crucial choke point in strategic sea lanes, should be cause for alarm within the administration, but we have not heard a peep from them.

In Afghanistan the Soviet connection is more tenuous, but the results no less ominous or threatening to peace than in South Yemen. The Soviet's now have a client state in Afghanistan and the Pakistanis and Iranians dread what the future may hold with such a nation at their borders. But again what do we hear from the administration, but the muddled and confused prose of a State Department so proud of their "tough" stand on human rights, and yet so quiet when it comes to the death of nations.

The fact is that now Afghanistan and South Yemen post a threat to regional

peace. Begin and Sadat know this, but the message seems to have been lost on the United States.

The article follows:

THE CLAWS OF THE BEAR

Six years ago, when a Third World ruler became disenchanted with his Russian advisers, he threw them out. Now, if he becomes disenchanted, the Russians throw him out. This, starkly stated, is the pattern of increasing Russian boldness throughout the globe.

When President Anwar Sadat of Egypt expelled his Russian advisers in 1972, they left quietly, and the example may have reassured many Third World leaders that it was safe to accept Russian help. But in 1978, it seems, the Russian bear isn't so easily kicked out of the house.

In South Yemen, where the Arabian Peninsula meets the Indian Ocean, a militant Marxist regime has been taking Russian advice on building the revolution for about a decade. But its president, Salim Ruba'i Ali, grew frustrated with the resulting economic stagnation and sought a rapprochement with Saudi Arabia and the United States. In June, just one day before the scheduled arrival of some American diplomats, Ruba'i's left-wing enemies staged a bloody coup.

Well-placed pro-American sources in North Yemen are convinced that during the fighting the South Yemeni air force pilots were locked in, and Russian pilots flew the bombing and strafing missions on the presidential palace that sealed the coup. Washington can't confirm or refute this report, but one official wonders why the Russians would take such a risk. Such direct involvement would be a change from their previous habits.

But the prize is substantial. South Yemen overlooks the main oil shipping routes south from the Persian Gulf. Its island of Socotra in the Arabian Sea may in fact be the site of a new Soviet surveillance and communications installation. And South Yemen's new rulers are now more dependent than ever on the Russians who train the army, the Cubans who train the militia and, most sinister of all, the East Germans who train the secret police.

These reports grow more ominous when compared with the late April coup in Afghanistan. Afghan President Mohammed Daoud had seemed pro-Russian when he came to power in 1973, overthrowing his brother-in-law, the king. But he had become alarmed by the growing power of local Communist factions and was beginning to round them up when the coup came. The balance was tipped by an air force attack on the presidential palace. The precision of the bombing led some diplomats to speculate that the pilots must have been Russian, not Afghan, but the State Department dismisses the rumor as the product of a "colonialist mentality."

With or without direct involvement, however, the Russians have greatly benefited. Since the coup, the new rulers in Kabul have signed more than 25 economic and technical agreements with Moscow. Russian advisers make a sizable presence in government ministries and the military. The Chinese claim the Soviets have shipped in 100 T-62 tanks; some observers think the Chinese are too jumpy, but agree new equipment is flowing in.

The regime still faces tribal unrest, but for the moment the Russians seem to have won the "Great Game" for influence in Afghanistan that was once played by the Czars and the British crown. Nervous Iranians and Pakistanis fear renewed Soviet pressure in its historic southward drive to warm water. And Afghanistan's neighbors marvel at American tranquility.

The State Department has steadfastly refused to join Iranian, Indian and Pakistani officials in labeling the new government as Communist. But Afghan official statements echo the Moscow line; a diplomat at a recent "nonaligned" conference said of the Afghan foreign minister, "He sounds like a Bulgarian." The State Department's immediate concern is to avoid triggering a statutory cutoff of aid, which would deprive it of remaining leverage in the country. But a more serious malaise is at work.

Official Washington is refusing to admit how alarming the picture truly is. The Russians may succeed in intimidating a region far more strategic than Africa. More ominous than the possibility that Soviet pilots flew missions in the South Yemen coup is the fact that South Yemen's neighbors believe that they did. The impression is spreading that, as one French intelligence source put it in Afghanistan, "The Soviets are able to get away with practically anything these days."

Regardless of the merits of the quiet game, the administration is letting far too much go by default. At the very least, it should be making propaganda about the dangers of Russian aid. Any Third World leader who is flirting with the Soviets should be reminded of the fate of Salim Ruba'i Ali and Mohammed Daoud. Our failure to make the point suggests a failure of national will, and it is just that condition that makes the Russians so bold in the first place.●

FEDERAL HEALTH PROMOTION AND DISEASE PREVENTION ACT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PURSELL. Mr. Speaker, if one judges the investments by the returns they bring, the American health care industry is becoming progressively less cost-effective. Therefore, today I am introducing legislation which will not only make health care more cost-effective, but will make health care itself more effective.

In short, I am proposing that this country take a new approach toward health—to emphasize prevention, not treatment of disease. We literally can not afford to continue to wait until we are ill to care about our health. We must take steps to insure that Americans know how to prevent illness—and then actually prevent it. But only through a national commitment can we hope to accomplish this goal.

The "Federal Health Promotion and Disease Prevention Act" which I am introducing today is a first step toward achieving this goal. This legislation is a 3-year authorizing bill designed to establish a Federal program for health promotion and disease prevention, that is, preventive medicine. Four major initiatives in health promotion and disease prevention are established in this bill. First, eight regional health promotion centers are set up throughout the country—two each in the north, south, east, and west—serving both urban and rural areas. Second, a system of research, development and demonstration grants is established. Third, a special initiative for elementary and secondary school children through the use of health promotion demonstration projects has been designed. Finally, a grant system for health promotion manpower development and training is established.

Each of these four initiatives is vital to the development of preventive medicine. We need centers to emphasize the importance of prevention and to disseminate information to the public. Visible centers will assist Americans in realizing the importance of and understanding the unique nature of preventive medicine. Research and development are sorely lacking in the area of preventive medicine and so we must have a greater thrust in this direction to develop new techniques in this area of health care. Likewise, manpower is also lacking in this area. Without the necessary personnel, preventive medicine will never take hold in the health industry. Finally, but perhaps most importantly, we must insure that our youth are brought up knowing the vital importance of preventive medicine. It is very difficult to change one's basic health habits in mid-life. But if our children are taught early on, preventive medicine will become their health habit.

Medical advancements have been great in the past few decades—we have learned to save babies so they can grow into adulthood, but now we must learn to insure the health of those adults. I believe the tide is turning in favor of preventive medicine in this country—that we are ready for this type of legislation. Quite frankly, without it, we will see nothing but spiraling health care costs and continued unchecked, but preventable, illness.

Preventive medicine is not the complete answer. However, prevention can help control and cure illness and disease; and by preventing disease we can certainly keep down the cost of health care. This is an important fact of health which we cannot ignore.

Therefore, I hope my colleagues will join me in this commitment to health promotion and disease prevention. It is a commitment to better health and lower health care costs. Without a commitment, we will be failing all Americans.●

MORE PROBLEMS WITH IMPORTED STEEL

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MURTHA. Mr. Speaker, it has come to my attention that another case has occurred where foreign steel is being shipped into the United States in a situation that is hurting our industry, economy, and workers. It also represents another example of why we need to tighten the buy American law.

The case involves the Defense Department. I understand the Department purchased 3,000 tons of steel plates from Canada for a Green Bay shipbuilder constructing a naval vessel. Moreover, these shipments came into the United States without any duty under a section of the law that allows the Defense Department to make such purchases for their construction projects.

Thus, we have another case where U.S. tax dollars went to subsidize the purchase of foreign steel. Had the duty been

required it is very likely the steel would have been purchased from a domestic steel company.

This is another example of why we need to tighten the buy American law and why we need to make certain U.S. tax dollars are going to support the United States and not being used to help jobs in foreign countries rather than in the United States.●

INDEPENDENCE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, the price of independence is not small. Fortunately, neither are the benefits. Our ancestors sacrificed many lives and many comforts so that generations after them could live out their years in a free, unfettered society. Julie Jenks, of St. John Fisher School in Palos Verdes, Calif., has written an insightful essay bringing this to our attention. It is a piece from which we can all benefit by reading.

I am very proud to represent the Jenks family. America is very lucky to have future leaders of Julie's ability ready to take the reins.

The essay follows:

AN INDEPENDENT AMERICA

The Declaration of Independence sets forth in clear and forceful terms the desire of a people to govern themselves rather than be governed by a privileged class. Have you ever wondered about the courage and bravery of those men who sacrificed their lives, fortunes and sacred honor to the cause of independence and liberty for each individual when they signed this document?

What kind of men were these ancestors of yours and mine? Some were merchants and farmers, and almost half of them belonged to the law profession. Nine of the fifty-six signers fought and died during the Revolutionary War, five were captured by the British as traitors and twelve had their homes ransacked and burned. These men risked their security because they valued liberty more. They developed the resourcefulness and wisdom to solve the problem of organizing a nation in the midst of war and crisis.

This new weak nation wisely maintained a neutral foreign policy under George Washington. But as the country grew stronger, this policy of steering clear of foreign alliances was modified. A "learning" nation participated in the War of 1812 followed by an "era of good feeling" during the presidency of the author of the Monroe Doctrine, a document which guaranteed independent nations of the Western Hemisphere against European interference. We also participated in other wars, some of which could possibly have been prevented. Our ancestors who sacrificed their lives to insure our liberty could have been saved if the United States had followed George Washington's Farewell Address when he said to steer clear of permanent alliances and had obeyed his neutrality proclamation.

The Americans of the Revolutionary generation proved themselves the most creative statesmen in modern history . . . perhaps in all history. They established institutions that have had a more lasting influence than any established anywhere else—and we've been living on this "foundation" ever since.

And, as Ralph Waldo Emerson said: "Every man is a bundle of his ancestors."●

CREDIT CARDS: WHEN SHOPPING AROUND PAYS

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ANNUNZIO. Mr. Speaker, during the credit card blitz of the 1960's, a favorite subject of cartoonists was the American consumer buying everything imaginable with a little piece of plastic. But yesterday's satire of a plastic society is today's reality. Credit cards are no longer a novelty, they are an ingrained part of American life.

At the end of last year there were 563.7 million credit cards in circulation. And the credit card industry is expected to grow much larger as we approach the next decade. According to the Nielson Report, a news and advisory service for credit card executives, the number of credit cards is expected to reach 700 million by 1983. And the majority of that growth is expected to occur in the field of national bank cards, such as Visa and Master Charge.

Unfortunately, the development of the credit card society has often outpaced consumer awareness of the most effective ways to use this credit. Many consumers wrongly assume that all Master Charge or Visa accounts operate under the same policies, regardless of where the card is issued. The truth is that many very important considerations for consumers, such as the finance charge on credit cards and the method used to compute that charge, vary not only from State to State but from financial institution to institution.

The fruits of the credit card business are plentiful to banks issuing the cards. Banks make money on credit cards by charging interest on balances, usually 18 percent, and by paying back merchants less than the amount charged, thereby making money on both ends of the transaction.

The law allows banks to charge an annual percentage rate of 18 percent interest on credit card accounts, or 1½ percent interest a month. However, some State laws only allow banks to charge 12 percent interest and some banks voluntarily offer lower rates. So, the consumer's first step in shopping for the best credit card is to check the annual percentage rate.

The second step is to then check the method by which the interest, or finance charge, is computed. There are three accepted methods of computing the finance charge on credit cards: The daily balance method, the adjusted balance method, and the previous balance method. Which method is used to compute a finance charge can have a substantial effect on how much the consumer ultimately pays for use of the credit card.

The switch to computerized banking has caused more and more institutions to use the daily balance method. With this method, the finance charge is determined by the balance owed during the period, divided by the number of days in the billing period. Simplified, if a $500 purchase is made and a payment of $450 is credited to the account on the 20th day of the billing period, the finance charge is then based on a debt of $500 for the first 20 days and a debt of $50 for the remaining days in the billing period. A computer is used to keep the account updated continuously.

With the adjusted balance method, the finance charge is figured on the unpaid balance at the end of the billing period. With this system, payments made late in the period have the same effect of payments made early in the billing period. This method is the most advantageous to consumers because the finance charge is only computed once, at the end of the billing period, and it is computed only on the outstanding balance.

The previous balance method is the least advantageous method to consumers because the finance charge is computed on the amount owed at the final date of the previous month. In other words, it does not matter when payments are made or how often these payments are made for if the full amount of a credit purchase is not paid off before the end of the billing period, finance charges are assessed on the full amount of the original purchase.

As chairman of the Subcommittee on Consumer Affairs, I am always keenly interested in advancing consumer education in the field of consumer credit. For this reason, I was happy to see an article in yesterday's Washington Post which touches on the pitfalls of credit cards and details what to look for in shopping for a credit card.

I would like to submit the entire article into the RECORD at this time.

CREDIT CARDS: WHEN SHOPPING AROUND PAYS

(By Robert Krughoff)

Most persons assume a Visa card is a Visa Card is a Visa card, and that all Master Charge cards are alike. In fact, there are big differences.

Suppose you and your friend have Visa cards and you go to the same bank to take out $2,000 cash advance loans with your cards. Suppose, too, that you both pay off your loans after exactly a month. The finance charge for you might be $60 while your friend's finance charge might be $20.

Or take a similar, though less dramatic, situation—this time involving use of the Visa cards for retail purchases rather than cash advance loans. Suppose you and your friend have been carrying $1,000 card balances and each of you makes retail purchases totaling $500 on the 10th of the month. Your finance charges at the end of the month might be $10 higher than your friend's.

Who pays more depends on which bank "issued" the card. There are about 20 Washington area banks issuing Visa cards, Master Charge cards or both. Each bank is free to set its own interest rates and other terms within certain limits set by law, and the bank that takes the entire loss if you fail to pay off your balance.

These banks simply affiliate with one or both of the national interchange systems—Visa (formerly BankAmericard) and Master Charge (the Interbank System)—for paper-handling convenience. In the past, many banks had their own cards with their own names. The Bank of Virginia Charge Plan is a surviving example. But customers who had these cards could not use them with merchants in other parts of the country. To solve this problem, since the mid-1960s most banks have affiliated with Visa or Master Charge.

If you make a purchase in a distant city, the merchant can cash in your sales slip with an interchange-affiliated bank in that city, and that bank, in turn, can collect from your bank. In becoming a member of one of the interchange systems, a bank simply agrees to handle sales slips in this way and to follow a common card format. The major differences among cards affiliated with the same system have to do with:

Interest rate. On balances resulting from cash advance loans, some banks charge 12 percent while others charge 18 percent. On balances resulting from retail purchases, Virginia banks charge 18 percent regardless of balance size, while Maryland banks are limited by law to 12 percent on the portion of a balance above $500. Because the District's legal interest rate ceiling is 11.5 percent, none of the District banks has considered it profitable to issue its own card.

Method of computing interest. No bank charges interest on a balance resulting from retail purchases paid off in full within 25 days of the first billing. But if you carry a balance from month to month, some banks will start charging interest on each new purchase as soon as you make it, while others will give you a free ride until you get your first bill reflecting the new purchase. Similar variations affect cash advance loans.

Transaction charges. On a cash advance loan, some Virginia banks charge as much as 2 percent of the amount of the loan at the time of the loan on top of the interest charge. As a result, for the first month of such a loan, you pay the equivalent of a 36 percent annual interest rate. But none of the Maryland banks imposes these transaction charges, and not all of the Virginia banks have them either.

To get the best of these various terms, you have to shop. Start by calling various banks and asking for truth-in-lending disclosure statements. These statements should enable you to make comparisons. Be warned that some are hopelessly obscure, but some are actually intelligible. If you cannot figure out what one says, you can check with bank personnel. But, again, don't count on a lucid explanation. You may get conflicting statements from different persons. Finally, if you cannot get clear answers from a particular bank, you can drop that bank from consideration.

In shopping, be aware that every bank giving out applications is not an independent "issuing" bank. Some simply serve as agents for others. For instance, the National Bank of Fairfax is a Master Charge agent for Bank of Virginia. But by trying several banks you can be sure to get a few that are unaffiliated.

Do not confine your shopping to the jurisdiction you live in. Some of the best terms for retail purchase credit are available on cards issued by Equitable Trust and Suburban Trust in Maryland. Anyone from the District or Virginia can apply.

Also, consider getting different cards for different purposes. For large retail purchase balances, the terms of United Virginia's Visa card are not as favorable as those of a Visa card from Equitable Trust. But for a cash advance loan, the United Virginia card offers a 12 percent interest rate, compared to the 18 percent rate Equitable Trust charges most customers (except customers with credit limits exceeding $3,500).

Before settling on one or more bank cards, you may want to consider two other alternatives: the independent cards and the "travel and entertainment" cards.

The terms of the independent cards, Central Charge and NAC, are roughly competitive with the terms of many of the bank cards, and some individua's whose credit histories do not qualify them for the bank cards find the independent cards easier to get. But these cards, which are not affiliated with banks or with national interchange systems, cannot be used to get cash advance loans and do not enjoy nationwide acceptance for retail purchases.

The "travel and entertainment" cards—American Express, Carte Blanche, and Diners Club—differ from the bank-issued cards in two important respects: They charge customers an annual fee—currently $20 to $30, depending on the card—and they expect you to pay off your balance from most types of purchases right away, preferably within 25 days of billing. In addition, the travel and entertainment cards have traditionally been limited in the types of purchases for which they are accepted. But they are now expanding into many new retail outlets, from auto repair shops to clothing stores.

American Express has a special arrangement with some banks to market what it calls its "Gold Card," which is directly competitive with Visa and Master Charge cards. You can use the Gold Card to get cash advance loans, and you also can use it to extend the due date for payment of a retail purchase balance. If you do not wish to pay off a retail purchase balance within 25 days, you notify the American Express Company and it will tell the bank that arranged your Gold Card that it is to give you an automatic loan to pay off the American Express balance. From that point on, your obligation is to the bank, just as it would be with a Visa or Master Charge card.

At several local banks, this Gold Card system is a particularly attractive arrangement. For instance, at Riggs Bank and Union First Bank in the District, you pay only 11.5 percent on balances that originate through use of a Gold Card. This compares very favorably to the 18 percent interest rate most common on Visa and Master Charge retail purchase balances.

One final tip: If you run up a substantial retail purchase balance on a bank card and you cannot pay it off right away, consider getting the needed funds through a regular installment loan from a bank or credit union. You may be able to get an installment loan at 11.5 percent or better—a considerable savings compared to the 18 percent you pay at many banks to carry a credit card balance.

PAUL ROGERS

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. IRELAND. Mr. Speaker, as you know our good friend PAUL ROGERS has decided to leave the Congress after 24 years of distinguished service.

During those 24 years PAUL has earned the reputation as one of the most effective Members of the House, and the respect and admiration of all who have worked with him.

In all that he does, PAUL ROGERS conducts himself with a certain dignity and a special grace which sets him apart from most.

In short Mr. Speaker, PAUL ROGERS is a special person, and we in Florida, and all of those across this land concerned about health care, will miss him greatly.

I know that you join me, Mr. Speaker, in wishing PAUL all the best when he leaves Congress, and in the hope that his time spent outside this body will be as rewarding and productive for him as his time here was for all of us.

Thank you Mr. Speaker.●

IF EVER THERE WAS AN OPPORTUNITY

HON. GENE TAYLOR

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. TAYLOR. Mr. Speaker, Alan A. Reich, chairman, Paraplegia Cure Research, recently addressed the Fourth Wakeman Award Banquet held at the Duke University Medical Center, in Durham, N.C.

Mr. Reich had some important and most interesting comments to make relative to the progress made in the rehabilitation of paraplegics. I would like to share his remarks with my colleagues at this point in the RECORD:

IF EVER THERE WAS AN OPPORTUNITY

Prior to World War II, there were few paraplegics. They simply did not survive. Medical science and the commitment of numerous dedicated people (including many here tonight) have made it possible for paraplegics to live and accommodate to wheelchair living. Rehabiliation has facilitated an increasingly normal existence and opportunity for personal fulfillment. In the United States more than in any other country, there has been a climate of encouragement for this process. In March of 1970, the year the word "impossible" was redefined by landing a man on the Moon, at a conference sponsored by the National Paraplegia Foundation in Palm Beach, Florida, scientists overturned the old dogma that central nervous system regeneration was impossible. For the first time a group of neuroscientists declared, "the problem should no longer be considered hopeless; it is amenable to solution through basic research." This validation challenged the world's scientists and strengthened the hope of paraplegics.

At that time too Mrs. Gardiner established the Wakeman Award in memory of her paraplegic husband to stimulate central nervous system regeneration research aimed at curing paraplegics. Have her generosity and foresight brought results? The answer is a resounding yes! While we may not be able to make specific connections, I believe it is reasonable to attribute much of the progress to the momentum generated by the Wakeman Award process. That progress includes:

In 1970 only a handful of scientific articles was published on central nervous system regeneration. Last year there were over 400. Many more investigators throughout the world are now working on the problem.

Government funding by the National Institute of Neurological and Communicative Disorders and Stroke and by the Veterans Administration of regeneration research has increased from about two hundred thousand dollars in 1970 to about five million dollars last year. Both agencies have sponsored conferences.

The National Paraplegia Foundation has held four international conferences on CNS Regeneration. Its new research division has published bibliographies and has initiated an exciting fellowship program.

The Paralyzed Veterans of America has created a new research foundation which has funded close to a quarter of a million dollars of CNS research.

Several universities have started up regeneration research programs and laboratories.

Six annual congressional luncheon reviews, hosted by Congressmen Orval Hansen and Bill Frenzel, have been held in The Capitol in Washington.

The Government's Neurologic Institute sponsored an 18-month task force study by

eminent neuro-scientists who concluded "the field is ripe for a push."

The day after the last Wakeman Award banquet two years ago, a group of paraplegics and their families founded Paraplegia Cure Research, an advocacy group, with headquarters in Washington. Its Bermuda Conference and dynamic program have a momentum of their own. PCR fosters research, promotes public and private support, and generates a sense of urgency and purpose.

Very significantly, the Wakeman Award process itself, under the able direction of Dr. Molly Brazier and Dr. Stanley Appel, has stimulated fruitful meetings and exchanges of ideas.

Tomorrow's Wakeman Neurobiology Conference here at Duke Medical Center attests to this university's ongoing commitment.

I could go on, but most importantly, underlying this activity, there is solid scientific accomplishment toward Mrs. Gardiner's and our goal of liberating paraplegics from their wheelchairs through regeneration research.

Because, according to scientists, the research effort required will take time, we must have a long-range perspective. As one paraplegic said to me, "If we work on the problem, I may get out of my wheelchair. If we don't, I won't."

It will take understanding and commitment on the part of paraplegics as well as scientists. No longer can we allow the fear of raising false expectations to be an excuse for inaction. Paraplegics are realists, but they hope for and desire continuing commitment to the job at hand. The time is past when paraplegics inquiring about cure-oriented research can be put off by learned descriptions of paraplegia research in general. Paraplegics deserve in return for their patience, persistence and support of science straight answers clearly distinguishing these areas of research from that aimed at a cure eventually liberating them from their wheelchairs. Paraplegics are less interested in research per se than in the very human results of research.

One must appreciate that scientists require freedom of inquiry so essential to the free flow and development of ideas; only in such an environment will basic science flourish. The scientists I have known in this enterprise are compassionate and also are motivated by a desire to improve the condition of their fellow man. We must recognize the complexity of this area of science. A scientist easily could spend his entire life on this problem without finding the answer. There must be understanding on both sides; paraplegics must respect the scientific approach, while scientists must appreciate the urgency felt by paraplegics. There must be continuing, purposeful, and realistic dialogue between the two communities.

The basic research effort must go on in parallel with other research whose purpose is better accommodation to wheelchair living. It is not a matter of one or the other; both are necessary. All the research on better facilities, devices, rehabilitation and surgical techniques, epidemiology, etc. is important; in fact it is vital and should be encouraged and expanded. It is not unlike working on improvements to the iron lung while developing the Salk Vaccine.

People ask how we can afford such a dual approach. My reply is how can we not afford it? The 1975 Regeneration Task Force report I mentioned estimated annual world-wide savings from a CNS research breakthrough might approximate $20 billion. In addition to the 150,000 American paraplegics and their counterparts throughout the world, scientists point to large numbers of sufferers of other neurological disorders who would benefit from such a breakthrough. They include many forms of stroke, focal epilepsy, chronic multiple sclerosis, cerebral palsy, and mental retardation. While the economic savings would be enormous, the potential savings in human suffering are incalculable. In view of this potential payoff, the current $5 million annual CNS regeneration research commitment of the U.S. Government is woefully inadequate!

As we recognize Dr. Hamburger and Dr. Weiss, two giants of neuroscience, we look back in awe at their enormous accomplishments. It is also fitting on this occasion to look forward, as our collective business remains unfinished. To help bring it to the ultimate conclusion we all seek, I urge the following ten-point program:

"10-POINT PROGRAM FOR ACTION"

1. Form a strategy council of leading scientists from appropriate disciplines to monitor and guide the worldwide effort in regeneration research.

2. Bring about Presidential leadership of a major, coordinated "push" for regeneration to eventually cure millions.

3. Increase U.S. Government regeneration research support to $20 million annually.

4. Review regularly, formally, and critically the recommendations of the U.S. Government's 1975 task force which dealt with "high priority research areas," "training," "centers of excellence," and "planning and coordination."

5. Increase the awareness and support of the U.S. Congress and the American public.

6. Strengthen the commitment of concerned U.S. and international voluntary health organizations to advance regeneration research in a coordinated manner.

7. Increase the support of foundations, corporations, and other private sector groups having coincidence of interest and untapped potential.

8. Establish a private sector fund to take advantage of research "targets of opportunity" promptly as they may arise.

9. Institutionalize, for as long as necessary, the Wakeman Award and associated activities at Duke University; increase its visibility substantially; and orient it to ensure recognition of recent scientific contribution toward the donor's stated purpose of "liberating paraplegics from their wheelchairs through central nervous system regeneration research."

10. Review and publicize progress on this program on an annual basis until the solution is found.

I hope all of you here this evening will do all you can to further this noble effort. Thank you again Mrs. Gardiner and Duke University for leading the way. If ever there was an opportunity to alleviate human suffering, this is it.●

RESOLUTION ON LEBANON

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. O'BRIEN. Mr. Speaker, the tragic events in Lebanon have not received the proper attention nor the understanding from the administration. That country is near the point of destruction. The Christian populace in Lebanon continues to suffer from the growing military aggression by Syrian troops which is threatening to break the fragile Middle East peace.

I wish to call the attention of the Members to a resolution which was recently adopted by the National Republican Heritage Groups (Nationalities) Council, and to which I fully subscribe:

RESOLUTION

The National Republican Heritage Groups (Nationalities) Council, at its fall Executive Board meeting held September 30, 1978 in Washington, D.C., hereby makes the following recommendation:

Whereas, Lebanon is continuing to suffer daily assaults in the loss of life and limb to innocent civilians by the indiscriminate shelling and bombings being conducted by the Syrian peace-keeping troops in Lebanon;

Whereas, such conduct by the Syrians upon civilian targets is both reprehensible and in flagrant violation of the rights of those civilians;

Therefore, the Natonal Republican Heritage Groups (Nationalities) Council urgently demands:

(1) That President Carter immediately intercede with the Syrians to halt the shelling and bloodshed being inflicted upon the innocent civilians in Lebanon;

(2) That President Carter demand the immediate removal of the Syrian troops from Lebanon and their replacement with the United Nations peace keeping troops;

(3) That additional humanitarian aid by the United States be rendered to Lebanon to assist the victims of the present conflict.

October 2, 1978.

MITCHELL P. KOBELINSKI,
Chairman.●

FREEDOM AND RESPONSIBILITY

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SEBELIUS. Mr. Speaker, western Kansas is traditionally known for being one of the largest wheat producing areas in the country, the home of an independent and strong people, clear air, and small towns. What is not always recognized about this part of Kansas and the United States is that it is also the home of the finest small universities in the country, Fort Hays State University.

Dr. John Garwood, professor of economics and dean of instruction at Fort Hays is widely recognized for his writings on economics, business, and education. During his three decades at the school he has counseled thousands of students. Dr. Garwood has drawn on his experiences as a teacher, counselor, and scholar to bring our Nation and its people a message of hope and direction in his book, "Back to Basics." Because Dr. Garwood's book embodies what I believe to be some of the most basic values held by the American people, I would like to share just a small part of Dr. Garwood's thoughts on the future of our Nation and what we must do to hold on to the freedoms we all enjoy.

"Freedom and Responsibility" from the book, "Back to Basics," by Dr. John Garwood:

FREEDOM AND RESPONSIBILITY

If nations, institutions and individuals want freedom, then they have a moral obligation to assume responsibility for the use of it. Freedom without responsibility is always accompanied by actions which impinge upon some other individual's freedom. Self-discipline is a necessary ingredient if there is to be freedom.

After capturing Babylon in 585 B.C. Cyrus, King of Persia, reminded his followers to be alert at all times. He said: "To have been once brave men is not sufficient; it is harder to hold what you have gained than to gain it."

Our behavior, individually and collectively, is governed by what we believe to be true,

that is, true about good and evil, where we establish our priorities, how we perceive the future as related to the present and finally how well we have learned the lessons from the past. What is true sometimes is difficult to determine and if determined, slow to be accepted.

In accepting the Nobel Prize for literature Alexander Solzhenitsyn warned the West with these words:

"The timid civilized world has found nothing with which to oppose the onslaught of a sudden revival of barefaced barbarity, other than concessions and smiles. The spirit of Munich is a sickness of the will of successful people; it is the daily condition of those who have given themselves up to the thirst of the prosperity at any price to material well-being as the chief goal of earthly existence. Such people—and these are many in today's world—elect passively and retreat . . . just so as to not step over the threshold of hardship today—and tomorrow. You'll see, it will be all right. (But it will never be all right. The price of cowardice will only be evil . . .)"

We can't turn back the clock on technological change which has made possible our more than trillion-dollar GNP, which in turn has led to change in all areas of our lives. We can however, purposefully modify levels of permissiveness, our concepts of excellence and ordering of priorities. The traditional American values of work, thrift, belief in country, integrity, public decency, and faith in God are needed even more with the rapid rate of change. These values are not transitory which are shed in the name of progress and "doing our thing." These are values which historically have characterized great nations. No nation, no institution, no individual ever achieved greatness by emphasizing leisure and forsaking discipline of purpose.

If the president of the U.S., a senator, a businessman, or a staff member of a university has his or her integrity questioned, this one factor overwhelms everything else that person might be, or try to do. A credibility gap in integrity is a thousand times easier to create than to bridge. Chappaquiddick is a case in point.

A French taxi driver once played a joke on Sir Arthur Conan Doyle. Sir Arthur had been driven from the railroad station to his hotel. When the driver received his fare he said, "Meric, Sir Arthur Conan Doyle."

"How did you know my name?" asked Sir Arthur.

"Sir, I saw in the papers that you were leaving the South of France for Paris. Your hair has been cut by a barber of Southern France.

"This is indeed remarkable. Did you have any other evidence?"

"The underside of the right sleeve of your coat appears to be shiny and worn as though it had been moved in writing, while the elbow of the left sleeve appears to be worn as though from leaning on it."

"Go on man," urged Sir Arthur, delighted at a man so perceptive. "What else did you see?"

"Well," said the driver, "there was also the fact that your name was on the luggage."

You and I write our name in indelible ink on our luggage by the lives we lead.●

INFLATION

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

Mr. JACOBS. Mr. Speaker, no quorum at Ways and Means today. The Honorable KEN HOLLAND sums it up, to wit:

On Friday the 13th I went to the forum and tried to help AL get a quorum. The issue we lost was hospital cost, and the consuming sick folks died of boredom.

Oh well, so much for the fight against inflation.

THE VOLUNTEER FORCE IS WORKING

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. STEIGER. Mr. Speaker, the Washington Post recently ran an article by Warren Rogers that did a disservice to our men and women in uniform. The piece suggested that the volunteer Army is in trouble; it made some sweeping, critical statements that simply were not accurate.

Because of my concern over the amount of misinformation that sometimes becomes accepted as fact simply because it was printed, and reprinted, in the newspaper, I have prepared a response to the Rogers article. As I noted in my rebuttal, he was dead wrong on some of his assertions and was misleading in use of some statistics.

It is important that the record be set straight. Those who were concerned about the picture painted in the Rogers article can take heart when looking at the true picture. I hope that those who care about the calibre of our Nation's defense force will not be misled by sensationalist pieces, but will rather seek out the truth about the quality of the all-volunteer army.

My response follows:

TAKING EXCEPTION: THE VOLUNTEER FORCE IS WORKING

(By Representative WILLIAM A. STEIGER)

It must be that the press abhors the doldrums of summer. Whyever else would a number of horror stories keep reappearing during these slow, warm days. The return of Bigfoot, the latest sighting of the Abominable Snowman, or a retrospective on the Johnstown flood provide the standard fare. Another bogeyman that periodically materializes is the Need-to-Return-to-the-Draft.

When conscription ended five years ago, stories appeared almost immediately predicting the imminent Return of the Draft. Despite continued improvements in military manpower programs ever since, these stories reappear every so often, albeit with decreasing frequency. The usual tack of such stories is to begin by noting an adverse trend, and conclude that the Return of the Draft is just around the corner.

Like the latest sighting of Bigfoot, such stories have an ephemeral impact. Apparently they are so lightly regarded by editors of the Post that little effort is made to check the veracity of their contents. I can think of no other explanation for the Post's publication of the fanciful statements in Warren Rogers' piece, 'The All Volunteer Army's Bleak Future" (Outlook, August 6).

In prophesizing The Return of the Draft, Rogers first points to the "high rates of desertion" in the Army and the other three services." He simply did not do his homework. The rate of absences in the Army has dropped dramatically subsequent to the end of the draft, from 52 desertions per 1,000 in the last year of the draft to 13.1 in 1977. With the exception of the Navy, the same is true for the other services.

Rogers also focuses on the question of enlistment standards. Enlistment standards are now higher than they were during the periods of the draft; he may not like to admit it, but the services are actually rejecting young men who would have been taken into service during the draft era.

He makes much of the contention that "too many CAT IV's, individuals in the group with the lowest acceptable test scores, are coming into the services . . ." Rogers is entitled to his opinion as to how many, but the plain fact is that the number of CAT IV's entering the services has been reduced dramatically since the end of the draft. For all services, the percentage of accessions in Category IV dropped from 14.5% in 1964 and 14.1% in 1973 to 5.3% in 1977; for the Army, the figures are 19.9% in 1969, 17.3% in 1973 and 9.2% in 1977.

Such misuse of statistics to demonstrate the "bleak future" of the volunteeer force is inexcusable and far below the standard one would expect in the "Outlook" section. It is equivalent to proving the existence of Bigfoot by quoting an eyewitness account from an eccentric high on LSD.

No one would contend that the military is without manpower problems. The question is whether a return to the draft would produce a better solution than continued reform of manpower policies. As Rogers notes, attrition must be brought under better control. Yet the AVF outperforms the draft—the average tour length actually served in 1964 for all services was 37 months, while this has been increased in the volunteer era to 43 months. New management techniques, dismissed by Rogers with no analysis whatsoever, will do more for decreasing attrition than return to the high turnover policies fostered by the draft.

Rogers is almost correct when he writes: "In the event of a national emergency, a draft law would have to be enacted to provide the legal authority for calling up the people needed . . ." In fact, the draft law remains on the books (hint: it is in the Appendix to Title 50 of the United States Code, just where it has always been). The only aspect of the law that requires congressional action is the induction authority. An important lesson from the Vietnam era is that the power to activate the induction authority should reside with Congress, not the President—unless, of course, Rogers favors unrestricted executive authority to commit this nation to military adventures overseas.

Recruiting, training, and managing an active force of 2 million persons and reserve force of one million is an enormous task. By and large, that challenge has been met. The Army has increased its combat strength from 13 to 16 divisions. The services have achieved nearly all of their enlistment goals for most reporting periods. Almost every disciplinary trend is favorable. Costs have been brought under control to such a degree that a return to the draft would generate little, if any, savings. While Reserve and Guard recruiting presents a continuing challenge, these units have gained an enormous number of accessions without cost-effective enlistment incentives. Recent congressional action to provide such incentives should lead to an improvement in the picture for these forces.

Rogers wisely concludes that a return to selective service would be unfair and national service would be too costly. He recommends a "modest" draft call of 2,000 per month, a number clearly picked out of a hat with no relationship to recruiting experience or manpower requirements. With 4 million young men and women turning age 19 each year, only a minuscule fraction would be called. Such a draft call would reduce the incentive that now exists within the Pentagon to overcome resistence to manpower reform and would prove highly inequitable for the few who were called. Unless we return to

the poverty-level recruit wages of the draft era—a prospect not seriously suggested even by proponents of the draft—the Rogers proposal would greatly raise manpower costs by restoring the expensive Selective Service bureaucracy and increasing attrition in the services.

Rogers article is about as convincing as the last story I read on Bigfoot—which may explain why it appeared on a dreary Sunday in August. My only question for the Post is why did you put this piece of fluff in the news-oriented section of "Outlook" when it clearly belonged next to one of your humorous pieces in "Style"?●

OHIO AGRICULTURE DIRECTOR QUESTIONS CFA SURVEY

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

○ Mr. ASHBROOK. Mr. Speaker, the Department of Agriculture's award of a $23,500 grant to the Consumer Federation of America has come under a great deal of public scrutiny. This grant, which is to study proposed changes in net weight regulations, was made by the Department's Food Safety and Quality Service under the direction of Assistant Secretary of Agriculture Carol Tucker Foreman. Mrs. Foreman, of course, served as executive director of the Consumer Federation before assuming her current position in Government.

Questions surrounding the grant include whether the award indicates a conflict-of-interest on Mrs. Foreman's part in view of the apparent favoritism shown to the Consumer Federation of America in the bidding process. Also at issue is whether CFA should have been disqualified from receiving the grant because that organization had previously taken a public stand on the question to be surveyed.

Now a further question has been raised, this time by John M. Stackhouse, director of the Ohio Department of Agriculture. Confronted with what he considers a totally unrealistic CFA testing program, Mr. Stackhouse has advised the Consumer Federation that the Ohio Department of Agriculture will not take part in the survey.

Mr. Stackhouse's response to the Consumer Federation's research coordinator offers one more example of why this grant should be canceled immediately and a thorough, independent investigation should be undertaken to determine the circumstances under which CFA received the grant. According to Mr. Stackhouse, it is virtually impossible for the States to complete the work CFA wants in an accurate fashion in the timeframe allowed.

In his letter to the CFA's research coordinator advising CFA that Ohio would not take part in the CFA survey, Mr. Stackhouse says:

In order for your survey results to be included in a valid recommendation or study, the answers obtained from the various states must be accurate. In order to meet the requirement of accuracy, the amount of time allotted is simply insufficient.

Ms. Foreman has said that one reason for awarding the contract to CFA was its ability to conduct the study within the timeframe required. But, we see now why CFA was able to conduct its "study" within a restrictive timeframe: evidently, the deal was for the State officials to do the work for CFA—I might add, at additional cost to the taxpayers in the form of State government salaries.

Another question is raised in my mind. For what is Carol Foreman paying CFA $23,500? Questionnaires? And, is CFA really qualified to conduct this study in view of its apparent ignorance of the complexity of the question? I again call for an independent investigation of this matter and cancellation of the study contract.

At this point I am including the full text of Mr. Stackhouse's response to the Consumer Federation of America's research coordinator:

OHIO DEPARTMENT OF AGRICULTURE
Columbus, Ohio, August 15, 1978.

Re: Net Weight, Proposal Survey.

Miss CATHY PERLMUTTER,
Research Coordinator,
Consumer Federation of America,
Washington, D.C.

DEAR MISS PERLMUTTER: In response to your request that the various state officials responsible for implementing the Weights and Measures regulations of the state complete the attached survey, please be advised that the Ohio Department of Agriculture will not take part in the survey. The information solicitated by your survey requires extensive testing on the part of the state, testing which could not possibly be completed within the two weeks allotted for the completion of this survey. In order to provide valid answers to the questions, the Ohio Department of Agriculture would need to conduct special tests utilizing two different methods of calculation. Although the department possesses the equipment and expertise to conduct such tests, there would be a personnel problem in running the various field tests.

The Ohio Department of Agriculture currently utilizes the specifications set out in National Bureau of Standards Handbook 67, such specifications being incorporated into the state statutes and regulations. Your survey would require us to utilize specifications incorporating both Handbook 67 and the proposed USDA standards, thus necessitating the implementation of different techniques.

It is the estimation of the Ohio Department of Agriculture that in order to conduct a "good" survey it would take two to three months of our time to obtain valid results. It is the position of the Ohio Department of Agriculture that in order for your survey results to be included in a valid recommendation or study, the answers obtained from the various states must be accurate. In order to meet the requirement of accuracy, the amount of time allotted is simply insufficient.

Sincerely,

JOHN M. STACKHOUSE,
Director.●

GREAT AMERICAN FACE PHOTO CONTEST

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WYDLER. Mr. Speaker, a review of the book "Faces USA" has recently come to my attention.

"Faces USA" resulted from a modest amateur photo contest, which became an official Bicentenial project of the U.S. Government. The contest eventually touched the lives of millions of Americans.

Originally, the contest was open to all Americans to submit snapshots—informal and candid—of their family members, friends, or any American with whom they came in contact. It was called the Great American Face Photo Contest and divided the snapshops into 12 different categories—ranging from infants to great-grandparents. A panel of judges then selected the "most representative" face in each of the 12 categories.

The winning photographs were displayed from coast to coast in museums, galleries, libraries, schools, State fairs, and shopping centers. So great was the interest in the contest that an estimated 10 million Americans flocked to see the exhibits. The USIA has also shown them in numerous other countries whose citizens came in large crowds to view the "representative" American faces in the pictures.

As a result of the extraordinary interest in what began as a small amateur photo contest, Arnold Newman photographed the winners in each category. These photographs have been compiled into the book "Faces USA," which is published in my hometown of Garden City, N.Y.

I am pleased to commend to the attention of my colleagues an outstanding review of "Faces USA" written by Irving Desfor:

CAMERA ANGLES
(By Irving Desfor)

Just two years ago, early in 1976, a deceptively simple photo contest originated to interest the country's amateur photographers. The idea was to invite all Americans with a camera to submit snapshots—not formal portraits—of friends, relatives, or even strangers, in 12 different categories from babies to grandparents. A panel of judges would then select the most representative face in each category to form a symbolic photographic "great American family."

No one at that time visualized the national enthusiasm that the Great American Face Photo Contest would generate. Who could have predicted that it would become an official Bicentennial project of the U.S. Government and that it would be lauded by Senator Hubert Humphrey in the Congressional Record?

No originator foresaw that the 12 national winners—ordinary people like you and me—would wind up as subjects for professional portrait assignments by Arnold Newman, renowned photographer of the world's leading personalities.

Or that an estimated ten million viewers would see the Great Americans Faces Exhibition from coast to coast, at the United Nations in New York, at the National Visitors Center in Washington, D.C., as well as at museums, galleries, libraries, schools, state fairs and shopping centers.

Or that major cities would proclaim Great American Face Days to promote the project. And that it would inspire a popular song and lyrics.

Or that, two years later, 'FACES U.S.A." would still be exhibited under the auspices of the United States Information agency in 125 countries on six continents.

And finally, that its complete story would make a compelling book.

Now that, too, has taken place with the current publication by AMPHOTO, Garden City, N.Y., of: "FACES USA" by Arnold Newman, with a foreword by Thomas Thompson (paperbound, $5.95).

It's all on record. We realize now that it was a unique contest, ingeniously attuned to the spirit of the nation as it celebrated its 200th birthday. Its appeal was at the grassroots level, asking people to get involved with their neighbors and themselves. The contest sought a mirror image of Americans with a rich variety of ethnic cultures and an individual emphasis on qualities of character, personality, strength, warmth and humanity. The country was taking its own family portrait with a self-timer.

As the contest gathered momentum with its mass appeal and public spirit, its continued success was assured by the low-key profile maintained by its sponsor, Kinney Shoe Corp., and the integrity and professionalism of Ruder & Finn, its guiding hand in the communications area. Their awareness of the larger purposes of the Great American Family concept, as it evolved, produced a contest that became a remarkable achievement for both photography and the American people.

It is strange that a collection of amateur photos of ordinary Americans should capture the public's imagination? That interest became evident from the very first simultaneous exhibitions of "Faces"—at New Jersey's Morris Museum of Arts & Sciences and at the California Museum of Science & Industry in Los Angeles. And audiences in other countries who have seen the USIA-sponsored exhibits also reacted, and are reacting, with similar fervor.

The key may well be in the high degree of self-identification that these photos stimulate. The faces are of ordinary people, like "you and me." We see in these photo families the parents and grandparents we were familiar with, the children we knew, the boy and girl down the street. We see ourselves. The response is different when we look at photos of famous personalities, however. There is an invisible barrier or gulf because we are separated by the differences of wealth, position, talent and distance. We can't identify with them personally. But "FACES" can be part of our own family albums.

When Arnold Newman—who photographed seven U.S. presidents, kings, celebrities, Nobel prize-winners and headline personalities—photographed the dozen "ordinary" Americans, he found they were not ordinary at all. Their achievements have a special yardstick. Their accomplishments are in living their own full, rich lives with integrity and dignity. And that is in itself a memorable accomplishment.

In addition, Newman achieved just as great a sense of personal satisfaction with the photographic results as any attained when photographing the most famous celebrity.

Today, the 1976 Bicentennial and its celebrations have faded from the American scene but some rewards remain. Among them we count the Great American Faces project and its exhibitions. And one of its dividends is the book, "FACES USA."●

FBI UNDERCOVER OPERATIONS AMENDMENT

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. EDWARDS of California. Mr. Speaker, the following legal memorandum prepared by the Department of Justice, explains the need for and scope of the amendment I introduced to H.R. 12005 (Justice Department authorization). This part of the memorandum deals with the following legal issues that are addressed in the amendment: First, whether the FBI may deposit funds in banks in support of its undercover operations, and second, whether certain statutes pertaining to Government leasing apply to leases required by the FBI in its undercover operations:

BANK DEPOSITS

At times it becomes necessary for the FBI, in the course of undercover operation, to deposit public funds in a bank. The FBI might do this in several different situations. First, it deposits funds to maintain and support undercover agents or off-site surveillance teams or equipment, so that these entities will not be identified with the FBI. Second, the businesses established by the FBI must deposit funds in banks in order to operate as any other commercial enterprise would. Finally, in investigations dealing with white collar and organized crime, the individuals with whom the FBI is dealing frequently require FBI undercover agents to demonstrate their financial ability to participate in transactions involving large amounts of cash—e.g., the purchase of stolen securities. To do so, the FBI must often deposit large sums in banks in order to permit the undercover agent to verify his finanical resources.

The practice of depositing funds in banks raises questions under 18 U.S.C. § 648, which provides in part: [1]

"Whoever, being an officer or other person charged by any Act of Congress with the safekeeping of the public moneys, loans, uses, or converts to his own use, or deposits in any bank or exchanges for other funds, except as specially allowed by law, any portion of the public moneys intrusted to him for safe-keeping is guilty of embezzlement of the money so loaned, used, converted, deposited, or exchanged, and shall be fined in a sum equal to the amount of money so embezzled or imprisoned not more than ten years, or both . . . ."

For the reasons outlined below, we have concluded in a previous opinion that the FBI might deposit funds in banks under certain circumstances without violating this statute. The rationale which justifies this conclusion however, would not extend to certain large deposits necessary to conduct successfully certain investigations of white collar and organized crime. The proposed amendment is thus necessary to enable the FBI to continue to conduct its investigations effectively in those areas.

The rationale which justifies FBI bank deposits in certain limited circumstances rests on both the language and the purposes of the statute. The statute prohibits bank deposits except "as specifically allowed by law." While the FBI has no explicit authority in this regard, the lack of an explicit provision is generally not regarded as conclusive. *United States* v. *Macdaniel*, 7 Pet. (32 U.S.) 1, 13–14 (1833). Rather, the general rule as to the scope of an official's authority is that where a statute imposes a duty, it authorizes by implication all reasonable and necessary means to effectuate such duty. 2A Sutherland, Statutes and Statutory Construction § 55.04 at 384 (4th ed. 1973) This approach has been adopted by the courts and other legal authorities in regard to statutes which establish a prohibition absent an "authorization by law." *See, e.g., Chase* v. *United States*, 155 U.S. 489, 502 (1894); 31 Op. A.G. 570, 575 (1912) (both construing the predecessors to 31 U.S.C. § 655(a) and 41 U.S.C. § 11 (a)); *Burns* v. *United States*, 160 F. 631, 634 (2nd Cir. 1908) (construing the predecessor of 40 U.S.C. § 34). This approach has also been followed to uphold the activities of law-enforcement agencies in the absence of explicit statutory authority. *See, e.g., United States* v. *Krapf*, 285 F.2d 647 (3rd Cir. 1961); *United States* v. *Jones*, 204 F. 2d 745, 754 (7th Cir. 1953); *United States* v. *Kelly*, 55 F.2d 67 (2d Cir. 1932). Based on these authorities, the FBI's statutory mandate "to detect and prosecute crimes," 28 U.S.C. 533(1), and the FBI's determination that it is imperative to deposit funds in banks in the course of undercover operations, we have concluded that this practice would not violate the statute if the FBI ensured that the funds were fully safeguarded.

In our view, this interpretation does not contravene the purposes underlying the statute. Several of the goals underlying the statute—e.g., to guard against favoritism among banks, to ensure that the government would have funds available when needed, and to prevent overexpansion of bank notes—do not seem threatened by the FBI's practice. Moreover, the statute's major objective—that of safeguarding public funds—could be satisfied if the FBI met certain conditions with respect to maximum deposits. It is our understanding that many of the FBI's undercover activities can satisfactorily operate within these conditions.

However, in certain circumstances where the FBI needs to display large financial resources in white collar and organized crime investigations, the limitations necessary in our opinion to comply with 18 U.S.C. § 648 would frustrate the undercover operations. Four major current operations are threatened by the applicable limitations, and four other major operations planned for implementation in the immediate future would be greatly hampered under the limitations imposed under our interpretation of 18 U.S.C. § 648.

There appears to be no alternatives to legislation in this instance. While the FBI can conduct certain limited operations under the restrictions of 18 U.S.C. § 648, it cannot maintain present and planned operations of a size and scope necessary to deal effectively with large scale white collar and organized crime. In addition, even the limited operations which might be conducted consistent with 18 U.S.C. § 648 will be short-lived since sophisticated criminal elements would be able to identify them as FBI tactics subsequent to arrests, trials, and attendent publicity.

LEASES

In the course of its undercover operations, the FBI at times must enter into leases of property. In the law-enforcement area, the FBI's undercover businesses must operate as any other commercial business, and this requires that these businesses lease space from which to conduct their operations. However, this practice raises problems under statutes relating to government leasing and to government procurement. While the FBI has heretofore largely been able to adhere to the pertinent statutes without undue difficulty, several statutes pose serious problems for undercover law-enforcement operations which are scheduled to begin in FY 1979. The proposed amendment is designed to eliminate these problems, as well as to clarify one questionable area of the law.

The problems which undercover law-enforcement operations face (or will face) in leasing property are as follows: (1) whether the FBI might enter into leases for periods extending beyond the current fiscal year; (2) whether the FBI might enter into leases in Washington, D.C.; and (3) whether the FBI might enter leases without including in the lease clauses usually required in government contracts. Each of these problems requires separate discussion.

(1) Leases extending beyond the current fiscal year.

At times, the FBI needs to rent property for its undercover operations where the landlord demands a lease extending beyond the current fiscal year. This raises problems under 31 U.S.C. §§ 665(a) and 41 U.S.C. § 11 (a). These statutes prohibit federal agencies from entering into contractual obligations unless appropriations are available to meet those obligations or unless they are authorized to do so by law. In the leasing

[1] The same prohibition on deposits of public funds in banks is contained in 31 U.S.C. § 521.

area, these statutes have been interpreted to prohibit leases which extend beyond the current fiscal year unless such contracts are authorized by law or unless appropriations are available to meet those obligations. *See, e.g., Leiter* v. *United States,* 271 U.S. 204 (1926).

This Office has, in the intelligence area, concluded that the FBI may, under narrowly delineated circumstances, enter into leases extending beyond the fiscal year. This conclusion was founded, first, on the ground that the statutory exception "authorized by law" has been interpreted to allow for an authorization "by necessary implication" from a general statute. *Chase* v. *United States, supra* at 502; 31 Op. A.G. 570 (1912). Second, the statutes set forth above allow contracts where an appropriation is available to meet the contractual obligations; the statute which sets forth the availability of appropriations, 31 U.S.C. § 712a, has been interpreted to allow the government to enter contracts requiring payments relating to future years if such was the only way the government could obtain a needed supply or service. *See* B–18631, December 9, 1976 (slip. op. at 19, 22); 37 Comp. Gen. 155, 159–60 (1957); 3 Comp. Gen. 654 (1929). On the basis of these interpretations, the FBI's responsibilities in the intelligence area, and the exigencies of intelligence work, we concluded that the FBI could enter a lease extending beyond the current fiscal year where such was truly necessary in the performance of its responsibilities.

Even though we have concluded that leases extending beyond the current fiscal year in the intelligence area are lawful, we still consider it to be a close question. Due to the different sorts of considerations underlying law-enforcement operations, we believe the question is even closer in this context.

The FBI has thus far managed to avoid situations requiring a lease extending beyond the current fiscal year in the law-enforcement area. However, we are told that there is presently pending at least one major operation whose implementation is being delayed due to this problem; we are also informed that there is another imminent major operation which might be forestalled completely due to the problem.

Conceivably, there might be alternatives to legislation. The FBI may be able to structure the same sorts of solutions it has in the past—i.e. entering month-to-month leases, or entering leases extending only to the end of the fiscal year, or simply looking for alternate locations. However, as the FBI's operations grow and become more complex, these alternatives may simply become unavailable. The lessors of large commercial property, for example, may uniformly require leases in excess of one year. Since the FBI believes it will encounter this sort of situation in FY 1979, we believe that it is necessary, if the FBI is to continue its undercover activities, for corrective legislation to be enacted.

(2) Other leasing problems.

The FBI's investigative responsibilities in the area of law enforcement exist in Washington, D.C., as much as in any other area. This means that, just as in other areas of the country, the FBI may have to resort to undercover operations in Washington, D.C., in order to perform its statutory responsibilities. These operations, like all other undercover operations, may have to lease space in order to conduct business. Unlike operations conducted in any other part of the country, however, operations in Washington, D.C., face a particular prohibition on leasing. Section 34 of title 40 prohibits leases in Washington, D.C., "until an appropriation therefor shall have been made in terms by Congress." [2]

[2] Another prohibition pertaining to rentals in Washington, D.C., is contained in 40 U.S.C. § 35.

Since the FBI, to our knowledge, has not had to rent property in Washington, D.C., in the course of its law-enforcement operations, this statute has not yet posed an obstacle to such operations. Since the FBI has thus never presented this particular problem to the Department, no determination has been made whether the FBI might legitimately enter into leases in Washington, D.C. If, however, a need ever arises in this regard, legal problems would obviously arise. The broad language of the statute would on its face apply to such a situation. Moreover, while there is some authority allowing for exceptions to the statute in certain circumstances, *see, e.g.,* 6 Comp. Dec. 75, 78–79 (1899), the decisions interpreting the statute generally adhere to its literal terms. We think that, in order not to foreclose the FBI from conducting effective undercover operations in Washington, D.C., explicit legislative authority should be obtained so that the FBI may enter into leases in the District. If legislation is not secured, the FBI may have to conduct its operations in Washington, D.C., from space leased either in Maryland or Virginia. This alternative, however, raises credibility problems and practical difficulties, which may well render an operation inadvisable altogether. It thus seems best, in order to avoid these difficulties, that we secure explicit legislative authority in the authorization bill.

The final leasing problem is that, in entering the leases discussed above, it is obvious that the FBI usually cannot disclose the true identity of the lessee. This raises problems under statutes such as 41 U.S.C. §§ 22, 254 (a) and (c), which require certain clauses to be inserted into government contracts; [3] the inclusion of such clauses would disclose to the lessor that a government agency was actually the lessee. This would compromise an operation and could often require its termination.

This Office has concluded that, under certain conditions, the FBI may enter into leases without including in the leases clauses usually required in government contracts. We understand that the FBI can operate satisfactorily under those conditions. However, in view of the broad language of the pertinent provisions, and to clarify the scope of the FBI's authority to enter such leases, we believe a specific legislative exception to these general provisions is necessary. We therefore recommend that this authority be secured in the authorization bill, and our proposed amendment contains language to this effect.

JOHN M. HARMON,
Assistant Attorney General,
Office of Legal Counsel.●

[3] These clauses relate to prohibitions on government contracts with members of Congress, the payment of improper fees in soliciting or securing government contracts, and the Comptroller General's access to the contractor's or subcontractor's records.

DR. DANIEL ALDRICH, CHANCELLOR OF THE UNIVERSITY OF CALIFORNIA, IRVINE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTERSON of California. Mr. Speaker, imagine the awesome task and responsibility for seeing a major university developed from bare ground to a fully operating institution. It is an assignment not meant for the average administrator.

That assignment was placed on the shoulders of Dr. Daniel Aldrich, Chancellor of the University of California, Irvine. Dr. Aldrich not only accepted this difficult task, but has effectively built the University of California, Irvine, into one of the finest institutions of higher learning in the United States.

Dr. Aldrich, who was appointed chancellor of UCI in 1962, is now tops in seniority among the nine chancellors in the University of California system. On November 9 he will be honored as a "Humanitarian of the Year" by the Orange County chapter of the National Conference of Christians and Jews.

He is an avid fan and participant in track and field events. He has won medals in the discus, javelin, shot put and hammer throw. Like our senior Senator for California, Alan Cranston, Dr. Aldrich is a regular participant in the U.S. Masters Track and Field Championship for participants over 40 years of age.

Dr. Aldrich has unquestionably established his success in academia and I wish him continued good fortune in all his future endeavors.●

PHILADELPHIA INQUIRER CITES NEED FOR HUMPHREY-HAWKINS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. EILBERG. Mr. Speaker, I know that many of my colleagues in the House share my earnest hope that the Senate will, in the closing days of Congress, decide that the proper course of action is to pass the Humphrey-Hawkins bill which would commit us to definite goals in reducing unemployment.

For those Members of the Senate who still have doubts about the wisdom of the Humphrey-Hawkins bill, I commend to them the following editorial from the Philadelphia Inquirer of Monday, October 9, 1978. This editorial is an eloquent commentary on the need to set goals in our battle to cut unemployment:

WHY NOT SET JOBS GOALS AND TRY TO ATTAIN THEM?

While the Congress wrestles with a tax bill which, at this writing, tilts toward helping the well-to-do and the middle classes, how about some attention to the question of jobs? Specifically, to the Humphrey-Hawkins bill, a version of which has been passed by the House, 257 to 152, but which is stalled in the Senate.

The Humphrey-Hawkins bill, named after the late and loved Democratic senator from Minnesota and Los Angeles Democratic Rep. Augustus Hawkins, has become a symbol, but of very different things to different people. On one side, there are those who regard it as radical legislation which might subvert our system of capitalism. On the other, there are those who regard it as almost the be-all and end-all of wise and compassionate economic policy.

In reality, it is neither. Certainly it is not radical. What is so radical about establishing as national policy "the right of all Americans able, willing, and seeking to work full opportunities for useful paid employment at fair rates of compensation"?

What is radical about setting a goal of a national unemployment rate of 4 percent and

establishing processes and planning by which the goal might be achieved? The current unemployment rate hovers around 6 percent, but it is twice that for blacks and as high as 40 percent or even more in America's urban ghettoes.

That, basically, is what Humphrey-Hawkins is all about—a way of coordinating policy and planning among the Executive Branch, the Congress and the Federal Reserve Board to achieve the 4 percent unemployment rate that economists traditionally have regarded as "full employment."

Opponents have opposed it on contradictory grounds. The legislation, they charge, would be "wildly inflationary," as the Washington Post put it in an editorial the other day. That assumes that the legislation would require the federal government to do all kinds of things—most particularly, to spend all kinds of money—to bring the unemployment rate down. On the other hand, however, they attack the legislation as being nothing more than symbolic—a promise, still another promise, by the government to accomplish a noble goal, but a symbol without substance, and hence doomed only to disappoint and disenchant.

In other words, they attack the legislation as being both too much and not enough. You can't have it both ways. Our own view on the subject has changed, partly because we have thought the matter over, and partly because the legislation itself has been changed to include an anti-inflation component, requiring a similar process of setting short and long-term goals and proposing specific means of achieving them to combat inflation.

True, the legislation in and out of itself will not create jobs, but what is wrong with requiring that attention be paid, in a comprehensive way, to the intolerable situation of people willing but unable to find "useful paid employment at fair rates of compensation"? True, the goals to be set may be unattainable immediately, but what person does not set goals for himself, what corporation does not set goals for itself? Setting goals is a key to planning, the process of figuring out where you want to go and how to get there. Humphrey-Hawkins would set the goals of full employment and zero inflation. By itself, it cannot get us there, but it can help show the way.●

THE CASE OF LEONID SKRYNNICK

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

Mr. CARR. Mr. Speaker, I am pleased to participate today in the vigil for freedom sponsored by my colleague BILL BRODHEAD in support of Jewish families and individuals who are being denied permission to emigrate from the U.S.S.R.

I believe it is important that this Congress be reminded of the individual suffering of those whose human rights are not adequately protected. Accordingly, I am bringing to the attention of my colleagues the case of Leonid Skrynnick, a 33-year-old lawyer living in Moscow.

Mr. Skrynnick graduated from Moscow State University in 1971, after which he began work for the Soviet branch of the international insurance company Ingosstrakh. When he applied in 1975 for permission to emigrate, he was fired from his job. Two months later, the request was denied, with the explanation that Mr. Skrynnick had state secrets. This came as a surprise to him, but his inquiries resulted only in the response "you had better know which state secrets."

Mr. Skrynnick has since applied two more times for permission to emigrate, and the requests have been denied for the same reason. He has thus been left without a job and without any explanation for the reason for his firing.

I am hopeful that continuing public pressure will result in Leonid Skrynnick being allowed to emigrate from the Soviet Union.

A NATIONAL PROGRAM TO IMPROVE THE HANDLING AND DISPOSAL OF HAZARDOUS WASTES

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LaFALCE. Mr. Speaker, yesterday I introduced the Toxic Pollutant Compensation Act, a bill designed to protect innocent victims injured as a result of toxic pollutants in the environment. Today I am introducing a second bill which is intended to help prevent hazardous substances from being handled or disposed in ways that threaten injuries to American citizens or to the environment.

My bill will, I believe, help to fill the gaps which have become evident in the original Resource Conservation and Recovery Act of 1976 (RCRA) by amending it to:

Establish a program for the identification and reclamation of abandoned hazardous waste sites;

Set fees to be paid by private organizations which store or dispose of hazardous wastes; and

Provide a process for the selection of sites for future disposal of hazardous wastes.

The bill is not meant to be a definitive judgment on the ways in which RCRA should be improved. Rather, its purpose is to serve as a starting point for congressional action. RCRA comes up for reauthorization in 1979 and will, I expect, be amended in many ways. I plan to take an active part in this process and I hope my bill will be a signal for the need for changes in existing law, and serve as a catalyst for provocative and creative thoughts by others similarly concerned.

THE PROBLEM

RCRA, as presently written, does not provide a program for the identification, reclamation, and maintenance of hazardous waste sites, whether abandoned or presently in operation. Neither does it provide for the location of future sites. Recently we have all become acutely aware of the need for such a program, as witnessed by the explosion of the "Love Canal" in the city of Niagara Falls, which is in my congressional district.

At least 39 additional abandoned landfill sites have been identified in Niagara County alone; according to the U.S. Environmental Protection Agency (EPA), the exact number of these "ticking timebombs" cannot be definitely determined—only estimated. EPA's estimate is 3,000 nationwide.

ABANDONED SITES

A concerted effort must be made to identify all abandoned landfill sites that do or may contain hazardous wastes, and once they are identified they must be reclaimed, if feasible. If reclamation is not feasible they must be monitored to insure that public and environmental health and safety are not endangered. My bill includes an approach to do just that; it establishes a joint State/Federal procedure for identifying, reclaiming and/or maintaining abandoned sites.

LOCATION OF FUTURE LANDFILL FACILITIES

When RCRA was passed in 1976, no one foresaw the widespread public opposition to new hazardous waste disposal sites which has swept the country. The general public was not then fully aware of the large number of abandoned sites throughout the country, the deleterious effects they were having on people's health and safety, and their dire impact on the environment. Now that public awareness has grown, in part because of the Love Canal emergency, citizens are understandably leery about the dubious honor of having a new site proposed to be located in their backyards.

However, the hazardous waste disposal situation is here to stay; our advanced manufacturing processes must produce wastes as byproducts of those very activities that allow us to enjoy one of the highest standards of living in the world.

Therefore, we must create a program and process for locating new facilities for the treatment, storage and disposal of hazardous waste materials in as rational, effective and equitable a manner as possible. That is precisely what my bill is intended to provide. A permit system will be established under which permits will be issued only after assurances are given about the environmental safety and soundness of any new facility's location. Affected local residents, local governments and States would be included in the process and must be consulted; panels of scientific experts will be formed to help answer the many questions that arise in such situations.

CLOSING OF EXISTING OR FUTURE HAZARDOUS WASTE DISPOSAL SITES

My bill also creates a program for the termination of existing or new hazardous waste disposal sites in a safe manner. This is most important, for it will provide assurances to communities surrounding such sites that they will not cause problems in the future such as those we are experiencing as a result of past landfill sites being abandoned and improperly sealed.

FEE SYSTEM

The bill would initiate a system of fees to be levied on permitholding operators of hazardous waste treatment, storage or disposal facilities. The fees will be deposited into a fund to be used for two purposes: First, the maintenance of new or existing sites and, second, the mainte-

nance and reclamation of abandoned sites.

Half of all fees collected will be paid into a special account and used for new site maintenance. The fees will be set at a level sufficient to assure that all costs for maintenance will be borne by this account, thus making this a program funded entirely by the industry which created the need for the program in the first place. These costs, previously borne by society in general through environmental and health hazards and damages, will now be shifted to the industry through this user fee.

The other half of the fees will be deposited into a second fund and used to help defray the costs of monitoring and reclaiming abandoned sites. It is anticipated that the fees will provide 50 percent of these costs; the remainder needed for these purposes would be provided through a Federal/State program funded on a 90–10 percent basis.

EMERGENCY ASSISTANCE AND LIABILITY

The bill I am introducing would also establish a program and a contingency fund for emergency assistance and payment of costs for cleanup operations in the event any pollutant or other contaminant associated with any facility for the treatment, storage or disposal of hazardous wastes present an imminent and substantial danger to the public health and welfare. This is a customary provision in this type of legislation, and it is accompanied by an equally customary provision providing for the Government to bring an action against owners or operators of facilities where such emergencies arise to recover the costs of cleanup operations.

CONCLUSION

Mr. Speaker, I repeat that I do not consider this bill to be a "final" product that solves all the problems we now know about solid waste disposal. Rather, I view it as the beginning of a long and arduous task leading, I hope, toward some solutions to some of the problems our highly industrialized and technological society has created. If anything needs "cradle to grave" attention, it is hazardous wastes, and I hope Congress will act to help achieve that.●

JUDICIAL TENURE ACT

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PEASE. Mr. Speaker, in the closing days of this Congress, many bills will die. There is one such bill, the Judicial Tenure Act, that I hope will receive prompt and thorough consideration in the 96th Congress.

The functions of the Federal judiciary in our constitutional government are critical. The power residing in the Justices of the Supreme Court and the Federal judges is great. The importance of the independence and integrity of the Federal judiciary cannot be underestimated. The size of the Federal judiciary has far outgrown that contemplated by the Founding Fathers. And there exists a compelling need to reinforce public confidence in the character and the professional conduct of Federal judges.

All of these factors point toward the need for legislation to establish within the judicial branch of Government a system for dealing with allegations of misconduct or disability among Federal judges. Accordingly, I am working on legislation designed to address this need. My bill will be similar to that which passed the Senate in early September. I hope to elicit support from my colleagues for what I feel is a responsible approach to coping with a growing public concern. I also want to encourage the House Judiciary Committee to give high priority early in the 96th Congress to coming to grips with several issues related to judicial conduct and disability.

There is a school of thought which contends that Federal judges can only be removed from office by impeachment for "bribery, treason, or other high crimes and misdemeanors." On the other hand, a competing school of thought argues that the "good behavior" clause of article III, section 1 of the Constitution needs to be defined by law so as to provide supplementary grounds for removing Federal judges from office.

Much scholarly debate has centered on these divergent constitutional interpretations. Ample historical and legal precedents have been cited in defense of each interpretation. Now is the time for the Congress to give thoughtful consideration to the approach provided in this bill as a way of establishing the constitutional parameters under which the conduct and conditions of Federal judges can be evaluated. The public is criticizing the Federal judiciary as never before, so the need for arriving at a delineation of the constitutional standard of "good behavior" is greater now than ever before.

Briefly, this bill establishes a procedure within the Federal judiciary for investigating and resolving allegations that a Justice or Federal judge is not conforming to "good behavior" or is suffering from a permanent mental or physical disability that seriously interferes with the performance of his official duties. This is accomplished through a three-tiered judicial disciplinary system which investigates and takes appropriate action on complaints filed against a judge of the United States. Only allegations relating to the conduct or condition of a judge which are connected with the judicial office or which prejudice the administration of justice by bringing the judicial office into disrepute could be considered. Complaints filed by persons unhappy with a judge's procedural rulings or stemming from personal disagreements with the merits of a judge's decision could not be considered.

An investigation of a complaint against a judge could result in the involuntary retirement, removal, or censure of the judge or the dismissal of the complaint. Similarly, a complaint against a Justice of the Supreme Court, if found to be meritorious, could result in a report to the House of Representatives recommending impeachment, censure, or dismissal of the case.

Personally, I am persuaded there are strong arguments in defense of the constitutionality of this bill. It does not undermine the separation of powers doctrine, in my opinion, since that doctrine refers to the independence of the judiciary as an institution from the two other branches of Government and not to the independence of judges from their peers. After all, under the procedures established in this bill, judges suspected of misconduct or disability would be judged by other Federal judges.

The bill is also practical. The system that would be established for handling allegations of misconduct or disability among Federal judges parallels those already in use in 47 States, the District of Columbia, and Puerto Rico.

In closing, I venture to guess that most of us at one time or another have heard from disgruntled constituents, litigants, and attorneys concerning Federal judges. For lack of anywhere else to file their complaints, they come to us. This bill would fill this void by creating a system whereby allegations about Federal judges could be filed with a responsible, judicial body that has both the means and the ability to investigate and take appropriate action.●

WE NEED A DEPARTMENT OF EDUCATION

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MARKEY. Mr. Speaker, I rise in strong support of H.R. 13778, legislation to establish a Department of Education.

In an article which appeared in Change magazine last February, Senator ABRAHAM RIBICOFF clearly outlined why the creation of a Department of Education is essential if we are to provide an equal chance for quality education for all. I hope my colleagues will join me in supporting this important legislation.

The article follows:

A SEPARATE DEPARTMENT OF EDUCATION: WHY NOT THE BEST?

(By ABRAHAM RIBICOFF)

Historically, Americans have displayed an almost mystical belief in education as the path upward, the road to success. Even today, nothing is more important to the nation's well-being than providing an equal chance for quality education to all. Thus it is not surprising that education has become a huge, all-encompassing activity. Today almost 64 million Americans—30 percent of the population—participate directly in its operations. It takes up 38 percent of our state and local budgets. And the federal government is involved at all levels.

However, the federal effort is scattered. It resides in what Harvard professor Steven Bailey has called "the hands of a series of fourth- and fifth-level bureaus spread throughout a score of executive departments and agencies." Nearly 40 different federal agencies handle 300 programs, 200 of them outside the Department of Health, Education, and Welfare. State and local education administrators go from agency to agency putting together a package of grants and ap-

provals. They answer the same questions over and over for different offices.

Organization is both symbol and reality. Symbolically, organization tells us how important something is. Urban America became important in the mid-1960s; thus we have a Department of Housing and Urban Development. Energy matters, so we created a Department of Energy. What does this tell us about how education is viewed?

Organization also defines real situations: how sharply programs are focused and how effectively they compete for funds. Education moneys are only one part of the huge budget for the Department of HEW. Since attention focuses on budget totals by division, the pressure is to keep each unit's expenses down. But much of HEW's budget cannot be controlled. It is only after funds are allocated to the growing entitlement programs in health and welfare that education can compete. It is thus the poor cousin in a huge department. Charles Saunders, currently with the American Council on Education and former Deputy Assistant Secretary for Education, has summed it up: "The history of education's role within the HEW complex clearly demonstrates that it has suffered in competing for attention with all of the Department's other vast responsibilities for social policies affecting all Americans."

Separating education from health and welfare will result in better administration in all three fields. No one is busier than the Secretary of HEW. Crises in health and welfare demand his time. Education, which presents a different kind of problem, is relegated to a lower priority. No serious work is done in developing a coordinated federal role in education. Nor will this role ever be developed as long as the top federal education officials remain at the level of Commissioner and Assistant Secretary.

We have said to the Assistant Secretary for Education and to the Commissioner of Education, "Go and coordinate federal programs related to education," but we have not given them the backing or the prestige to do so. A Department of Education would provide a focal point for such efforts. A Secretary of Education—unlike the Assistant Secretary or the Commissioner—would have direct access to the President. A cabinet Secretary can fight for coordination where a lower official can only argue.

In October 1977 the Governmental Affairs Committee, which I chair, held the first hearings in 20 years on legislative proposals to create a Department of Education. There was wide agreement that dealings with education on the federal level today are unsatisfactory. Senate Bill 991 would transfer into a cabinet-level Department of Education many education authorities, including all of the current Education Division, the Department of Agriculture's school lunch and child nutrition programs, the National Foundation on Arts and Humanities, and the National Science Foundation's education programs. But the Department would not absorb all education programs; those designed to support the major goal of another Department would remain with that Department. However, coordination would be improved. S. 991 strengthens the Federal Interagency Committee on Education by providing a statutory base and a cabinet-level chairman.

Some have used the demands of coordination as an argument against a separate Department of Education. They suggest that health, education, and welfare are so intertwined that policies in one area should be designed with the other two in mind and that this can be best accomplished within a single department. This argument assumes that links between health, education, and welfare programs currently exist. But in my years of experience with HEW I have yet to find concrete examples of planning links. Rufus Miles, currently a professor at Princeton University and for 12 years director of administration for HEW, has described this coordination as "simply a figment of the imagination."

Total coordination, of course, is never possible. However, the relationships between education and other programs can be worked out across Departments when both components work from strength—witness the links between HEW and Labor on welfare reform. Coordination of the government's widely scattered education programs, however, requires high-level leadership and the umbrella of a Department focus on education.

Organization has to do with policy within a department as well as between departments. I believe it is important to structure the Department of Education so as to prevent domination by any single interest—whether it be elementary or secondary schooling, postsecondary or vocational learning. In this regard, six former Education Commissioners have recommended creating two undersecretaries: one for elementary and secondary education and the other for postsecondary and continuing education.

As far as the budget goes, this apparently presents no problem. Although fewer programs are directed at higher education, there is rough equality in funding between elementary-secondary programs and higher education programs. This and other suggestions will be studied later this year when the Governmental Affairs Committee resumes its hearings and debate on the exact structure of the proposed new Department. We hope to complete action during this session of Congress.

For too long the nation has assumed that education could muddle through. We have neglected it because other areas were in visible crisis. Perhaps if budgets were unlimited, sending money and directions to education scatter-shot fashion would do. However, money and time are not unlimited. We cannot continue to waste both in overlapping and undirected programs. We need a Department which can work effectively with the states and cities. We need a Secretary of Education who can operate from strength, within a reasonable structure. Once that is accomplished. Perhaps the average tenure of the nation's highest education officer will stretch longer than a single year.●

BEN ADAMOWSKI

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ANNUNZIO. Mr. Speaker, one of my constituents has written a poem in honor of Ben Adamowski, now a lawyer in private practice in Chicago and a man whose record of accomplishment is an inspiration to his friends and fellow citizens. The text of that poem follows:

THE WAY TO GO

(By Harry the Horse)

Oh, his name is Adamowski
but Ben is more his style
He stands for truth and justice
and he's been around awhile
His Father came from Poland
to Chicago long ago
Where Ben learned helping people
is the only way to grow

He grew up to be a lawyer
and he won his LL.B
'Til Uncle Sam came calling
and he went across the sea
He entered as a Private
when his country needed men.
But when the smoke had lifted
he was known as Captain Ben

He's been Corporation Counsel
and a Legislator too
And a fighting States Attorney
when the accolades were few
A candidate for Mayor
that's walked along the aisle
Yes, they call him Adamowski
but Ben is more his style!●

SOVIET UNION WOULD USE OLYMPIC GAMES FOR POLITICAL GAINS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McCLORY. Mr. Speaker, I want to share with you and my colleagues a poignant critique of one of the events to be held in conjunction with the 1980 Olympic Games in Moscow.

It was put out by the Estonian American National Council headquartered in New York City and it was given me recently in my 13th Congressional District by Olaf Tammark, a longtime friend and a heroic worker for the rights of Estonians and the liberation of that Baltic nation.

Mr. Speaker, Tammark felt that all of us should be aware of this, and I agree with him.

[From Estonian American National Council]

OLYMPIC GAMES 1980

As part of the Olympic Games in Moscow, a Yachting Regatta will be held in Tallinn, capital of the Soviet-occupied Republic of Estonia.

The Soviet Russian rulers in Estonia are using this event for their political propaganda purposes.

Most countries of the free world have never recognized the forcible annexation of the three Baltic States, Estonia, Latvia and Lithuania, by the Soviet Union. This illegal act took place in 1940 as a result of the notorious pact between Stalin and Hitler.

Since then Soviet Russia has made efforts to cover up this international crime. By bringing the Olympic Regatta to the territory of an occupied country, the Russians intend to give the impression that conditions there are quite "normal" and the incorporation of Estonia into the Soviet Union a generally accepted fact.

During the period of Estonia's freedom, Estonian athletes participated under their national colors in Olympic Games and other international contests. If Estonia would be a free country, all the people would have greeted with pleasure the Olympic Regatta in Tallinn, a well-known center of yachting on the Baltic Sea. However, under present circumstances the Estonians look at this event with mixed feelings nor dare they express freely their thoughts about it.

As a commendable example of understanding of the Estonian problem, we quote in English translation the following passage of an article in the Norwegian yachting magazine "Seilsport" (No. 2—1977):

"Should or ought Norwegian yachting sportsmen or those from other free countries take part in a sporting contest with the Russians on occupied Estonian territory in 1980? If Germany had won the last war, what would the Norwegians have said and thought when German-arranged winter Olympics had been held in Oslo? Would not a participation in Tallinn be a mockery against all freedom-

loving people over the whole world, and especially against the occupied Estonians?

"Should not the Norwegian yachting sportsmen and organizations show a straightforward adherence to leading principles of life among free people and abstrain from participating in Tallinn, and preferably take the initiative to a similar attitude among yachting sportsmen of other countries?"

The Estonian community in the free world is appealing to all concerned to realize under what conditions the Olympic Regatta is being held in Estonia and to refrain from any acts which would damage the justified claims for freedom of the Estonian people or the international status of the Republic of Estonia.

THE TRIS BILL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WAXMAN. Mr. Speaker, yesterday, the House considered S. 1503, a bill to compensate manufacturers who suffered losses resulting from the Consumer Product Safety Commission's ban on tris-treated children's sleepwear. While I did not object to the laudable intent behind the bill, I strongly opposed consideration of this legislation on the Suspension Calendar.

Expedited floor procedures were not justified in this case. The procedures deny members the opportunity to thoroughly debate the bill and offer amendments. As I have strong objections to several portions of the bill, I opposed it and voted against it.

Mr. Speaker, I do not object to providing financial relief to small sleepwear manufacturing firms injured by the tris ban. In many cases these small operations, many of which are family run businesses, did not even know what tris was. In many cases these small businessmen merely bought flame retardant fabric from the fabric mills and cut it into garments. Actual chemical purchases were made by the mills.

Unfortunately, the garment industry is highly labor intensive. As a result, the economic loss resulting from the ban on tris fell disproportionately on the small cutters and sewers. It is this injustice that must be rectified.

The legislation before us contained a serious flaw. The bill assumed equal innocence between major integrated fabric mills and small family owned businesses. Further, the legislation totally ignored the fact that many sleepwear manufacturers knowingly exported thousands of the banned, cancer causing sleepwear garments overseas.

These businessmen knew the risks of tris. They knew tris could increase a child's risk of cancer. Nonetheless, they persisted in their macabre trade and now have the arrogance to ask the Congress to reward them for their efforts.

Mr. Speaker, it is an outrage. The bill before this body subsidized businessmen that deliberately sold cancer causing substances to children overseas. These individuals have demonstrated a callous attitude towards the health of foreign consumers and a disrespect for the reputation of the U.S. export market. Their sole motivation was financial gain—nothing more.

To compensate such individuals with Federal dollars is unconscionable. Such trade practices have no moral or ethical explanation. They deserve only our contempt.

I agree that this legislation is well intended. But I cannot support an indemnification bill which does not clearly distinguish between those manufacturers who in "good faith" withheld tris garments from export and those who resorted to foreign exploitation in search of short term financial gains. Any businessman who has exported tris should forfeit any right to Federal compensation or public compassion.

I had prepared an amendment to the bill which would have prohibited the U.S. Court of Claims from compensating manufacturers who had exported tris overseas. Under the floor procedure, I was denied the right to offer this amendment during House consideration of the bill.

Mr. Speaker, I therefore urged my colleagues to defeat the bill and allow it to be considered under the regular order early next session. I now urge the President to veto it.●

LANGUAGE AND POLITICS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, George Orwell once observed that the corruption of the language is one of the features attendant upon the corruption of a society and its politics. It is not unusual for us to refer to Communist revolutionaries and terrorists as merely "leftists," a word that leaves them indistinguishable from, say, the board of directors of the Americans for Democratic Action or the network of passionate reporters who labor diligently for Ralph Nader. This is unfair to everyone. The roots of this corruption are not difficult to trace. More often than not it springs from a simple lack of linguistic precision. It may also reflect a kind of subconscious surrender to enemies who self-righteously arrogate virtue exclusively to themselves. The Communist is such an enemy. Those who fail to understand him, who merely view him as a kind of militant social democrat—winning the steeled Bolshevik's heartfelt contempt, easily fall prey to this kind of self-betrayal. How often have we heard news reporters describing avowed Communists, holding the allegiance of no more than a tiny fraction of the population of some less developed country, as the forces of "national liberation?"

Senator DANIEL PATRICK MOYNIHAN, a gentleman blessed with a unique rhetorical gift and a deep appreciation for the integrity of language, has some hard-hitting and insightful remarks on this condition. I commend his observations to your attention:

WORDS AND FOREIGN POLICY

(By Daniel Patrick Moynihan)

Years ago Disraeli, in one of his novels, remarked that "Few ideas are correct ones, and none can ascertain which they are. But it is with words we govern men." There can be no doubt that words are important in government and they are especially so in the delicate arena of foreign policy negotiations. It is for this reason that I have recently been troubled by what appears to me to be the undisciplined use of language with which American spokesmen and principal officers of the government have addressed themselves to certain foreign policy problems.

In particular I am concerned about the phenomenon dealt with so brilliantly by George Orwell in his classic essay, "Politics and the English Language." More specifically I should like to briefly call to the attention of our diplomats a more recent and I think important point made by Dr. Fred Charles Ikle (formerly a professor of political science at MIT and lately director of the Arms Control and Disarmament Agency).

Some years ago, in a paper on American difficulties in negotiating with communist countries (published by the Rand Corporation), he pointed to the process whereby we come to adopt the language of our adversaries in deescribing political reality. He gave to this process the intriguing term "semantic infiltration."

I quote a passage from the paper he wrote on the matter. He said:

"Paradoxically, despite the fact that the State Department and other government agencies bestow so much care on the vast verbal output of Communist governments, we have been careless in adopting the language of our opponents and their definitions of conflict issues in many cases where this was clearly to our disadvantage. Or perhaps this is not so paradoxical. It might be precisely because our officials spend so much time on the opponent's rhetoric that they eventually use his words—first in quotation marks, later without."

There are concepts which are at the heart of today's major political conflicts. For years now the most brutal totalitarian regimes in the world have called themselves "people's democracies" or "democratic republics."

The term "people's democracies," according to Djilas, was coined by Stalin himself and given as part of the title of the new publication that attended the formation of the Cominform in 1947. Stalin wanted us constantly repeating the fact that the Cominform journal for "A People's Democracy" said such and such. Similarly, organizations in various parts of the world which seek to emulate and institute that manner of regime have taken to calling themselves "liberation movements."

Now here is the problem we face today.

For some time, the Secretary of State, who is a distinguished and capable American statesman, in referring to the parties to the dispute in Rhodesia has spoken of "the Patriotic Front," on the one hand, and "the Salisbury group," on the other. Now, "the Patriotic Front" is made up of forces supplied by and backed by the totalitarian powers, the Soviet Union and China. The self-styled "Patriotic Front" represents the armed component of totalitarianism, a philosphy which they openly espouse.

However, who would not wish to be with "the Patriotic Front"? Is there a man whose heart is not stirred by the prospect of joining with the Patriots? Who, by contrast would wish to be with "the Salisbury group"? It sounds like a mining concession put together by investment bankers in London.

Let me cite another example. On July 17, in a State Department briefing, the spokesman for the Department of State made the following statement:

There cannot be a peaceful settlement unless the liberation forces and the Salisbury parties are satisfied. What we are seeking is an agreement by all parties to fair elections under neutral transition arrangements.

By using the words "liberation forces" the Department of State spokesman is referring to the guerrillas who are armed by the Soviet Union and China and which certainly espouse a totalitarian doctrine. The Department of State spokesman went on to say that we want "fair elections under neutral transition arrangements."

I would argue that the use of those terms, the choice of those words, is fatal to the object of neutrality. When you have described one side as the liberation forces and the other side as a group in the capital, you have summoned all the imagery of political legitimacy of the 20th century and put it on the one side and denied it to another. That is not only fatal to neutrality but, I suggest, it is fatal to clear thinking about this phenomenon.

I do not believe this is a trivial matter. For some years, I have been arguing that the West's political culture is endangered by the fact that the vocabulary and the symbols of political progress are being expropriated by the opponents of our values. Democracy, as we understand it, is under assault from totalitarians masquerading as democrats—just as democratic socialism is under assault from totalitarians masquerading as socialists in Eastern Europe. Nonetheless, we persist in dignifying these enemies of freedom with the terminology of freedom—so that we persistently misdescribe the political forces arrayed against us.

It is thus important that we convey the impression to the world that we understand the difference between national liberation on the one hand, and the progressive brutalization of politics which is being carried on by the Soviets in the name of national liberation.

If I could use a term of nautical imagery, I would like to suggest that at the very least the Department of State's acceptance of this language is unseamanlike. It is prejudicial to good order and to semantic discipline. It reveals a carelessness that verges on negligence or, alternatively, it reveals a private agenda that needs to be further explored in public.

In summation, I believe we need not be ashamed to express our proprietary interest in the notions of self-determination and representative government. And it is essential to our own well-being in the world that other nations not be permitted to distort these concepts into a shape which would exclude our own democracy from the proper definition.●

THEFT AT CIA

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GOODLING. Mr. Speaker, I would like to bring to my colleagues' attention an article written by Michael Ledeen, which appeared in New York magazine, October 2, 1978.

Several days ago the President revealed, for the first time in history, that the United States uses satellites to monitor Soviet compliance with arms control agreements. The President's admission is significant, not so much for what it tells about American verification capabilities—I think I first read about these spy satellites in a Weekly Reader—but for what we can expect from the administration as they try to fatten us up for the SALT treaties. The President's statement is supposed to convince the people that because of superior American technology we will have no problem verifying an arms control agreement with the Soviet Union. After all, why would the Soviets cheat when they know we can watch their every move with our sophisticated spy satellites?

It comes as no surprise then, that the President's hope for our surveillance abilities ignored the recent theft of the manual describing our most valued satellite surveillance system and its subsequent sale to the Soviet Union. Confirmation of this report comes from evidence that the Soviets have already taken steps to foil this system's ability to gather intelligence.

All this suggests that our ability to verify a SALT agreement has been severely compromised, a possibility which has yet to be discussed by this "open" and "honest" administration. Now it should be pointed out that normally the political aspects of verification are more important than the technical. The questions about vertification tend to be greatest when they concern our attitude toward and response to Soviet violations. But this incredible intelligence leak makes us wonder whether we will ever even know about Soviet cheating, let alone be able to consider a response.

In addition, Ledeen calls our attention to a far more threatening possibility—that of Soviet infiltration of our intelligence community.

Mr. Speaker, I implore every Member of this Chamber to read this article.

A MOLE IN OUR MIDST?

(By Michael Ledeen)

Seven months ago, a low-echelon, 23-year-old Central Intelligence Agency officer allegedly stole a top-secret manual detailing the operations of the most important and complex American surveillance satellite and sold it to the Russians.

Although it deeply disturbed the United States intelligence community, this event seemed at first like an aberration, an isolated breakdown in what has traditionally been the most impenetrable security system in the West. Repetition seemed unlikely.

But since March there have been other events that when viewed jointly have instilled an even greater fear among some of America's high-level intelligence specialists and elected officials. The fear is that the United States administration and the CIA have possibly been infiltrated by one or more Russian agents.

Intelligence sources from a variety of countries stress that American security-leak problems may be merely coincidental, that the Russians may have made their discoveries through other means. Nonetheless, the best-informed people in this field—including more than one former CIA director—are privately saying that the responsibility for the United States' recent difficulties may arise more from the activities of a "mole" than from incidents related solely by a slim thread of chance.

In reaching the conviction that at least one foreign operative, or "mole," is at work within our government, the intelligence-community sources point to three events: the already mentioned alleged theft of the satellite manual; the defection of a CIA operative "in place" within the Rumanian government last July; and, most spectacularly, the formulation and results of a counterintelligence experiment run by the CIA to discover the possible existence of a foreign agent in a high position in the U.S. government.

SPY IN THE SKY

The case which first so unnerved the Western intelligence community was the reported theft of the manual describing the KH-11 satellite surveillance system. According to press reports, the manual was removed from the control room in CIA headquarters in Langley, Virginia, by William P. Kampiles. Kampiles, who was hired for less than $15,000 a year as a "watch officer," has allegedly told Federal Bureau of Investigation agents that he simply took the manual home from work one morning, following his night shift at Langley, and eventually sold the document to a Russian agent named "Michael" in Athens in early March.

The apparent theft of the KH-11 manual is of importance both to the United States and to the other NATO countries, for this system of surveillance was the basic means of gathering information on Russian strategic developments. The nature of the KH-11 system (which has often been mislabeled the "Big Bird" satellite) obviously remains a highly classified secret, and only its basic principles are known. It has at least three complicated sensing systems and lenses said to be so accurate that they can distinguish between civilians and military men from an altitude of 200 or 300 miles. Its infrared and multi-spectral sensing devices make it possible to locate large objects such as missiles, trains, or launchers, even at night, and to distinguish camouflage and artificial vegetation from real plants and trees. Also, the satellite is equipped with devices (such as side-looking radar) that can effectively "see" through overcast.

The KH-11 transmits its information in a digital computer code via instant communications links to earthbound stations, where it is reconstructed in visual form. These direct transmissions give it a big advantage over other spy satellites such as the "Big Bird," where discoveries are recorded on high-resolution film, periodically dropped back to earth in re-entry capsules, and snatched in midair from their descending parachutes by a giant Y-shaped hook on the nose of an air-force C-130 cargo plane. The risks of this approach are obvious.

Yet, despite the precision of the KH-11, it is vulnerable to deception. As long as the exact nature of the system remained secret, the United States could reasonably assume that the Russians were not capable of taking the precise steps necessary to falsify the information recorded from the satellite. But now that the Russians know enough about the resolution of the lenses, the nature of the infrared and multispectral photographic equipment on board, and the way in which the information is gathered and transmitted, they can take steps to "blind" the KH-11. In fact, what originally tipped security experts to the reported sale of the manual was Russian ground movements that seemed designed to thwart specific KH-11 capabilities. In any event, it may not be entirely accidental that at the same time the intelligence community was reeling from the alleged robbery, the Defense Department (which along with the CIA launched and operated the KH-11) announced that it would soon build a new version of the U-2 spy plane.

The Russians' knowledge about the KH-11 is considered so grave that one former high-ranking intelligence officer said it was the most serious espionage disaster since the defection of two National Security Agency officials in 1960. Curiously, the two—William Martin and Bernon Mitchell—who went over to the Soviet Union nearly two decades ago, carried similar information dealing with the nature and location of American sensors used to monitor Soviet communications.

The most significant implication of the KH-11 theft, say knowledgeable officials, is that the ability to obtain information about Russian strategic developments has been

compromised so seriously that it is now doubtful that America could reasonably expect to verify Soviet compliance with a possible strategic-arms-limitation treaty. Although proponents of SALT (the treaty) argue that there is litle harm in the Russians' knowing about America's monitoring abilities, intelligence experts take a very dim view of the situation.

Indeed, Senator Birch Bayh (D., Ind.), the chairman of the Senate Select Committee on Intelligence, has suggested the research and development of an even more advanced, less vulnerable, and, it is hoped, secret system, both to ensure SALT verification and to provide reliable intelligence during crisis confrontations.

Yet, aside from these purely technical matters, there remains the fear that this intelligence coup was not merely the apparent work of a low-level employee operating on his own but part of a pattern that points to penetration at a far higher level.

STOLEN QUESTIONS

The Kampiles case still contains many unanswered questions. As Cord Meyer Jr., a former CIA official now associated with conservative causes, put it in a recent article in the Baltimore Sun, "Why was one so young, untrained, and untested assigned to work in the operations center through which the most sensitive information flows?"

This is standard procedure. The operations center works through the night, and the CIA has long employed junior officers for such tasks, as older employees are reluctant to work the night shift. But Kampiles himself hardly seems to meet the criteria for someone in such a position: He reportedly wished to work in operations but is said to have lacked the aptitude. Some sources who have examined the case say that there had already been suggestions that Kampiles was a loner and should not have been given such a delicate task. In any case, he was in the operations center, he did have access to the KH-11 manual, and he has since reportedly told the FBI that he passed the manual to his Russian contact in exchange for $3,000 "on or about March 2, 1978."

But there appear to be problems with Kampiles's behavior following the alleged transfer of the manual.

Upon his return to America from Athens, he reportedly wrote a letter to a former colleague at the CIA saying that he had received money from the Russians and had been asked to obtain information. Should he, he asked, pass "disinformation" to the KGB? To intelligence analysts the letter actually seemed to be a confession of guilt.

The CIA has long known that the KGB (the Russian intelligence network) does not pay "on spec," that it only pays for services actually rendered. So the Kampiles letter was a red flag: It told the CIA that he had apparently already committed espionage. They then, we are told, initiated a search to discover what was missing, and Kampiles was arrested on August 17 and charged with espionage and theft of government secrets.

It may be that Kampiles was ignorant of this bit of intelligence lore, but those with long experience in the business say that many signs suggest that the KGB instructed him to write the letter, knowing that it would lead to his arrest. Yet why would the Russians "burn" an agent who had reportedly given them their greatest intelligence coup in nearly two decades? In short, the fear is that Kampiles was sacrificed to provide the United States with a plausible explanation for the loss of its secrets and to protect a higher-placed agent, a "mole."

The notion that the Soviet Union has infiltrated the CIA is what former agency chief Richard Helms once called "the constant nightmare of every director." He added last week that "the Kampiles case raises the question of whether or not there has been infiltration of the United States intelligence community or government at a significant level."

The CIA was already aware of a major leak concerning the KH-11 well before the Kampiles letter, for there was a top-secret security check going on in March to find the source of the leak. The timing is of paramount importance; if the CIA was already looking for the source of the leak in March, then either Kampiles apparently gave the Russians the information before March 2 or the KGB had already obtained it from another source. Some Washington sources believe that the latter happened.

If this is true, there is still a Russian agent somewhere in the administration or the intelligence community.

THE GREAT ESCAPE

Ion Pacepa, the Rumanian vice-minister, went to West Germany last July to negotiate a venture with the VFW-Fokker Company for the manufacture in Rumania of the VFW 614 aircraft. By the end of the month, Pacepa had disappeared from his Cologne hotel. He has not since been seen in public.

Actually, Pacepa had long worked as a CIA agent in the Rumanian intelligence system and had been an important source of information, particularly regarding Rumanian and Russian espionage in Western Europe.

According to a Reuters dispatch at the end of August, Pacepa had "revealed that a Communist spy is active at the highest levels of the West German establishment." This so-called revelation led to an emergency meeting of the Bundestag in late August in order to vote to lift parliamentary immunity from a deputy suspected of being the agent in question. Other rumors suggest that Pacepa was the source of a spectacular article in the London *Daily Telegraph* this summer that accused a high-ranking member of the governing Social Democratic Party of preparing plans leading to the withdrawal of West Germany from the NATO alliance.

But this is only part of the Pacepa story. According to intelligence sources in Washington, Pacepa insisted upon "coming over" after he discovered that he had been compromised. The Rumanians had learned about his CIA connection, and his arrest was imminent. Where had the leak come from? As in the Kampiles case, it is conceivable that Pacepa had made a mistake and inadvertently revealed his identity to the Rumanians or the Russians. But there was good reason to fear that information on Pacepa's role had come from Washington: Pacepa was working for the CIA. Did someone within the American intelligence community or the administration advise the KGB?

Pacepa is only one of many CIA agents in Eastern Europe to have been compromised in recent months. Indeed, in the last year or two several American agents operating under "deep cover" in the Soviet Union have been compromised and eliminated.

No apparent explanation exists for these intelligence coups; we only know that the agents are no longer functioning. Pacepa was luckier. He found out in time that he was in jeopardy and was able to escape to the West.

THE MOLE HUNT

The CIA has long lived with the possibility that a major penetration might someday occur. According to former directors William Colby, George Bush, and Richard Helms, the agency is itself structured in such a way as to prevent this from happening and to severely limit the damage should such a penetration actually take place. Yet Colby eliminated much of this compartmentalization, and security measures are, in the final analysis, only as good as the people who apply them and submit to them.

What this essentially means is that the agency can maintain tight security only if morale is excellent. At the moment, morale in the CIA is at an all-time low.

One former high-ranking CIA official says that he sometimes thinks he is living through a sort of "twilight of the gods," with the agency in a grave crisis, the old guard in either disrepute or failing health, and the Congress and the public more critical than sympathetic. This, therefore, is an ideal time for the KGB to step up its attempts at infiltration, both inside and outside the CIA. It is no accident that there have been so many cases of reported espionage in the headlines in the past year, including the Kampiles case, the attempt to obtain naval secrets in New Jersey, the conviction of two Americans who sold satellite secrets to the Russians, and the collaboration of a United States Information Agency employee with a foreign citizen to pass classified documents in Washington.

Predictably, in the midst of all this, the CIA has attempted to test the possibility that a "mole" is operating in the American government.

Following the discovery of the KH-11 theft, CIA counterintelligence designed a controlled, top-secret experiment. Documents that ostensibly contained highly sensitive information were circulated among a small number of top government officials. Included within the papers was some information which, if transmitted to the Soviet Union, would in all probability provoke a response which could be monitored by counterintelligence.

Shortly after the documents were distributed, the predicted response from Russia occurred. What this meant was that someone high in the U.S. government had purposely—or perhaps inadvertently—passed what was believed to be secret data to the Russians.

THE NEXT MOVES

No one today knows whether there is a "mole" in Washington or Langley, but the events of recent months have grim implications for the ability of the United States to conduct foreign policy. Strategic planning depends upon a nation's ability to gather information about clandestine foreign activities, and the loss of agents and top-secret information about our satellite technology has already greatly reduced America's information-gathering apparatus.

This throws into question both the verification of future nuclear and military agreements and the capacity of the United States to react to an international military crisis.

Furthermore, the recent security ruptures within the intelligence community seriously reduce the ability of the CIA to recruit and operate agents in the field. Already concerned about the continuous assault on past sins, the agency now knows that prudent people think long and hard about the safety of working for the CIA; as Ion Pacepa and others would testify, it is an increasingly perilous business. Perhaps it is becoming more difficult to determine just precisely who the enemies are.●

AUTOMATIC TRANSFER SYSTEMS

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ANNUNZIO. Mr. Speaker, banks are taxing their imaginations to come up with catchy names for their new automatic transfer services, but they all spell the same thing—consumer ripoff. Although advertised as just another of the banking industry's so-called consumer conveniences, this new system will have a major impact on how people bank, and on the competitive equality of different financial institutions. The service is supposedly designed both to protect people from the costs and embarrassment associated with overdrafts, and to allow savers to come as close as pos-

sible to earning interest on demand deposits, which is currently forbidden by law. But in fact, the ATS does no such thing except for those who maintain very high balances in their acounts. For the average saver, the new system is likely to end up costing more than the price of maintaining two unlinked accounts, and provides no real protection from overdrafts. It is fitting that these plans will go into effect the day after Halloween, a time when people disguise themselves as something they are not.

The confusion about automatic transfer services is revealed by the comments received by the Federal Reserve Board earlier this year when the regulation permitting ATS was under consideration. Individual respondents overwhelmingly supported the idea, believing it would be a convenient service which would save money and avoid the embarrassment of accidental overdrawing of their checking accounts. But what is the real story?

For all except those maintaining large deposits, the service fees being instituted by various banks run as righ as $5 per month, which will exceed the interest accrued by keeping a zero balance checking account and having money automatically transferred from a savings account whenever a check is drawn. As well as instituting these monthly fees, the banks are planning to assess charges for each transfer of funds. The banks, as part of their acknowledged effort to rid themselves of small depositors, are placing the burden on those who can least afford to bear it.

Another feature of the new service plans is the method of shifting funds from a savings to a checking account. Transfers are made in increments as large as $100, rather than a sum equivalent to the amount of a check. Thus, even if an account holder writes a $10 check, 90 extra dollars are placed in the demand account, and are no longer eligible to earn interest. This method also makes it difficult for people to keep track of how much money they have in their different accounts.

Overdraft protection is another of the myths perpetrated by the banks. Although savers will be covered for overdrafts on their checking accounts, nothing prevents them from writing a check for more than is in their combined savings-checking accounts. Savers are much better protected by the automatic loan programs offered by banks today.

The new system also threatens to create a competitive disadvantage for savings and loans, which are already struggling to meet rising mortgage demands, and small banks. Most thrift institutions are not permitted to offer checking accounts. Their inability to provide automatic transfer services means that many people may be drawn away from savings and loan institutions in order to take advantage of this dubious customer service. This could have a crippling effect on the Nation's housing market, which is dependent on the health of the savings and loan industry. The advent of the automatic transfer systems also threatens the viability of small banks which can barely afford to provide the service, but must do so to remain competitive.

Still another danger lurks behind the seemingly innocent facade of automatic transfers. This new service invites carelessness on the part of consumers, who will be enticed to overdraw on their checking accounts, secure in the knowledge that they have savings which will back them up. Furthermore, the traditional conception of a savings account as a means of preserving funds for the future may be replaced with the idea of such accounts as simply being the closest one can come to earning interest on demand deposits. Automatic transfer systems are not just another customer service—they can profoundly alter the way Americans bank.●

PROVIDING INCREASED OPPORTUNITIES FOR PENSION PORTABILITY IN PRIVATE AND PUBLIC SECTOR EMPLOYMENT AND HELPING TO ASSURE ADEQUATE RETIREMENT BENEFITS FOR THE ELDERLY

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. HANNAFORD. Mr. Speaker, employer pension plan participants in both the private and public sectors are currently prohibited from making tax-deductible contributions to an IRA (individual retirement account). The assumption, of course, is that such employees by virtue of their participation in an employer pension plan will actually receive pension benefits upon retirement. However, it is obvious that this assumption has not proven to be completely accurate. There are mobile workers, for example, who may participate in employer plans but never participate long enough to become vested; that is, become eligible for a pension benefit.

Many hearings and studies have been conducted on the need for greater pension portability systems. It is also apparent that sweeping changes in this area will be extremely costly and that implementation would require some additional Federal manpower. The fact remains that we must do something to protect individuals from situations under which pension benefits are lost forever without alternative means of providing for retirement income.

The legislation that I am introducing today for study by the Ways and Means Committee with the hope of positive action early next year would help ameliorate the present condition faced by mobile employees who never become fully vested in employer plans. Specifically, my bill would permit such individuals in the private and public sectors to contribute to IRA's. The tax-deductible contribution to the IRA for a taxable year would be the lesser of 15 percent of annual income or $1,500 ($1,750 in the case of an eligible individual with a nonworking spouse). Once the employee becomes fully vested, my bill would allow continued contributions to the IRA but would limit such contributions to the lesser of 5 percent of annual income or $500.

Such eligibility would be an important step toward portability of pension plans, but significant also in that workers would be given an additional option of saving for retirement life. This option would be completely voluntary for all workers. While this approach will reduce tax revenues to the U.S. Treasury, it is far simpler and perhaps even less costly than organizing a new Federal bureaucracy and mandating additional pension fund regulations to promote portability and earlier vesting.

Another facet of the approach I suggest which deserves further study is its potential for relieving pressures on the social security system to provide retirement income benefits. That is, if individuals were given incentives, via IRA's, for their own retirement, reliance on social security may be reduced.

A corollary to assuring that individuals will have sufficient retirement benefits is to provide that what seems sufficient today does not become inadequate tomorrow because of the eroding impact of inflation. In this connection, my bill amends the tax credit for the elderly by: First, further increasing the credit base for individuals from $2,500 to $3,500 (from $3,750 to $5,000 in the case of married couples filing a joint return, and from $1,875 to $2,500 for married couples filing separate returns); second, indexing the credit bases listed above to account for increases in the cost of living; and third, raising the adjusted gross income limits from $10,000 to $25,000 for joint returns and from $7,500 to $20,000 for single returns.

I believe that these changes are necessary especially in light of the soaring costs of housing, transportation, fuel, and food which many of the Nation's retirees can no longer afford based on pensions that had been planned years ago.

I encourage my colleagues to review this proposal and hope that proposals of a similar nature will receive full consideration in the next year.●

MIA LIVE SIGHTINGS—IX

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, before the end of this session, I want to remind all of the Members of this House that reports from Vietnamese refugees on Americans held in Southeast Asia continue to come to our attention. What are we doing to investigate these sightings? I cannot determine what is happening with this awful trajedy. I have two more items on the subject: One an article in the Vietnamese language journal, "Trang Den" and the other a letter from another refugee. I include these items at this point in the RECORD:

COMMUNIST VIETNAM STILL HOLDS ONE AMERICAN COLONEL AND TENS OF PRISONERS AT HA NAM NIMH PROVINCE

Before the U.S. Mission's visit to Vietnam, led by Leonard Woodcock, President of the U.S. Auto Workers Union, in February 1977, Communist Vietnam had high hopes for a normalization of diplomatic relations with the United States. For this reason, they have organized study sessions in order to explain

to their cadres and to the people the need to normalize relations with the United States.

In those study sessions, big empty slogans were used such as "Great victory", "U.S. Imperialist fleeing", "Soviet Socialism", "World admiration", "U.S. to pay war reparations", "Normalization of diplomatic relations from a strong position" etc. Mai Chi Tho, director of the Police Directorate, Deputy Secretary of the Party (Ho Chi Minh City), Deputy Chairman of the Administrative Committee (Ho Chi Minh City), the powerful number 2 man in South Vietnam, paid a surprise visit to one of these sessions reserved to former officials of the old regime. During this visit he said that the government was negotiating for a normalization of diplomatic relations from a strong position. He added: "The weakness of the United States lies in the problem of United States prisoners. We are holding United States prisoners. Therefore, in any negotiations, we are holding the trump card."

The Communists are clever and cunning. They never keep their promises. After the Paris Accord was signed, the Republic of Vietnam was forced by the United States to release all Communist prisoners. As for the Communists, they held back a number of our people and not until after April 30, 1975, did they slowly release our soldiers captured since 1970–1972.

Therefore, through Mai Chi Tho's disclosure, we believe that, although the Communists have categorically stated that they have returned all U.S. prisoners as well as have supplied all information regarding MIAs, they are in fact still holding a number of United States prisoners to be used as a prey for future U.S. missions.

On account of this reason, we have used our best efforts to seek help from friends whose relatives are Communist cadres in order to check on this matter for us.

The first piece of information came from prisons' officials (Party members coming to South Vietnam from North Vietnam). They said that they are still holding a number of United States prisoners in North Vietnam. There are about several scores of them. Before, they were held in a camp near the Sino-Vietnamese border. They are now moved to near Hanoi, probably to Ha Nam Ninh City.

Later on, our information was confirmed:

1. Nam Ken, a Communist Colonel, almost like Mai Chi Tho, told his aunt: "Our Party is very clever. We did not return all United States prisoners for fear we might lose our advantageous position."

2. Tu Than, former chief of the Communist Police Bureau, Rach Gia province, presently police inspector of the City, has revealed to his relatives that: "We are still holding a number of United States prisoners in North Vietnam. The highest ranking prisoner is a Brigadier General (or Colonel?) captured at Ban Me Thuoc." (A colonel of the Republic of Vietnam armed forces said this could be correct because it had been reported that a United States advisor to a Division in Ban Me Thuoc had been captured.)

3. Professor Nguyen Van Chi, Chairman of the United People Front, Ho Chi Minh City (Chairman of the now defunct National Liberation Front) while complaining to a close friend about the gloomy fate and the incompetency of the leaders of the National Front for the Liberation of South Vietnam, said that: "Our Party is still holding a number of United States prisoners in North Vietnam."

The source of our information is correct and reliable. It comes from the people who have themselves heard from the Communist leaders.

Therefore, we are certain that the Communists are still holding a number of United States prisoners, although we do not know the exact number and whether the camp is at Ha Nam Ninh or not.

We believe that the United States authorities, especially the CIA must have better sources regarding this information.

What surprises us is why the U.S. authorities do not talk about it. Do they keep silent because they do not want to admit that they have been cheated by the Communists, or have they already forgotten their sons, those who have given their lives for the defense of freedom in South Vietnam. They now have to accept a slow death with humiliation and suffering in the inhuman Communist prisons. Day after day, they are hoping for a miracle that could save their lives.

It is so useless to fight communism with empty criticism or loud demonstrations for human rights.

While writing this article, we hope that (being not a United States citizen to demand) President Carter would have positive actions in order to save those American heroes, instead of patiently waiting day after day for the return of the remains of the MIAs.

We also hope that President Carter would also give some thought about the hundreds of thousands of military personnel and officials of the Republic of Vietnam, who were at one time allies of the United States, and who are now held in concentration camps, suffering the same fate as the U.S. prisoners are suffering in Communist prisons.

HUYNH TRUNG CHANH,
Trang Den.

Translated by Nguyen Hoa, Descriptive Cataloging Division, 20 Sept. 1978.

MAY 30, 1978.

MY DEAR SISTER: I am replying right away upon receiving your letter.

I am very happy to hear from you, and like to hear from you more and more. I am in need of speaking our language, thinking of our country and our people. I have so much respect for you, a woman who lives in a foreign country and tries so hard to do something for her own country. Out of that respect I am wishing you the best of everything.

I would like to tell you what I heard and saw.

I am an employee (employed after the fall of Saigon), working in a big harbor where I happened to hear all the tricks, plots, and corruptions of the Communists. I have a brother who got caught in the battle at the Vietnam-Laos border on April 14, 1971. Since then my family thought that he was already dead. Surprisingly, after the fall of Saigon, a friend of his, who also got caught in the battle, came back from the prison in the North and disclosed all the secrets in the prison. Out of doubts we asked some acquaintances in the North to search for my brother. He is still alive and imprisoned in the North.

Our family wonder so much about the promise of the Northerners. They promised to release, after the reunion of the country, all the prisoners. The fact is that he is not allowed to send a letter to us nor could he contact to tell us where he is. That is the way they treat their own people. I could imagine how worse they do to their enemies, the Americans. In addition to that, some people from the North told us that they saw a lot of Americans in the North. They saw the Communists taking the Americans to make the movies, especially war movies.

I saw a movie some time in April 1977, and I don't remember the date.

The letter is long enough, next time. Until then my best regards to you.

P.S.—From this letter on I would like you not to reveal my name, my age, and my letters. I hope you understand.

I just got the news from Taiwan and Philippines that my brother was taken to re-educational camp, and no news from him have we gotten since then. My old mother becomes blind for crying so much for the departure of her son. That is enough for you to see how hurt I am right now. I want to kill myself, yet I know I have to live; live to fight for those who are still in the prisons of the Communists.●

MONTHLY LIST OF GAO REPORTS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The August 1978 list includes:

NATIONAL DEFENSE

Inadequate Methods Still Used to Account for and Recover Personnel Costs of the Foreign Military Sales Program. FGMSD–78–47, July 25.

The Department of Defense Continues to Improperly Subsidize Foreign Military Sales. FGMSD–78–51, August 25.

Budget Authority for Foreign Military Sales is Substantially Understated. PAD–78–72, July 27.

Department of Defense is Overcompensating Its Foreign Employees. FPCD–78–64, August 2.

Progress Made and Improvements Needed in Developing a Containerized Ammunition System. LCD–78–222A, August 3.

Full Potential to Achieve Savings by Investing in Fast Payback Productivity Enhancing Capital Equipment Not Realized. FGMSD–78–44, July 25.

LETTER REPORTS

Review of alleged quality assurance deficiencies in Minuteman silos at Malmstrom Air Force Base, Montana. PSAD–78–124, July 7.

The Army plans to convert certain base support functions at Fort Gordon, Georgia, from in-house to contract operations. LCD–78–320, July 27.

To make needed program assessments, the Navy should accurately measure benefits realized from the various management programs. LCD–78–230, August 9.

The Arms Export Control Act provides the legal basis for the replacement cost for machine guns shipped after June 1975. LCD–78–432, August 28.

INTERNATIONAL AFFAIRS

U.S. Foreign Relations and Multinational Corporations: What's the Connection? PAD–78–58, August 23.

U.S. Economic Assistance for Israel. ID–78–31, August 18.

GENERAL SCIENCE, SPACE, AND TECHNOLOGY

A Second Launch Site for the Shuttle? An Analysis of Needs for the Nation's Space Program. PSAD–78–57, August 4.

LETTER REPORTS

Reporting accuracy of research and development funding data to the National Science Foundation. PSAD–78–133, August 9.

ENERGY

The Advance Payment Program: An Uncontrolled Experiment. EMD–78–47, July 10.

Need for Greater Regulatory Oversight of Commercial Low-Level Radioactive Waste. EMD–78–101, August 16.

Region at the Crossroads—The Pacific Northwest Searches for New Sources of Electric Energy. EMD–78–76, August 10.

Questionable Suitability of Certain Salt Caverns and Mines for the Strategic Petroleum Reserve. EMD–78–65, August 14.

LETTER REPORTS

The Department of Energy should provide the Congress with all estimated costs associated with the Tokamak Fusion Test Reactor project. PSAD–78–129, July 10.

Is there a need for uniform oil and gas accounting standards? EMD–78–100, August 4.

NATURAL RESOURCES AND ENVIRONMENT

An Overview of Benefit-Cost Analysis for Water Resources Projects—Improvements Still Needed. CED–78–127, August 7.

Improved Project Authorizations and Agency Practices can Increase Congressional Control of Water Resources Projects. CED–78–123, July 11.

Environmental Effects of Airport Development: Better Assessment Needed. CEDX78–156, August 22.

LETTER REPORTS

There is a continued need for a clearinghouse on environmental carcinogens. HRD–78–143, July 26.

Are long-range adverse health effects from exposure to the herbicide Agent Orange possible? CED–78–158, August 16.

COMMERCE AND HOUSING CREDIT

The Role of Field Operations in the Federal Communications Commission's Regulatory Structure. CED–78–151, August 18.

LETTER REPORTS

Listings of U.S. Travel Service contracts from October 1, 1977 through June 30, 1978. CED–78–161, August 24.

COMMUNITY AND REGIONAL DEVELOPMENT

Housing Abandonment: A National Problem Needing New Approaches. CED–78–126, August 10.

Management and Evaluation of the Community Development Block Grant Program Need to be Strengthened. CED–78–160, August 30.

Complications in Implementing Home Weatherization Programs for the Poor. HRD–78–149, August 2.

The Community Development Block Grant Program: Discretionary Grant Funds Not Always Given to the Most Promising Small City Programs. CED–78–157, August 31.

LETTER REPORTS

There is no evidence indicating the decisionmaking process resulting in allocation and cancellation of funds for HUD's elderly housing unit in Harrisburg, Pa., was amiss. CED–78–150, July 17.

The Farmers Home Administration emergency disaster program should be made more equitable and efficient. CED–78–136, August 18.

EDUCATION, TRAINING, EMPLOYMENT, AND SOCIAL SERVICES

Federal Employment of Handicapped People. FPCD–78–40, July 6.

Problems and Outlook of Small Private Liberal Arts Colleges. HRD–78–91, August 25.

Poor Administration of the 1977 Summer Program for Economically Disadvantaged Youth in New York City. HRD–78–123, July 26.

Federally Sponsored Research at Educational Institutions—A Need for Improved Accountability. PSAD–78–135, August 18.

LETTER REPORTS

Impoundment of $500 million on budget authority for the Department of Labor Employment and Training Administration. OGC–78–13, August 4.

The Department of Labor's revisions of certification regulations for recruiting foreign temporary workers were clarified. HRD–78–156, August 15.

HEALTH

Lack of Authority Hampers Attempts to Increase Cosmetic Safety. HRD–78–139, August 8.

Progress and Problems in Improving the Availability of Primary Care Providers in Underserved Areas. HRD–77–135, August 22.

LETTER REPORTS

Audit of costs charged by the National Academy of Sciences to a Veterans Administration contract for health care systems. HRD–78–137, July 14.

Review of operation of the Occupational Safety and Health Review Commission. HRD–78–144, July 18.

How adequate are investment returns on for-profit hospitals allowed under Medicare? HRD–78–152, July 31.

INCOME SECURITY

Replacing Missing Supplemental Security Income Checks—

Recipients Waiting Longer Than Necessary HRD–78–28, August 22.

LETTER REPORTS

Impact of newly arrived aliens on supplemental security income payments in California, Florida, Illinois, New Jersey, and New York. HRD–78–136, July 18.

ADMINISTRATION OF JUSTICE

FBI has Improved Its System for Handling Allegations of Improprieties and Misconduct Against Its Employees. GGD–78–92, August 11.

Bank Robbery—The Federal Law Enforcement Role Should Be Reduced. GGD–78–87, August 18.

The Danbury Prison Fire—What Happened? What Has Been Done to Prevent Recurrence? GGD–78–82, August 4.

IRS Seizure of Taxpayer Property: Effective, But Not Uniformly Applied. GGD–78–42, July 31.

A Compilation of Federal Laws and Executive Orders for Nondiscrimination and Equal Opportunity Programs. HRD–78–138, August 2.

GENERAL GOVERNMENT

A Management Concern: How to Deal With the Nonproductive Federal Employee. FPCD–78–71, August 10.

What Rules Should Apply to Post-Federal Employment and How Should They Be Enforced? FPCD–78–38, August 28.

How Long Does it Take Conrail to Process Protected Employees Claims Under the 1973 Regional Rail Reorganization Act? CED–78–138, July 31.

A Look at the Prohibition on Using Commercial Travel Agents. LCD–78–219, August 8.

Contemplated Legislation to Provide Telecommunications for the Deaf. LCD–78–118, August 14.

New Senate Office Building: Escalated Costs and Delayed Completion. LCD–78–333, August 14.

Examination of Financial Statements of the National Credit Union Administration for the 15 Months Ended September 30, 1977. FOD–78–2, August 14.

Government Field Offices Should Better Implement the Freedom of Information Act. LCD–78–120, July 25.

Import Duties and Taxes: Improved Collection, Accounting, and Cash Management Needed. FGMSD–78–50, August 21.

Progress in Improving Program and Budget Information for Congressional Use. PAD 78–78, August 29.

Audit of the Senate Recording Studio Revolving Fund for the Fiscal Year Ended March 31, 1978. GGD–78–86, August 3.

Audit of the House Recording Studio Revolving Fund for the Fiscal Year Ended March 31, 1978. GGD–78–90, August 8.

Audit of the Minority Printing Clerk, House of Representatives, for the Fiscal Year Ended September 30, 1977. GGD–78–89, August 9.

Audit of the Majority Printing Clerk, House of Representatives, for the Fiscal Year Ended August 31, 1977. GGD–78–88, August 9.

Examination of Records, House of Representatives Finance Office for the 15-Month Period Ended September 30, 1977. GGD–78–94, August 14.

LETTER REPORTS

How the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System have carried out GAO recommendations to improve their financial disclosure systems. FPCD–78–54, July 14.

What is the cost of using GSA vehicles instead of privately owned vehicles for official business? LCD–78–238, July 26.

Is the Postal Service's decision to terminate the Railway Post Office operations reasonable? Should it make greater use of Amtrak? GGD–78–97, July 26.

Allegations about an Immigration and Naturalization Service contract for microfilming services. GGD–78–83, July 28.

Alleged unfair promotion practices and employee harassment at the Fargo, North Dakota, post office. GGD–78–103, August 7.

Changed conditions in ocean shipping practices warrant revising the justification for using foreign ships. LCD–78–231, August 18.

The Federal Trade Commission should clarify and restate its policy on use of injunctive authority. HRD–78–161, August 24.

GENERAL PURPOSE FISCAL ASSISTANCE

Will Federal Assistance to California be Affected by Proposition 13? GGD–78–101, August 10.

The Monthly List of GAO Reports and/or copies of the full texts are available from the U.S. General Accounting Office, Distribution Section, Room 4522, 441 G Street, N.W., Washington, D.C. 20548. Phone (202) 275–6241.●

TUITION ADVANCE FUND SUPPORTED

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. OTTINGER. Mr. Speaker, few issues have come more insistently to the attention of the Congress this past year than the question of how to meet the very high tuition bills that face individuals who wish to attend college. The current system is a mess. We need a new and better mechanism. I believe that the far-reaching proposal developed by the president of Boston University, John Silber, which he has called the "Tuition Advance Fund" is a possible answer to the problem.

There are major advantages to the students, parents, and taxpayers of America in the tuition advance fund (TAF) concept, which has been introduced in the House by Representative MICHAEL HARRINGTON.

First, it meets the real needs of the student. It will cover the cost of tuition plus up to $1,000 in related education expenses with a maximum annual advance of $5,000. Thus, it will make education available to all who qualify without regard to financial matters.

Second, the tuition advance fund will relieve the crushing burden on the parents who are frequently unable to raise the enormous sums required to meet the current tuition bills. This is particularly true of those families that may have more than one child in college at any one time.

Third, all of the funds advanced will be returned to the fund by means of a payroll withholding system. Thus, in the long run, the TAF plan is not only comprehensive, it is also economical.

Newsday, in its editorial of August 25, 1978, indicated that the Congress "might

do everyone a favor by considering the tuition advance fund." I agree. I hope that the House will take a look at this exciting and innovative legislative concept. It is simple; it is far-reaching; and it will work.

The editorial from Newsday follows:

WHY NOT PAY FOR COLLEGE OUT OF FUTURE INCOME?

President Carter has threatened to veto a bill allowing tax credits for school tuition, and well he should; his own plan to increase grants and loans to college students makes a lot more sense. But a tuition advance fund might be even better.

In a sad display of irresponsibility last week, the Senate actually approved tuition tax credits and higher grants and loans. At least the House made a choice, even if it was the wrong one: The aid bill Carter supports was put in cold storage there by Rules Committee chairman James Delaney (D-Queens).

The House has voted tax credits ranging up to $250 a year for college students and $100 for private elementary and secondary school pupils by 1980. The Senate's bill would allow larger credits but confine them to college tuition, starting at $250 a year now and rising to $500 in 1980.

In either case the cost to the federal treasury would be great—an estimated $1.7 billion a year in the Senate bill and $1.2 billion for the House version. Yet the relief would be modest for families that confront college costs of thousands of dollars a year. The Carter-supported bill sponsored by Senator Claiborne Pell (D-R.I.) and Representative William Ford (D-Mich.) would be an improvement, but it wouldn't erase the flaws in the present student aid program, and it would cost about $1.5 billion annually.

Congress and Carter might do everyone a favor by considering the tuition advance fund proposed by Boston University president John Silber. Under TAF, an education trust fund would be established to advance college sophomores, juniors and seniors the cost of tuition plus $1,000 in education-related expenses such as room and board—up to a maximum of $5,000 annually. The advance, plus a 50 percent surcharge, would be repaid by the student through payroll withholding of 2 percent of adjusted gross income a year. It would be collected by the Internal Revenue Service and protected from default and bankruptcy, which pose persistent problems in the current student loan program.

While the initial cost would be higher than those of the other proposals, Silber estimates that the fund would become self-sustaining in about 20 years. It would also, as he points out, "introduce the old-fashioned American principle that the person who receives the benefit is the one who ought to pay for it." TAF certainly merits a closer look in Washington.●

CONGRESSIONAL OVERSIGHT IMPROVEMENT ACT

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GILMAN. Mr. Speaker, Congress is not only responsible for making our Nation's laws, it is responsible for assuring that the implementation of such laws is undertaken in accordance with congressional intent in authorizing such laws.

For study purposes and in preparation of the forthcoming session, I am today introducing legislation, the Congressional Oversight Improvement Act, designed to enable Congress to more effectively fulfill its overall legislative responsibility.

We hear much these days that Government has become too large and too complex for adequate legislative oversight, that Congress has experienced a serious problem in monitoring the administration of those programs it has authorized. This line of reasoning concludes that the result of this development are programs not accomplishing their objectives, people going unserved, and taxpayers dollars being wasted. Faced with an uncertain economy, it is clearly imperative that we correct this situation by providing cost-effective programs to deal with the critical problems facing our Nation.

The legislation I am proposing amends the Legislative Reorganization Act of 1946 and provides Congress the necessary means to assess the implementation of those laws it has authorized. The bill requires that each report accompanying a bill approved in committee and referred to the House floor for consideration, contain within its summation of the legislative history of that bill, a congressional oversight statement. This statement would identify those Federal agencies administering those programs authorized and contain an outline of the manner in which the committee will exercise its oversight responsibility for the program specifically mandated by that bill.

In preparing this oversight statement, the committee shall appropriately enlist the assistance of the four key congressional support agencies: General Accounting Office (GAO), Congressional Research Service (CRS), Congressional Budget Office (CBO), and the Office of Technology Assessment (OTA).

Mr. Speaker, a February 1977 report of the Senate Committee on Government Operations concluded that—

Congressional committees should take increased advantage of GAO's expertise by . . . requesting GAO's assistance in drafting a statement of goals and objectives in new legislation, so that evaluation of agency activity might be easier.

As Congress' most valuable oversight support agency, charged with analyzing and auditing the programs, activities, and financial operations of Federal departments and agencies, GAO is an especially key position to define ways to measure to what degree programs are achieving their goals and objectives. However, the Senate report points out:

To date committees have not been clamoring for that type of GAO help.

The report also charged that GAO's current efforts are often out of touch with those areas of specific and topical interest to congressional committees, and that GAO reports often suffer from an inordinate production time. Indeed, as an Assistant GAO Director recently stated, vital to GAO's ability to increase the effectiveness of its oversight services to Congress, is the agency's need "to discern congressional needs and priorities early and quickly."

However, as a House Select Committee on Congressional Operations report of June 22, 1978 observed:

Although GAO officials are encouraged to consult congressional sources in planning the agency's self-initiated work, no systematic or formal procedure has been developed to solicit the views of committees, Members, or staffs for this purpose, a situation which tends to limit GAO's responsiveness to congressional needs and may reduce the ultimate usefulness of some of its self-initiated studies.

I am confident that my proposal requiring committees to enlist the assistance of congressional support agencies, such as GAO, preparing an oversight statement identifying particular aspects of an authorized program which the committee should evaluate, will produce a systematic, formal procedure whereby energies of congressional support agencies can better be attuned to the oversight responsibilities of the congressional committee.

The second main feature of this legislation would enable Congress to better assess the scope and impact of regulation issued by Federal agencies, We are all well aware of the onerous burden Federal regulations impose upon our Nation's taxpayers, private industry, schools, and other groups and organizations. Federal regulations written in incomprehensible jargon, affecting those to whom they apply in ways never envisioned by Congress pose a serious threat to the integrity of congressional legislative powers. By requiring executive departments and agencies to report back to the committee from which the legislation originated, what the impact of these regulations is and how it squares with the law's objectives, we will allow Congress to regain legislative authority now lost to executive departments and agencies.

Moreover, Congress, upon its findings that such reports assessing those programs it has authorized and those program regulations issued by administering agencies are inadequate or otherwise inappropriate, shall be empowered to direct GAO to mobilize a strike force geared to evaluating such programs and regulations, and the reasons for agency noncompliance with demands by Congress for such reports.

Mr. Speaker, passage of this measure will allow our Nation's elected representatives to fulfill their complete legislative responsibility which includes not only enacting responsible legislation, but also assuring that such programs are administered successfully in a cost-effective manner assuring the most efficient use of our hard-earned tax dollars.

Accordingly I urge my colleagues to support this legislation, and I include the full text of this bill at this point in the RECORD:

H.R. —

A bill to amend the Legislative Reorganization Act of 1946 to improve the oversight capabilities of the standing committees of the Senate and of the House of Representatives

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Congressional Oversight Improvement Act".

SEC. 2. The Congress finds that—

(1) the Congress is responsible for effectively evaluating the implementation of those programs which have been legislatively au-

thorized and those programs developed as a result of such legislative authorization;

(2) the responsibility of the Congress to effectively evaluate such implementation is imperative if the above programs are to fulfill the intent of legislation from which these programs are established or originate; and

(3) the ability of the Congress to expeditiously and prudently fulfill its above responsibility can best be achieved through a systematic, formal procedure developed with the assistance of the congressional support agencies.

SEC. 3. Section 136 of the Legislative Reorganization Act of 1946 (2 U.S.C. 190d) (relating to oversight by standing committees) is amended by redesignating subsections (b) and (c) as subsections (c) and (d), respectively, and by inserting after subsection (a) the following new subsection:

"(b)(1) If any Government agency within the executive branch finds that the way in which any law is being administered, or is proposed to be administered, by such agency may not be consistent with the legislative intent underlying such law, such agency shall, within a reasonable time after such finding, request each standing committee having jurisdiction over the subject matter of such law to review with representatives of such agency the findings of such agency.

"(2) At the request of any such standing committee, any Government agency within the executive branch responsible for administering any law, the subject matter of which is within the jurisdiction of such standing committee, shall furnish such standing committee and the Comptroller General, the Director of the Congressional Budget Office, the Director of the Congressional Research Service, and the Director of the Office of Technology Assessment (at such time, during the duration of such program, as such standing committee shall designate) with a report setting forth—

"(A) citations to the rules issued by such agency in administering such law, together with a summary of such rules;

"(B) an assessment of the impact of such rules; and

"(C) recommendations, if any, for modifying such law.

The Comptroller General, the Director of the Congressional Budget Office, the Director of the Congressional Research Service, and the Director of the Office of Technology Assessment shall prepare, individually or jointly, an evaluation of such law, based on such report, and shall furnish such evaluation to such standing committee, which shall determine (taking into account such evaluation) what modifications of such law, if any, would be appropriate.

"(3) If such standing committee determines that any such Government agency has failed to submit a report in accordance with the requirements of paragraph (2), the chairman of such standing committee shall notify the President of the Senate (if such standing committee is a committee of the Senate) or the Speaker of the House of Representatives (if such standing committee is a committee of the House of Representatives), who shall direct the Comptroller General to conduct an investigation of such failure. The Comptroller General shall establish a strike force, composed of employees of the General Accounting Office, to carry out such investigation, and shall report the results of such investigation to the President of the Senate or to the Speaker of the House of Representatives, as the case may be, who shall report such results to the chairman of such standing committee.

"(4)(A) Except as provided in subparagraph (B), each report accompanying any measure reported by a standing committee of the Senate or of the House of Representatives and each report accompanying any recommendation made by a committee of conference to, the Senate or House of Representatives shall include a statement entitled 'Congressional Oversight Statement', which shall—

"(i) identify the Government agency within the executive branch which will administer any law which is a subject of the report containing such Congressional Oversight Statement;

"(ii) identify the ways in which such agency can assist any committee which has oversight responsibilities under this section with respect to such law to fulfill such oversight responsibilities; and

"(iii) be prepared after consultation with the Comptroller General, the Director of the Congressional Budget Office, the Director of the Congressional Research Service, and the Director of the Office of Technology Assessment.

Any additional oversight statement required to be included in such report under the Rules of the Senate or of the House of Representatives shall be set forth separately in such report.

"(B) If any such standing committee determines, under criteria established under subparagraph (C), that compliance with the requirements of subparagraph (A) would be impracticable, such standing committee shall include as a substitute in any report required to contain such Congressional Oversight Statement a statement that compliance with such requirements would be impracticable and an explanation of the reasons for such statement.

"(C) The criteria to be used in determining whether compliance with the requirements of subparagraph (A) would be impracticable shall be established—

"(i) by the Committee on Rules and Administration of the Senate, with respect to the standing committee of, and committees of conference to, the Senate, and

"(ii) by the Committee on Rules of the House of Representatives, with respect to the standing committees of, and committees of conference to, the House of Representatives.

"(5) For the purposes of this subsection the term 'rule' has the same meaning such term has in section 551(4) of title 5, United States Code.".

SEC. 4. The provisions of this Act shall take effect as of noon on January 3, 1979.●

COOPERATION IS ESSENTIAL

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WINN. Mr. Speaker, at a recent joint hearing of the Subcommittee on International Development and the Subcommittee on International Economic Policy and Trade of the House International Relations Committee, some interesting testimony regarding the position in which President Carter found himself during the economic summit in Bonn was presented. The testimony of Mr. Jeremiah Novak, a financial journalist for Asia Mail, pointed to the need for better coordination and consultation between Congress and the Executive in the formation of U.S. international economic policy. Such an improved and systematic relationship between these two branches of Government could put the President on a more equal footing with his counterparts from parliamentary governments at future summits by enabling the President to take with him a policy on which he already had obtained congressional participation and support. Mr. Novak's remarks on this important subject follow:

TESTIMONY OF MR. JEREMIAH NOVAK

Mr. Chairman, Mr. WINN, at most of the economic summits the representatives of other countries represent their Parliament. Mr. Callaghan, Mr. Schmidt, Mr. Giscard d'Estaing can walk into a Summit meeting with full confidence of which way their Parliaments will vote on a given issue.

When President Carter attends, he is not so blessed. I believe yesterday in the exchange with Mr. Cooper, one of the things which became clear was that the inability of the Administration to sell Congress and the failure of the Administration to take Congress' views into account, represent one of the major weaknesses in the American position at Summits.

For example, consider Mr. Carter's relative weakness over the energy issues that he faced at the recent Bonn summit.

I believe that this type of situation is exactly what makes the hearings so important. Such a situation suggests that perhaps Congress and the Senate should make a more arduous effort to work with the Administration, in order to form a policy which would enable the President to speak with a voice backed by Congress.

In 1944 at Bretton Woods, then Secretary of the Treasury Henry Morganthau, and Secretary of State Cordell Hull, were confident that they could bring Congressional majorities with them on certain issues. Because of this, the United States had a very clear cut policy at Bretton Woods, compared to where we stand today.

If we compare the situation today with that of Bretton Woods—in both cases there existed the need to create a new international economic system—it becomes clear that it is essential for Congress and the President to work together.

With this in mind, I think it very important that Congress look at the Summit process. The Summits are now institutionalized, and they provide a process through which Congress can register its views.

At present, the agenda for the Summit is established by a group of international planners. This group is led by Henry Owen of the United States, and includes representatives of the Presidents and Prime Ministers of all the other members attending the Summit. It is extremely important, therefore, that Congress have input into Mr. Owen's preparatory group committee, and that this takes the place of a regular dialogue between Congress and the committee, in order to make sure that the Congressional views are taken into account at the Summit meetings.

In my interviews, I have been told that this is not taking place in a systematic way. Perhaps Mr. Bingham, who has attended the conference, could correct me on that, but I have been told that Congress and the Administration are not effectively coordinated in the Summit process.

Thank you very much.●

THE LIFTING OF THE TURKISH ARMS EMBARGO

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MAGUIRE. Mr. Speaker, on August 1, 1978, in one of our closest votes this session, the House voted to support the administration's proposal to lift the arms embargo against Turkey. On Tuesday, September 26, President Carter signed the International Security Assistance Act, which included the lifting of

the arms embargo. At the same time he notified the Secretary of State that he had determined that the resumption of military cooperation with Turkey was in U.S. national and NATO interests and that Turkey was acting in good faith to achieve a just and peaceful settlement of the Cyprus problem.

So now, after an unsuccessful partial embargo, which was imposed after Turkey's second forceful and violent invasion on the island of Cyprus in August 1974, the situation reverts exactly to that prior to the imposition of the embargo. The Turkish military now controls over 40 percent of the island and its presence continues to impose on Greek Cypriots the fear of further military expansion.

Few of us know what it is like to be dislocated by the movement of massive, hostile military forces. But about one-third of the residents of Cyprus—200,000 people—have been displaced by the Turkish intervention and made refugees.

It was hoped the embargo would give the Turkish Government a clear indication that it must reassess its policy and deal justly with Cyprus. But possibly because throughout the 4-year embargo there were American proposals and official vows to lift the embargo, Turkey never reacted to the embargo.

And now, after Turkey's persistent refusal to negotiate a solution to the Cyprus problem, and after its unwillingness to recognize the rights of those driven from their homes by the invasion, the Turkish Government has been rewarded for its disregard of both international law and the binding agreements under which it received American arms by the lifting of the embargo. Many of us in Congress recognize that Turkey's invasion and occupation of Cyprus was a flagrant violation of the terms of sale with the United States under the Foreign Military Sales Act and the Foreign Assistance Act of 1961. But a bare majority of House Members finally bowed to the pressures brought to bear by the administration on the grounds of strategic necessity. They were assured that Turkey was essential to NATO. What the State Department's argument ignored was that Greece, too, is part of NATO, but that—until there is a just settlement in Cyprus—they will not participate. Of even greater importance, I cannot comprehend why our human rights policy should exclude Cyprus.

I must agree with Mr. Nicos Rolandis, the Foreign Minister of Cyprus, who recently said that—

> The decision to lift the embargo does not in itself pave the way for favorable developments as regards the prospects for a solution to the Cyprus problem.

He attributed this to what he claimed was a lack of demonstration by the Turkish Government that it intends to abandon its "negative approach" to the Cyprus problem.

However, Turkish Prime Minister Ecevit has said that the lifting of the embargo has "shown there is a proper medium for cooperation between Turkey and the United States." He went on to say that—

> Some of the realistic and constructive statements made by the House should be evaluated as a hopeful factor in the restitution and development of our friendly relations with the U.S.

I would certainly hope that "cooperation" is not simply another term for the willingnesss to concede to Turkey all that it wishes. I would like to believe that Turkey intends genuine cooperation—a willingness to work with the United States for a complete and rapid end to its occupation of Cyprus. I regret, however, that I see little in the past behavior of the Turkish Government to indicate that such a result is likely.

As we are all well aware, President Carter must report to Congress 60 days after September 26, the date of certification, and periodically thereafter, on the progress that is being made. It is important that we carefully monitor these reports, and the entire situation to determine whether Turkey is in fact meeting its obligation to resolve with justice and humanity the Cyprus problem.

It was, after all, the administration's assurances that termination of the embargo would lead to reciprocal action by Turkey which gained the crucial votes in favor of termination. If Turkey does respond favorably, then I, along with all the other Members of Congress, will be pleased to celebrate the end of this crisis and to commend Turkey for at last acting as it should.

But if Turkey fails to act, if we see that little or no progress has been made or even that Turkey has taken advantage of the end of the embargo in order to improve its strategic position, I can unequivocally state that many of us in Congress will move to reimpose the embargo with stricter limitations than in the past.

I am convinced that this is a critical point in the history of Eastern Mediterranean relations. We have been told that our Nation's strategic interests are at stake. But the final outcome in Cyprus will only serve our strategic interests if we remain determined to seek a just solution.●

A TRIBUTE TO LEONARD PUTNAM

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. HANNAFORD. Mr. Speaker, it gives me great pleasure today to salute Leonard Putnam, who has served as the city attorney for Long Beach during the past 14 years. While Leonard's services will be missed, the high standards of professionalism and competence which he established will long remain as an example to all public servants.

A native of Long Beach, Leonard graduated from Wilson High School. During World War II, he served as a radio operator in the Pacific Theater for the merchant marines, U.S. Navy. After the War, Leonard entered the University of Southern California and then attended UCLA pursuing studies in foreign service and political science. Leonard then went on to Southwestern University to study law and graduated magna cum laude in 1953.

Having served for 1 year in private practice in the city of Long Beach, Leonard entered the city attorney's office on February 16, 1955, as deputy city attorney. By 1958, he was made chief trial attorney for the city and in 1964 was appointed city attorney. Since then, Leonard has been reelected to the position on four occasions.

Leonard's retirement is marked by years of dedicated and distinguished public service. Those of us who have followed his career admire the great combination of knowledge, integrity, and compassion that Leonard has consistently exhibited. As I extend this tribute to Leonard Putnam, I wish him many happy years of retirement life and I know that the people of Long Beach join me in saying "Thank you for a job well done." ●

PANAMA'S TRANSFORMATION

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, almost daily, there is somber news emanating from the Republic of Panama. The following letter from a Panamanian national, Alford Camacho Diez to Robert Norris of the Inter-American Commission on Human Rights is another piece of valuable testimony on the conditions prevailing in Panama. Camacho's son was killed during the troubles when President Carter visited the country.

I ask my colleagues to give this letter their undivided attention:

[Translation—Spanish]

PANAMA,
August 2, 1978.

DR. ROBERT NORRIS,
Inter-American Commission on Human Rights, Washington, D.C.

DR. NORRIS: I am Alford Henry Camacho Diez, a Panamanian, Investigator of Criminal Matters, graduate of the officers' academy "Inter American Police Academy, male, currently a government official, with I.D. card no. 8-58-184. I write through this letter to that high continental body of the Organization of American States with the end of making known and invoking rights foreseen in their Statutes and Rules, in accordance with that agreed upon by the Republic of Panama and the other nations in Costa Rica in 1969 who endorse the agreements on human rights, agreed upon and ratified by the Republic of Panama, as legal document 15 on October 28, 1977 and currently in effect. Below I wish to communicate the following to you:

I. Antecedents:

1. The Ministry of Education of the Republic of Panama, the direction of Student Affairs of that ministry, as well as Student Affairs of the University of Panama, the latter also a branch of that same official entity, the officials, Carlos González Martinez for the Ministerial Office and Juan Gómez for the Office of the Rector of the University of Panama, appear to be implicated, by commission and omission, in the bloody acts which occurred at the University of Panama on on June 14, 1978, a place where the student Demóstenes Rodriguez and Jorge Antonio Camacho Castro, student of philosophy and history of the School of Humanities of that university, were killed.

II. The Minister of Education of Panama, Dr. Aristides Royo, and the Rector of the University of Panama, Lic. Eligio Salas, are

both responsible for the acts because of omission. It is known by everyone in this country that the actions with firearms on the part of officious encouraged groups were supported by the Office of Student Affairs of the Ministry of Education of Panama and of the University of Panama, when violence broke out and spread to the schools of innocents of the high schools. It is common knowledge about the armed attacks on the Politechnical Institute of the City of Colon and Abel Abel Bravo of that same city.

III. The part which implicates the Rector of the University of Panama, Lic. Eligio Salas, is more serious, since this official had knowledge that in a certain office or place at the University of Panama heavy caliber arms had been being stored and he took no measures. This makes him an accomplice in the criminal acts of June 14, 1978.

IV. In the criminal action carried out against the students of the University of Panama on June 14, 1978, the place where my son Jorge Antonio Camacho Castro was killed, two different types of interests were at work: one that planned, equipped and put the plan into action and the other, which carried out the action with groups of combined backing. The first group corresponds to an international conspiracy planned and carried out by elements of the People's Party, their organizations of backers, the FAU (University Anti-imperialist Front), University Reform Front (FRU), the Federation of Students of Panama (FEP), under the due planning and logistical support of Communist Cuba. This well calculated scheme, with the end of injuring the prestige of the meeting of presidents and especially to dim the presence of President Jimmy Carter of the United States at that meeting for June 16, 1978.

The above-exposed groups carried out their plans, also making sure that they complied with the purposes and interests of the Communist Party (People's Party) with respect to the interests of local politics of that organization. It is know by all our honest fellow citizens in the country that the Communist Party and the Federation of Students of Panama participated in the counting of votes of precandidates, the other political organizations not being present since at that time the national government had not defined the Legal Status of Political Parties, which consequently gave a balance of candidates for the Representatives to the Assembly of 80% in their favor and the rest to independent elements. Added to this situation the Communist Party of Panama and its satellites prepared lists of judges who would be elected by the Electoral Tribunal, to form the Election Boards, also with a unilateral representation in their favor. All of this plan would have gone along well if they had not allowed the entrance of exiles, especially the Panamanian group headed by former President Arnulfo Arias Madrid. Here is where the macabre plan arises; sacrifice students after a planned act, indicating that the partisans of Dr. Arnulfo Arias Madrid were those responsible for the acts and this action was also approved to eliminate the independent student groups which opposed the Communist Party and their backers. For this operation they hired mercenaries from organized crime, together with operative commandos of the Communist Party of Panama.

V. Immediately after the criminal action of June 14, 1978, when they killed the student Demóstenes Rodríguez and my son Jorge Antonio Camacho C., the Minister of Education, Eligio Salas, in a premeditated manner with the Rector of the University of Panama openly carry out their insane ends by blocking all information and trying to confuse public opinion through a series of broadcasts that covered all the national territory, forgetting that this action made them participants in the cited conspiracy of criminal acts. This in conformity with Law 47 of Education of 1946 . . . The events that occurred are of private jurisdiction of the Government Attorneys in accordance with articles 223, 224, 225, 226 and 227 of the Legal Code. The decisive function is in the jurisdiction of the courts of justice, the Government Attorneys explain the concept but they don't decide the hearing of the case. In this case the expression quoted for the rules of law on competence is appropriate: Causae ne dividatur contintia in cadem judez defendere debet. Indivisible competence [jurisdiction] of the cause determines the competence. In other words the officials mentioned from the Ministry of Education are not authorized to assume functions that are of the jurisdiction of the Public Ministry, in this case the Attorney General of the Nation, who is the official who would have the authority to take the precautionary measures in order to protect the area of access to the place of events and to ask if * * * necessary to have the intervention of police authorities, in order to preserve all of the necessary proof for the investigation. At the same time, he was the only person who could make statements, whether directly or through the Ministry of Government and Justice, in order maintain peace and order, as a measure of tranquility of those associated.

II. The Church and Notable Personages Go on Record:

1. The Panamanian Episcopal Conference, through a pastoral letter on the situation in the country, makes a statement through all of its bishops in the national territory. Indicating in this document its concern and vehement desire for peace, respect for human dignity, criticizing the acts of violence and political manipulation of students.

2. Notable people such as former parliamentarian Victor Navas, in his uneasiness, shows his humanist feelings and releases a page which calls upon the conscience of the country to reflect deeply so that there will be no more sorrowful acts.

III. The Facts:

1. My son Jorge Antonio Camacho Castro, on many occasions, was the victim of physical aggression and threats from members of the Federation of Students of Panama (FEP). I enclose a xerox copy as evidence of my statement.

2. Weeks before the bloody acts at the Politechnic Institute, the Rector of the University, Eligo Salas, informed him that in certain places at the University of Panama arms were being stored; my son Jorge Camacho sent two anonymous notes. A minor handed them over and Rector Eligio Salas paid no attention and the minor is followed to find out who had sent the message.

3. The month of May of 1978 was the month for the first person wounded from a bullet from an automatic weapon fired by members of the Federation of Students of Panama in Colon at the Abel Bravo High School. That time it was the student Edmonds, Mario. Where did those automatic weapons come from?

4. In the months of May and June, groups armed with automatic weapons mercilessly attack students, wounding them, at Abel Bravo as well as the Politechnical Institute of Cativá, Prov. cf Colón. All of these acts by the Federation of Students of Panama. Where are the authorities of the Ministry? What are they doing about it?

5. Then from June 12, 13, 14, 1978, the satellite groups of the Communist Party of Panama, FAU, FRU, and FEP, had been carrying out rallies in all the centers of the university schools and were characterized by insults and open provocation of the other students and independent groups. This was an attitude of provocation of the other students and independent groups that led to a simple confrontation with the sudden and unforeseen appearance of arms of different calibres in the hands of the groups of the Communist Party. Immediately the aggression began against defenseless young people and from the buildings of Colina the smoke from the firearms could be seen; within the Office of Student Affairs for the University the sound of machine guns could be heard, bravely shooting—against the pebbles and rocks of the defenseless students; those of the FAU, FRU, and FEP coming out of their hiding places with their machine guns, arms identified as manufactured in Czechloslavakia, communist.

6. As the University of Panama has a great number of students and groups, all their members are known; it is very easy to identify they were bearing arms and their locations at the moment of their criminal actions; as a consequence numerous arrests were expected, but it happens that since the acts had been planned, those implicated before beginning their criminal deeds had covered their bodies with chemical agents to avoid the parafin test and the arms of communist origin were taken away in the retreat, with the only ones left behind being of American manufacture, who knows for what purpose. The investigation is begun by Attorney Lic. Olmedo Miranda and evidence of great value is found for the investigation, but Rector Eligo Salas, in his desperation, orders the immediate remodeling of all those places which suffered the impact of projectiles that could contribute to the investigation by experts when there was criminal cause against one of their officials or groups of the same cause. In conflict with this action, he publicly stated that he would practice administrative actions against those who in his judgment deserved disciplinary sanctions, thus leaving a hidden threat against those who could shed light on the investigation that has not yet been concluded, so that with his attitude he is breaking Law 47 of 1976, which impedes the authorities of the Ministry of Education from intervening in the investigations that are in the jurisdiction of the Public Ministry. Also, it is in contracition to our legal clauses with respect to the fact that the major crime absolves [misspelled in text] the minor one; therefore, that official can only falsely or poorly apply disciplinary sanctions when those under his rectorship seem to be implicated.

7. Weeks before the events of June 14, 1978, the Federation of students of Panama (FEP) changes its office location opposite the Cuban Embassy to a new office on Calle 33 and Mexico Ave. in Panama City and its principal members, as well as the Director of Student Affairs of the Ministry of Education, Carlos Gonzáles Martínez, stop frequenting that embassy after June 29, 1978.

8. Having decided on my own to maintain vigil in secret of the offices of the Communist Party on Calle 45 Bella Vista in this city I have studied the movement of the different elements; and candidates to positions in the house of Representatives: understanding their activities I suspended the watch and proceeded to maintain a secret watch on the office on calle 32 and Ave. Mexico opposite the building La Atalaya, a location next to the Karate society where the Comando of Guerilla operations has its center, under the direction of the Director of Student Affairs of the Ministry of Education, Mr. Carlos Gonzáles Martínez. With respect to the organization known as FENAMUDE, they are used largely for work in intelligence and counter-intelligence, for getting closer, detecting situations and investigating the private life of some officials and especially learning the intentions, way of thinking of actions of the Superior Comando and intermediaries of the National Guard and Security Agencies. They are divided into two groups by

branches, women who are married and those who are single of different ages.

9. The offices of Calle 33 (FEP), Calle 32 and 31 Bella Vista are paid for by the Ministry of Education and the vehicles used in these duties are the property of the state, and I have the description and license numbers of these.

10. With the sinister plans of the Director of Student Affairs of the Ministry of Education carried out, Carlos González Martínez travels to Havana, Cuba in the company of others where he reports the battles that gave glory to his armed groups at the University of Panama on June 14, 1978.

To conclude this exposition of antecedents and concrete facts, exposed in the previous paragraphs, we see that there does not exist a condition or adequate climate to allow the authorities of the Public Ministry or Security Agencies to have an objective and impartial investigation, because of the hierarchy of officials involved in the plot and murder of young students.

Tangible proof of this statement is the fact that it has been stated in serious newspapers abroad that the dead on June 14 are many more than the students indicated in this report and yet the official report insists that there were only two dead; this is evidence of the partiality of the officials in charge of the investigation of the facts. Facts such as these, for their notoriety, do not need denouncement by any official; nevertheless, the first official who should be investigated as being responsible for what happened at the university appears as the denouncer, with the sole motive of throwing the investigation off the track to other sectors that possibly are not involved in the acts.

It is for that reason that I appeal to the good will of your organization. You have my authorization to use my name, whether in a probable investigation or for information for the Social Communication Groups.

We enclose a glossary of August 1 of this year, which appeared in the Republic, which predicts what must occur in this country in the not very distant future. The author of the glossary is a permanent visitor of the Cuban Embassy in our country.

With my best wishes for a deep peace,

Sincerely,

ALFORD H. CAMACHO D.

Postal Address: Apartado 2288, Balboa, Canal Zone.●

THE VERY REVEREND HAROLD F. LEMOINE

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WYDLER. Mr. Speaker, recently the Very Rev. Harold F. Lemoine retired as dean of the Cathedral of the Incarnation, Diocese of Long Island, in Garden City, N.Y. He has served in that capacity since February 1, 1957—a period of 21 years and 9 months. This is the longest tenure of any of the cathedral's nine deans, going back to 1890.

At the suggestion of the bishop, the cathedral chapter voted that, upon his retirement, he shall be known as dean emeritus.

In the Village of Garden City, Dean LeMoine has been active in the ministers fellowship which meets at the various churches monthly, except in the summer. He is a member of the Rotary Club and of the Order of Masons.

In the Diocese of Long Island, Dean Lemoine served on many and various committees, particularly the Committee on Ecumenical Relations and the Liturgical Committee. Since 1954 he has served as secretary of the diocese.

Dean Lamoine was first elected a delegate to represent the Diocese of Long Island at the general convention of the Episcopal Churches in 1952 and has served continuously since that time, having been elected to 10 general conventions. At general convention, he was a member and then chairman of the Committee on the Prayer Book. In 1963, he was priest representative from the Diocese of Long Island to the Anglican Congress in Toronto. The dean is a member of the board of managers—since 1933—of the church charity foundation which operates three hospitals and a home for the aged in the Diocese of Long Island.

In addition to preaching in various parts of this country, he has preached at the Cathedral of St. Paul in London and in many parish churches on various visits to England, in St. Andrew's Cathedral in Honolulu, at St. James Cathedral in Mauritius and in other churches and cathedrals around the world.

I know of no man whose long and devoted service to God and his fellow man more justly entitles him to many, many years of good health and happiness in his retirement. To Dean Lemoine, I extend my "well done" and pray God's richest blessings upon him in the years ahead.●

THE CASE OF GALINA GOLZMAN MICHELSON

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ARMSTRONG. Mr. Speaker, I am pleased to participate today in the Vigil for Freedom sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the Soviet Union.

As we all know, in 1975 35 countries signed the Helsinki Final Act, which committed the signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

The case of Galina Golzman Michelson illustrates both the urgent need for implementing these principles throughout the world and the abject failure of the Soviet Union to comply. Since 1956, Galina Michelson has made 18 separate applications for permission to emigrate from the U.S.S.R. to reunite her family. The Soviet Government has refused in each instance. No reason for the refusals has ever been given.

Over these years the life for Galina Michelson and her daughter has been one of interrogation by the secret police, humiliation by officials, and denial of employment or admission to schools.

While many individuals in this country have sought to assist Galina Michelson, it is my hope that this reminder of her and the vigil for freedom will strengthen our resolve to continue.●

REINTRODUCING H.R. 13752, TO AMEND THE SAFE DRINKING WATER ACT AND THE RURAL DEVELOPMENT ACT

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ABDNOR. Mr. Speaker, although it is late in the 95th Congress and no legislative action can be expected this year, I am reintroducing with cosponsors H.R. 13752, to amend the Safe Drinking Water Act (SDWA) and the Rural Development Act (RDA).

This measure would encourage and assist citizens living in small communities and rural areas to achieve compliance with Federal safe drinking water standards.

The SDWA is up for extension next year, and the House Interstate and Foreign Commerce Committee's Subcommittee on Health and Environment has held hearings on controversial standards proposed under the act.

The issues addressed in H.R. 13752 are important from Arkansas to Michigan to South Dakota to Oregon and throughout rural America. I plan to reintroduce this measure in the 96th Congress and to push for its adoption.

I commend H.R. 13752 to my colleagues and other interested readers of the RECORD. Support for its enactment, suggestions as to how it may be improved, or any comments on its merits are earnestly solicited.

The text of my September 25 statement to the Subcommittee on Health and the Environment follows:

STATEMENT OF HONORABLE JAMES ABDNOR

Mr. Chairman and members of the Subcommittee, I commend your interest in holding this oversight hearing to consider EPA's administration of the Safe Drinking Water Act.

It is a truism that we all support the goal of safe drinking water. It is also evident, however, that EPA's administration of the Act leaves something to be desired and, further, that the law itself could be improved.

In commenting on proposed drinking water regulations, the Council on Wage and Price stability said:

"The economic impact analyses of the proposed EPA regulations to control organic chemical contamination in drinking water are inadequate."

The EPA studies contain no analysis of the benefits of alternative performance standards or of alternative population-size cut-offs, and no analysis of either the costs or the benefits of alternative design standards.

Consequently, the EPA analyses shed no light on the reasonableness (i.e., the cost-effectiveness) of these decisions.

They provide no information about the consistency of these regulatory decisions with each other or with other EPA regulations.

Because the resources available for health-related programs are limited, it is important that those resources be allocated in a way that maximizes the benefits (in terms of lives saved or cases of illness or injury

avoided). This in turn requires that the incremental cost per case avoided be at least approximately equated for different regulations or different adopted standards. To ignore this fact is to allow more deaths than necessary for a given expenditure on health-related programs. It is therefore incumbent upon EPA to support its proposed regulations with careful risk-assessment and cost-benefit analyses, employing the best estimates available regarding uncertain variables, parameters, and relationships.

There is a considerable amount of uncertainty about both the costs and the benefits of these alternatives, but it makes little sense to act on uncertain evidence by imposing costly regulations on local communities while, at the same time, eschewing cost/benefit analyses because of this uncertainty.

The House Appropriations Committee also recognized problems from the public interest standpoint in EPA's actions with respect to drinking water standards. The Committee's report (HR 95-1255) said:

"EPA has at times put greater emphasis on publishing a standard rather than on the compilation of the necessary scientific data on which to base it. Under these circumstances, EPA's research and development programs have been directed more toward a legal defense of regulations rather than information for their development.

"An example of proposed regulation issued without substantive supporting scientific evidence is the recently published regulation on control of organic chemical contaminants in drinking water supplies for communities above 75,000 population."

I am greatly concerned about these proposed regulations in particular because:

(1) a sound and adequate scientific basis seems to be lacking;

(2) If, in fact, the threat is real and the regulations are justified, nearly one-half of the population is left unprotected;

(3) it is evident that the law requires drinking water regulations such as these to be applied to all "public water systems" eventually and, for this reason alone, the cost will be much higher than EPA's estimate of as much as $800 million;

(4) EPA shows no apparent concern—probably because OMB will not allow it—about the cost of the regulations and little inclination to assist small community water systems in finding means of financing mandated improvements at a reasonable cost to their users; and

(5) millions of Americans do not receive their water supplies from a "public water system" and are totally ignored—not only by these regulations but by the Act itself.

The National Demonstration Water Project published a report in March of 1978 entitled "Drinking Water Supplies in Rural America." The report estimated that 25 million rural Americans depend upon supplies of drinking water of doubtful adequacy and safety. It also said that 24.5 million drink from individual wells or small town water systems which are "potentially hazardous." EPA itself estimates 12,000 communities—most of which are small or rural—will need additional water treatment to meet drinking water standards.

In my view this issue is of vital importance and warrants improvements in the Safe Drinking Water Act to promote a more responsible regulatory program. Consequently, on August 7th I introduced HR 13752, to amend the Safe Drinking Water Act and the Rural Development Act.

H.R. 13752 would not create a costly new program. It would:

(1) require the Federal Government to weigh more adequately the benefits and costs of its standards;

(2) encourage intergovernmental cooperation, rather than confrontation, in meeting drinking water standards;

(3) end bureaucratic harassment of small community officials who have no realistic hope of compliance without assistance;

(4) enable those citizens, primarily rural poor, who are not presently covered to benefit from the same standards applied to others;

(5) ascribe priority in the allocation of available funding to projects which will achieve compliance with SDWA standards; and

(6) rationalize the regulatory process.

HR 13752 would create a framework for the protection and enhancement of the interests of rural citizens within the regulatory process. It would not require Federal assistance to any water system, but it would prevent EPA from taking a small community to court to be fined if it cannot afford to comply with the standards.

This measure would also encourage cooperation instead of confrontation between EPA and the local people in meeting drinking water standards. It would foster efforts upon the part of the local people to seek solutions to water quality problems and would provide them the means to achieve solutions at a reasonable cost.

At the same time no Federal funds would be expended if (a) the local users can reasonably afford the cost themselves, (b) there is a less costly means of achieving compliance with the standards, or (c) the benefits do not justify the costs.

Finally, enactment of HR 13752 would require the Federal Government to more fully consider the expenses it imposes upon local water users. While my bill does not authorize a new grant program or even an increase in funding for the existing program under the Rural Development Act, the argument that the Federal budget cannot absorb greatly increased expenditures for a safe drinking water program is moot if these costs are merely foisted upon local users. The impact on the national economy will still be there, and it will be an impact mandated by the Federal Government whether or not it is a direct Federal expenditure.

Again, I commend the Subcommittee for its interest in this important issue. An analysis of HR 13752 along with the full text of the bill are contained on pages 24745-24746 of the August 7th CONGRESSIONAL RECORD, and my additional comments may be found on page 30222 of the September 19th RECORD.

Thank you very much.●

VIGIL FOR FREEDOM FOR SOVIET JEWRY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MARKEY. Mr. Speaker, I wish to join today a "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry.

In 1975, 35 nations signed the Helsinki Final Act, committing themselves to the pursuit of policies consistent with basic principles of human rights, including religious freedom, minority rights, and the reunification of divided families whose members live in different countries.

The Soviet Union was among the 35 signatory nations. Despite this fact, the Soviet Government has shown total disregard for the human rights provisions of the Final Act.

Today, I bring to my colleagues' attention the case of Leib Khnokh, a 34-year-old electrician from Riga. Leib, whose wife and child reside in Israel, is imprisoned in the notorious Vladimir Prison.

Conditions at Vladimir Prison are deplorable. The floor of cells are made of concrete. Windows are nothing more than narrow slits. There are no sanitary facilities in most cells, and prisoners are allowed to bathe only once a week. Very few persons survive a stay at Vladimir without suffering permanent damage to their health.

It is my hope that this "Vigil for Freedom" brings about humane treatment of Leib and perhaps enables him to be reunited with his family in Israel.●

CRISIS IN LEBANON

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GILMAN. Mr. Speaker, the recent tragic clashes between the predominately Syrian Arab "peacekeeping" forces and the Lebanese Front Forces—Christian forces—in Beirut have resulted in the needless deaths of thousands of innocent civilians in Lebanon. These recent deaths are a stark reminder that more people have lost their lives in Lebanon in the last 3 years of civil war than in all the Arab-Israeli wars combined.

While Beirut remains under a shaky cease-fire, the debris of dozens of past cease-fires are reminders that in Lebanon peace is an elusive thing. As long as the Syrian troops remain in that strife-torn country, the threat of renewed violence is ever present.

Of critical concern is Syria's recent action in Lebanon which has resulted in a large-scale violation of the human rights of the Lebanese Nationals. In an apparent effort to establish control over Lebanon, Syrian troops have undertaken a campaign of kidnaping, murder, and terror in Christian villages. Rather than fulfilling its original peacekeeping mandate, Syria has sought to use her position to destroy Lebanon as a buffer state.

There has been, and continues to be, a need for a dispassionate peacekeeping force in Lebanon to serve the interests of peace—for the continuing crisis threatens not only the peace and stability of that nation, but that of the entire region. Unfortunately, the Syrians are not a disinterested party and have in fact become an instigator of violence. Their continued presence no longer serves to further the attainment of peace in that country.

If present conditions in Lebanon persist, the current Camp David peace efforts will remain in great jeopardy. The longer these deplorable conditions exist, the more likely that Syrian peacekeeping forces become an Arab army of occupation with all that implies for Israel's security.

Yesterday, I joined with several Members of the House in sponsoring a briefing of the Lebanese crisis in an effort to inform the public about the critical nature of this situation. We heard shocking testimony from a variety of informative witnesses including Mr.

Alfred Mady, Secretary General of the Christian Lebanese Forces, Lebanon; Dr. Elias El-Hayek, executive director, American Lebanese Information Center, Washington, D.C., and Mary Rihani, vice president, Trans Century Foundation; Mr. Peter Dartley, chairman, Archdiocese of Syrian Orthodox Church of the United States and Canada; and Mr. El. Shabo, president, Deacon Society, Nation School Association.

Today I am joining with those and other Members of the House in sending a letter to President Carter urging him to take advantage of the current ceasefire to bring about a United States-U.N. effort to begin the painstaking process of restoring a secure, stable, and independent Lebanon.

Included in the letter is a resolution signed by more than a majority of the Members of the House which specifically urges the President to:

One. Seek the withdrawal of all foreign troops;

Two. Support efforts to disarm all others;

Three. Seek an expanded peacekeeping role for the U.N.; and

Four. Seek the formation of a U.N. commission to bring about the economic and political rehabilitation of Lebanon.

The crisis in Lebanon is at a critical period. As pointed out by a recent Washington Post editorial on October 10, 1978:

> The matter should be at the top of the international agenda . . . the slaughter cannot be allowed to resume.

For my colleague's information I say inserting into the RECORD at this point the entire text of the Post editorial and in addition a related editorial from the Philadelphia Inquirer of October 10, 1978.

I call upon my colleagues to join in this effort and urge the President to act now to bring peace to Lebanon.

The material follows:

[From the Washington Post, Oct. 10, 1978]

CEASE-FIRE IN LEBANON

As one stares at the debris of the dozens of cease-fires that have been proclaimed and then broken in Lebanon in the last three years, it is idle to say that one of them has more value than the others. Yet the one that the United Nations Security Council demanded and the Christians and Syrians accepted over the weekend is precious indeed. It halted at least temporarily a frightful phase in the calamity that has become Lebanon's permanent way of life. And it forestalled an Israeli intervention in behalf of the Christians, with all the damage to the Arab-Israeli peace effort that could have done.

Through the summer, the militias guarding the Christian Maronite community in Beirut found themselves heavily engaged with the Syrian army, which has been occupying parts of Lebanon for two years, ostensibly to keep the peace in the Lebanese civil war. Did the militias provoke the attack? Which comes first is, by this time, a chicken-and-egg question in Lebanon. In any event Syria took the occasion, or so it seems, not only to punish the militias but also to make Christian East Beirut uninhabitable and thus to threaten, by demoralization as much as by death, the whole Christian Maronite community. Civilians and civilian facilities were major targets, and Syrian fire was deadly.

Can the weekend cease-fire hold? There is a long chance that it could. One party—the Christian militias—may be frightened and headstrong and resistant to international discipline in the Lebanese manner. But the other—Syria—is something else. Though the U.N. appeal is an implied rebuke to Damascus, the Syrians may well wish to have others take over some further part of the thankless job of keeping the peace in Lebanon. They are probably less interested in provoking the collapse of the Arab-Israeli peace effort than in leaving open an eventual place in it for themselves. They are poorly placed to challenge, at the same time, the United States, which provides aid and a certain political support; and the Soviet Union, their military patron; and France, a traditional friend. All supported the cease-fire call.

Why the Russians? Jimmy Carter personally approached Leonid Brezhnev. Evidently the Kremlin did not want to cause trouble—trouble that could easily get out of hand in a way that could seriously discomfit Moscow—at an otherwise quite propitious moment in Soviet-American relations.

It remains a formidable task to use the time gained by the cease-fire to make a credible start on healing Lebanon's wounds. The Camp David agreements, offering a potential way to lance Lebanon's Palestinian boil are one possibility. Jimmy Carter's proposal for an international conference to recalibrate Lebanon's Moslem-Christian political balance is another. The matter should be at the top of the international agenda. More people have lost their lives in Lebanon in three years than in all the Arab-Israeli wars combined. The slaughter cannot be allowed to resume.

[From the Philadelphia Inquirer, Oct. 10, 1978]

PEACE OUTLOOK IS GRIM IN BLEEDING LEBANON

A day after the U.N. Security Council adopted a U.S.-sponsored resolution calling for a cease-fire in Lebanon, Syria ordered its "peacekeeping" forces to stop shooting. Does Syria deserve credit for that? Hardly. For a week, the Syrians had been unmercifully pounding Lebanese Christians in Beirut. One does not deserve credit for stopping what one should not have been doing in the first place.

What are the 30,000 Syrian "peacekeeping" forces in Lebanon up to? It does not exactly look like peacekeeping. One theory has it that the Syrians are involved in a quagmire—"Syria's Vietnam," as one Western diplomat called it—and that somehow a way to save Syrian President Hafez Assad's face must be found so that Syria can extricate itself.

The theory, however, begs the question. Does Syria want to extricate itself? It is no secret that Syria, which once ruled Lebanon as well as most of Jordan and Israel, has not given up its ambitions for a "greater Syria." Indeed, had it not been for Israeli backing, the Christians in Lebanon would have gone under long ago.

It also is no secret that Syria is dead set against the kind of peace that Egyptian President Anwar Sadat and Israeli Premier Menachem Begin, under the aegis of President Carter, worked out at Camp David. According to Mr. Assad, President Sadat "defected to the enemy" and "left us alone in the trenches." In Damascus, Mr. Assad presided over a conference of radical Arab leaders of his own country, Libya, Algeria, South Yemen and the Palestine Liberation Organization to firm up their anti-Sadat alliance and, in Yasir Arafat's words, to say "yes to continuation of the struggle" against Israel.

So it may be that that Syria's behavior in Lebanon has been designed, at least in part to upset the Camp David accords. The icing on the cake, as it were. Alone, Syria could not succeed, but with Syria are the other radical Arab forces and behind them is the Soviet Union. Does the Soviet Union deserve credit for not exercising veto of the resolution in the Security Council? Hardly. The Syrians would not have been doing what they were doing without Soviet arms and encouragement.

What are the Russians up to? They, too, are determined to subvert the Camp David arrangements if they can. At a Moscow dinner in Mr. Assad's honor several days ago, Soviet leader Brezhnev declared that there could be no peace in the Middle East "until the causes of the Arab-Israeli conflict are removed, until the consequences of Israeli aggression are eliminated." Since the radical Arabs believe the cause of the conflict is Israel's very existence, the consequences that Mr. Brezhnev has in mind are all too clear.

Coming down from Camp David, the three national leaders, as Mr. Carter later declared, "committed ourselves to renew our support for the government" of Lebanese President Elias Sarkis. That is one of the few hopeful signs in an otherwise grim situation. Washington also ought to be, and presumably is, urging its friends the Saudis, who bankroll Syria, to apply some pressure of their own for moderation. And it would do well to advise Moscow quietly that if the Soviet Union expects U.S. cooperation in other areas, Moscow cannot subvert the prospects of Mideast peace. As a Soviet foreign minister once declared in the mid-1930s, "Peace is indivisible."●

JIM BEAM, A MAN WHO INVOLVES HIMSELF IN THE COMMUNITY

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTERSON of California. Mr. Speaker, recognition often escapes many persons who dedicate their professional talents to the public good.

Fortunately, this has not been the case with my friend Jim Beam. Jim is recognized in Orange County, Calif., as a community and government leader. And today I want to make my colleagues aware of Jim Beam's tireless and lasting contributions to Orange Countians.

Until recently he was the executive director of the Orange County Chapter of the Building Industry Association of southern California. He resigned the directorship to become president of Concordia Development Corp., a southern California residential and commercial construction firm.

Jim Beam is currently chairman of the board of trustees of Christ College Irvine Foundation. He is also a member of the board of directors of the following organizations: President's Advisory Board of California State University, Fullerton; World Affairs Council of Orange County; and Town Hall of California.

His other civic activities are too numerous to mention, but they reflect his genuine concern and interest in his fellow human beings.

Between his numerous community activities, Jim finds time to serve as mayor pro tempore of the city of Orange and chairman of the personnel committee of the South Coast Air Quality Management District.

I know I join many Orange Countians who appreciate Jim's sincere interest in

bettering the lives of his fellow man, and I am proud to call him a friend.●

SENIOR CITIZEN SEMINAR

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. EILBERG. Mr. Speaker, on September 11, I was honored to have the opportunity to host approximately 100 leaders of the senior citizen community in northeast Philadelphia at a seminar to discuss the needs of older Americans, and what services are available to them in our community.

I would like to offer the minutes of our seminar for the RECORD, because I believe the discussion was an excellent summary of the services which senior citizens can take advantage of.

In addition, the dialog which followed the panel discussion was extremely informative, and I know it will be helpful to me in my work in the Congress on behalf of senior citizens:

William Ross, former Business Manager of the International Ladies Garment Workers Union of America and a former member of the Philadelphia School Board, opened the seminar by welcoming the participants, and explaining that the panel members will detail the services of the organizations they are representing.

He stated that for years our country was considered a young people's country. But now, this situation is changing. The large number of senior citizen organizations present here demonstrate the increased interest in issues vital to older Americans. This is true not only in Philadelphia but nationally as well.

Mr. Ross explained that he recently had occasion to witness the kind of interest that exists on behalf of senior citizens when he attended a Congressional seminar in Washington, D.C. Many Congressmen and Senators banded together to set up an institute for senior citizens, who were invited for a 2-week session to consider what is being done on their behalf. There were 141 participants from all over the country. However, whenever anyone spoke about a program that was necessary, there was always one catch to it—the lack of funds.

Mr. Ross commended Congressman Eilberg for his great interest in behalf of senior citizens. He cited the results of a recent survey by the National Council for Senior Citizens which shows how Pennsylvania's 25 Congressmen were rated as far as their votes on behalf of senior citizens are concerned. Congressman Eilberg rated 100%. He voted in favor of all 10 bills dealing with senior citizen issues.

Mr. Ross introduced Congressman Eilberg.

Mr. EILBERG emphasized his belief that meetings of this sort are very important. Even when programs to assist senior citizens exist, they won't do much good unless our senior citizens, and those who are in a position to advise them, are aware of the help that is available, he said. This is the purpose of today's seminar, to have our panel members acquaint us with the programs that are available.

Mr. EILBERG stated that he was pleased to tell the participants that there is increasing interest in the problems of senior citizens in all levels of government as well as in the private sector.

Congressman EILBERG summarized some of the legislative activity in the 95th Congress which is important to senior citizens.

The legislation which has probably received the most attention is the Age Discrimination in Employment Act. This bill recognizes that age is an arbitrary and poor measure of one's ability to perform a job. It eliminates mandatory retirement ages for federal employees, and raises the retirement age in the private sector from 65 to 70.

Another important action was Congress' effort to amend the Older Americans Act.

This legislation is now in conference committee, where the differences between the House and Senate versions of the bill are being resolved. These 1978 amendments extend programs already in effect—senior citizen centers, hot meals and employment assistance. And they set up new programs—home-delivered meals, legal services and a method to investigate and resolve complaints about nursing homes.

The House attached one other important provision to the Older Americans Act, a provision to establish research projects in long-term care for senior citizens. Along these same lines, it is significant that the Ways & Means Committee just completed consideration of a Medicare bill which expands home health care alternatives to institutionalization. This bill will be voted on by the House this week.

Congressman Eilberg stated that the 95th Congress has also passed amendments to the Social Security Act. Among other things, these amendments raise the amount of earnings a retiree can have without the loss of any social security benefits. Next year this earnings limitation will be $6,500. The amendments also provide that remarriage will not reduce the benefits for widows or widowers over the age of 60.

Congressman Eilberg explained that for those of our senior citizens who are veterans, and there are many, the House has passed legislation revising the program of benefits for non-service connected disabilities.

One other item is the new Act which allows airlines to offer lower rates to senior citizens on a space-available basis.

Congressman Eilberg closed by saying that he hopes we can continue to have seminars like this from time to time. He stated that he thinks that these sessions can help us to determine whether existing programs are helping our senior citizens, and to develop new solutions for unresolved problems.

Congressman Eilberg informed the participants that after the panel members give their statements, everyone would be given a chance to ask questions. He stated that the panel might not be able to provide answers to all questions, but it should be able to give suggestions for dealing with the issues raised. Because time was limited, Congressman Eilberg asked all panel members to limit their statements to 5 minutes so that the greatest number of persons could be heard. He also mentioned that he would have to depart early for Washington since the House would be considering the Civil Service Reform bill, and he wants to give it his full consideraton.

Congressman Eilberg then introduced the panel members:

Mr. Louis C. Cappiella, Executive Director, Mayor's Commission on Services to the Aging, 1317 Filbert Street, Philadelphia, Pa. 19107.

Chief Inspector John Craig, Community Relations Bureau, Police Department Headquarters, Franklin Square, Philadelphia, Pa. 19106.

Mr. William Finlay, Older Philadelphians Legal Services Plan. 1317 Filbert Street, Philadelphia, Pa. 19107.

Mr. Ephraim Goldstein, Executive Vice President, Federation Housing, Inc., 8900 Roosevelt Boulevard, Philadelphia, Pa. 19115.

Mr. Melvin Jenks, Field Representative, Social Security Administration, 7959 Bustleton Avenue, Philadelphia, Pa. 19152.

Mr. Bernard R. Marks, Center Director, David Neuman Senior Center, 6600 Bustleton Avenue, Philadelphia, Pa. 19149.

Mr. Ed Nalley, Section 8 Subsidized Housing, Philadelphia Housing Authority, 2012 Chestnut Street, Philadelphia, Pa. 19103.

Ms. Diane Niesley, Catholic Social Services, 222 North 17th Street, Philadelphia, Pa. 19103.

Mrs. Victorina Peralta, Director, Adult Services Division, Department of Public Welfare, 1405 Locust Street, Philadelphia, Pa. 19102.

Mr. Ralph Rizzo, Federal Blue Cross Representative, 7213 Fowler Street, Philadelphia, Pa. 19128.

Mr. Jack Schimpf, Veterans Administration, 5000 Wissahickon Avenue, Philadelphia, Pa. 19144.

STATEMENTS OF PANEL MEMBERS

(Mr. Louis Cappiella, Executive Director, Mayor's Commission on Services to the Aging:)

Mr. Cappiella mentioned a few of the many services of the Mayor's Commission on Services to the Aging, such as employment, information and services, technical assistance, reduction of utility rates, free transportation fares, senior aid program, discounts for senior citizens, elder craftsmen shop, and nursing home assistance. He also mentioned that the Commission helps senior citizens in filing their property tax and utility forms.

In his view, Mr. Cappiella believes inflation is the number one problem existing for senior citizens. Inflation harms senior citizens more than any other individual. Mr. Cappiella thanked Congressman Eilberg for his support of Title 9, which is part-time employment for senior citizens. They Mayor's Commission has the second highest funding in the United States for this purpose. It now has 221 senior citizens who are working under their program. They also have a waiting list of 488 people for part-time employment.

The Mayor's Commission on Services to the Aging is open from about 8 a.m. to 5:30 p.m., Monday through Friday, located in Room 143 of City Hall. Their telephone number is MU6-3504. Last year, 12,000 people came into the Commission with problems, and the staff is there to help.

(Chief Inspector John Craig, Community Relations Bureau, Philadelphia Police Department:)

Chief inspector Craig thanked Congressman Eilberg for inviting him to speak at the seminar.

He stated that the purpose of his department is to protect people from crime. Whether or not the citizens think the Police Department is doing a good job is very important for them to know. He remarked that he is amused when he hears people say the Philadelphia Police Department is not doing a good job, because they are visited occasionally by people from other states who feel differently.

The Police Department tries very hard to protect citizens from criminals. Senior citizens are more traumatized by crime than any other individual. In order to protect the senior citizens, the Community Relations Bureau has introduced programs that deal with crime prevention. Chief Inspector Craig said that dealing with the problem of harassment of senior citizens by young people is very difficult in our modern society because everyone has rights. The Police Department has to try their best to protect everyone's rights.

He said that all 22 police districts in Philadelphia have workshops where the captain discusses problems and solutions with citizens. These workshops are publicized in the local media. They also provide speakers for Golden Age Clubs in the area.

The Police Department has a group of police officers called the Pastimers who will

perform for the entertainment of senior citizens. Requests should be made in writing to the Community Relations Bureau, 1328 Race Street, Philadelphia, Pa. 19107.

Through the Law Enforcement Assistance Act (LEAA) the Police Department has trained officers in crime prevention. These officers will visit your home or business free of charge to inspect it for the purpose of better crime prevention. The telephone number for this service is MU6-3380. LEAA funds have also been provided for other programs such as one to help people who have been victimized by crime. Also, a 30-foot mobile home has been visiting shopping centers to display and demonstrate devices for better crime prevention.

Chief Inspector Craig stated that their greatest hope of the Police is that they can listen to the problems of the senior citizens so they can try to help.

William Finlay, Older Philadelphians Legal Services Plan:

Mr. Finlay thanked Congressman Eilberg for inviting him to speak. He explained that the Older Philadelphians Legal Services Plan (OPLS) is a new program designed to help senior citizens. It began in January, 1978. The most important issue here is providing new solutions to old problems. It seems that the senior citizens encounter the most problems in dealing with the legal system since they are the ones who are most often victimized by an unscrupulous roof repairman or door-to-door salesman, for instance. And, they are the ones who are most often refused service by social service agencies.

The new approach of the OPLS is centered around the telephone. The organization is a telephone information and referral service. For a fee of $3 per individual and $5 per couple for a complete membership, members will receive unlimited telephone advice between the hours of 9 a.m. and 5 p.m. They have a complete staff of attorneys who will try to answer your questions. There are also legal services beyond advice over the telephone at reduced, fixed fees by OPLS Panel Lawyers conveniently located throughout the city of Philadelphia. For instance, the OPLS Panel Lawyers will assist members in drafting a simple will at a maximum charge of $25.

There are also workshops and educational materials on legal matters important to senior citizens, such as wills and how to avoid probate, when and how to challenge social security and medicare decisions, the legal rights of consumers, how to use small claims court, etc.

Mr. Finlay explained that the qualifications are that you must be 60 years of age or over, live in Philadelphia, receive $20,000 or less in income annually, and have a net worth of $50,000 or less not counting home, automobile(s) and personal belongings.

Mr. Finlay stated that this is a unique and worthwhile program for senior citizens. At present, there are 4,000 members. The address is 1317 Filbert Street, Philadelphia, Pa. 19107. For more information about the plan, the telephone number is 563-1086.

(Mr. Ephraim Goldstein, Executive Vice President, Federation Housing, Inc.:)

Mr. Goldstein stated that Federation Housing is concerned with the development of apartments for senior citizens. He said that without the federal government, Federation Housing would not be in business. The government provides subsidies for construction and rent subsidies that are needed because of spiraling inflation. Rent subsidies enable senior citizens to afford their rent payment, which is 25 percent of their income. The federal government pays the rest. Unfortunately, the programs today still do not meet the needs of the entire population.

Mr. Goldstein stated that the primary question he is asked is "How can we get into your facility?" He said: "We have thousands of applications presently in our files. The problem is lack of space. The Congress is going to have to appropirate more funds for this purpose. Last year there were approximately 300 units made available and there are 19 agencies, such as Federation Housing, trying to get these units." Mr. Goldstein said that although the decision has not yet been made as to what agency will get the units, it is imminent. He hopes that Federation Housing is successful in obtaining these units because they already have the site and plans ready in the event they are awarded the project.

He stated that they do have a third building presently on the books waiting HUD's final approval. Construction will start within the next two months.

Mr. Goldstein said that Federation Housing presently has 700 units. The new construction will add another 150 units to the project.

(Melvin Jenks, Social Security Administration, Field Representative:)

Mr. Jenks stated that the Social Security office at Bustleton and Rhawn Streets is open from 8:00 a.m. to 4:30 p.m., Monday through Friday. He mentioned that sometimes, part of the staff works overtime, but the office is open to the public only until 4:30 p.m. There is also a branch office at Kensington and Allegheny Avenues. He said if you are in that vicinity, you can stop in on a social security matter.

One important point he mentioned is that anyone who files a claim at that office will have his or papers transferred to the Bustleton and Rhawn Streets office. On Fridays, the Social Security Administration operates a contact office in Olney at 5627 North 5th Street, in the Unemployment Office Building between 9:00 a.m. and 3:00 p.m. The Social Security Administration cannot give you a full range of services at that office, but it can handle new claims and non-claims action.

The function of the Social Security is to handle Social Security benefits, or Title II, Supplemental Security Income, or Title 16, and Medicare. SSI is a federally administered welfare benefit based on need, so the requirements are different than regular social security benefits. All food stamp inquiries are sent to the Department of Public Assistance.

Mr. Jenks explained that Medicaid and Medical assistance are also handled by the Department of Public Assistance. All inquiries regarding those programs are referred to that department.

Mr. Jenks stated that business can be transacted by either coming into the office or over the telephone. He said that if a client cannot come into the office, he should try to get someone to go in his behalf or to try to handle it over the telephone. The Social Security Administration does have field representatives that can go out, but they are limited by the workload. Mr. Jenks said that he realizes the problem of runaway inflation. But, there is nothing that he and his colleagues can do as employees of the Social Security Administration. He stated that the pressure must come from individuals and it should be directed to their representatives in the U.S. Congress. The employees at the branch office can only pass on such information to the higher officers in their center city offices.

Mr. Jenks said the telephone number of the social security office at Bustleton and Rhawn Streets is RA2-7353. He mentioned that at the beginning of the month and on Mondays, the switchboard is very busy. He also mentioned that there is no telephone service at the Olney office.

(Mr. Bernard R. Marks, Center Director, David Neuman Senior Center:)

Mr. Marks stated that he had been asked to describe his program at the David Neuman Senior Center. He explained that they average 350 people a day and have serviced 1,100 senior citizens so far this year. At the Center, they have lunches, continuing education, physical education and other activities. The project is funded in part under a contract with the Philadelphia Corporation on Aging and the Office of Aging, Pennsylvania Department of Public Welfare. The Center works closely with in-home service through its association with the United Way, Philadelphia Corporation on Aging, and the Department of Health, Education and Welfare.

Mr. Marks stated that their major concern at the Center is that Philadelphia has not received any additional money from the State of Pennsylvania in two years. He blames the freeze created by the Department of Public Welfare for this problem. Another major concern of those at the Center is the fact that the Center is adequate because it was not built for senior citizens. There are only two Centers in Northeast Philadelphia, the other being in Liddonfield. He said that there are 70,000 people who are 60 years of age and older in the Greater Northeast, which is a larger population of senior citizens than most other entire towns in Pennsylvania.

(Ed Nalley, Section 8 Subsidized Housing, Philadelphia Housing Authority:)

Mr. Nalley stated that at the present time, funds have run out for Section 8 funding. He explained that when his office receives a subsidy from the Department of Housing & Urban Development (HUD) it is divided by bedroom size. The problem is that there are no more certificates for efficiencies, one bedroom, or two bedroom apartments available.

Mr. Nalley explained that the program is designed to help people pay their monthly rentals. He stated that he thinks it is a very helpful program for senior citizens. It is based on income. Those in the program only pay 25 percent of their gross monthly income. It is a five-year program consisting of consecutive one-year leases. It is the responsibility of the applicant to find an apartment, although the Housing Authority does have service representatives to assist.

Because of the non-availability of units at the present time, Mr. Nalley directed the participants to write to HUD to request that they give the Philadelphia Housing Authority more allotments. The address of HUD is 625 Walnut Street, Philadelphia, Pa. 19106.

Mr. Nalley stated that the City of Philadelphia is anxious to provide decent housing for senior citizens, and that he hoped that more money becomes available for this purpose.

(Diane Niesley, Catholic Social Services:)

Ms. Niesley stated that her organization is part of the Department of Community Services on Aging created in January, 1972. It was created because of the needs in the community, spiritually as well as materially. There are nine programs in this Department. The overall goal is to keep older people active in the community.

They operate three centers in Philadelphia: Star Harbor in West Philadelphia, St. Rita's in South Philadelphia and St. Anne's in the Kensington area. They provide home delivered meals, transportation, shopping assistance and regular center services. The main office is located at 222 North 17th Street, center city.

The Catholic Social Services has caseworkers to work with anyone who needs assistance. They also have a Friendly Visiting service in which senior aids offer supportive services such as visiting with clients, and providing services such as shopping and light chores.

Ms. Niesley stated that they also have an information and referral service where callers can obtain immediate information about resources and service delivery to senior citizens. They also have a project called HEAD (Help Elderly Adults Direct), which attempts to help the leaders of about 200 senior citizen organizations.

She also described their cultural program, which has specialists trained in arts, crafts,

music and dance. This program assists in planning special events to learn new crafts.

Ms. Niesley also talked about the Retired Senior Volunteer Program (R.S.V.P.), which helps senior citizens remain active and functional in society.

(Victorina Peralta, Director, Adult Service Division, City of Philadelphia, Department of Public Welfare:)

Mrs. Peralta thanked Congressman Eilberg for inviting her and mentioned that she was very pleased to be a part of the seminar for the third time.

She indicated that there are two Departments of Public Welfare—one a city agency and the other a state agency. She emphasized that she is from the City of Philadelphia agency, which is not the department that issues the welfare checks. She stated that her department is a service department and a protective service agency. It looks after senior citizens or any adults 18 years or older who are abused, neglected, abandoned, or exploited.

For example, she described a case of an old man who lives in an abandoned home with 60 cats, and his neighbor never sees him leave. The neighbors suspected that he was killing off the cats one at a time for food. Another case she described was the recent one involving a rumor that an elderly woman had about $45 million stashed away in her home, and the neighbors broke in and ransacked her home. These are the people that they try to help, those who are no longer able to take care of themselves.

Mr. Peralta stated that in cases such as these, the City of Philadelphia actually goes to court and becomes the legal guardian of the individual who is in need, such as a senior citizen whose nephew takes the money from her social security check to support his drug habit or an 85-year-old lady who was brought in by a newspaper boy because she was roaming around and didn't know her name or where she lived. In cases such as these, they assign a trained social worker and go to court to become the legal guardian.

Mr. Peralta also described the adult foster care program for people who are no longer able to care for themselves. They also assist in nursing home placement. Their workers give supportive counseling. She described her agency as "the agency of last resort." When people come to the agency, they are broken down, bitter and ressentful. The telephone number is MU 6- 5661. It is located at 1405 Locust Street, 19th Floor. It is open 7 days a week and holidays, from 7:30 a.m. to midnight.

(Ralph Rizzo, Federal Blue Cross Representative:)

Mr. Rizzo described his feelings of the Blue Cross program in its present state. He mentioned that he thought it was a bureaucratic monstrosity.

If a subscriber has a problem, Mr. Rizzo stated that he should write a letter to Blue Cross outlining the problem.

The contact at the federal level is: Federal Employees Program, 1800 M Street, N.W. Washington, D.C. 20036. The telephone number there is 202-785-7950, and the Director of Field Service for that program is Karen E. Schweitzer.

In Philadelphia, the Blue Cross Representative is Mrs. Bertha Jackson, and her address is 1333 Chestnut Street, 11th Floor, Philadelphia, Pa. 19107.

(Jack Schimpf, Veterans Administration:)

Mr. Schimpf explained that he was attending in place of Mr. S. W. Melidosian, the Veterans Administration's Philadelphia office Director. He gave the address of the Veterans Administration, 5000 Wissahickon Avenue, Philadelphia, Pa. 19144. The telephone number which is 438-5225. He mentioned that if anyone has a question or a problem, he should call.

Mr. Schimpf stated that the VA office in Philadelphia has responsibility for administering federal benefits through a 40-county area of Eastern Pennsylvania. The VA administers compensation, pension, educational benefits, and the insurance program. Mr. Schimpf mentioned that earlier this year, the VA did a study of its pension benefit program. One of the outcomes was the determination of the fact that older veterans and dependents were not getting the money to which they were entitled.

Mr. Schimpf stated that Max Cleland, the Administrator of the Veterans Administration in Washington, D.C. has instituted a new training program for physicians who specialize in geriatric medicine. This program was begun because the VA is concerned about the increasing age of the veteran.

The average age of the veteran population will be 65 in 1984. Another thing Mr. Schimpf pointed out is the fact that the VA has initiated a direct deposit program for monthly checks with the use of the Electronic Funds Transfer system. So, recipients won't have to worry about making a trip out to the bank. For information, he directed recipients to the bank where they do business.

Another very important point that Mr. Schimpf discussed was that World War II and Korea veterans who have a term life insurance policy in force should look into having it converted or reduced. A lot of people don't need as much insurance, and the cost keeps going up. He suggested converting it to a permanent plan because term insurance is almost unpayable with a fixed income. Also, Mr. Schimpf emphasized that it is very important to keep your beneficiary current. He mentioned that some veterans have never up-dated their beneficiary and have ran into difficulties.

Mr. Schimpf stated that anyone can call the local VA office and ask a question about his claim and can get instant information due to their new computer system.

Mr. Schimpf again emphasized that the VA's effort to help cannot work unless people come to the VA and ask for assistance. He stated that many people are missing out on benefits because they won't take the time to inquire about them.●

THE INTER-AMERICAN DEFENSE BOARD

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SIKES. Mr. Speaker, few of our colleagues have more than scant knowledge of the work and accomplishments of the Inter-American Defense Board. Yet it is an effective agency for providing a better understanding of defense needs of the hemisphere, and defense objectives and defense problems of the member states. It was my pleasure recently to discuss in detail the work of the Board with the chairman, Lt. Gen. Ranald T. Adams, Jr., of the U.S. Air Force. I was impressed with the information provided me by General Adams, whose leadership on the Board has been both outstanding and highly appreciated by his colleagues on the Board.

I would like at this time to outline the development, mission, and functions of the Inter-American Defense Board (IADB) in the context of hemispheric security and peace. I am using information provided me by General Adams on behalf of the Board.

HISTORICAL DEVELOPMENT

a. Meeting in Rio de Janeiro in January, 1942, barely a month after the attack on Pearl Harbor, the nations of the Americas established the IADB, "to study and recommend measures necessary for the defense of the continent."

b. When World War II ended, in 1945, the American States, meeting in Mexico City, decided to continue the existence of the Board, pending establishment of a permanent military body within the Inter-American System.

c. When the Organization of American States (OAS) was established, at the conference in Bogotá in 1948, provision was made in the OAS Charter for an Advisory Defense Committee (which, in fact, has never been convened) but the IADB was continued, by separate resolution (Washington, D.C., 1951), as an element apart from the OAS, to accomplish hemispheric defense planning and preparation.

d. The IADB, now almost 37 years old, is the oldest, multilateral military organization in the free world today—antedating NATO by more than five years—and numbers 19 member states: Argentina, Bolivia, Brazil, Chile, Colombia, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, United States, Uruguay, and Venezuela.

MISSION

a. The mission of the IADB is:

To act as the organ of preparation and recommendation for the collective self-defense of the American Continent against aggression, and to carryout, in addition to the advisory functions within its competence, any similar functions ascribed to it by the Advisory Defense Committee of the Organization of American States. (Article 1, Regulations of the Inter-American Defense Board.)

b. The key words of the mission statement are those that pertain to the Board's *planning and advisory* functions. Resolutions adopted by the Board's Council of Delegates—on which the 19 member states are represented—are submitted to the respective governments as recommendations to those governments.

Organization: The IADB consists of a Council of Delegates comprising the accredited delegations of the nineteen member nations, and a supporting Staff and Secretariat. Presiding over the Council of Delegates in a non-voting, executive capacity is a Chairman designated by the host country, the U.S. Subordinate to the IADB is the Inter-American Defense College, where senior military officers of the American Republics pursue strategic studies.

Planning Functions: Plans prepared and approved by the IADB, necessarily broad and general in nature, are sent to the member countries to form the basis for more detailed bilateral and multilateral operational plans. The more important IADB plans and documents that have been approved and distributed include the following:

a. Basic Strategic Plan ALPHA: This plan provides guidance for collective defense planning against the subversive threat.

b. Basic Strategic Plan BRAVO: This plan sets forth the basis for continental defense against the conventional threat, accompanied simultaneously by subversion and guerrilla warfare.

c. Plan DEFTRAMI. This is the plan for the coordination of the defense of inter-American maritime traffic. It is the IADB counterpart of the NATO maritime traffic control manual ATP-2A but contains an interesting variant where maritime areas are controlled by independently cooperating operational control authorities rather than under one area coordinator as is done in NATO. This plan is an excellent example where defense procedures have been tailored to pre-

serve national sovereignty. (Plan DEFTRAMI was employed as an integral part of the 1977 inter-American naval war games.)

d. Disaster Preparedness/Relief Operations. This special study, although not strictly in the field of hemispheric defense, sets forth guidelines for the employment of military forces in disaster relief operations. Considerable favorable response to this document has been received from the United Nations, Red Cross, and other agencies involved in disaster relief. In 1978, a more detailed, field-oriented disaster preparedness document has been issued, including versions in the English, Spanish, and Portuguese languages.

e. Civic Action. "Military Civic Action" was compiled as an information and guidance document for military civic action programs in the Americans.

f. Air Defense. As an initial step in inter-American air defense planning, a document on the bases for collective air defense of the continent has been published. Currently, a more definitive plan for surveillance and control is under development.

g. Search and Rescue. This document, published by the Board to provide guidance for coordinated search and rescue efforts, has received broad, favorable comment.

h. Strategic Evaluation. In support of IADB plans and studies, the International Staff of the Board periodically prepares and updates the Strategic Evaluation. This has been accomplished in the form of various Periodic Intelligence Resumés and a Strategic Analysis document.

i. In preparation, under guidance from the IADB Council of Delegates, are the following documents:

(1) Basic Strategic Plan CHARLIE
(2) Doctrine for Combined Exercises
(3) Strategic Concept
(4) Contingency Plan
(5) Analysis of Strategic Areas
(6) Multi-language versions of the Dictionary of Military Terms.

j. Also under current examination are proposals to study further integration and coordination of the inter-American military schooling system, and a concept for a closer institutional relationship between the OAS and the IADB.

IADB ACTIVITIES

a. The advisory function of the Board is most effectively fulfilled because the IADB is virtually always operating and available for consultation in case of emergency. The Board has been utilized, in one capacity or another, whenever its services were needed. Representative examples are:

(1) In 1963, the Council of the OAS, acting on behalf of the Foreign Ministers, requested the IADB to provide military expertise in evaluating the cache of weapons that had been covertly introduced into Venezuela and in determining their origin and probable intended use. As a result, Cuban subversive activity and involvement were definitively identified, and the Council was enabled to take firm action in denouncing the Cuban conspiracy.

(2) During the Dominican Republic crisis of 1965, the OAS requested the IADB to formulate a plan for the establishment of an Inter-American Armed Force. Within 48 hours, the Board had forwarded to the OAS a completed study outlining the organization, composition, and operation of the combined force. Subsequently, in response to an OAS request, a high-level advisor was provided by the Board—this advisor, in addition to his normal advisory functions, acted as a negotiator, as well.

(3) Although the OAS identified the Honduras-El Salvador conflict of 1969 as political in nature, military advice and assistance were provided by a number of officers who were connected with the Board. Although not acting specifically in the name of the IADB, these officers served in a military advisory role in the area of conflict and, subsequently, in the demilitarized zone.

(4) When conflict between Honduras and El Salvador again erupted, in August 1976, officers assigned to the IADB were again sent to the area as OAS military observers. The chief of this OAS peacekeeping mission to Honduras and El Salvador was General Miró, of the Army of Argentina, who was at that time the Chief of the Argentine Delegation to the IADB.

b. The Board works cooperatively with the Central American Defense Council, CONDECA, and its subordinate permanent committee, COPECODECA, through the exchange of information. CONDECA, which necessarily functions on a more operational, pragmatic level, conducts frequent combined exercises as a mechanism for formulation of their operational plans. Because the CONDECA organization provides a viable example of active cooperation of American armies on the operational level, the IADB takes a keen interest in their activities.

c. In 1978, the Board initiated exploratory discussions with the International Peace Academy and participated in an JPA Seminar in Lima, Peru, in an attempt to identify how activities of the two organizations might be coordinated to the mutual advantage of peace and security within the hemisphere.

IMPORTANCE TO U.S. INTERESTS

a. Despite the traditional "East-West" orientation of U.S. policy planning and the undeniable importance of our "European connection", Latin America does represent our "strategic backyard" and is therefore of great strategic importance in its own right. The bare facts of geography alone illustrate this fundamental point: the U.S. shares 1,800 miles of border with Mexico; Cuba is only 90 miles off the coast of Florida; Buenos Aires is closer to Washington than Tokyo and only moderately further than Rome, and Rio de Janeiro is much closer than Angola, Ethiopia, or the Horn of Africa; Argentina stretches for 1,000 miles and Brazil 4,000 miles along the South Atlantic coast, and Chile for 2,600 miles along the South Pacific Coast, facts of patent strategic significance to the defense of the hemisphere.

b. Not to be overlooked is a more subtle factor, the rather strong Latin influence on U.S. culture. Spanish-speaking residents of the U.S. constitute about 7% of our national population. Probably, comparatively few Americans realize that the U.S. has the fifth largest Spanish-speaking population in the world, after Spain, Mexico, Argentina, and Colombia—and far more numerous than Chile, Peru, Bolivia, Venezuela, or Cuba. (Source: Office of Education, Department of Health, Education and Welfare.) And, conversely, it is equally true that there exists a strong U.S. influence—culturally, economically, socially—within Latin America, including the pervasive presence of U.S. commercial products, television programs, and business interests . . . everything from Kodak to Coca-Cola to The Mary Tyler Moore Show to the Chase Manhattan Bank.

c. Beyond geography, beyond history and culture, there are important economic links, as well. The U.S., as is becoming ever more painfully clear, is far from self-sufficient in strategic materials. In mid-1977, the U.S. imported virtually half of its crude oil requirements, and no less than 9% of this amount traversed the Caribbean (with the addition of refined petroleum products, the percentage of Caribbean-transported material was over 50% of the total imports). It is not difficult to visualize the magnitude of the impact that interruption of this flow of crude oil and refined products would have, both on the U.S. defense posture and on its economic health.

d. Nor is petroleum the only strategic material for which the U.S. is dependent on overseas suppliers. More than 85% of the U.S. production of aluminum—a vital, irreplaceable metal—is derived from the bauxite ore imported from Jamaica, Surinam, and the Dominican Republic. For manganese, essential in the production of high-quality steel and industrial alloys, the import figure is 100%, much of it from Brazil. Bolivia, Mexico, Peru, Venezuela, and Chile export to the U.S. important quantities of tin, fluorine, tungsten, iron, lead, and copper ores. These materials play a vital role in the U.S. industrial production and therefore, in turn, on the overall U.S. defense posture and that of its allies. (Source: Domestic Business Development Office, U.S. Department of Commerce.)

e. Since the combined industrial output of the U.S. and its NATO allies amounts to virtually half that of the entire world, it is inescapable that a significant scarcity of these strategic materials would have a serious impact on U.S. defense and economic postures. On the overall basis, the Latin American countries have supplied the U.S. with over 50% of our total imports of aluminum, manganese, lead, columbium, over the past five years, and at some times also provide more than 50% of total U.S. imports of iron, copper, zinc and vanadium ores as well. (Source: Domestic Business Development Office, Department of Commerce.) When there is added to this the potential economic and technological capacity of such nations as Argentina, Brazil, and Chile, there are evident important overtones to hemispheric security development, well into the 21st century. (It is also significant that U.S. direct capital investments in Latin America (1975, Department of Commerce data) totalled $22.2 billion, larger than for all other "Third World" developing countries combined.)

MILITARY FORCES

Unclassified information available from open sources—in this instance, the Institute of Strategic Studies, in London—reveals some provocative information about the comparative investment in military forces, on the part of nations of the hemisphere. Cuba, for example, with a national population of about 9.5 million, maintains an army of about 90,000, only moderately smaller than the Army of Brazil, whose population is some twelve times greater than Cuba's. This clearly indicates a proportionately much larger national military commitment for Cuba than Brazil—Brazil's army constitutes only 0.16% of its population, while Cuba's is a ratio at least six times greater. (The U.S. Army strength—to support worldwide commitments for a wide spectrum of possible war situations, including conventional and nuclear war scenarios—constitutes less than 0.4% of our population.) Similar proportional commitments are observable for Naval and Air Forces:

TABLE 1.—ARMY STRENGTHS RELATIVE TO NATIONAL POPULATION SELECTED WESTERN HEMISPHERE NATIONS (1976 DATA)

	Population (millions)	Army strength	Percent of population
Cuba	9.3	90,000	0.96
Argentina	25.0	83,500	.33
Brazil	108.0	170,000	.16
Chile	10.6	40,000	.38
United States	216.0	785,000	.35

TABLE 2.—NAVY STRENGTHS RELATIVE TO NATIONAL POPULATION, SELECTED WESTERN HEMISPHERE NATIONS (1976 DATA)

	Population (millions)	Navy strength	Percent of population
Cuba	9.3	7,000	0.075
Argentina	25.0	33,000	.132
Brazil	108.0	49,500	.046
Chile	10.6	21,800	.206
Venezuela	12.1	8,000	.066
United States	216.0	536,000	.248

TABLE 3.—AIR FORCE STRENGTHS RELATIVE TO NATIONAL POPULATION, SELECTED WESTERN HEMISPHERE NATIONS (1976 DATA)

	Population (millions)	Air Force strength	Combat aircraft
Cuba	9.3	20,000	205
Argentina	25.0	17,000	132
Brazil	108.0	35,000	160
Chile	10.6	12,000	32
Venezuela	12.1	8,000	85
Colombia	24.7	6,000	16
United States	216.0	612,000	5,000

TABLE 4.—ARMED FORCES STRENGTH AND RESOURCES COMMITMENT, SELECTED WESTERN HEMISPHERE NATIONS (1976 DATA)

	Population (millions)	Armed Forces strength	Percent of population	Percent of GNP
Cuba	9.3	117,000	0.94	6.4
Argentina	25.0	133,500	.53	1.9
Brazil	108.0	254,500	.22	1.1
Chile	10.6	73,800	.68	1.1
Colombia	24.7	64,300	.26	.8
Peru	15.9	56,000	.35	2.4
Venezuela	12.1	44,000	.35	2.1
United States	216.0	2,131,000	.98	6.0

It is clear from analysis of the above data that Cuba—for such a relatively small nation—is a military power, with a sizable standing Army and dedicated military resources significantly larger than her hemispheric neighbors. Cuba has the demonstrated capability, as she has openly shown since 1974—in Angola and Ethiopia—of effectively deploying forces halfway around the world in support of "revolutionary wars of liberation", and has readily supported guerrilla/terrorist movements throughout the hemisphere. The Cuban leader, Fidel Castro, has publicly declared his readiness to export revolutionary communism around the world, and tended to give proof of his words in Angola, and, more recently, in Ethiopia, as well as supporting infiltration and subversion—closer to home—in Guyana, Jamaica, Belize, Panama, Venezuela, Colombia, and elsewhere.

IADB PHILOSOPHY

a. The IADB, in its organizational structure and processes, decidedly does *not* constitute a "little NATO"—there are no forces in being, under an established command structure, and there is not even a single tactical language.

b. Nonetheless, the raison d'être for the Board is that in fact it meets the immediate defense needs of the hemisphere, as determined by the nations that comprise the Inter-American System. The IADB provides the essential first step in the formulation of defense plans, even though the plans produced are necessarily very broad and require preparation of more detailed implementation plans at lower, operational levels. (IABD plans, general though they may be, are the only plans of their type currently being developed and updated specifically for bilateral or multilateral use in the hemisphere.) Since IADB plans must be approved by two-thirds of the delegations accredited, prior to their transmittal to the governments, they do in fact represent a high degree of professional certification and resolve among the membership. IADB recommendations form the political and military foundation for the development of detailed operational plans. (In this connection, former U.S. Ambassador to the United Nations Daniel Moynihan, currently the U.S. Senator from New York, has observed that the General Assembly of the United Nations only sends recommendations to the member countries, and that these recommendations were not binding, so in that respect the IADB is no less potent than is the United Nations.)

c. In the event of an emergency situation, the IADB provides a highly responsive source of military expertise that can be tapped without delay, as has been noted with respect to the covert arms smuggling into Venezuela in 1963, the Dominican Republic crisis of 1965, and the Honduras-El Salvador border disputes of 1969 and 1976. When the OAS recognizes the need for prompt, professional military advice, they can and do call upon the IADB for military support.

d. Under non-crisis conditions, the IADB provides a permanent multinational forum representing the defense ministers of the hemisphere, having the capacity to accept and study problems facing the hemisphere, recommend solutions, and—if necessary—refer matters to the highest military echelons in the hemisphere.

e. Overall, the IADB provides an element that, while difficult to quantify, is nonetheless extremely important, that is, a sense of common purpose. The IADB building in Washington—called La Casa del Soldado—is a unique location where members of all branches of the Armed Forces of the nineteen American member nations can meet together, in an atmosphere conducive to fraternity, mutual understanding, and trust, on a person-to-person basis. Through this mechanism, a cooperative military forum of nineteen independent nations, future contingencies can be dealt with, and the security and solidarity of the Americas assured.

PERSPECTIVE

It seems clear that the U.S., in the world of today, must find a way to order its priorities and place its international commitments in balance. The importance to U.S. security of credibility and confidence in the U.S., among the governments and peoples of Western Europe, the Middle East, and the Korea-Japan area, is undeniable and immense. Yet the vital significance of a secure and friendly Latin America, our own "strategic backyard", is no less, and simply must not be taken for granted. The concept of "Fortress America", in the sense of an overall, cooperative hemispheric defense, has been for some time a viable strategic asset to the hemisphere, and indeed to the entire Free World.

In the final analysis, the United States is the "senior partner" in hemispheric endeavors, by virtue of its military and economic power, and the world community of order, tranquility, and peace that the U.S. is anxious to see built and strengthened must surely be able to count on a secure Western Hemisphere as one of its central supports. The world is patently becoming increasingly interdependent, so it is essential that the multilateral character of the U.S.-Latin American connection be a source of unity, strength, and mutual confidence. Failing that, the "prospects for success in any other part of the world"—to use Henry Kissinger's phrase—"will truly be clouded." A lack of vigilance and attentiveness to the tensions and danger spots within the hemisphere can lead to perilous conditions, where the United States might stand alone in the Americas.●

RATIONALE BEHIND U.S. POLICY FOR MASSIVE BUILDUP OF GRAIN STOCKS

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, in the course of our oversight role in all aspects of the inflation problem, the Subcommittee on Economic Stabilization of the Banking Committee, of which I am chairman, has naturally looked closely into the special problem of food prices. As I have reported previously, the "underlying' increase in food prices reflects inflationary forces in the economy at large, given the fact that only 33 cents out of each food dollar spent by the consumer goes to farmers. But farm prices and the agricultural economy are still of major importance and they continue to account for the volatility of food prices. Put another way, there remains a danger of serious, independent inflation of food prices as a consequence of events in agriculture at home and abroad. With our current grain stocks and excellent harvests, it is not an imminent danger, but it is there.

At the subcommittee's most recent hearing on food prices, September 19, we looked into the question of large food and feed grain reserves as a kind of insurance policy against a recurrence of the events of 1972–74, when bad harvests in the world, including the Soviet Union, led to a veritable explosion of food prices in the United States. We heard from Howard Hjort, the respected chief economist of the Department of Agriculture, some of the constraints against a unilateral policy by the United States of building up massive reserves. But we also heard from Fred Sanderson of the Brookings Institution the arguments for such a policy, which were spelled out in a letter to me following the hearing.

Mr. Speaker, I am inserting that letter in the RECORD not because I have reached any firm conclusions on this very important issue. But I believe that Members of the House should know the rationale behind an overt policy of the United States of a very large buildup of grain stocks—a policy that is not by itself profarmer or antifarmer. Mr. Sanderson's letter follows in its entirety:

THE BROOKINGS INSTITUTION,
FOREIGN POLICY STUDIES PROGRAM,
Washington, D.C., September 26, 1978.

Hon. WILLIAM S. MOORHEAD,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MOORHEAD: Thank you for your letter of September 21. I appreciated very much indeed the chance to testify before the Subcommittee on Economic Stabilization.

In reply to your question, I believe it would be in the U.S. interest to allow full grain production, with no acreage set-asides, until we have accumulated a reserve of 100 million tons. I believe the benefits to the United States of a well-managed reserve of this size would justify the budgetary costs. I believe this holds true even in the absence of significant foreign contributions.

Let me explain. I am starting from the premise, implicit in the 1977 farm legislation, that we are trying to stabilize U.S. (and world) grain prices within a range between U.S. support prices and 40% above support. I have estimated that it would have taken a reserve of 100 million tons of grain (over and above normal working stocks of about 25–30 million tons) to meet the foreign and domestic crop shortfalls in 1972–75 while keeping grain prices within that range. I am not advocating unlimited stockpiling.

It will be argued that the events of 1972–75 were unusual and unlikely to recur. My own feeling is that we must be prepared for much greater instability in world grain markets than we have experienced in the past. There are indications that climatic conditions in the United States in the period 1958–73 were more stable than usual. But of

greater importance are economic and political trends in countries that, in the past, played no major role in grain trade. Crop failures in communist and developing countries are no longer largely absorbed internally. These is greater resistance to belt-tightening in countries such as the USSR, Eastern Europe, China and India and the balance-of-payments constraints on food imports are less severe. As a result, major crop shortfalls in these countries now have a greater impact on world markets. This is the more significant because there is evidence suggesting that adverse weather tends to occur simultaneously in different parts of the world. I don't think that the events of 1972–75 will prove to be as unique as one might think from looking at the past.

The costs of a 100-million-ton grain reserve are not as great as is commonly believed. I estimate the average annual net costs of a government-owned reserve of 100 million tons of grain at about $800 million (storage and interest less annualized sales profits). (The costs of the present farmer-held reserve are greater mainly because the farmer keeps any profit from holding the grain while the public is paying almost all carrying charges). On the other hand, there would be substantial savings on other programs. I understand that we are spending over $500 million on acreage diversion payments for the 1978 feedgrain crop which could have been saved. With unrestricted production, it should also be possible to reduce the high target prices for wheat which were justified, in part, as a necessary incentive (and compensation) for the growers' cooperation with the set-aside program. This should result in some savings on deficiency payments to wheat growers which, I gather, amount to about $770 million.

The benefits to the United States on an adequate grain reserve, though more difficult to quantify, are nonetheless real. Most important, we would avoid the far-reaching inflationary consequences of another grain shortage and the economic costs involved in trying to cope with inflationary pressures emanating from the grain sector. We would avoid the costly disruption of our livestock industry. Adequate reserves and more stable prices would strengthen our reputation as a reliable supplier and would help us maintain and expand our position in world grain markets. To my mind these benefits greatly exceed the net budgetary cost.

Sincerely,

FRED H. SANDERSON,
Senior Fellow.●

HEALTH CARE FOR OLDER VETERANS—LONG-TERM CARE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PEPPER. Mr. Speaker, I wish to share with my colleagues an additional portion of a research paper which was prepared by Ms. Dena Belinkoff, who served as a summer intern with the Subcommittee on Health and Long-Term Care of the Select Committee on Aging, both of which it is my privilege to chair.

The paper deals with the Veterans' Administration's system of health care and gives special consideration to programs which provide services to elderly veterans. As I indicated earlier, this paper offers points for discussion in the course of our ongoing efforts to develop long-term care programs and policies under our existing medical programs, and in the course of our deliberations regarding national health insurance.

I include part II of Ms. Belinkoff's paper to be inserted at this point in the RECORD:

NURSING HOMES

Three types of skilled nursing homes are utilized by the Veterans Administration: VA owned and operated facilities; community contract nursing homes; and State Veterans Homes. Each type is both supported and regulated to a different degree by the VA.

State Veterans Homes fall under the jurisdictions of the States, but are built with 65% federal construction funding. A per diem arrangement enables the States to receive assistance through reimbursements from VA medical facilities for the care of veterans. State hospitals and domiciliaries are similarly supported. Currently, a total of 15,815 State home beds are available in 31 States and the District of Columbia. State homes are licensed and reviewed by the individual States.

To satisfy the need for nursing home care in communities, the VA contracts with proprietary facilities for a transition period between a hospital stay and a return home. As of July 1977, 7,932 veterans were receiving care in contract facilities, just under the 8,000 placement authorization.[10] Care for a service-connected condition is provided at government expense indefinitely, but care is limited to six months for other veterans. Admittance requires a prior hospitalization period. These nursing homes undergo VA inspection before contracts are approved and are reviewed annually. The NAS found that VA contract homes are, on the whole, of better quality than the average nursing home, but still not as good as VA owned nursing homes.

Contract community homes are intended to allow a veteran to recover in a familiar environment which facilitates re-entry into community life. Because of the six month limit on care for non-service connected conditions, however, an identifiable group of veterans is left without the care they need. Some are able to qualify for Medicaid benefits upon discharge; some receive extensions on their VA benefits; some are readmitted to hospitals for the sole purpose of renewing their six month care period; and some must cope by themselves. The VA offers counselling to the last group and their families to help them assess their resources and the available alternatives.

Another problem with the contract program stems from the legislated limitations on the per diem the VA will pay for care in a contract facility. In a few areas, such as New York City, the VA has recently been unable to negotiate contracts due to the high costs of health care. The VA is authorized to spend a per diem of up to 40% of the cost of acute hospital care on nursing home care. When this is not sufficient one alternative is to move patients out of their familiar environment to a VA facility or a different contract home.

Duplication of inspections of contract facilities, which take both VA and Medicare and Medicaid patients, is both a costly and an unnecessary administrative burden. Currently the VA is negotiating with the Department of Health, Education and Welfare to coordinate interagency evaluation of these nursing homes. In addition, the VA is specially training employees to assess community homes.

The VA operates 88 nursing homes, adjacent to VA full service hospitals, serving 7,874 patients as of April 1978. Length of stay is not time-limited in these facilities and priority is given to those with service-connected conditions.

The NAS reviewed the quality of care favorably, rating the homes above the appointed benchmark of adequate care: ". . . the overall quality of the long-term care provided by the VA is usually acceptable—superior to a great amount of the care provided outside the VA."[11] The quality, however, fell short of an excellent NAS rating.

In order to care for the growing elderly veteran population, the VA plans to expand its nursing home facilities to 10,000 beds. This increase has already been authorized by Congress and the VA hopes to eventually bring the total to 12,000 beds.

Uncertainty as to the future demand for nursing home beds has led the VA to adopt a flexible strategy for certain plans. New facilities will be adaptable according to need, serving alternately as Intermediate Care facilities, nursing homes or domiciliaries. Keeping admission standards and patterns as they are, it is probable that the demand for skilled nursing beds will rise. If, however, home health services succeed nursing homes as the dominant mode of care, the VA should be cognizant of the potential oversupply of nursing beds.

Comment

In the future, the VA should seriously examine their investments in additional nursing homes and coordinate them with regional planning. While the VA will need expanded facilities to meet the demands of World War II veterans, that elderly population will level off along with the demand. The general civilian elderly population, however, will continue to increase and require more nursing homes, but VA homes will not be accessible to them under current law. Limits on the allowable per diem should be studied and, if necessary, revised to meet regional differentials in an effort to preclude expensive construction.

Hospital based home care

The Hospital Based Home Care (HBHC) program allows patients, who otherwise might be institutionalized, to remain in their homes with the coordinated assistance of a treatment team consisting of a physician, public health nurse, social worker, rehabilitation therapist, dietician and nursing assistants. Veterans classified up to the fifth level of care are considered suitable for HBHC. The fifth level, according to VA definition, includes those patients with severe, chronic and stable disabilities, who require intensive non-professional nursing care. This level is considered by the VA also to be the highest level for a skilled nursing facility.

Thirty hospitals now provide HBHC programs and in 1977, approximately 2,500 patients were served by 60,000 home visits. No new HBHC units have been initiated since 1974 as "HBHC is an outpatient program and has had less funding priority than the inpatient programs."[12]

Although the VA states the expansion of HBHC as a desirable goal, at present the priority and funding remain on the side of acute hospital medicine. VA tradition in this regard appears even stronger than in the non-VA medical establishment, where long-term care, particularly for the elderly, has come under close examination. In a policy statement regarding home care, the VA concluded that, "it should not be assumed that a home is always the best choice; given attractive surroundings and appropriate personal attention, an institution need not be institutional and the quality of life may be better than in many homes."[13] The current trend in long-term care is to maintain the person in the familiar comfort of the home environment. From both a financial and a medical standpoint, home health care and not institutionalization, appears to best benefit the patient.

An article in Medical Care of June 1978, titled "Patient Outcomes in Alternative Long-Term Care setting," reported on the health status outcomes in three Veterans

Footnotes at end of article.

Administration programs: Home Care (HC); Community Based Nursing Care (CHC); and Hospital Nursing Home Care (HNH). The study concluded that "most patients requiring extended medical care will be more successful in the HC program than will similar patients in the CNH or HNH programs . . . these findings do provide preliminary support for what many health care professionals have long believed, but lack the evidence to substantiate: home care is preferable, when possible." [14]

On economic grounds, home health care is similarly desirable. A December 1977 GAO report to Congress found that "until older people become greatly or extremely impaired, the cost of nursing home care exceeds the cost of home care including the value of the general support services provided by family and friends." Among other provisions, the GAO recommended that Congress pass legislation to consolidate home health services under Medicare and eliminate the three day prior hospitalization requirement for home health care.[15] The GAO testified that the cost of the recommendations would be offset in part by savings that would result from decreased hospital and nursing home utilization if the provisions were passed. Congressman Claude Pepper, with over 100 cosponsors, has introduced legislation (H.R. 10738) to implement the changes recommended by the GAO. H.R. 13097, passed by the House on September 18, 1978, includes two of these proposals: removal of the prior hospitalization requirement and deletion of the visit limits under Medicare.

Comment

The Veterans Administration should take heed of these findings and trends in the field of long-term care. With the tremendous projections for the elderly veteran population, the cost efficient and medically beneficial concept of home health care should be implemented by the VA to a greater extent. The current HBHC program must be reclassified as a priority program in the VA Department of Medicine and Surgery.

Personal care homes

The VA Personal Care Home (PCH) program places patients without supportive home environments in appropriate community settings. Originally devised for released psychiatric patients, PCH has expanded to serve 22,000 patients. VA social workers inspect the homes before placement, but no VA medical funding supports the veterans once they have been released from a medical facility. For this reason, the PCH program costs the VA only $400 per veteran per year. The facilities approved for veterans range from rooms in single family home to board and care homes. No formalized standards for Personal Care Homes have been prescribed and these types of facilities are not usually licensed by state authorities.

The VA has expressed interest in investigating the PCH program's expanded application to elderly veterans; however, current limitations on VA funding of placements preclude extensive utiliziation of this program.

The GAO completed a study in June 1978 titled, "Better Services at Reduced Costs Through an Improved 'Personal Care' Program Recommended for Veterans." The report concluded that personal care homes are an effective, non-institutional alternative to the care of a potentially large group of homeless and/or elderly veterans. As it is currently operated, however, the program lacks definition, goals and efficient management. The GAO recommended that the VA specify the program in the annual budget request; define objectives; establish staffing and facility criteria; and institute periodic evaluations of the program. To encourage greater use of the program the GAO suggested that Congress authorized the VA to participate in paying the cost of veterans' personal care when other funds are not available. The VA agrees with GAO proposals and is working to expand the PCH program.

Comment

Congress should recognize the desirability to this alternative to institutionalization and should allocate the necessary resources and provide structural guidelines for the program's wider implementation.

Domiciliaries

The Veterans Administration originated with the domiciliary program, which was first developed to provide homes for returning Civil War soldiers. As a result of the two World Wars and the enactment of Public Law 293 in 1946, the domiciliary program evolved to its present capacity of 9897 beds in 16 locations. Few medical services are available, as the emphasis in these facilities is on protected residential care. Residents must be capable of meeting their own personal needs, but meals are served, and all domiciliaries except one have access to VA hospitals.

Individual states also provide veteran domiciliary care with federal assistance in the form of construction grants and per diem reimbursements. At present, state homes have a capacity of 8567 beds.

Occupancy in domiciliaries has declined in recent years, allowing the VA to close some outdated facilities which failed to meet fire and safety codes. According to the NAS, domiciliary residents are most often infirm, unmarried approximately 60 years old and disaffiliated from society, all of which contributes to an average stay of several years and to frequent re-admission. Internal programs emphasize recreation and maintenance, rather than rehabilitation and therapy. Alcoholism is prevalent among domiciled veterans, as are chronic diseases and mental illness.

The VA plan to develop and implement a new prototype for domiciliary care in response to the changing needs of veterans and the NAS evaluation of the current program. Proposed are smaller facilities of 200 beds, with greater privacy and increased rehabilitation incentives and services. Convertability of the facility from domiciliary to nursing home will allow the VA to respond to the demands of elderly veterans.

Domiciliaries fulfill their purpose of providing an adequate sheltered environment for homeless veterans who otherwise might reside in single room occupancy hotels in inner cities.

Outpatient care

A total of 228 clinics, mostly located in the 172 VA hospitals, provide ambulatory care for veterans across the country. As described earlier, eligibility for this service was narrowed in the 1976 Veterans Health Care Omnibus Act in an attempt to put a lid on the program's rapidly increasing utilization.

The NAS found defects in the physical facilities and staffing patterns of the ambulatory care program, which were partially attributed to the VA's primary commitment to inpatient care. In addition, the study commented on the problem of access to outpatient clinics, since travel to and from clinics presents an obstacle, particularly to elderly people. Within its legislative and budgetary limitations, the VA is revising its outpatient program and responding to NAS criticisms.

Senior centers

Although the VA is not authorized to fund senior centers under the Department of Medicine and Surgery, the Office of Extended Care has assisted veterans service groups in establishing two centers in Minnesota. The VA plays a consultative role in the operation of the senior centers, occasionally sending medical staff from the local VA hospital to provide various supportive health services.

Participants receive noon meals under the nutrition program carried out under Title VII of the Older Americans Act, but the senior centers do not qualify for other federal funding because of a restriction imposed by the American Legion that only veterans are eligible to attend.

VA involvement in senior centers is a worthwhile investment in terms of the development of a full range of supportive social services for elderly veterans, which cannot be separated from medical services in a holistic approach to health care. In the future, the VA should be mindful of the potential for costly duplication of senior center services in a geographic region if VA centers remain exclusive and additional centers are required for the non-veteran elderly.

A UNIVERSITY FOR PEACE

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DENT. Mr. Speaker, I am delighted to have received a copy of Costa Rican President Rodrigo Carazo's recent address to the 33d session of the United Nations' General Assembly. I am particularly impressed with the purpose of President Carazo's address, the proposed establishment of an international university for peace under the auspices of the United Nations.

Mankind has come a long way in many fields of endeavor, yet we are still plagued by the age-old scourge of war. We have conquered space but we have yet to overcome hatred and bigotry. We have developed untold riches and luxuries, yet far too many of our brothers and sisters exist in abject poverty and despair. We have built massive institutions for war and destruction but we have yet to institutionalize our dreams of peace and human rights.

Mr. Speaker, I have, on many occasions, stood on this floor and disagreed with President Jimmy Carter on a number of different policies and programs. However, in the fields of human rights and human liberties, President Carter has my unqualified support and admiration. His bold initiatives for peace in the Middle East and his unswerving devotion to human liberties has earned him the rightful distinction to be called "Peacemaker."

Like Mr. Carter, President Carazo has devoted himself to the cause of peace and has put forth a concrete proposal to institutionalize that illusive and long sought after dream. His proposed university for peace, dedicated to the active pursuit of peace by men and women of good will everywhere, is a proposal which I urge the United States to support when

it is considered by the U.N. General Assembly. To my colleagues here assembled, I recommend that each of you take a few minutes to read and consider President Carazo's address and to reflect on its importance.

Mr. Speaker, at this time I would like to present for the RECORD the speech of my good friend, the President of Costa Rica, Rodrigo Carazo.

The speech follows:

ADDRESS BY THE PRESIDENT OF COSTA RICA, RODRIGO CARAZO

Mr. President, distinguished delegates: As I address this august assembly of the Organization in which Mankind has placed its highest hopes for the preservation of peace, the development of the Earth's peoples and the prevalence of respect for the rights of the human person, it is with deep satisfaction that I extend a respectful greeting to the honourable representatives of the sovereign States that take part, with identical rights, in the deliberations of this supreme body of the most eminent of international organizations. And to you, Mr. President, as one who ranks high among the intellectuals and men of outstanding insight who have lent distinction and renown to our Latin American spiritual community, I wish to express my hearfelt satisfaction at the well-deserved recognition your merits have received through your election to the presidency of this General Assembly of the United Nations in a year so crucial to that noblest of endeavours, the advancement of human rights, a cause to which your country and my own attach such great importance.

This year marks the thirtieth anniversary of the unanimous adoption of both the American Declaration of the Rights and Duties of Man, signed on the second of May, 1948, in Bogota, and of the Universal Declaration of Human Rights, adopted on the tenth of December of the same year in Paris, that city beloved of all free men since the historic day when the barricades raised in its ancient streets gave rise to the inmortal cry of "Liberty, Equality, Fraternity!" And now, as if to attest to the strength of their belief in this noble cause, a group of member States of the United Nations is preparing for the forthcoming inauguration of the Inter-American Court of Human Rights, whose seat is to be in Costa Rica, the country that was also the seat, more than 70 years ago, of our first regional court of justice, the Central-American Court, which was given competence to hear grievances and accusations by persons who considered that their rights had been violated by any of the governments of Central America.

HUMAN RIGHTS

Thirty years will shortly have elapsed since the Paris Declaration was drawn up. Much progress has since been made in this continuing struggle to secure recognition and respect for the rights of the human person in every corner of the globe. That declaration, a valuable yet limited expression of the juridical conscience of Mankind, gave way to the Human Rights Covenants adopted in this very hall on the sixteenth of December, 1966. Over ninety countries have secured the inalienable right recognized by the United Nations freely to determine their own destiny. Discrimination among men for reasons of race has wholly disappeared from the law of many countries, where the separation imposed by social custom has also diminished or abated. Today, although one nation or another may still cling to the laws and practices of "apartheid" abhorrent though they may be to all who believe in the oneness of the human race, the innate equality of men and the ideals of the United Nations, we may be sure that no such laws or practices can long endure, for they are infringements of the most sacred of the rights of the human person: respect for the dignity of man, which is both the wellspring and the foundation of the juridical doctrine of human rights. We therefore welcome the news that has recently reached us that biracial Government of Zimbabwe has adopted a series of measures that take the first step towards the abolition of all rules and measures implying unequal treatment of the inhabitants of that long suffering country merely by reason of the colour of their skin.

The work done by the United Nations in this field, which affects so many millions of men and women, as well as other innocent beings, as are children and adolescents, has been great and fruitful. Worthy of special mention is the arduous work done by the Commission on Human Rights and the Sub-Commissions, Committees and sub-committees created to deal with related problems. But this is not enough. In every corner of the earth, there continue to occur frequent cases of violation or non-recognition of rights which the world's conscience and the United Nations consider sacred because the domestic peace of States and, in the final analysis, peace among nations rests upon respects for those rights.

In this connection, Costa Rica has, for more than 12 years, tirelessly advocated the establishment of the post of a United Nations High Commissioner for Human Rights, which, like that of the United Nations High Commissioner for Refugees, would strengthen, through specific personal action, the application of the Universal Declaration and Covenants on the fundamental human rights and freedoms, which is essential to enable all men to enjoy peace and the blessings of progress and civilization.

We have once again pressed for the inclusion of this item because we feel that its continued presence on the agenda of the General Assembly will serve constantly to underscore its importance to the world. This, however, does not imply that we underestimate in any way the major role which has been played with respect to this item and to human rights in general, by the special committee entrusted with studying the item and reporting to the General Assembly

AGGRESSION BY NICARAGUA

A fortnight ago, my country, which has made peace a habit and a way of life, was the victim of the violation of a fundamental right of man: the right to peace.

My country's constitution forbids the establishment of an army and allows only a police force to keep the peace. Resources earmarked by other Nations for maintaining military forces are devoted to education. Costa Rica is thus able to appropriate one third of its national budget for education at all levels.

Costa Rica has no arsenals, no military forces or economic might. Yet it is not by default but by conviction that my country has clearly chosen a civilian vocation, one which places right over might, and the search for the riches of the spirit over the desire for dominance. Costa Rica's lack of force is its strength.

On the twelfth of September, aircraft of the Nicaraguan Air Force violated the border with Costa Rica and proceeded to strafe the only army our country has: its students and teachers. The order was given by the Government of Nicaragua, and the target was the innermost heart of our nationhood.

My Government, which is based upon the rule of law and respect for international agreements, repelled the attack with its finest weapons: the moral courage of its people, and reliance upon international treaties. It immediately appealed to the Organization of American States, invoking its Charter, and supported the open and exemplary initiative of the Government of Venezuela, which called for a meeting of American Foreign Ministers. My Government brought its case before the Organization of American States, as a regional body, before appealing to the Security Council.

In this matter, my Government has enjoyed the resolute and effective support of the Governments of Venezuela and Panama, which have shown themselves ready to come to the aid of a country which has no army and no weapons, as well as the support of other friendly nations. Before this world forum, I convey to them the thanks of my Government and my people.

How great a task lies before us in the field of human rights when a country can be assailed because it lives in peace! How great is our responsibility when dedication to culture, to education, health and development can be greeted with a treacherous attack! How much yet remains to be done to uplift the minds of men and nations when weapons, in the hands of a foreign country's ruler, can be raised against children, teachers and students walking joyously and peacefully through the fields of their homeland organizing the celebration of their Independence Day, as has just occurred in my country.

Distinguished Delegates, compare the character of the attacker and the position of the attacked, and ask yourselves whether this case leaves any room for doubt as to who is in the right.

My people and Government solemnly undertake, before this forum of universal dialogue, to continue demonstrating their adhesion to human rights and to the cause of peace, and to strive without respite to secure respect for the law and for the human dignity in the face of aggression, genocide, violence and the stifling of liberty. This is my Government's reply to those who, in word and deed, have left the stain of their treachery upon our land.

I am confident that the international community will recognize who is in the right and will issue a just verdict, as an expression of its faith in its principles as a demonstration of their fruitful application.

SELF DETERMINATION

The Covenants on Economic, Social and Cultural Rights and on Civil and Political Rights, of sixteen December 1966, which Costa Rica had the privilege of signing, approving and ratifying before any other country, are an embodiment of the inalienable right of peoples freely to exercise self determination in the political, economic and social domains. Both Governments, using the same wording, place this right in the first paragraph of their first article, to indicate thereby that the legal framework of respect for human rights and peace among nations rests fundamentally upon recognition of the right of peoples freely to determine their political institutions. Thanks to this sound principle, we have today in this General Assembly representatives of a great many States which secured independence, recognition and sovereignty since 1945, among them the newest member of our Organization, the Solomon Islands, to whom I wish to extend my Government's heartfelt congratulations and our best wishes for the development and prosperity of this new nation. Costa Rica cannot hide its satisfaction at having contributed, on all previous occasions, to ensuring that the aspirations of different groups of human beings to govern themselves freely and independently should be recognized by other nations and by our Organization.

MIDDLE EAST

In this regard, my Government publicly expresses its joy at the signing by President Anwar El Sadat and Prime Minister Menagem Begin, of a preliminary peace agreement, under the auspices of President Jimmy Carter, which augurs an historic change in international relations in the Middle East, if good will, pursuit of the ideal of peace,

and direct dialogue between the two countries continue.

It is my Government's sincere hope that, in the long-awaited settlement of the very delicate problems of the Middle East, the right of the Palestinian people freely to determine its own destiny should, as the Camp David document suggests, become a reality in the near future. My Government likewise reaffirms the right of the State of Israel to have its status as a free and sovereign State acknowledged and guaranteed by all members of this Organization.

The direct dialogue between Israel and Egypt has inspired new hope in all peace-loving men and peoples. Peace is possible. In that conviction, I appeal to all Governments in this effort and pursue in this fruitful and exemplary dialogue so that, before long, they can offer the world imposing evidence of faith in man, and so that, once again, as in Biblical times, the dove of peace shall take flight and peoples shall be united. On that day, Mankind shall turn a new page in its history and the blessings of all men of good will shall go with the leaders who brought about this achievement.

My Government upholds the unique effectiveness of frank and cordial dialogue, as in the case of Egypt and Israel. We also harbour the highest hopes for Central America expressing once again Costa Rica's heartfelt wish and concern to see a speedy solution of the problems still pending between the sister nations of El Salvador and Honduras. Accordingly, I reaffirm my Government's confidence in the mediation mechanism which has been established.

PANAMA CANAL

My Government hopes that the same spirit of justice will attend the deliberations of the Third United Nations Conference on the Law of the Sea, which has just completed another session, as well as the multilateral negotiations being conducted by several countries concerning the rights and obligations of States which have interests or which carry on fishing activities in the economic zones which the new Law of the Sea recognizes for coastal States. Costa Rica, whole land territory is small, possesses broad maritime zones in the Pacific and Atlantic Oceans that it has claimed for many years, with no objection by other States, on legal grounds which correspond to those that have already been incorporated in the text which the Conference on the Law of the Sea is working out by consensus. These zones abound in marine species of all kinds—some sedentary, others migratory—all of which are part of the natural resources which both law and equity recognize as the economic heritage of Costa Rica, and which the government that took office in my country in the eighth of May proposes to defend with all the force of the law in order to ensure that the Costa Rican people receive their just share of the benefits derived from permitting the exploitation of their fisheries by Costa Rican vessels of by foreign vessels which obtain the necessary permission in accordance with duly established regulations. It is all well and good that on the high seas, which are the *res communes* of Mankind, fishing fleets of economically powerful nations should take the harvests without sharing the product of their sale with any country other than their own; it would be inequitable, however, for such fleets to transfer their bases thousands of kilometres away in order to take advantage of the thunnidae which abound in the economic zones of other nations without those nations, which are generally underdeveloped or at an early stage in development, receiving a fair share of the proceeds accruing from the sale of a natural resource that was taken from their economic zones.

It is not right that the great industrial powers should reserve extensive fishing zones for themselves, send their fleets thousands of kilometres away to reap resources lying off the coasts of developing States, and yet not recognize the rights of those States with regard to the exploitation of their marine resources, which are the only such resources accessible to their generally poor equipped national fleets.

As I stated during my first visit to our island territory most distant from the mainland—Cocos Island—"the President of the United States has opened up a new and promising era in international relations by proceeding with the exchange of documents concerning the Panama Canal Treaty. The principles he laid down are categorical and, if the new Canal Treaty is the first sign of this new policy, Costa Rica trusts that those same principles will apply in the case of fisheries, in the interests of justice in relations between our two countries." The resources of the sea are an important part of the national wealth of coastal States. Costa Rica hopes that, at this promising juncture, as nations strive to find just formulae conducive to development, bi-lateral or multilateral agreements can be worked out that will recognize the right of Costa Rica or of any other State that authorizes exploration of its resources by foreign fleets to receive the equitable share to which it is entitled by the use of the living resources of its exclusive economic zone.

DISARMAMENT

All men who long for peace are concerned about the arms race that has been unleashed among the largest world powers and which is consuming enormous economic resources and absorbing the efforts of intelligent men who could otherwise place their inventive genius in the service of peaceful arts and sciences, and thus contribute to the worthy tasks of development and the gradual eradication of the ignorance and poverty that persist in many large areas of the globe. My Government, which represents a people known for its love of peace, cannot fail to reiterate its hope that the major military powers will find a propitious formula enabling them to earmark for peaceful purposes a substantial part of the financial resources and man-hours which they are now devoting to the construction of ever more sophisticated instruments of death and destruction.

As we enter the closing years of the Twentieth Century and near the dawn of the Third Millenium, the question of disarmament as the basis for the establishment of peace in the world must, in my Government's view, be accompanied by a new vision of peace.

The purpose of global efforts for disarmament is to eliminate the principal physical instrument of war. All things considered, what is involved is a worldwide decision and a worldwide struggle, which may fail to alter the fundamental problem: the absence of a collective and positive will for peace. The struggle for disarmament must therefore be accompanied by a pedagogy of peace—in other words, education for peace. Disarmament may serve to avert imminent disaster. Education for peace is a permanent attitude. Disarmament means discarding an instrument of war in order to achieve the objective of peace. Education for peace means creating the real conditions for a peaceful world. Consequently disarmament should advance hand in hand with education for peace.

I therefore propose to this Thirty-Third General Assembly of the United Nations the creation of a University for Peace, within the framework of the United Nations University network, as a concrete expression of this new vision of a triumphant and dynamic peace, this new vision of peace as a result of education and consciousness.

This University would be a great centre of higher learning, open to all peoples and all men of good will, whose primary objective would be to contribute, through research, teaching, dissemination and free inquiry, to the cause of peace, to mutual knowledge for men throughout the world, and to the promotion among all men of a spirit of understanding, tolerance, and peaceful coexistence, in order to stimulate international co-operation and eliminate any situation which could imperil universal peace and progress.

The United Nations is, by definition, dedicated to the cause of peace. That is its supreme and inescapable purpose.

The United Nations has created various bodies to perfom specific tasks in economic, social and cultural development. However, it lacks the supreme institution, that from which it derives its essence and its reason for being: the institution of Peace. The United Nations was created to safeguard peace, and the entire organization is oriented towards that central goal. However, for historical reasons, its concept of peace has been closer to the notion of peace as the absence of war than to that of peace as the supreme achievement of man, as a continuing task in the domain of learning. Accordingly, I propose the creation of an institution to prepare men and nations for peace.

Every positive and concrete effort against the arms race meets with opposition from those who wield the old Latin principle "Si vis pacem, para bellum" ("If you desire peace, prepare for war".) Today, however, preparing for war has a different goal, not the achievement of peace, but the prevalence of fear, as the means to world equilibrium. This, then, is peace founded on an act of fear, not on conviction or on an act of conscience.

For the military maxim, I propose to substitute a human one: "If you desire peace, prepare for peace."

Peace is a dynamic concept. It is a condition of life and, consequently, one of the fundamental human rights. Viewing the matter in this way, it becomes a question not of keeping the peace, but of achieving it. Peace is a right of the human species, but it is also a duty. It follows that every man, and Mankind as a whole, must be not only the object, but the subject of peace. Men may enjoy this right, but they must, at the same time, keep it in being. Peace is the work of justice and the fruit of love, but it must also be the product of education, or, better said, education must be one of its most effective instruments of action.

At this point in the Twentieth Century we are being called upon to face, in all their tragic urgency, the needs of Mankind. However, we must at the same time face up to the requirements of the species. The University for Peace must be the laboratory of the spirit of peace, the crucible in which we must form the new mentality of peace over the decades to come. For the Twenty-First Century shall be peaceful, or it shall not be.

Peace is not the end of a conflict or an interlude between wars; it is a constantly renewed challenge. It must be our supreme objective and, as such, we must provide concrete means for affirming it, recalling that the present generation reserves its trust for words that are accompanied by deeds.

Peace, like war, is not the result of historical predestination; it springs from man's freedom. Peace is within man, but it urgently requires measures to safeguard and create it: diplomatic relations, covenants, agreements, treaties, economic and human resources, means of information and education, laws and, finally, a vast machinery to give visible and tangible shape to this ceaseless quest of man on earth. What would become of the human species without all of a specific institution dedicated to preparing for peace, training for peace, two decades before the new millennium?

Peace is not merely a matter of noble sentiments. It requires, by its very nature, some measure of precise and diversified knowledge, both theoretical and practical. That is why it is urgent that man's intel-

ligence and culture should be directed towards peace. What is involved, as has been proposed by one eminent voice, is marshalling all man's intellectual faculties, all of the cultural and scientific heritage of mankind, in order that we may become an instrument of peace. What this implies, finally, is preparing and training man's will and intelligence for peace.

Peace is made, not found. Peace is not rest. It is not another word for fear. It is the pulse of life.

Settlements imposed by fear do not constitute peace. The institutions of peace we have today were born in the wake of the war. They were inspired by pain and fear. But, as the pain and fear of that holocaust subside, the possibility of a new war looms ever greater. Why is this happening? Because, as the old Latin maxim would have it, we are still preparing for war in order to bring peace. Thus, the vicious circle continues and Mankind is never prepared for peace.

With this in mind, what I offer for your consideration is an institution that would not be built on fear, but on a triumphant and vigorous idea of peace. The world must instil a dynamic mentality of peace in adults, children and young people. To that end, we must put to use one of the greatest and most effective means of ennobling and transforming man: education. In this way we may forge in man the thoughts and habits of peace, bringing peace first into the minds and hearts of men, and then into world politics.

My Government will submit a specific draft resolution on this subject, requesting the General Assembly to consider the initiative of creating a University of Peace along the lines I have described, as the contribution of a peaceful people to the cause of peace, the supreme goal of the United Nations, on the thirtieth anniversary of the Universal Declaration of Human Rights.

And, as a token of good will and the desire to take part in the creation of the University for Peace, I offer my country, Costa Rica, as its host. I hope that the distinguished representatives of the Member States will view this offer as testimony of our faith and trust in the ability of this Organization to find new ways to strengthen and nurture a flourishing and positive peace in the world through the education of man. Let us rally to peace!

Costa Rica places at the disposal of the United Nations achitectural drawings and programmes of study which we have already developed, as well as an ample and ideal site, from an ecological and geographical viewpoint, for the realization of this project. The tropical features of the site, coupled with a refreshing altitude, produce a spring-like climate. Largely surrounded by virgin forest, the site is an ecological paradise.

The area set aside for the University for Peace enjoys a climate which, from the physical and biological standpoint, is particularly well suited for the realization of an historic project on peace.

Distinguished Delegates: Thirty-five years will shortly have elapsed since the signing, at Moscow in October of 1943, of the Four Nations Declaration on General Security, which, for the first time, recognized the necessity of establishing "a general international organization, based on the principle of the sovereign equality of all peace-loving States, and open to membership by all such States, large and small, for the maintenance of international peace and security." That declaration planted the seed which, finding fertile soil in a Mankind racked by blood and destruction, was to grow into this august Assembly of sovereign States, the largest and most exemplary organ of international action that the centuries have witnessed. I call to mind here the illustrious names of so many eminent men of the Old and New Worlds, of the Northern and Southern Hemispheres, men from strong countries or from weak countries, leaders of Christianity and of other spiritual movements, who have spoken from this podium and have contributed so much to this Organization's endeavours to fulfill the hopes that led to its creation.

Distinguished Delegates, allow me once again to extend to you all my respect and consideration.●

INTRODUCTION OF THE HALIBUT CONSERVATION AND MANAGEMENT ACT

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. YOUNG of Alaska. Mr. Speaker, today, I am joining my colleague from the State of Washington (Mr. PRITCHARD) in introducing the Halibut Conservation and Management Act. This bill will bring under U.S. jurisdiction the research and management activities currently being conducted by the International Pacific Halibut Commission.

The Halibut Commission was established in 1923 by a convention signed with Canada. The Commission represented the first attempt at international management of a marine resource. Since its establishment, the Commission has done an excellent job in compiling data on the nature and distribution of Pacific halibut and has assembled a distinguished staff of marine scientists to aid in the management of the resource.

Unfortunately, problems have arisen in recent years. Halibut stocks have declined due to a number of factors, including a high rate of mortality of juvenile halibut from incidental catches by foreign trawl vessels.

Halibut management has become entangled in disputes between the United States and Canada over the location of international boundaries and reciprocal fishing rights. Canadian fishermen have begun to take more halibut in U.S. waters than in Canadian waters. All of these problems have caused the United States to give notice of withdrawal from the Halibut Convention, effective April 1, 1979. This will cause the Halibut Commission to be disbanded and will mean the loss of the carefully acquired data.

While I concur in the need to withdraw from the convention, I do feel that the years of research conducted by the Commission should not go to waste. Thus, this bill, which is supported in principle by the Governor of Alaska, the North Pacific Fisheries Management Council, and the Pacific halibut fishermen, will transfer the research data to the Northwest and Alaska Fisheries Center operated by the National Marine Fisheries Service and will provide for uninterrupted management of the halibut resource. By working within the framework provided by the Fisheries Conservation and Management Act, this bill will allow U.S. halibut fishermen to continue earning their livelihood without dangerously depleting the existing halibut stocks.●

CZECHOSLOVAKIA

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DERWINSKI. Mr. Speaker, as we will be in adjournment on the 28th of October, I would like to take this time to remind the Members of a very important date in the history of Czechoslovakia.

Although before 1914, the Czechs and Slovaks existed only as a nation within Austria-Hungary, the outbreak of World War II, changed this outlook. Prof. Thomas Garrigue Masaryk devoted himself to the purpose of liberating his country, and became the spiritual head of the struggle for independence.

In May of 1918, Thomas Masaryk went to the United States where he secured official support for his cause which resulted in its later adoption by the allied powers.

His work found its culmination in November 1918, when he was elected first President of the Czechoslovakian Republic. He served in this capacity for 17 years in accordance with democratic principles. Ill health forced his resignation in December 1935, and he died in September 1937, thus being spared the agony of seeing his homeland under the control of Nazi and Communist oppressors.

His memory lives on in the minds and hearts of his countrymen to whom he dedicated his life, and remains a symbol of inspiration to all who value freedom and true national independence.

In honor of this anniversary of the birth of modern Czechoslovakia, I wish to insert a letter which Professor Masaryk sent to President Wilson on October 18, 1918, and a copy of the Czechoslovak Declaration of Independence:

OCTOBER 18, 1918.

President WOODROW WILSON,
Executive Mansion,
Washington, D.C.

MR. PRESIDENT: I beg to enclose our Declaration of Independence, which is published today in all the Allied countries and in America; the National Council was compelled to make this declaration now because of the Austrian moves for peace and toward a mock-federation calculated to deceive the world.

Believe me, Mr. President,
Very respectfully yours,
T. G. MASARYK.

DECLARATION OF INDEPENDENCE OF THE CZECHOSLOVAK NATION BY ITS PROVISIONAL GOVERNMENT

At this grave moment, when the Hohenzollerns are offering peace in order to stop the victorious advance of the Allied armies and to prevent the dismemberment of Austria-Hungary and Turkey, and when the Habsburgs are promising the federalization of the Empire and autonomy to the dissatisfied nationalities committed to their rule, we, the Czechoslovak National Council, recognized by the Allied and American Governments as the Provisional Government of the Czechoslovak State and Nation, in complete accord with the Declaration of the Czech Deputies, made in Prague on January 6, 1918, and realizing that federalization, and, still more, autonomy, mean nothing under a

Habsburg dynasty, do hereby make and declare this our Declaration of Independence.

We do this because of our belief that no people should be forced to live under a sovereignty they do not recognize, and because of our knowledge and firm conviction that our nation cannot freely develop in a Habsburg mock-federation, which is only a new form of the denationalizing oppression under which we have suffered for the past three hundred years. We consider freedom to be the first pre-requisite for federalization, and believe that the free nations of Central and Eastern Europe may easily federate should they find it necessary.

We make this declaration on the basis of our historic and natural right. We have been an independent State since the seventh Century; and, in 1526, as an independent State, consisting of Bohemia, Moravia, and Silesia, we joined with Austria and Hungary in a defensive union against the Turkish danger. We have never voluntarily surrendered our rights as an independent State in this confederation. The Habsburgs broke their compact with our nation by illegally transgressing our rights and violating the Constitution of our State which they had pledged themselves to uphold, and we therefore refuse longer to remain a part of Austria-Hungary in any form.

We claim the right of Bohemia to be reunited with her Slovak brethren of Slovakia, once part of our national State, later torn from our national body, and fifty years ago incorporated in the Hungarian State.

We reject the sacrilegious assertion that the power of the Habsburg and Hohenzollern dynasties is of divine origin; we refuse to recognize the divine right of kings. Our nation elected the Habsburgs to the throne of Bohemia of its own free will, and by the same right deposes them. We hereby declare the Habsburg dynasty unworthy of leading our nation, and deny all of their claims to rule in the Czechoslovak Land, which we here and now declare shall henceforth be a free and independent people and nation.

We accept and shall adhere to the ideals of modern democracy, as they have been the ideals of our nation for centuries. We accept the American principles as laid down by President Wilson: the principles of liberated mankind,—of the actual equality of nations,—and of governments deriving all their just powers from the consent of the governed. We, the nation of Comenius, cannot but accept these principles expressed in the American Declaration of Independence, the principles of Lincoln, and of the Declaration of the Rights of Man and of the Citizen. For these principles our nation shed its blood in the memorable Hussite Wars five hundred years ago, for these same principles, beside her Allies in Russia, Italy, and France, our nation is shedding its blood today.

We shall outline only the main principles of the Constitution of the Czechoslovak Nation; the final decision as to the Constitution itself falls to the legally chosen representatives of the liberated and united people.

The Czechoslovak State shall be a Republic. In constant endeavor for progress it will guarantee complete freedom of conscience, religion and science, literature and art, speech, the press, and the right of assembly and petition. The Church shall be separated from the State.

Our democracy shall rest on universal suffrage. Women shall be placed on equal footing with men, politically, socially and culturally. The rights of the minority shall be safeguarded by proportional representation; national minorities shall enjoy equal rights. The government shall be parliamentary in form and shall recognize the principles of initiative and referendum. The standing army will be replaced by militia.

The Czechoslovak Nation will carry out far-reaching social and economic reforms; the large estates will be redeemed for home colonization; patents of nobility will be abolished.

Our nation will assume its part of the Austro-Hungarian pre-war public debt; the debts for this war we leave to those who incurred them.

In its foreign policy the Czechoslovak Nation will accept its full share of responsibility in the reorganization of Eastern Europe. It accepts fully the democratic and social principle of nationalism and subscribes to the doctrine that all covenants and treaties shall be entered into openly and frankly without secret diplomacy.

Our constitution shall provide an efficient, rational, and just government, which will exclude all special privileges and prohibit class legislation.

Democracy has defeated theocratic autocracy. Militarism is overcome, democracy is victorious; on the basis of democracy mankind will be reorganized. The forces of darkness have served the victory of light, the longed-for age of humanity is dawning.

We believe in democracy, we believe in liberty, and liberty over more.

Given in Paris, on the eighteenth day of October 1918.

Professor Thomas G. Masaryk, Prime Minister and Minister of Finance.

General Dr. Milan R. Stefanik, Minister of National Defense.

Dr. Edward Benes, Minister of Foreign Affairs and of Interior.●

MONSIGNOR MEYER RETIRES

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GEPHARDT. Mr. Speaker, it is my pleasure to recognize today, Msgr. Louis F. Meyer of St. Louis. Monsignor Meyer recently retired as the director of the St. Louis Archdiocesan Catholic Youth Council after 15 years of dedicated service. Upon his retirement from the CYC, he assumed the directorship of the Family Life Commission in St. Louis.

Monsignor Meyer has worked with the youth of St. Louis for over 30 years. As director of the CYC, he directed all of the archdiocesan youth programs. These included camps, sporting activities, teenage and adult programs, and the Girl Scouts.

Additionally, Monsignor Meyer has been very active in efforts to preserve the strong neighborhood character of South St. Louis. Through his insistence that the CYC teams be products of the parishes they were associated with, he encouraged the development of a strong sense of community and neighborhood. Many St. Louisans active in the revitalization effort of St. Louis can thank Monsignor Meyer for developing that quality and others so important to the development of an individual character and of his community.

Now that Monsignor Meyer is giving up his post with the CYC after 30 long years, it is tempting to dwell on the magnitude of the loss that all St. Louisans will feel. But Monsignor Meyer's contributions to his fellow man have been so great that the St. Louis community at this moment, can feel a glowing pride that his contributions are still with us today and will endure for a long time in the future.

For all the young people who were touched by this man's understanding and compassion in the formative years of their lives, a chorus of "thank you's" will be heard this Thursday evening, October 19, when members of the St. Louis community will honor Monsignor Meyer for his service. I would like to join them by offering my sincere appreciation for his work and my best wishes.●

CONGRESSIONAL SALUTE TO THE CLERGY AND PARISHIONERS, ST. GEORGE GREEK ORTHODOX CHURCH, CLIFTON, N.J.

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ROE. Mr. Speaker, on Sunday morning, November 12, residents of my congressional district, State of New Jersey, will join with His Eminence Archbishop Iakovos, primate of the Greek Orthodox Church of North and South America, assisted by Bishop Silas of Amphipolis, Reverend Father John P. Orfanakos, presbyster, other distinguished members of the clergy and parishioners in the solemn consecration of the St. George Greek Orthodox Church located in the city of Clifton, my congressional district, State of New Jersey.

Mr. Speaker, consecration services will be followed by a consecration banquet at the Wayne Manor and I am deeply honored and privileged to have been invited to participate in this most historic event.

In recognition of the fact that our Nation was founded on the cornerstone of our people's faith in God, which is truly the spirit, conscience and very being of our society, I appreciate the opportunity to call this consecration service to the attention of you and our colleagues here in the Congress. I know you will want to join with me in extending our warmest greetings and felicitations to the pastor of St. George's, Father Orfanakos, his associate priests, Hon. Peter N. Kartanos, president, the board of trustees, and all of the other members of this congregation of our citizens of Greek heritage who are promulgating the richness of their religious culture through the consecration of St. George Greek Orthodox Church.

Mr. Speaker, the magnificence and splendor of the St. George Greek Orthodox Church where the consecration services will be conducted was described to me by Father Orfanakos, as follows:

The cornerstone for the beautiful, Byzantine Style edifice, on the side of Garrett Mountain, was laid in December, 1971, and the first Divine Liturgy was conducted three years later. Demetris Siderakis was the architect and Leegwater-Riker the builders. The furnishings were imported from Greece and the iconography, which is almost completed, is being done by Constantine Youssis. The stained glass windows were done by Hiemer & Co., a Clifton enterprise.

The present location is the fourth in succession since a handful of Greek immigrants residing in the Passaic area established the original church in 1921 over a store. Later the church moved to Lincoln Street and then to Hamilton Avenue. The church serves the

spiritual needs of the Greek Orthodox of Passaic County and some sections of Bergen and Essex Counties

It provides, in addition to religious guidance and Sunday School, a Greek language school three days a week for the parish children and once a week for adults who wish to learn Greek—when there are enough persons to form a class.

Youth organizations, the Philoptochos Society, the Senior Citizens Club have become the outlets for the athletic, philanthropic and creative energies of the parishioners under the guidance of the Reverend Father John P. Orfanakos and the Board of Trustees led by President Peter N. Kartanos and the president of each parish organization.

Mr. Speaker, to understand the wealth and vibrancy of inspiration that the consecration services signify, with your permission, I would like to insert at this point in our historic journal of Congress the following information related to to me by Father Orfanakos on the baptism, sanctification, consecration, and dedication embodied in this Greek religious service:

THE SERVICE OF THE CONSECRATION

On Sunday, November 12, 1978, we will have our church consecrated. The solemn service of the Consecration will be celebrated by his Eminence Archbishop Iakovos.

The Consecration Service dates back to the 4th Century A.D. The tradition to dedicate an Altar to the service of God was practiced by the Jews, as recorded in the Old Testament.

Consecration means "To make sacred," to set apart for sacred use, thus the Consecration of the Church means that the Church building is set apart especially and exclusively for the purpose of worshipping God. St. Symeon of Thessalonica writes "Just as a bishop or priest is needed to celebrate the Divine Liturgy and a Bishop to celebrate Holy Orders, in like manner these rites have need of an Altar, for the Altar is the Church and through the Altar the Church is made Holy; for without an Altar there can be no Church, but only a house of prayers."

On the evening before the day of the Consecration, at the Vesper Service, the Archbishop followed by the priests, will enter the Church carrying the Holy Relics, proceeds to the Sanctuary, and stands before the Altar Table, which has been stripped of all its Holy articles. There he separates the Holy Relics into three small portions, places them on a paten and covers the paten with a veil.

On the morning of the Consecration, at the conclusion of the Orthros (Matins) the Archbishop dressed with all his vestments, proceeds to the Altar and stands before the Holy Relics. The Archbishop, holding the paten containing the holy relics above his head, leaves the Church preceded by the Altar boys, clergy and followed by the faithful.

A procession three times around the Church will take place, stopping each time in front of the Church, where a table is set, and where the Epistle and Gospel readings are read. Upon the third completion the Archbishop places the holy relics on the table which is in front of the Church, and the following dialogue takes place, between the Archbishop, who represents Christ returning to heaven at the Ascension, and a priest within the Church who represents an angel: "Open, Open the gates and let them remain open forever and let the king of glory enter." "Who is this king of Glory?" "The Lord strong and mighty, the Lord mighty in battle, the Lord of hosts. He is the king of glory."

The gates of the church open wide and the Archbishop proceeds to the Sanctuary and places the paten on the Altar table. Uncovers the Holy Relics and removes them from the paten and places them in a small Pyx (box), sprinkles the relics with the oil of Holy Chrism and seals the pyx securely reciting at the same time the words: "May the memory of all those who contributed and built this Church be eternal. Amen." Deposited with the Holy Relics are the names of the living and dead for eternal commemoration. He then deposits the pyx containing the holy relics in a concealed crypt in the center of the Altar Table and pours over it wax-mastic, a mixture of wax, mastic, myrrh, aloe, incense, resin and ladanum, to seal them in.

The Archbishop then puts on over his Liturgical vestments a white garment made of pure linen, "Savvanon" which reaches from his shoulders to his feet. This white linen garment reminds us of the cloth (Shroud) with which Joseph of Arimathea wrapped the body of our Lord before placing it in the tomb.

The Archbishop wearing the shroud reminds us also of the death of Christ so that we may never forget that the Altar symbolizes the tomb of Jesus Christ. He then proceeds to cleanse and purify the Altar table.

The materials of which the Altar table is constructed die to their former use and resurrect to a new use, the Sepulchre of our Lord.

A basin, containing warm water, and a vessel of wine and one of rose water are brought before the Archbishop who blesses and prays for their sanctification. Pouring the water three times on the Altar Table in the sign of the Cross the Archbishop says each time "In the name of the Father and the Son and the Holy Ghost." The Archbishop washes the Altar Table with a new sponge as Psalm 84 is read. Symeon of Salonika says: "Since the Altar symbolizes Jesus, it also receives the marks of His Baptism, and this in two ways. It becomes clean by washing it and is sanctified with Holy Spirit since it becomes the vessel of the Spirit." The Archbishop glorifies God at the completion of the washing and wiping off the Holy Table. Then three times he anoints the Altar Table with rosewater symbolizes the anointing with sweet smelling fragrances of Christ's Body. The Altar Table is wiped with the Corporals, Antimensia. The Archbishop now takes a vial filled with oil of the Holy Chrism and pours the contents on the Altar making the Cross three times (as is done during the Holy Baptism) chanting at the same time the "Alleluia." He proceeds then to anoint carefully the entire Altar. After this, he wipes the Altar dry with the same corporals with which he wiped the rosewater and wine.

Four icons of the Evangelists are fastened on the four corners of the Altar Table with mastic. The Altar now symbolizes the whole church, which from the four corners of the earth is held together by the Lord and is built on Him, through the preaching of the Gospel. The Altar is then covered with a white linen shroud called the "Katasarkion." This symbolizes the shroud with which our Lord was wrapped for burial. The "Katasarkion is secured around the Altar with a cord, which typifies the cord tied around our Lord when he was led before the High priests. The shroud will never be removed again and will remain on the Altar as long as the Church will remain standing, for our Lord died and was buried once and for all time. Over the "Katasarkion" he places a cloth of rich material called "Epedyses" or "endyte." Finally, he places the "eiliton" or corporal (Antiminsion) on the Altar and upon this the book of the Holy Gospels. The Priests assist in completing the vesting of the Altar by placing the Tabernacle, candlesticks and the Vigil light on the Altar.

Since the Altar Table has been consecrated, sanctified, and adorned it is censed, for we cense that which is holy, the church is then censed. The Archbishop then proceeds to anoint with the oil of Holy Chrism the four walls of the Church. This is done by means of a long pole at the end of which is secured tightly some cotton. St. Symeon of Salonika says: "The entire Church is anointed, symbolizing the sanctification of all humanity by God's Grace.

Sometimes during the Service the Archbishop will invite the Congregation to participate in the offering of light to the Vigil Lamp by approaching the Solea and placing oil into this lamp and making an offering to the Church. The Archbishop then lights the Vigil Lamp which he places near the Tabernacle and which is never to be extinguished. This eternal light represents the ever presence of the light that Christ brought to the world which was found in darkness.

The church has now been baptized, anointed, sanctified, consecrated, and dedicated to God for eternal use as an Orthodox Christian House of Worship. The Divine Liturgy is performed immediately after the Consecration Service, for the Holy Eucharist consumates the Consecration of the Church, and which is to be celebrated for seven consecutive days.

Mr. Speaker, as they consecrate their altar to the service of God dedicated to the noble cause of service to God and brotherhood, goodwill and understanding among all mankind, we extend this national recognition and tribute to the elegance of the faith of our people of Greek heritage and salute the clergy and parishioners of St. George Greek Orthodox Church.●

THE OLDEST PUBLIC/PAROCHIAL SCHOOL RIVALRY IN PHILADELPHIA

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LEDERER. Mr. Speaker, I would like to pause in the business of the House to recognize a great rivalry in the history of Philadelphia football—the North Catholic-Frankford High School football game. This is a rivalry which began on October 5, 1928; certainly the oldest public school/parochial school game in Philadelphia and possibly the Nation. The game cannot be played on the football field of either school, simply because the numerous fans of this rivalry, often numbering over 30,000 cannot be accommodated by the limited seating in a high school field.

This Thanksgiving Day game will mark the 50th anniversary of this great series. Fittingly, the game will be played in Philadelphia's finest sporting complex, Veterans Stadium. Since 1931, this game has begun at 9:30 a.m., making it the first football game to be played in the Nation on each Thanksgiving Day. While this may be symbolic, certainly this great Thanksgiving classic is No. 1 in more ways than simply the time that it is played.

Mr. Speaker, I wish to thank Mr. Jeb Lynch, coach of North Catholic High School football, and Mr. Al Angelo, coach of Frankford High School football, for the great work they have done in preparing their respective teams for this tremendous classic.

I also wish to salute the students, faculty, alumni, fans and, of course, players of North Catholic and Frankford

High Schools for making Philadelphia's greatest Parochial/Public High School rivalry possible.

This Thanksgiving Day we will see in the gridiron future all American's which has been a Philadelphia tradition for over 50 years.●

NATIONAL COMMISSION TO STUDY COMPUTERS IN EDUCATION

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SCHEUER. Mr. Speaker, today I and Representative ROBERT S. WALKER have introduced H.R. 14329 to establish a national commission to study the uses of computers in the Nation's educational system. There are two major reasons for our action:

First, our Nation must critically assess how it will prepare our young people for a developing information-based society—a future society where computer literacy may be as critical as reading literacy is today.

Second, we must take full advantage of the marvelous potential being offered by what is termed the microelectronic revolution in the computer industry. This revolution will make computers affordable by every school and virtually every home. The educational potential of this development cannot go ignored.

The idea behind this commission and the specific tasks it should undertake grew out of a 6-day oversight review of the Domestic and International Scientific Planning, Analysis, and Cooperation (DISPAC) Subcommittee of the House Science and Technology Committee during the fall of 1977. Witnesses at those hearings were convincing to the subcommittee that such a commission is necessary to put our country on the correct course of computer usage.

Specific tasks assigned to this commission will lay the groundwork for an appropriate national policy on computers in education. Items to be addressed include:

First. A forecast of changes in information technology during the period from 1980 to 2000, with emphasis on the effect of such technology on education and lifestyles;

Second. A forecast of the need for individuals with computer skills during the period from 1980 to 2000, with emphasis on the need in the service sector of the Nation's economy for individuals skilled in information processing;

Third. A forecast of the effect of increased use of computers in education on school financing and local taxation during the period from 1980 to 2000;

Fourth. An investigation of needed incentives for increasing private sector involvement in the research and development, demonstration, dissemination, and utilization of computers for education purposes;

Fifth. An investigation of the costs and benefits of alternative methods of training teachers in the use and application of information technologies and computer-based instructional materials;

Sixth. An investigation of the status and effectiveness of existing computer-based instructional techniques;

Seventh. An investigation of research in the application of cognitive psychology and artificial intelligence to computer-based learning, and

Eighth. An investigation of institutional mechanisms for development of exemplary computer-based learning techniques.

To assure proper understanding of these areas of information, the commission will be composed of individuals who are affected by and involved in our Nation's technological progress in this field. Specifically, the Commission shall consist of 12 members appointed by the President with the advice and consent of the Senate.

At least one member of the Commission shall be appointed from each of the following three categories:

First. Individuals who are engaged in the professions of teaching, education administration, or education research.

Second. Individuals who are developers of computer-based instructional materials and computer equipment.

Third. Individuals who are enrolled in school or parents of such individuals.

Not more than three members of the Commission shall be officers or employees of the United States.

Mr. Speaker, we urge passage of this act. In scrutinizing the use of computers in improving our Nation's educational system, it is evident that the problem is large, but the promise is great.●

NATURAL GAS ISSUE

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RYAN. Mr. Speaker, the natural gas issue, in spite of recent congressional action on energy policy legislation, remains with us and demands policy initiatives on the part of the U.S. Government.

A case in point is the recent decision by the Department of Energy Secretary Schlesinger to import liquefied natural gas (LNG) from Indonesia. Not only is the transport and unloading of LNG dangerous, but costly special ships and docking facilities must be built. In California, there is strong public and local government reaction against such facilities.

I grant that the LNG decision may have been made at a time when other alternatives did not exist. Now such alternatives exist, not only to LNG and its problems, but to the purchase of such fuel from countries already receiving great amounts of U.S. money for petroleum.

We now have the opportunity to buy both natural gas and petroleum from our good neighbor to the South—Mexico. It is time to place our relations with Mexico on the same basis as those we enjoy with our other good neighbor—Canada.

It makes sense to turn to Mexico for oil and natural gas instead of other countries, with which we do not have such strong, cultural, social, historical, or political ties. This is also an opportunity for us to deal in a positive way with some of the other issues confronting our two governments, for example, immigration, drugs, et cetera.

It is to the mutual benefit of all the nations in the Western Hemisphere to have a strong and healthy economy in Mexico. We can aid in this by increasing trade, cooperation, and improving political and cultural relations with Mexico while assuring a safe and reliable energy source for the United States.

I was distressed to learn that the Department of Energy and the State Department offhandedly refused the Mexican government's offer to supply us with natural gas. I sincerely hope that President Carter reconsiders that decision when he receives a Presidential Review Memorandum on the subject.

I commend the following article entitled "Oil Colossus Lies South of U.S. Border" by J. P. Smith, which appeared in the Washington Post on October 8, 1978:

OIL COLOSSUS LIES SOUTH OF U.S. BORDER

(By J. P. Smith)

As the Arab oil embargo came to a close five years ago the Central Intelligence Agency circulated secret reports that Mexico harbored an oil bonanza of some 20 billion barrels—enough to reduce substantially U.S. dependence on Arab oil.

Last month Mexico's president, Jose Lopez Portillo, pegged his country's possible oil reserves at 200 billion barrels, an estimate on which American oil experts concur. This would rank Mexico as a rival only to Saudi Arabia among the world's most oil-rich nations.

Yet the significance of a potential oil colossus along the southern border of the United States seems to have registered little impact on top Carter administration energy and foreign policy makers.

When asked at a press conference last month about the impact of Mexican oil finds on the U.S. relationship with Arab oil-producing states, White House national security adviser Zbigniew Brzezinski replied equivocally:

"I don't have a clear notion of how any potential developments in the area of energy, in Mexico, will affect the world economic energy situation. I don't have an informed judgment to make."

Nonetheless, the National Security Council staff, over which Brzezinski presides, is working on a Presidential Review Memorandum (known as PRM-41 within the bureaucracy) outlining a possible linkage of energy, trade and immigration policies to encourage higher Mexican oil and gas production. The document is due on President Carter's desk in November.

Within and outside government, questions have been raised as to why the administration has not responded faster and more aggressively to the prospect of a Saudi Arabia-sized oil reservoir on the doorstep of the United States.

"Why hasn't Mexico become an issue *vis a vis* our leverage on the Persian Gulf?" asked Jerome Levinson, general counsel of the Inter-American Development Bank.

"Every barrel of oil and cubic foot of natural gas Mexico markets is a bonus for every country entering the market to buy," observed International Energy Agency analyst James Reddington.

"Mexico will be a big factor in the world oil market," predicted Irving Trust vice president Arnold Safer. "Mexico is already selling some oil on the Gulf Coast to U.S. markets that is undercutting crude from Nigeria and the Middle East."

Since the Arab boycott the stated objec-

tive of U.S. policy has been to reduce dependency on imported oil, principally from the Middle East and other members of the OPEC cartel. Mexico has refrained from joining OPEC, the Organization of Petroleum Exporting Countries.

But since oil prices quadrupled in 1973 the trend of drilling and exploration in the less developed countries outside OPEC, particularly Latin America, Africa and Asia, has drifted downward, according to a personal study just completed by a U.S. Geological Survey geophysicist, Bernardo Grossling. Promising areas in these regions remain unexplored, Grossling found.

The richness of Mexico's promise is already being demonstrated. Hydrocarbons—oil or natural gas—are being found in four out of every five wells drilled there as compared to one out of every five in the United States. Individual Mexican wells can produce an average 20,000 barrels a day, the largest rate outside the Middle East as compared to 16 barrels a day in the United States.

Mexico is now pumping 1.5 million barrels a day and is expected to nearly double that by the early 1980s. Production could well go to four or five million barrels a day by the mid and late 1980s, according to State Department and International Energy Agency forecasts.

More importantly, the U.S. government and some major oil companies concede that if Mexico's reserves turn out to be in the 150 billion range, the country could join the ranks of major oil exporters pumping as much as eight million barrels a day in the next decade.

But even if the oil in Mexico jumps to the top of the priority lists of U.S. Government policymakers there is no guarantee of access to the potentially massive tap.

Unlike Saudi Arabia and Iran, the Mexican government has pursued a determinedly independent course of developing its oil and gas richesse.

For one thing, it nationalized the American oil companies drilling in Mexico 40 years ago and turned over control of oil production to the state-run corporation Petroleos Mexicanos (Pemex). This means the major international companies such as Exxon, Texaco and Mobil, which share in production revenues in the Middle East, would stand far less to gain in Mexico—if they were welcome at all.

Mexico has given the cold shoulder to overtures by the major international companies for offshore drilling concessions. "We discussed it at length and we told them we appreciate their efforts, but that we did not need their help," Pemex Director General Jorge Diaz Serrano said recently.

In evidence of that, Mexico is having little trouble attracting capital and is now borrowing from international investment banks at preferential rates. One reason for the favorable interest is that Pemex could pay off all its loans in three years from oil income alone.

While Mexico's oil potential has, as American Ambassador to Mexico Patrick Lucey says, "unfolded beyond our expectations," Washington's handling of bilateral energy questions—especially a proposed natural gas sale of 2 billion cubic feet a day—as well as trade and migration questions have become ensnarled in a succession of debates.

"It's clear we would like to make a deal," says an administration official, "but politically whether we can do it is a tough question."

Sources close to President Lopez Portillo also say that Mexico is actively interested in pursuing high-level exchanges of oil and gas assurances for U.S. concessions on trade barriers and immigration.

Jack Ray, president of Tennessee Gas, had a hand in the talks. He calls Energy Secretary James Schlesinger's performance "an absolute debacle . . . Schlesinger displayed an arrogant sort of attitude about it."

James Flug, head of Energy Action, a consumer lobby on energy issues normally critical of Schlesinger, commends DOE and State for refusing the Mexican gas offer.

At stake was a contract negotiated by a consortium of six American pipeline companies for 2 billion cubic feet of gas a day, equivalent to 5 percent of U.S. daily consumption. The gas was to be sold at a price indexed to the price of oil products, starting at about $2.60 per thousand cubic feet. This is higher than the $1.99 the administration has proposed in its energy bill, and also higher than the $2.16 paid Canadian producers.

Officially, State Department officials such as Deputy Assistant Secretary Steve Bosworth say, "The Mexican gas deal is on the backburner."

Unofficially, the administration says that the talks can start up once the energy bill passes Congress.

In the interim, DOE has approved a purchase of liquefied natural gas from Indonesia at the same pricing formula asked by the Mexicans.

Portillo, who drew political fire from the left in Mexico, has pledged, "We will not lower our prices."

The ultimate significance of the gas deal, some argue, is that the gas is associated with oil. By buying Mexican gas at any price, it's said, the United States can create conditions that will stimulate more aggressive oil production.

Beyond that, Latin experts and the Mexicans themselves admit, there are still questions about whether Mexico will be willing to deplete its oil resources to slake American consumer appetites.●

CLEAN WATER

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

Mr. GRASSLEY. Mr. Speaker, improved purification of municipal waste water has become a critical element in our efforts to provide "clean water" for our country. Unfortunately, conventional water purification systems are extremely expensive, catastrophically so for many smaller communities.

One of the wastewater treatment alternatives, which has been widely used recently, is the high purity oxygen (HPO) system which employs onsite manufactured pure oxygen exclusively. A still newer innovation, the Pentox system, developed by the Cedar Falls, Iowa, based Pentoch Division of Houdaille Industries, Inc., uses combinations of atmospheric (free) air in a series of tank reactors and just a small amount of high purity oxygen in a final cell. In the Pentox system, high purity oxygen is used in only the amounts necessary to achieve the desired results.

Through its research efforts, including studies of existing HPO systems and analysis of other independent studies, Pentech has determined that using these large amounts of high purity oxygen throughout the process is both costly and wasteful. Where HPO systems require elaborate, expensive oxygen concentration equipment, the Pentox system uses conventional air compressors for almost all the oxygen requirements. A small amount of HPO is used for control purposes and can be obtained from readily available liquified oxygen in storage tanks. This results in much lower capital costs, lower energy consumption for a given waste flow and less complicated equipment which is easier to operate and maintain. Through its pilot studies and demonstration plants, Pentoch has proven Pentox to be the functional equivalent of the more costly conventional HPO systems. In a comparison of both capital and maintenance costs, the Pentox system shows significant savings over the HPO systems. The lower maintenance costs are of even greater importance to municipalities than the capital savings since these indirect costs are not covered by grant-eligible funds and will have to be paid by the municipalities from their operating budgets forever. A comparison of capital investment between the Pentox system and a conventional HPO system for a specific 20-million-gallon-per-day waste water treatment plant is shown below:

	HPO	PENTOX
Capital cost of oxygenation	$1,900,000	$1,450,000
Present worth of power	1,780,000	1,260,000
Present worth of liquified oxygen	0	169,000
Extra excavation	0	8,000
Extra concrete for tank deepening	0	29,000
Eliminate tank covers	154,000	0
Total	3,834,000	2,916,000

These savings by use of Pentox are typical of those which can be achieved over comparable HPO systems. The Pentox system is not just an engineer's dream. It is being used and/or proposed in several facilities, including one in my congressional district, at Marshalltown, Iowa.

The Pentox system is fine example of the ability of American enterprise to develop new products to meet new challenges, creating new jobs for workers while reducing costs for consumers and taxpayers. It is a major step toward a better environment and will undoubtedly be followed by additional innovations which will improve our quality of life still further.●

TRIBUTE TO ROBERT PUGLISI

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. OTTINGER. Mr. Speaker, last month, Westchester County was saddened by the passing of my good friend, Robert Puglisi. Bob, public relations manager for the New York Telephone Co. in Westchester, was a good friend who will long be remembered for his humor, industriousness, and dedication to the community.

Bob was a wonderful human being—always kind and considerate, always a gentleman. Even while I was engaged in a citizen action campaign against the deteriorating service of the phone company, Bob was always available to talk, always candid in admitting shortcomings of the phone company, always thoughtful, always the most effective advocate for his company. He alone ele-

vated the profession of public relations to an art which one would be proud to join; he always had the consumer in mind.

I do not think Bob Puglisi had an enemy in the world. Everyone was his friend; the world was his oyster.

Bob was a selfless person, always devoting his time and self to the good of the community. At this time, therefore, I would like to share with my colleagues tributes from Warren Jackson and the Westchester Rockland Newspaper's editorial staff.

ROBERT PUGLISI

Robert L. Puglisi had been honored last year by the National Conference of Christians and Jews "for his boundless enthusiasm for those causes that enrich the community and for his unselfish concern for others." Puglisi, public relations manager for the New York Telephone Co.'s mid-state territory and a member of numerous Westchester civic organizations, died Sept. 9 of cancer.

When a person with Bob Puglisi's outstanding personal qualities dies the sense of loss the community feels is compounded by a vague sensation that our whole standard of public service and involvement has fallen a little. There will be those who worked with Bob Puglisi, caught up in his own blend of enthusiasm, friendliness and compassion, who will say that there never will be another to match him.

But the word must go out that Bob's career should serve as an inspiration to others in the future, rather than merely a landmark of accomplishment in the past.

REMEMBERING THE LATE BOB PUGLISI

(By Warren Jackson)

My friend, Bob Puglisi, was buried a week ago and, unfortunately, I did not attend the funeral because I was out of the country and hence did not know of his death. From all I've heard since my return, the funeral services proved that "Pug" was a friend of a lot of people.

I'm lucky to count myself among them, as is anyone who knew Bob Puglisi during his 54 years of distinguished living. "Pug" had the quality of being everybody's fall guy. You loved him and delighted in making him happy by collective or one-on-one exchanges.

Lunch with Bob Puglisi was always a delight, whatever day or week it happened. It would invariably come about by an early morning phone call, complete with the customary static and intermittent failure of the phone in his automobile.

"Warren, this is Pug. What are you doing for lunch?" was how it would start. Then, after arguing over who would pick up the check, his famous line: "Media or P.R. guys never pick up a check for me."

Pug's 26-year career of accomplishments for the New York Telephone Company are well known to his business acquaintances and friends. As Public Relations Manager for the mid-State territory, he was all over; his energy and health was boundless. The trips up and down the Hudson Valley never seemed to tire him out.

These Gannett Westchester Newspapers have chronicled extremely well, his varied professional, fraternal and civic involvements. He did it all—on and off company time.

My first recollection of Bob Puglisi goes back some eight years. He called me up to introduce himself one day and wanted to get together to discuss how the Telephone Company could become involved in minority programs and community concerns.

Although the relationship began as a business meeting, and to his credit the company became increasingly involved in helping its neighbors, our personal friendship outdistanced our professional relationship.

Golfer Lee Elder has made Gregory's restaurant in White Plains famous nationally, but Pug was equally a champion exponent of it and the other Losapio family location, Sergio's restaurant in Hartsdale. He was never happier than when he was eating too much Italian food and not staying from desserts as advised, with friends like Al Grosby of WFAS, Joe Baglia of the American Cancer Society and various members of the Gannett Westchester staff.

I can remember a lunch that lasted over three hours, sponsored by Puglisi, to bring together what he called some of the best "story tellers" in town. The lunch, held at a 46 Street Italian restaurant (where else), consisted of Publicist Irving Rudd; Guido Cribari, Executive Sports Editor for Gannett Westchester; Dan Mahoney of the New York Telephone Company; myself and Pug. For three hours "can you top this" was never better. Memorable moments . . . you bet!

The Puglisi team at the Telephone Company's Public Relations Office was an extension of the man. Dolly DiMarzo, Rose Casella, Wally Simpson and Marilyn Conway . . . they all were Pug. They made working with, or covering the Telephone Company's mid-Hudson Division, a pleasurable assignment.

It was through Pug that I met some of the utility's key Westchester executives; men like Bob Burke, Tom Hartman and Jack Kreel who supported Bob and yet enjoyed the rapport of "putting Pug on."

As for Bob's private life, Pug made it no secret that he was a "square" when it came to his family . . . church on Sunday and no overnight company trips if he could help it.

His Eastchester home was the center of his life: Rita, his wife; Robert Jr., his eldest son; Ellen, his only daughter and Donald, the youngest, were all blessed with a good husband and father who cared most of all about his family.

Pug and I used to constantly attempt to intimidate each other, affectionately, by stating we were taping our conversation. He was always threatening to have me arrested for abusing telephone property and I was always threatening to go over his head to some Telephone Company higher-up to complain about the way he gave the public (that is, me) the business.

Gee, Pug, I only wish I could have taped some of those conversations, so I once more could hear my good friend say, "Hey Warren, this is Pug."●

IN THE PURSUIT OF PEACE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BROWN of California. Mr. Speaker, I would like to call to the attention of my colleagues the national meeting of the pacifist churches held in Green Lake, Wis.

For 4 days, 300 delegates representing the various organizations of Quakers, Mennonites, and Church of the Brethren, met to discuss the ways to promote peace. Whether the question was one of nonviolent activism or voluntary subordination, it centered on the issue of peace.

Mr. Speaker, as we conclude another session of Congress, I hope my colleagues who intend to return will take time to reflect on this. The defense budget pending before Congress is the largest annual expenditure of defense in the history of the world. Given the fact that this country is supposedly in an era of peace, one wonders how much we as legislators are doing to promote peace.

In the next session of Congress I hope my colleagues will bring with them the idea and proposals for the promotion of peace. One measure which deserves consideration is the world peace tax fund bill, which will allow those conscientiously opposed to war an opportunity to pay their taxes with the knowledge that they are acting consistent with their moral and religious convictions.

I urge my colleges to read the following article.

[From the Los Angeles Times, Oct. 10, 1978]

WAR-TAX RESISTERS WIN CHURCH BACKING

(By John Dart)

GREEN LAKE, Wis.—An unprecedented national meeting of the "historic peace churches"—Quakers, Mennonites and Brethren—resulted in agreement Sunday to go beyond their common pacifist stance and support those who refused to pay "the military portion" of their federal taxes.

For many in the three small but historically influential denominations, the possibly illegal "war-tax resistance" position represents a giant step from their previous passive refusal to bear arms and the practice of turning the other cheek to violence.

But statements such as, "We are praying for peace but paying for war," prodded the more than 300 delegates to the New Call to Peacemaking conference to support what advocates called an economic moral equivalent to military conscientious objection.

The consensus statement, which urged total disarmament following arms reduction, formation of a peace church delegation to President Carter, establishment of a world peace tax fund and simpler life-styles, is not binding on individual church members. However, the four-day conference here followed 26 regional meetings involving more than 1,500 Quakers, Mennonites and Brethren.

Those joint meetings in themselves constituted a new ecumenical venture in breaking stereotypes. "We have discovered," the Rev. Dale W. Brown, a Brethren seminary professor, said, "that some Quakers also have Bibles that some Mennonites have been off the farm long enough to know a passion for global concerns and a few Brethren have actually been able to keep their biblical and peace concerns as they have jetted to and from the boardrooms of the Nation and World Councils of Churches."

Not all regional meetings had suggested including war-tax resistance in peacemaking efforts, but, reflecting strong sentiment here, the national conference challenged congregations and church agencies to:

—"Seriously consider refusal to pay the military part of their federal taxes as a response to Christ's call to radical discipleship.

—"Uphold war-tax resisters with spiritual, emotional, legal and material support.

—"Consider the requests of employees who ask, for reasons of moral conviction, that their taxes not be withheld."

A Mennonite newsletter, God and Caesar, has reported 33 cases of war-tax resisters within and outside the historic peace churches. Many have merely filed letters of protest with their tax forms, but some have withheld taxes equalling the percentage of the federal budget estimated as going to the military. Some court cases have resulted.

In several instances, employes at Mennonite institutions have asked their employers not to withhold their taxes so they can "express their faith through our tax resistance." The American Friends Service Committee has had similar requests.

The witness of the peace churches to the New Testament declaration that "blessed are the peacemakers" has been consistent, historian Donald Durnbaugh said, noting that the movements emerged at different points in history: Mennonites from the Radical Reformation (16th century), Quakers, or "Friends," from the left-wing Puritanism

(17th century) and Brethren from German Pietism (18th century).

"The refusal to participate in war has been matched by persistent willingness to reach out to those suffering from acts of war, from social oppression or from natural catastrophe," said Durnbaugh, who was chairman of the committee that wrote the final peacemaking statement.

The U.S. and British Friends Service Committee won the Nobel Peace Prize in 1947 and Brethren and Mennonite aid to flood and tornado disaster victims in this country has been notable.

Mennonites were among the few westerners who stayed on in South Vietnam after the American withdrawal in 1973 and the Communist takeover.

However, the Quakers and Mennonites of various affiliations and the Illinois-based Church of the Brethren—who together have more than 400,000 members—have been somewhat overshadowed in peace efforts of the last decade by the war protests of Catholics and mainline Protestants.

As the popular movement faded after the end of the Vietnam war, the peace churches found a strong remnant in the Catholic left, symbolized by the Berrigan brothers, and a growing social justice movement among evangelical Protestants, exemplified by the Washington, D.C., Sojourners community.

The impetus for the peace churches, regional and national peacemaking conferences, in fact, came two years ago from evangelical Quakers.

Nevertheless, some churches, including conservative branches of the traditions, oppose civil disobedience as representing political activism or as a kind of violence.

Brethren theologian Vernard Eller of La Verne (Calif.) College, in a biblical position paper for the conference, said that economic pressure, propaganda and psychological browbeating violated human freedom and dignity.

To achieve peace, Eller contended, "We are free to use only those means God asks of us—defenseless love, voluntary subordination, the way of the 'Suffering Servant' and the faithful martyr-witness."

But Ronald Sider, a Brethren in Christ (Mennonite) seminary professor from Philadelphia, argued in a lecture here that nonviolent activism would be a more faithful imitation of Jesus than quiet nonresistance. Nonlethal forms of coercion for peaceful ends are used in family and church and, he said, could be attempted in society as well without involving a corrupt use of power.

The broadened concepts of peacemaking expressed here held appeal for Mennonite Katie Wiebe, a teacher from Tabor College in Hillsboro, Kan.

"My father was a C.O. (conscientious objector), a medic in the Russian army, and my husband was a C.O. in alternate service during World War II, but I as a woman never personally had to take a position," she said.

"Peacemaking is not just a male responsibility," another woman delegate added.

More than a dozen chinline beards were worn by Mennonite and Brethren men—the moustacheless style most associated with the Amish, their more world-denying theological cousins.

The only clerical collar in evidence at the Baptist-run Green Lake center here was worn by Archpriest Arkady Tyshchuk of New York, representative of the Russian Orthodox Patriarch of Moscow and one of 19 observers from other denominations. The Russian Orthodox Church and the Church of the Brethren have developed close relations through a series of exchanges in the last two decades.

Although Quakers, Mennonites and Brethren found much common ground when talking about peacemaking, they recognized a multitude of divergent social and theological differences from local church to local church.●

THE LBJ INTERNSHIP PROGRAM—A SUCCESS: THE EXPERIENCE OF DENNIS MORROW

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. OBERSTAR. Mr. Speaker, to select this year's LBJ interns, I invited secondary school social studies and government teachers from my district to apply for the two positions.

I felt these two teachers and ultimately their students would benefit from the internship and from the firsthand experience with the operation of Congress.

For the interns, the program was a success. At the same time, I know how much it meant to me and to my staff to work with two individuals who were actively involved in classroom education.

It was my pleasure to have Dennis Morrow serve the first half of the summer as an LBJ intern. Dennis is an extremely capable and dedicated teacher who has taught at Blaine Senior High School since August 1975.

His advice and staff work during our consideration of Elementary and Secondary Education Act amendments were of great importance to me during this past summer.

He also developed a complete list of fellowships, grants, and other Federal aid opportunities available to educators. Dennis recognized the need among educators for this kind of list and then set to work to develop it.

In a letter to the Speaker, Dennis provides an articulate summary of his internship and its significance to his teaching career.

In that letter, he also discusses how the internship changed his perception of Congress as an institution.

Dennis' letter is a good one, and I would like to share it with my colleagues in the House.

SEPTEMBER 13, 1978.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES,
U.S. Congress,
Washington, D.C.

DEAR MR. SPEAKER: It is my pleasure to recount to you and to the Members of Congress the events of this past July as a participant in the Lyndon Baines Johnson Internship Program. I came to Washington from Blaine Senior High School, in Minnesota's 8th Congressional district, as an educator/participant involved in the governmental process as it touches education. I found my stay in Congressman Jim Oberstar's office both an encouraging and enlightening experience.

Interns have a unique position on the hill. We live and/or work close to the Capitol, yet there is a sense of distance from those who make the decisions. There is, of course, an understanding about the time limitations of legislators and this motivated most of us to find out our own niche in the office rather quickly.

My own experience began researching the question of federal involvement in the establishment of minimum competencies in education. Teachers and administrators in Representative Oberstar's district had expressed some questions about the propriety of a basic proficiency language in a federal bill. The House Education and Labor committee staff was most obliging in providing the needed information to respond to the questions.

This was the perfect beginning for my next assignment, that of drafting the ideas to be incorporated in an affirmative speech by Representative Oberstar to encourage the passage of the Elementary and Secondary Education Act renewal. In researching the ways that Minnesota has benefited from the E.S.E.A. during the past three years, I gained important information useful to me as an educator, as well as having the tremendous experience of being involved in drafting a speech to be given in Congress. It was a great thrill to see the finished product in the Congressional Record.

My third, and final, project was to compile a listing of fellowships, grants, and other financial aid opportunities available to educators. This has already proved to be a succesful tool for teachers in Minnesota's 8th District in securing personal development funding.

Since my return to Minnesota, I have seen students become excited about government as they hear about my Washington experience. They ask pertinent questions about the form and procedure of legislation. They want to know how they can become involved. It is fulfilling for me to see their enthusiasm.

I, personally, have become more patient and understanding as the massive bulk of government lumbers along. I have grown less frustrated with the bureaucracy and more impressed with the competence of Congressional staff assistants. I have seen skilled technicians of law reach for meaningful concepts in the face of certain compromise. This was especially apparent as I talked with Members of Congress about wilderness policies at the federal level.

I appreciated the opportunity to be directly involved in the marketplace of ideas, namely, the Congress. I loved the responsibility, but was frustrated by the pace and diffuseness. I confess intense interest in the glamour issues and planned avoidance of the others and was fascinated by the city of Washington, but missed the clean air and relaxation of Minnesota. It was a summer of contrasts for me. The balance, however, was weighted in favor of sincere gratitude to all of you for making it possible!

With Sincere Appreciation,

DENNIS MORROW.●

THE WORLD BANK: AN ADDITION

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, in my remarks in the RECORD on October 4 regarding the bankrolling of totalitarian regimes by the World Bank, I indicated that Congressman WILLIAM YOUNG'S amendment to the appropriations bill for the World Bank, which seeks to establish human rights considerations in connection with all loans, was deleted by the House-Senate conference committee report. I have since learned that, while Mr. YOUNG'S provision to bar the use of any IDA loans to the Communist regime of Vietnam was deleted from the report, his human rights amendment fortunately was not. I, therefore, exhort my colleagues to fully support Mr. YOUNG'S amendment and so give substance to our rhetoric about human rights.●

BUFFALO: A CITY ON THE REBOUND

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LaFALCE. Mr. Speaker, all too often, a negative attitude has a way of becoming a self-fulfilling prophecy. Confronted by difficulties and beset by tribulations, individuals, whole industries, and even entire communities are faced with two stark alternatives. They can begin to feel sorry for themselves, begin to bad-mouth themselves, and eventually roll over and die; or they can make a calm assessment of their difficulties, remember their advantages, and devise solutions to problems which are, in the end, solvable.

Buffalo, N.Y., is an excellent example of the latter case. Plagued by a period of economic stagnation and urban decay which has afflicted many old northern cities, it seemed to many, even some western New Yorkers, that Buffalo was destined to wither away and die. However, such was not to be the case, as Buffalo forcefully moved to reverse urban decay and economically rejuvenate its inner city. Those first measures are now beginning to bear fruit, as Millard C. Browne, the editorial page editor of the Buffalo News, so graphically describes in an article entitled "Buffalo Finally Getting Its Act Together."

The article follows:

BUFFALO FINALLY GETTING ITS ACT TOGETHER

(By Millard C. Browne)

Cynics still scoff and grumblers still grumble, but suddenly there's more of an upbeat air than we've felt in a long time, as Buffalo shows signs of getting its rebuilding act together.

A lot of things are beginning to happen at last, and the more that do, the more serious becomes the talk of still other things that they may stimulate. Everything not only feeds but feeds on everything else, like hands washing each other.

That applies to a flock of items you've been reading and hearing about: Rapid-transit and Convention Center; Chen Hotel and Marriott; the ECC and the old P.O.; the old Shea's Buffalo and new Studio Arena; the DL & W and the waterfront.

Some of this is now reality; some is still in the planning, hoping or maybe only dreaming stage. But it's all just what the original planners of such projects as the now about-to-open Convention Center and the ready-for-construction rapid-transit system had hoped would happen when—and if—those one-time dreams ever approached reality.

What is so frustrating about the seemingly endless gestation period that all these major projects require is that they are all so interdependent that everything waits for everything else. None of them, in fact, make much economic sense in a vacuum.

A subway from nowhere through nowhere to nowhere, for example, would obviously be of no earthly use to anyone. Making it work depends on what kind of traffic it can generate all up and down the line—from apartments and small shopping centers along its outer reaches, past hospitals, schools and colleges along the way, down through a live and vibrant theater district to a refurbished downtown shopping and office-building complex, on down to a busy, much-used Memorial Auditorium, with maybe even a farmer's market and entertainment-boutique complex at the lower end.

It's the same with the Convention Center: It's no good without plenty of nearby places to sleep and eat and shop and plenty of interesting things to do.

But that's what's exciting about how it's all now beginning, at long last, to come together. The transit line is now definite, along with the Convention Center. The Chen hotel is under construction instead of just being endlessly talked about.

And these facts lend credence to other plans and dreams, even though they are still only in the talk stage: Clement Chen's plans for a new office building complex adjacent to his waterfront hotel, for example, and James DiBlasi's plans for a $12 million shopping-entertainment complex on the site of the old D L & W depot.

That last has been talked about for years, but it only begins to make economic sense when you visualize something like it both as the lower-end anchor for a rapid-transit line and as a potential tourist magnet to complement a booming downtown convention business.

The point about downtown Buffalo for too long has been that, in spite of a lot of civic wheel-spinning, not much has really materialized since the last great wave of bank-building construction. As long as everything seemed to be waiting for everything else, the whole mood was pessimistic.

But now, with a new pattern visibly beginning to take shape, we can expect a lot of imaginative people to take new interest in projects that may have seemed too iffy a year or so ago. Even among long-time detractors of the rapid-transit line and Convention Center, there will be those who now smell economic opportunity in investments strategically related to those projects.

And why not? These are now the new reality, the shape of "Buffalo future." In fact, in terms of revitalizing the downtown, they are the only game in town. So instead of worrying any more about whether they should have been built, we'd all better make the most we can of the opportunities they present.

That means putting the complementary pieces in place as imaginatively and as rapidly as we can—and not only on the basis of anything goes if it will make a buck, but in accordance with the soundest sense of over-all civic planning we can muster.●

MEMORABLE OCCASION FOR ST. GEORGE CHURCH

HON. JOHN J. CAVANAUGH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. CAVANAUGH. Mr. Speaker, I want to take this occasion to extend recognition to the St. George Orthodox Church on the memorable occasion of the 75th anniversary of its establishment. I believe that this time is well spent noting their dedicated service to God and mankind since the establishment of this church in 1903. The St. George Church followed in the footsteps of its founders in deciding to exist as a parish—unstintingly giving of their precious time and many talents to serve the Orthodox faithful in general and have represented an unquenchable light of solace and faith to all those seeking its aid in times of trial and tribulation.

St. George's Church is renowned through the Orthodox Church in Nebraska for for its architectural history, beauty and structure, and is considered a landmark west of the Missouri River.

I am sure that my colleagues all join me in saluting one of God's true churches and extending our best wishes to St. George's on the joyous occasion of its diamond jubilee of service in the worship of God.●

TOY COMPANIES WILL BE HURT SEVERELY BY FTC RULE

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WYDLER. Mr. Speaker, on February 28, 1978, the Federal Trade Commission voted to begin a rulemaking procedure to consider restrictions on commercials televised during children's viewing hours, and has invited public comment on the advisability and manner of implementation of a rule which would include the following three elements:

First. A ban on all televised advertising where the audience includes a significant proportion of children who are too young, as determined by the FTC, to understand the selling purpose of advertising;

Second. A ban on televised advertising of products which pose the most serious dental health risks, as determined by the FTC, where a significant proportion of the audience is likely to be under 12 years of age; and

Third. A requirement that television advertising to children under 12 years of age for certain other foods containing sugar be balanced by "counter-advertising" containing nutritional and/or health disclosures, with such advertising to be funded by the food advertisers, but prepared by FTC-selected public interest groups.

Hearings are to begin in late November, and will last several months.

The toy industry, I am told, will be severely affected by a stringent FTC ruling that may result from these hearings. Frequently, it seems to me, regulatory agencies do not take into account the impact of their regulations upon individual companies, nor upon the communities from which these companies draw their work force, from which they purchase services, and to which they contribute in the form of taxes.

One such company, MEGO Corp., has a facility near my district. Some of my constituents supply services; others are employed there. A trade periodical, Playthings, in their September 1978 issue reported on the severity of the effect on MEGO Corp. if the FTC issues a stringent rule.

Mr. Speaker, so that my colleagues can have the benefit of reading this article, which may illustrate implications for their own districts, I include the article at this point in the RECORD:

MEGO'S ABRAMS HITS PROPOSED FTC RULE

NEW YORK.—The president of one of the nation's largest toy manufacturers issued a warning to the toy industry about the disastrous economic effects that could result, should the Federal Trade Commission's pro-

posed rule regarding advertising of toys to children be put into law.

"Nationally, we would be in the position of starting over and proving ourselves from scratch as a source of toys," said Marty Abrams, president of Mego Corporation.

"Our current business is built upon our customers' reliance that we can effectively advertise our products nationwide and assure them of a receptive market for our toys. Mego has grown to be a major manufacturer in our industry by virtue of this factor. If the FTC ruling were to take effect, the loss of opportunity to advertise our products would cause our customers to drastically cut back on the purchase of our products.

"Not only that, but a negative FTC ruling against television advertising could have an adverse effect on the toy industry's financial relationships. The leaders would be concerned about the manufacturers' ability to initially replace the television advertising with alternate sources, and this would affect borrowing costs. These higher costs would reduce the profitability of toy companies and their ability to hire people and continue to expand.

"In that transition period, the industry would probably endure a substantial decrease in sales, profits, and employment, and certainly, since most of the larger companies in the industry are public corporations, they would see a rapid decline in the price of their stock, affecting approximately 50,000 shareholders." Abrams pointed out that Mego's Bohemia, New York, distribution and manufacturing operations contributed over $2,250,000 to the economy of Long Island and the state of New York annually. "The domestic operation," he said, "physically processes approximately $85 million annually in sales.

"All of this money is continually poured back through the company for services, jobs, taxes, and similar expenditures to maintain our growth posture."

Abrams remarked that the Bohemia facility has grown from 70 employees during fiscal 1975 to 450 during fiscal 1978, with a projection of 1,000 employees during fiscal 1981. "All of these people and over 200 supporting vendors and their operations, have a substantial impact on the economy of Long Island along with the $2 million of income taxes that we pay annually to the Federal government. "It is mystifying to me, I must confess, that the FTC, which had as its original task the assuring of competition in our economy, now would take a step which would stifle competition.

"We began our rise in the toy industry because we had the freedom to create products and the means to sell them; the competition is intense. The proposed FTC rule would have the effect of preventing us from using television media which is providing much of the competition in our field," Abrams emphasized.

"We are already one of the most heavily regulated industries in the world. Not only as to television advertising, where we must undergo the most difficult and systematic self-policing and pre-screening by the National Association of Broadcasters of any industry advertising today, but we also are regulated, controlled, and affected by a huge number of federal bureaucracies." Abrams said that, at last count, there were 57 federal and other agencies under whose rulings the toy industry fell.●

ON PROFANING CHRISTIANITY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DORNAN. Mr. Speaker, the fundamental principle of Christianity is the love of God. The divine commandment is simple: Do unto others as you would have them do unto you. We are further reminded: That which you do to the least of My brethren, that you do unto Me. The message of Christ transcended the earthly trappings of the civil power. He simply said: Render to Caesar those things which properly belong to Caesar and to God those things which are His. That is a simple command. It is clear and straightforward. It is Caesar, however, who contests the rights of men, rights that would not even exist if God did not give them. And it is Caesar who has created a totalitarian hell on earth for millions whose only crime is their simple attempt to exercise the primal right of human existence: free will.

The sad truth is that there are those who employ the Christian name for purposes which are quite the opposite authorized by the Founder of Christianity. Anger and outrage are reasonably expected when coming upon such a profane misrepresentation. But, I confess, Mr. Speaker, I can only express sadness.

I am saddened by the fact that a man who professes to be a follower of the Gospel could justify one of the most ruthless totalitarian regimes in the history of the world. What of love? The least of our brethren? I have no more to say on the subject. But I ask that my colleagues pause from their busy schedules and examine the following piece by Mr. John Lofton in the October 9, 1978, edition of Monday magazine.

PROFESSOR OF CHRISTIANITY DEFENDS MAO'S MASS MURDERS

(By John D. Lofton, Jr.)

WASHINGTON.—Looking over his background, you wouldn't think that Creighton Lacy would see eye-to-eye with Mao Tse-tung on anything. Mao was a bloodthirsty, atheistic tyrant who believed that "a revolution is not a dinner party" but "an insurrection, an act of violence by which one class overthrows another." Under the brutally oppressive regime of the late Communist Chinese dictator, millions of so-called "enemies of the people" were put to death. One estimate of these killings ranges as high as 62 million people.

On the other hand, since 1953, Creighton Lacy has taught at Duke University's Divinity School, where today he is a professor of world Christianity. Born in central China, he is a Christian, and from 1946 to 1951 was a missionary to China. Lacy is a Phi Beta Kappa, an ordained elder in the United Methodist Church, a former Fulbright grantee, and was a Danforth visiting professor of philosophy at the International Christian University in Tokyo. He is also a member of the Society of Values in Higher Education and the American Society of Missiology.

But Creighton Lacy and Mao Tse-tung have quite a bit in common. In fact, Lacy believes that mass-murderer Mao "has left a legacy that the world as well as China will continue to honor." In a new book reporting on his 18-day trip to Red China in 1977, titled "Coming Home to China," he addresses himself to some "popular misconceptions" about Mainland China, specifically the idea that the communists murdered millions of people. In this small paperback volume—printed, incredibly, by Westminster Press, the official publishing agency of the United Presbyterian Church—Lacy writes:

"How many people died as a result of the Communist Revolution in China? Nobody knows or will ever know . . . I would guess, from extensive reading and weighing of authorities, that five million would be a top figure, probably far fewer than that . . .

"The real issue is not 'how many?' but 'what price for the Revolution?' I happen to be a semi-pacifist (which may be like being 'partly pregnant;' I wouldn't know). I find it difficult to justify the use of deliberate, destructive, deadly violence for any cause . . .

"Nevertheless, after 'going home to China' and seeing the overall advancement of the country and its people over the past 30 years, I can only conclude that it was worth the cost. That is not to justify or excuse the cost; it is simply to acknowledge that no progress is achieved without its price. And that quality of life for the many is more important than quantity of life for the few."

In an interview, admittedly outraged, I asked Lacy how he could, as a Christian, rationalize the murder of millions in the name of "progress?" He replied:

"My own Christian ethic comes out of a general concern for the humanity of people. To use an old cliche—the greatest good for the greatest number. If more justice, food, education, and medical care and so on are available now, then more lives have been saved than have been lost. It's not that I justify killing (sic), but that I think life and death and war are part of our human experience which may, at least, be related to the results thereof."

And where in the Scriptures or in the teachings of Christ do you find support for such an ends-justifies-the-means moral calculus, I ask? Lacy answers: "I am not a biblical scholar and I wasn't writing a biblical book."

When I asked if it is his view that whatever "progress" has been achieved under the communists on Mainland China could have been achieved only by murdering millions of innocent people, Lacy responds, after a long pause:

"I don't know. The nationalist situation was absolutely hopeless and something drastic had be done. Whether this required a certain number of killings, and I question how many were deliberate and systematic, I just don't know." He compares the mass murder of millions on the mainland to our own Revolutionary and Civil wars.

When I ask him if it is too early to say whether the mass murder of millions in Cambodia has, in his judgment, also been "worth it," Lacy says he has "no opinion" about this. He accuses me of having "a very strong bias" and trying "to make a case." Observing that our conversation "is not very profitable," he hangs up.

Footnote: When I asked Dr. Paul Meacham, editor of religious books at Westminster Press, why his publishing house would print an apologia for Mao Tse-tung, including the mass slaughter committed by his supporters, he says he doubts that Lacy has put it "in those terms." When I read him relevant portions from the Lacy books, he says Westminister Press tries to "present a variety of points of view on significant issues" and doesn't necessarily agree with everything in all the books it publishes. Meacham characterizes Lacy as a "well-known, respected professor regarded by many people as a man knowledgeable in his field." He says that "taken as a whole, we thought the Lacy book served a useful purpose." Like what? He doesn't answer.

Edward Trefz, the Westminster Press associate editor who actually edited the Lacy manuscript, defends the publication of the books by denying that the defense of Mao and his mass murders was the "thesis" of the book. He charges that I am "picking up on a little point" in an otherwise "fair and generous" book written by a man who is not "vindictive."●

INDOCHINA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SOLARZ. Mr. Speaker, today's Washington Post contains an eloquent editorial describing the serious plight of the refugees in Indochina and the particularly difficult situation of the Cambodian refugees.

On September 29 this body by a vote of 231 to 105 went on record as favoring an immediate extension of the parole power of the Attorney General to allow those refugees from the most repressive nation in the world, from that country already described by our President as the world's worst violator of human rights; namely, Cambodia, to come into the United States.

These Cambodian refugees have been aptly described as having escaped an Asian holocaust, and now live under extremely difficult circumstances in refugee camps. Fifteen thousand live in four camps in Thailand. Another 100,000 are in camps in Vietnam. Today I received a letter from one of the Cambodian families in Thailand, which I would like to share with my colleagues. It is a simple but moving request for assistance from refugees who live in the extreme southeastern tip of Thailand in a small camp which has suffered from poor administration, shortages of supplies, and even incidents of mistreatment of refugees by corrupt or inept petty officials.

The support of the Congress for a special parole for these Cambodian refugees was, I think, a strong indication of the depth of the humanitarian concern which this situation evokes, and also, I believe, a remembrance that forty years ago many people chose not to get involved with the problems of other refugees. This Congress did not wish to repeat that past tragedy. I sincerely hope that as we prepare to adjourn, the administration, and the Attorney General in particular, will move quickly to take the necessary steps to implement the special parole for the Cambodians, and to take whatever other actions are required to lift some of the incredibly heavy burden now being born by the Governments of Thailand and Malaysia in caring for the Indochinese refugees, until such time as the Congress has the opportunity, working with the administration, to adopt a new comprehensive refugee policy. We in the Congress are anxious to send a message by our foreign and domestic policy, that we remained deeply committed to the protection of human rights and to assisting the innocent victims of war and terrorism.

Mr. Speaker. I submit for the RECORD the editorial from the Washington Post of October 13, and one of the letters I received from Cambodian refugees in camps in Thailand:

CAMBODIAN REFUGEES

In the absence of feasible avenues for action, the outrage expressed at the war that the government of Cambodia has been conducting against its own people has provided scant benefit to the victims. "Democratic Kampuchea," as it is called, having chosen isolation to impose its rule, has seemed immune to external protests. So it is especially gratifying that the United States is finally finding something helpful to do.

The first step has been to funnel aid to countries caring for Cambodian refugees. Some $8 million is now going for such refugees in Thailand—through the United Nations High Commissioner for Refugees. Earlier this year a mission dispatched by Sen. Edward Kennedy (D-Mass.) brought to the Congress's attention the plight of some 120,000 Cambodian refugees in Vietnam. The trouble was that, while Thailand is a friendly country with which the United States has close ties, Vietnam is unrecognized by the American government and regarded as an unacceptable regime by many American citizens. For people feeling that way about Vietnam, such as Sen. Robert Dole (R-Kan.), the problem was how to help the refugees without giving aid or approval to Vietnam. That is, of course, precisely what international organizations are for—in this case, the United Nations High Commissioner for Refugees. On that basis, Mr. Dole joined forces with Mr. Kennedy. The result was that the Congress has now used up its first funds for Cambodians in Vietnam. The money is small ($1.5 million), but the necessary precedent has been set.

A second step is pending—admission of some of those Cambodian refugees to the United States. There is a continuing and, in our view, rather tiresome argument in Washington over whether refugees should be admitted under the attorney general's "parole" authority or whether Congress should itself directly regulate the flow. But in this instance, both houses of Congress, not without some friction, have supported resolutions requesting the administration to use the parole authority to admit at least 15,000 Cambodians. Attorney General Griffin Bell, who has expressed reservations about use of the authority, is pondering the request.

We hope he responds promptly and positively. Resolution of the fine points of a Washington legal and jurisdictional dispute cannot be allowed priority over the relief of desperate people fleeing a wretched regime.

CAMBODIAN REFUGEE CAMP,
Klong Yai, Trat Province,
September 22, 1978.

Congressman STEPHEN SOLARZ,
House of Representatives,
Washington, D.C.

DEAR SIR: We are Cambodian refugees living in the camp at Klong Yai, Trat Province, Thailand.

We fled the communists into Thailand by boats after they took power throughout the country. During the course of our stay in Thailand, we have been temporarily employed by the kind Thai merchants in various places in Trat Province.

Then we began to experience trouble. Every Cambodian refugee who has been earning his living in Trat has been ruled an illegal immigrant. This forced us to come into the camp by the end of March of this year. For more than six months we have been laid off without a single Baht to come in. We are in a difficult situation due to having exhausted our slight savings. The distribution of food we obtain is found insufficient for our daily consumption, the French and American come to interview, but the number they settle is limited and this camp is located so near the Cambodian border that some day we may be attacked by them.

We know only you on whom we depend in this urgent case, we hereby respectfully request your kind assistance in helping us to go to a third country.

We are grateful for your assistance and effort in this matter.

Yours respectfully,

CHOUN WICHETRA (SOK),
Chief of Cambodian Refugees at Camp.●

MORE HYPOCRISY AT U.N.

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DERWINSKI. Mr. Speaker, the annual United National General Assembly session is always dramatic evidence of how that world body demonstrates the minimum of diplomacy and the maximum of posturing.

A case in point is that of colonialism and the annual verbal abuse that the United States takes on the subject of Puerto Rico. This is the topic of an article by William F. Buckley, Jr., which appeared in the Chicago Sun-Times of October 12. The article follows:

MORE HYPOCRISY AT U.N.

(By William F. Buckley, Jr.)

For every good reason in the world, the doings of the United Nations are not widely reported. For one thing they are mostly meaningless. But, mostly the reason is that there is an inherent offensiveness in hypocrisy, particularly if it is studied.

But as a gesture, every now and then, one should report a UN venture, just in case anything changes, and I have selected for this reason to report on the deliberations of the UN's Decolonization Committee in the matter of Puerto Rico.

That committee has passed by a vote of 10 (in favor), 0 (opposed) and 12 (abstaining) enjoining a course of action on the United States government. We are directed to put an end to "the persecutions, harassments and repressive measures . . ." in Puerto Rico.

We are further directed to "unconditionally release the four Puerto Rican political personalities who have been incarcerated for more than 24 years."

We are further advised that if Puerto Rico continues to vote for its present commonwealth status, that will not do. Nor would it do if Puerto Rico voted to ask for statehood. No vote by the Puerto Ricans that would continue the existing relationship, or that would take them to statehood, would be tolerable to the UN. First they have to be given independence. Then, and only then, may they vote a different relationship.

Now: If there is persecution, harassment and repression of those who seek independence in Puerto Rico, it is extraordinary subtle. The "political personalities" who have been "incarcerated for more than 24 years" expressed their personality by sneaking into the visitors' gallery of the House of Representatives in 1954, pulling out pistols, and shooting our elected representatives, wounding five. They were given life sentences. In most of the countries that voted the resolution in question they'd have been shot.

Now who voted for the resolution, denouncing political harassments in Puerto Rico, and asserting "the inalienable right to self-determination and independence"?

The Soviet Union, China, Bulgaria, Czechoslovakia, Cuba, Ethiopia, Iraq, Syria, Tranzania and Afghanistan. The Soviet Union's respect for the territorial integrity of Bulgaria and Czechoslovakia is legendary. China's respect for the territorial integrity of Tibet is one of those matters we do not mention at the United Nations. Ethiopia's government is maintained in power by Cuba, as Cuba's is maintained in power by the Soviet Union. Syria and Tanzania are one-party dictatorships where the will of the people is consulted as regularly as Scottish hunters consult grouse.

Why then did Australia and Sweden abstain? China owes us very little. On the other hand, Chile's complaints against UN

hypocrisy sound a little tinny when Chile goes on to acquiesce in it.

The explanation, if that is the word for it, is that there are fewer and fewer countries prepared to stand up against the Third World and the Communist bloc. They muster only enough courage to wash their hands of the question of right and wrong. Fortunately, few listen. But high in the spheres, the dissonance is caught, and the conscience of civility and reason is stained.●

GUY NORTHROP

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. JONES of Tennessee. Mr. Speaker, I rise today to pay special tribute to a special friend with whom I had a long association. He was Guy Northrop, editorial page editor of the Memphis Commercial Appeal until his recent death. Guy Northrop was an exceptional individual. I would not take up a great deal of time because I think the following editorial which appeared in a recent issue of the Commercial Appeal gives a better description of Mr. Northrop than I could:

GUY S. NORTHROP

Guy Northrop was a first-class newspaperman.

In his 35 years he spent in this business of producing a newspaper 365 days every year, he had done just about everything. He had been a reporter, sports deskman, copy editor, telegraph news editor, makeup editor in the composing room, art columnist and editor of this editorial page. And he did all those things meticulously and conscientiously.

He was a lifelong scholar. Hardly a day went by but what he would leave the office with a briefcase stuffed with books, magazines and papers he would try to study at home in the evening. He was almost always among the first to arrive at the office, and usually among the last to leave because he wanted the editorial pages to be as nearly perfect each day as he could make them.

He often said it was fine for a newspaperman to specialize in a particular field, but that he should be knowledgeable in all. And he was. When new fields opened, he often attended seminars held on university campuses around the nation to learn about them from experts. He sharpened his journalistic skills at the American Press Institute seminars.

His column, "Living With Art," was an avocation. In that field he was truly knowledgeable and his advice was sought by many people who were considering buying art works or he wanted to know something about a regional or internationally famous artist. He would rise especially early some mornings to go out to look at a new art show somewhere in the Memphis area or to interview an artist before picking up his editorial page duties.

In recent years, when his daughters, Robin and Mimi, were grown, he and his wife Miriam had taken many trips to Europe. They went with tour groups but, as Guy once wrote of such trips, they would "flee the lockstep of the tour people as soon as we hit town, to walk more than ride, to dine on fruit and cheese from the open markets rather than in costly restaurants and to ride trains to neighboring towns."

But it is not enough to speak of Guy as a newspaperman.

He was also a beloved person. Kind, considerate and accommodating are some of the terms that come to mind to describe him. If someone on the staff had an emergency and had to leave the office, he would fill the breach. If someone needed help in writing something difficult, Guy could be consulted and he would offer help.

He had a fine sense of balance which probably resulted from his continuing study of history. It showed up in his writings upon occasion, as once just two years ago when he wrote of a side trip to Augsburg in Bavaria. He told how he and Miriam had wandered on foot through the old streets and suddenly rounded a corner to confront the Golden Goose brewery with its sign that said, "Since 1346."

"It is that kind of experience, a discovery of some existing part of life with links that stretch back hundreds of years, that gives the traveler a sense of his own place in the sweep of history. Time is chopped into pieces only in books and museums. In life it is an unbroken line and wherever you find yourself at the moment, there is a connection with the past and the future."

Guy Northrop is gone now, but his contributions to this newspaper and this community served as such a "connection with the past and the future." We shall miss him sadly, both for what he did and for what he meant to all of us.●

HELSINKI'S UNFULFILLED PROMISE

HON. PAUL E. TSONGAS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. TSONGAS. Mr. Speaker, I welcome once again the opportunity to continue the vigil of "Helsinki's Unfulfilled Promise," a project initiated through the efforts of Representative DRINAN. This is an important phase in the ongoing struggle to ease the plight of those detained under the repressive emigration policies of the Soviet Union. We who work toward the preservation of rights and freedoms in our own society must feel a special call to aid those detained under the harsh Soviet system of justice.

Iosef Mendelevich is one such prisoner of conscience. He is presently incarcerated at Camp Vladimir in Moscow, on charges involving the hijacking of a plane to Israel. Perhaps we cannot reasonably protest that sentence, but what is most unconscionable is an additional sentence of 3 years for his participation in the Soviet Jewish movement. At his trial for the hijacking charges, Iosef admitted to his "Jewish activities," which were in reality no more than the writing of articles concerning the Jewish holidays and anniversary of the Warsaw Ghetto uprising. The resulting charges will cost Mr. Mendelevich 3 years of life in addition to his existing sentence of 12 years, at a time when reliable reports indicate that his health has already seriously deteriorated under harsh prison conditions.

Denied a right to practice the religion of his birth, to receive outside communications, or even receive visits from family members, Iosef Mendelevich's cruel situation is one against which we all must struggle. In the spirit of all that Helsinki and our vigil in Congress stand for, I urge a reduction of this Soviet citizen's harsh sentence and the restoration of his fundamental human rights.●

MEMBERS OF CITY POLICE AND FIRE DEPARTMENTS HONORED IN DISTRICT OF COLUMBIA

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. FAUNTROY. Mr. Speaker, each year the Washington Metropolitan Board of Trade honors those members of the District of Columbia Police and Fire Departments who are recipients of the Meritorious Service Awards for the valorous acts which they have performed in their line of duty. We who live and work in the District of Columbia are fortunate to have the men and women who risk their lives and limbs to protect us from the perils of fire and violence. Their work has made this city a finer and better place for all of us.

Important in this recognition is the fact that many of the awards made at the annual recognition luncheon held on October 12, 1978, are for valorous acts done while off duty. The commitment of these persons to this city is a way of life and full time. We who live here are proud of these men and women whose names and acts I submit to this House for my colleagues, too, to honor with me and every official and citizen of our Nation's Capital:

HEADQUARTERS OF THE FIRE DEPARTMENT, DISTRICT OF COLUMBIA

The Metropolitan Washington Board of Trade will, on October 12, 1978, honor certain officers and members of the Fire and Police Departments who performed Valorous Acts as provided for by an Act of Congress. The following awards were presented to officers and members of the Fire Department.

Gold medal

Firefighter John M. Bruton

On June 27, 1978, Firefighter John M. Bruton, distinguished himself as a member of Engine Company No. 21, at a fire located at 2903 Woodland Drive, N.W., which occurred during a severe electrical storm. Upon arrival, the basement of the house was heavily engulfed in flames with dense smoke billowing from all openings. After being informed that a victim was trapped on the second floor, Firefighter Bruton, without hesitation and without regard for his own safety or respiratory protection, entered the house under the most adverse conditions and rescued an unconscious elderly woman. The quick, efficient manner in which Firefighter John M. Bruton performed his duties undoubtedly prevented serious injury or loss of life, and is certainly a credit to the high standards of this Department.

Silver medals

Firefighter William J. Gross

On June 27, 1978, Firefighter William J. Gross, distinguished himself as a member of Engine Company No. 31/Rescue Squad No. 4 at a fire located at 2903 Woodland Drive, N.W. After performing his regularly assigned duties, Firefighter Gross entered the house to search for possible trapped victims. Upon approaching the second floor, he was alerted by the alarm of a fireman's mask. Firefighter Gross continued his search through intense heat and smoke until he found a fellow firefighter in a semi-conscious condition, and carried him to safety. The quick, efficient manner in which Firefighter William J. Gross performed his duties undoubtedly prevented serious injury or loss of life, and

is certainly a credit to the high standards of this Department.

Firefighter Charles C. Diggs, Jr.

On June 2, 1978, Firefighter Charles C. Diggs, Jr., distinguished himself as Acting Sergeant of Truck Company No. 4 at a fire located at 438 K St., N.W. Upon arrival, fire was evident on all three floors with heavy smoke conditions. After being informed by residents that had already safely escaped the building that others were trapped, Firefighter Diggs without regard for his own safety, went past the attack team using the opening that their nozzle was making in the flames, to reach a trapped victim. Firefighter Charles C. Diggs, Jr., in performing his rescue, did prevent serious injury or loss of life and is a credit to the high standards of this Department.

Firefighter Raymond G. Kinder

On June 23, 1977, Firefighter Raymond G. Kinder of Engine Company No. 28, while off duty in Montgomery County Maryland, distinguished himself for courage, initiative and citizenship in the apprehension of a murder suspect. The act rendered by Firefighter Raymond G. Kinder is certainly a credit to the high standards of this Department.

Firefighter Robert N. Green

On January 5, 1978, Firefighter Robert N. Green of Engine Company No. 1, distinguished himself for outstanding courage and devotion to duty during a fire at 1649 Fuller Street, N.W., where he ascended a ladder to the second floor and after a room-to-room search, found and rescued a five-month old infant. The act rendered by Firefighter Robert N. Green is certainly a credit to the high standards of this Department.

Firefighter Gary J. Firmani

On March 5, 1978, Firefighter Gary J. Firmani of Engine Company No. 12, distinguished himself for outstanding courage and devotion to duty during a fire at 2004 1st Street, N.W., when he subjected himself to extreme punishment due to heat and smoke conditions that were encountered while rescuing three children and one adult. The act rendered is certainly a credit to the high standards of this Department.

Firefighter Robert F. Harrington

On July 12, 1977, Firefighter Robert F. Harrington of Engine Company No. 12, distinguished himself by saving a woman from being stabbed in the quarters of Engine Company No. 12. The act was done without concern for his own safety, therefore preventing a serious injury or loss of life. The act rendered by Firefighter Robert F. Harrington is certainly a credit to the high standards of this Department.

Captain Bernard C. Johnson

On January 5, 1978, Captain Bernard C. Johnson of Engine Company No. 1, distinguished himself for outstanding courage and devotion to duty during a fire at 1649 Fuller Street, N.W., where he rescued a women by giving her his respiratory equipment, subjecting himself to extreme heat, smoke and fire gases. The act rendered by Captain Bernard C. Johnson is certainly a credit to the high standards of this Department.

WASHINGTON METROPOLITAN POLICE DEPARTMENT, DISTRICT OF COLUMBIA

As provided for by an Act of Congress, Meritorious Service Awards will be presented to members of the Police and Fire Departments on Thursday, October 12, 1978, at a luncheon to be held at the Washington Hilton Hotel commencing at 1115 hours.

The following members of the Metropolitan Police Department were selected by the Mayor's Awards Committee to receive awards.

Gold medal for valor

Officer James E. Washington, Fifth District

On April 24, 1978, Officer James E. Washington distinguished himself by displaying courage and devotion to duty while assisting a wounded, fellow officer to safety and medical care. After monitoring a radio assignment for a man with a gun in a residential neighborhood, Officer Washington responded to the scene, observed a wounded officer, and questioned him regaring his injury. The wounded officer advised Officer Washington that he had been shot in the back and that the subject who had shot him was in the house in front of them. Officer Washington advised the officer that he would cross over to his location and assist him, but the wounded officer stood, attempting to make it over to Officer Washington and collapsed. Officer Washington realizing that the wounded officer was in the gunman's direct line of fire and in need of medical attention, sprinted to his side disregrading his own safety. Officer Washington then dragged him to the safety of the scout car and expedited him to the hospital where he was admitted in serious condition. The suspect was apprehended, and due to Officer Washington's prompt, unselfish actions, the wounded officer survived.

Silver medals for valor

Officer Delores M. Massey, First District

On January 21, 1978, Officer Delores M. Massey distinguished herself by displaying courage and devotion to duty. Officer Massey, while off duty and seated in her vehicle with her seven-year-old son, was conversing with a neighbor when two male subjects confronted the neighbor. One subject placed a handgun in the neighbor's stomach and demanded his money while the second subject searched him. The armed subject then crossed the street and aimed the gun at the head of another neighbor, and the second one stood lookout in the street. Officer Massey instructed her son to lie down on the vehicle seat. When the lookout subject turned away briefly, Officer Massey, drawing her service revolver, calmly exited her vehicle and advised the lookout subject not to move. She then told the armed subject to drop his weapon. Twice the armed subject failed to heed Officer Massey's command, turning toward her with the gun still in his hand. Officer Massey fired one shot from her service revolver. The armed subject dropped to the ground unharmed, releasing his weapon. As a result of Officer Massey's outstanding performance, the two subjects, who had a record for robbery and larcency, were arrested and charged.

Officer Robert H. McCants, Sixth District

On February 17, 1978, Officer Robert H. McCants distinguished himself by displaying courage and dedication to duty, and prevented possible injury to innocent people, during a domestic controversy that developed into a barricade situation. While off duty and at a service station, within the confines of the Sixth District, Officer McCants was informed by an on-duty policeman that the Youth Division had attempted to serve a custody order for a ten-year-old respondent at his home when the father became irrational and threatened the safety of his wife, his son, and the police by brandishing a revolver and barricading himself inside the residence. Officer McCants recognizing the address as one where he had previously handled domestic arguments responded to the scene. Although Officer McCants was unable to persuade the husband to respond to his call over a bullhorn, he was successful in persuading the wife to open an upstairs window, talk to him, and then open the door. Officer McCants stepped into the doorway and proceeded to talk soberly to the husband who seeing this officer as one who had been helpful in the past, placed trust in the action and conversation of Officer McCants and surrendered to him. It should be noted that Officer McCants accomplished this task unarmed.

Officer Samuel H. Newman, Fifth District

On November 8, 1977, Officer Samuel H. Newman distinguished himself by displaying courage and devotion to duty in the prevention of a robbery and possible injury to innocent people at a Seven-Eleven Store in Arlington, Virginia. While off duty and inside the store, Officer Newman, without regard for his own safety, cautiously approached the armed subject, knocked the shotgun to the floor, and informed the subject that he was under arrest. Officer Newman realized that the dangerous situation had not been completely alleviated as officers who had been called for a "Hold-up in Progress" would not be able to readily distinguish between himself, in civilian clothes with a revolver pointed at the holdup man's head. Therefore, he advised the counterman to slowly exit the store with his hands raised and apprise the arriving officers of the situation. Shortly thereafter, the police entered the store and arrested the subject for this attempted robbery and armed robbery of another Seven-Eleven Store committed two hours earlier.

Officer Carl A. Occhipinti, First District

On September 24, 1977, Officer Carl A. Occhipinti, assisted Officer Anthony J. Scarpine, distinguished himself by outstanding bravery and presence of mind in the rescue of a citizen. While off duty and in his private automobile, Officer Occhipinti observed a man trapped in an overturned vehicle with smoke and fire emitting from the engine area. Realizing that the entire vehicle could burst into flames as the heat increased, and in disregard for his own safety, Officer Occhipinti approached the vehicle and attempted to remove the trapped man. Due to the position of the car and the size of the victim, this was difficult to do. Another off-duty officer arrived and responded to assist Officer Occhipinti. As the victim's leg was caught in the vehicle, Officer Occhipinti entered the vehicle, released the leg, and with the fellow officer's assistance pulled the man out of the car to safety. Approximately five to ten seconds later, the vehicle burst into flames.

Officer Gerald A. Smith, Seventh District

On September 10, 1977, Officer Gerald A. Smith distinguished himself by displaying courage and devotion to duty. Officer Smith, while off duty, and driving his private automobile alone in the 2600 block of King Avenue, S.E., heard three consecutive gun shots and observed a male subject, carrying a revolver in his hand, fleeing. The male subject joined another male and a female, handed the revolver to the male, who then concealed the gun in his waistband. Officer Smith immediately turned his vehicle around, parked, and without regard for his own safety approached the three subjects. Officer Smith identified himself and advised them to drop the gun. Both males denied possessing any weapon. As Officer Smith confronted the armed subject, he heard a shotgun blast and pellets pass by him. Officer Smith quickly grabbed the armed subject and as he turned, a fourth subject was aiming a shotgun at him from the window of an automobile. Officer Smith fired three rounds from his service revolver, while maintaining control of the male subject. The three other subjects fled the scene, but were later captured and charged.

BURTELL M. JEFFERSON,
Chief of Police.●

REBUTTAL TO WASHINGTON POST EDITORIAL ON HUMPHREY-HAWKINS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CONYERS. Mr. Speaker, few major pieces of economic legislation have

had as much attention and scrutiny in recent years as the Humphrey-Hawkins Full Employment and Balanced Growth Act. Unfortunately, as is often the case with complex and controversial bills, the image of the bill occasionally becomes confused with its substance and fine print. Such has been the case with the editorial writers of the Washington Post. On numerous occasions this otherwise distinguished newspaper has seen fit to present the bill in a wholly inaccurate light.

As a means to clarify the nature and substance of the Humphrey-Hawkins bill, I ask my colleagues to consider the letter that follows, which is a rebuttal to a recent Washington Post editorial against the bill. The letter follows:

WASHINGTON, D.C.,
October 4, 1978.

Mr. PHILLIP GEYELIN,
Editorial Editor, The Washington Post, Washington, D.C.

DEAR MR. GEYELIN: Your editorial of October 4 on the Humphrey-Hawkins bill is disappointing for a newspaper with a distinguished reputation for enlightened and fair reporting. The editorial was both erroneous and callous.

Show me where in the Humphrey-Hawkins bill that blacks are given special treatment. Besides, what would be wrong with legislation that deals with massive unemployment in any community? The Humphrey-Hawkins bill, however, was not designed to exclusively or even mainly benefit blacks, much less to pacify its political leadership.

More than 82 national organizations—with predominantly white constituencies—representing churches, labor, women, consumers, civic groups, business, and minorities, have worked continuously for the bill's enactment for over four years. Numerically, blacks will benefit far less than whites from a reduction in joblessness and inflation. Of the more than 20 million persons hurt annually by joblessness, blacks constitute less than 20 percent. Of the more than 60 million people affected annually by the unemployment of a breadwinner, only a small minority are black.

Unemployment and doube-digit inflation have increased together. Conversely, unemployment reduced to 3 percent in 1952 and 3.8 percent in 1966 were accompanied by unusual price stability. Yet your editorial claims that reducing unemployment from 5.9 percent (in August 1978) even to 5.5 percent, or to 4 percent by mid-1983, would be "wildly inflationary." There no longer is any respectable economist, of conservative or liberal persuasion, who endorses the unemployment-inflation trade-off theory. *Business Week, Forbes, Dunns Review* and *The Wall Street Journal* have wisely avoided propagating such economic nonsense in recent times in their analyses of the complex international and domestic factors contributing to short- and long-term inflation problems. Even economists who do not support the Humphrey-Hawkins bill surely would find the *Post's* assertions extravagant and maybe ridiculous.

Your claim that "the Administration has not yet established any clear and comprehensible direction in its economic policies" is precisely our case for the Humphrey-Hawkins bill. At the very least, however, the Administration has recognized that reducing unemployment and inflation are consistent provides the planning framework for achievgoals, and the the Humphrey-Hawkins bill ing these mutually compatible goals.

Sincerely,

JOHN CONYERS, Jr.,
Members of Congress.●

SUMMATION

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ADDABBO. Mr. Speaker, each year at the end of the congressional session, I summarize the activity of the preceding year, as well as the activities of myself, and present them to my constituents for their consideration.

This year, because the rules of the House now force Members to do their last mailing to constituents 2 months before the end of the session, I was forced to summarize up until that point, and no further.

One of the most important elements that I have always previously included in my final reports to constituents obviously had to be left out of that earlier summation. That was the actual chart of the money the House had appropriated for the various functions of the Federal Government. Since I serve on the Appropriations Committee and have a vote in how these decisions are made, it is especially important to my constituents. But I also consider it very important for people to be able to look over a single chart and determine how their Federal legislators have spent their tax money over the last year.

We are presently concluding perhaps one of the most active years I have participated in during my 18 years in Congress. Just last night, we held the 400th recorded rollcall of the 95th Congress, and it is obvious to all of us that we shall conduct a number of additional rollcalls before this session comes to an end.

What have been the major issues? Obviously, enactment of the President's energy package, the tax cut bill and several other controversial issues still remain to be voted upon before we return to our districts. But we have passed the largest defense appropriations bill in the Nation's history, a total spending program $117 billion just for weapons systems and maintaining the Armed Forces. There is too much money in that bill as far as I am concerned; there always is. But it is generally a good bill with as little fat in it as any bill we have had before us in recent years. I am pleased that the Congress agreed with the President to withdraw the money for the nuclear carrier. It is a better bill for not containing that provision.

Generally, the defense appropriations bill provides a very lean budget for each of the services while providing adequate moneys if the programs are well managed. We have insisted that the services maintain best cost controls over weapons procurement programs so that the Government will get a good return on the money spent for these necessary but very expensive expenditures. The final figure as far as this appropriations bill is concerned is that it is some $2 billion under the budget request.

We increased spending in this last year for the Department of Agriculture and related agencies but if you will take a close look at the accompanying chart, you will see that every other agency of the Federal Government came in under the actual budget request. I think that is very significant and it ought to refute the claims that Congress spends and spends without concern for the taxpayer. It was on this floor of the House that these cuts were made, and if you will take a look at the bottom line, the Congress cut $10.6 billion from what the President requested. That is a very impressive amount. I repeat again that it cannot be disputed that when it came time for the Congress to fish or cut bait about spending, this Congress voted to cut spending and to cut spending by impressive amounts. Had it not been for the prudence of the Congress in this year of inflation and floundering economics, the budget deficit would have been far, far worse.

Now, you will find two other areas where the budget figures increased for fiscal 1979. We increased by $22 million money to fight black lung disease after a good case for this was made before the committee.

Additionally, the Congress increased by $63 million moneys for disaster relief. This so-called crisis intervention program passed the House by a single vote, and I am pleased that it did so because the House was voting on my amendment. Without this money, poor people and the elderly would have been in serious difficulty with high fuel bills last winter. It was a worthwhile program. It worked well, far better than it had the previous year, and I am pleased that it was included in the fiscal 1979 budget.

I believe, Mr. Speaker, that since I have already informed my constituents about the general activities of myself in this past year, as well as the actions of the House, that I will not go into greater depth at this time.

Let me conclude, however, by noting that it has not been an easy year for any of us. We have major domestic problems in this Nation and the Members of Congress are flooded with many, often varying, proposals for setting things right. Since we are but human beings we can only hope that our actions will be the right ones. We are never certain that the path we choose is the right one until we have walked down it.

We have struggled hard in this year to make the right choices. We have worked more days, more hours than any Congress in the history of this Nation. If there is any issue that has not had at least a fair hearing before the Congress this year, I do not know what it might have been. There is a limit to what any person, Member of Congress or not, can absorb in a single year, and I believe if we did not breach that limit this past year, we came very close to it. And well we might. When a Nation like ours has the number of problems we have, all we can do is put our collective noses to the grindstone and work until we solve them.

I know full well that a few months from now when we return we will face nearly as many problems as we began 1978 with, but to a large extent, they will hopefully offer better chances for success than some of the areas we have struggled with during the last 10 months.

The material follows:

ACTIONS ON REQUESTS FOR NEW BUDGET AUTHORITY CONSIDERED IN APPROPRIATION BILLS, 95TH CONG., 2D SESS.[1]—REVISED TO OCT. 11, 1978

[This table excludes "back-door" spending authority in legislative bills and permanent budget authority (Federal and Trust) available without further action by Congress]

Urgent Supp. for Dept. of Agriculture (P.L. 95-330)	57,145,000	57,145,000	57,145,000		+57,145,000	57,145,000		57,145,000	
Second Supp. Appropriations Bill, 1978 (P.L. 95-355)	6,675,886,486	6,383,818,186	[7] 6,333,389,186	−342,497,300	7,168,446,986	6,719,228,686	−449,218,300	6,753,925,686	−414,521,300
FY 1978 Supplementals in Legislative Bill (P.L. 95-391)					13,056,600	12,801,700	−254,900	12,801,700	−254,900
Total, bills for fiscal 1978	8,009,541,486	7,713,254,186	7,662,825,186	−346,716,300	16,959,128,586	8,221,934,386	−338,654,200	15,967,245,386	−991,883,200
C. CUMULATIVE TOTALS FOR THE SESSION TO DATE									
House	321,699,079,601	322,259,118,165	316,472,341,635	−5,226,737,966					
Senate					348,500,786,701	332,437,769,854	−7,664,476,847		
Enacted								337,855,966,730	−10,644,819,971

[1] Additionally, the Congress has taken action during this period to rescind budget authority as follows:

Bills	Proposed rescissions considered	Approved by House	Approved by Senate	Approved by Congress	Compared with proposed rescissions
First budget rescission bill, FY 1978 (P.L. 95-254)	$55,255,000	$55,255,000	$55,255,000	$55,255,000	

[2] Reflects 2 percent reduction for certain items in the amount of $58,558,720.
[3] Reflects $1 billion reduction for the House, $2 billion for the Senate and $1 billion for the conference for reduction of fraud, abuse, and waste.
[4] Reflects 2 percent general reduction on nonmandatory items in the amount of $397,166,000.
[5] Reflects 2 percent general reduction on nonmandatory items in the amount of $206,832,000.
[6] Reflects 2 percent general reduction on nonmandatory items in the amount of $92,825,000.
[7] Reflects 2 percent general reduction on nonmandatory items in the amount of $35,108,009.
[8] Includes $47,500,000 in permanent budget authority which was rescinded in this bill.
[9] Funding is provided in the Continuing Appropriations, 1979 (P.L. 95——).
[10] These bills were passed by the House and Senate during the 95th Congress, 1st session, but approved by the Congress and enacted into law during the 95th Congress, 2d session.
[11] Amount considered by Full Committee was $8,554,311,600 but is reduced by $3,907,984,000 in this table for unauthorized items removed from the bill by point of order.
[12] Amounts shown under Continuing Appropriations are new budget obligational authority for the Public Works-Energy Research Appropriation bill.
[13] Conference agreement.
[14] Amount as reported by Senate Appropriations Committee but not yet approved by Congress.

Note: The Budget for 1979, as submitted Jan. 23, 1978, tentatively estimated total new budget authority for 1979 at $568.2 billion net ($631.8 billion gross, including $63.6 billion in intragovernmental transactions and certain so-called proprietary receipts handled as offsets for budget purposes only). An estimated $265.8 billion does not require current action by Congress; this amount includes permanent appropriations such as interest and various trust funds already provided in basic law. Virtually all of the remaining $366.9 billion is for consideration at this Session in the appropriation bills. About $19.8 billion of the $366.9 billion was shown in the January budget as being "for later transmittal" for supplemental requirements under present law, new legislation, allowances and for contingencies and civilian pay raises.

Parentheses indicate that amounts are not included in "C. Cumulative totals for the session to date."

Prepared by House Committee on Appropriations. ●

THE RESULTS OF PUBLIC OPINION POLL OF OHIO'S 17TH DISTRICT

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ASHBROOK. Mr. Speaker, the results of my annual public opinion poll have been tabulated. The response was excellent. Thousands of 17th district residents expressed their views. Many included letters and comments along with their completed questionnaires.

The poll covered a wide range of domestic, national defense, and foreign policy issues. The results are of great interest.

Ninety percent of those responding favored proposition 13-type amendments to limit spending and taxation by the Federal Government. Only 6 percent opposed such amendments. Eighty-two percent expressed the view that a balanced Federal budget is very important, while another 13 percent thought it is fairly important. Sixty-three percent supported a major tax cut for individuals and corporations.

In the area of national defense, 92 percent believed that the United States should follow a policy of military superiority over the Soviet Union. Ninety percent opposed abandoning the Republic of China in order to normalize relations with Communist China. Another 82 percent went on record against giving our tax money to multilateral agencies such as the World Bank if they in turn make loans and grants to countries like Vietnam, Cambodia, Uganda, and Cuba.

Sixty-four percent favored strict import quotas on foreign steel as a means of protecting American jobs. An even greater number, 78 percent, thought Federal registration of all firearms by the Bureau of Alcohol, Tobacco, and Firearms was a bad idea.

I appreciate that so many 17th district residents took the time to complete this poll. It is an important way of getting constituent views on issues facing our Nation.

Following is the 1978 public opinion poll:

1978 PUBLIC OPINION POLL OF THE 17TH DISTRICT

[Answers in percent]

	Yes	No	No opinion
1. Do you favor proposition 13-type amendments which will limit spending and taxation by the Federal Government?	90	6	4
2. Do you think Federal registration of all firearms by the Bureau of Alcohol, Tobacco, and Firearms would be a good idea?	18	78	4
3. Do you favor strict import quotas on foreign steel as a means of protecting American jobs?	64	30	6
4. A balanced Federal budget is—			
(a) Very important	82		
(b) Fairly important	13		
(c) Not so important	3		
(d) No opinion	2		
5. To normalize diplomatic relations with Communist China, that nation insists that the United States break diplomatic relations with the Republic of China, abrogate our defensive treaties, and withdraw our troops from Taiwan. Should we accept those terms?	6	90	4
6. The proponents of the equal rights amendment seek an additional 7 years to secure ratification in the State legislatures. Do you favor this proposed extension?	26	69	5
7. What is the best solution to the economic problems farmers are experiencing?			
(a) Higher Government price supports	5		
(b) A combination of expanded credit, land set asides and Government reserves	8		
(c) Allow the free market to function and limit Government to developing exports and overseas markets	78		
(d) No opinion	9		
8. Do you favor Federal tuition tax credits to help pay tuition expenses at the college level?	42	50	8
9. Do you favor Federal tuition tax credits to help pay tuition expenses at the elementary and secondary school level?	25	70	5
10. Should those who are receiving public assistance but are able to work be required to work at least part time in order to keep their Government assistance?	94	1	5
11. New York City is seeking to renew the Federal loans which are due to expire shortly. With which statement do you most agree?			
(a) New York City should solve its own problems without Federal assistance	85		
(b) Federal assistance is justified	11		
(c) No opinion	4		
12. The Senate has passed the Panama Canal Treaty. The House will vote on appropriations and implementing legislation. How would you vote?	9	88	3
13. In planning for our national defense, should the United States follow a policy of military superiority over the Soviet Union?	92	6	2
14. Do you believe that illegal aliens presently in the United States should be granted amnesty to remain and work in the United States?	14	80	6
15. Should Congress roll back the social security tax increases it approved last year?	47	51	2
16. Should Congress hold down cost-of-living increases and all increases in social security benefits?	55	43	2
17. There are 2 basic areas of controversy in the abortion issue. Which position best expresses your opinion:			
As to abortion itself:			
(a) I favor the right of the individual to choose whether or not she will have an abortion	54		
(b) I favor the right to life amendment which would assure the right of life extends to conception and prevent abortions except where the life of the mother is involved	37		
(c) No opinion	9		
As to funding for abortions:			
(a) I believe tax money should be used to pay for abortions for the poor and those on welfare	21		
(b) I do not believe tax money should be used to pay for abortions	68		
(c) No opinion	11		
18. Do you favor the death penalty for the most serious crimes such as murder, kidnapping, terrorism?	83	6	11
19. President Carter advocates shifting emphasis on foreign aid to multilateral agencies such as the United Nations, the World Bank, the International Development Association and others. What do you think?			
(a) Whatever foreign aid we give should be given by our Government and administered by our Government	80		
(b) We should move in the direction of cooperation with other governments and multilateral agencies	6		
(c) No opinion	14		
20. I of the critical issues in this shift to multilateral agencies is that the World Bank, the UN, etc. promote programs in Vietnam, Cambodia, and nations of the world which are Communist or hostile to America. Which view do you hold:			
(a) Do not give to multilateral agencies if they in turn would make loans and grants using our tax money to countries like Vietnam, Cambodia, Uganda, Cuba	82		
(b) Work through multilateral agencies regardless of whether their position is different from ours	5		
(c) No opinion	13		
21. A number of steps have been proposed to deal with our energy problem. Which of these steps do you believe we should take?			
(a) Institute a program of mandatory gas rationing	16	79	5
(b) Increase the Federal gasoline tax	4	90	6
(c) Deregulate the price of new natural gas	47	45	8
(d) Expand the use of coal	88	4	8
(e) Accelerate development of nuclear power	85	7	8
(f) Accelerate development of solar energy	85	7	8
(g) Restrain the Environmental Protection Agency standards which limit use of coal, generation of energy and expansion of industry	75	16	9
22. Should employees of Federal, State, or municipal governments be permitted to strike?	23	74	3
23. Do you favor a major tax cut for individuals and corporations?	63	27	10
24. How would you rate the job that Congress is doing?			
(a) Good	4		
(b) Fair	27		
(c) Poor	67		
(d) No opinion	2		
25. How would you rate the job that President Carter is doing?			
(a) Good	4		
(b) Fair	24		
(c) Poor	71		
(d) No opinion	1		

●

RUSSIA WIDENS NUCLEAR TECHNOLOGY GAP

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WYDLER. Mr. Speaker, three articles have appeared in the Washington newspapers during the past week which I think document a cause for alarm with respect to this country's misguided nuclear policy. The first article "Soviets Confident They've Mastered Breeder Reactor Technology" in the Washington Star confirms my own views of Soviet breeder development which I presented to the Congress in a report this year. I also wrote the President about this potential for an "Atomic Sputnik" and asked him to keep a U.S. commitment to build a breeder plant. In the letter to Mr. Carter I stated:

OVERSIGHT OF SOVIET NUCLEAR ENERGY DEVELOPMENT

. . . I am pleased that you have initiated an effort to come to some accommodation with the Congress on the breeder program and the Clinch River Reactor Project in particular. I share your view, as Secretary Schlesinger has related it, that continued confrontation on this issue is not in the best interest of the country. Chairman Teague has told me that you do feel that our Nation needs a strong breeder program.

The fact is, however, that our program cannot really be strong without a demonstration of fast breeder technology in an operating plant. This plant does not have to be the one currently planned for Clinch River, but could incorporate more advanced breeder technology. However, until we make a large commitment, we must keep the Clinch River option open.

I have come to this conclusion about the breeder after my discussion last week with the Soviets in Moscow. I have also had extensive discussions with the International Atomic Energy Agency in Vienna and the French Atomic Energy Commission, all within the past year. In all cases the evidence is irrefutable. Other major developed nations are far ahead of us in breeder development. Our continuing technology program is simply not sufficient to keep this energy option open to the United States in a timely manner.

[From the Washington Star, Oct. 3, 1978]

SOVIETS CONFIDENT THEY'VE MASTERED BREEDER REACTOR TECHNOLOGY

(By John Flalka)

OBNINSK, U.S.S.R.—The goal of the nuclear scientists and engineers working here is to introduce a "plutonium economy" into the Soviet energy system by the 1990s.

The device for accomplishing this is called the liquid metal fast breeder reactor (LMFB), a piece of technology that has caused a major controversy in the United States because it will generate or "breed" large quantities of plutonium for use as nuclear reactor fuel. Plutonium is also the main material used in the manufacture of nuclear weapons.

The feeling here is that handling plutonium along with other materials involved in breeder technology is an art that has been completely mastered.

"I don't see any basic difficulties in transferring from uranium fuel to plutonium," explained Mikhail Troyanov, deputy director of Russia's Instiute of Physics and Power Engineering, to a group of visiting U.S. journalists.

The difference between the U.S. breeder program and the Soviet Union's is obvious to a lay visitor to Obninsk, the main breeder research facility, located 80 miles southwest of Moscow.

While the Carter administration and Congress are locked in a protracted dispute over whether to build the first U.S. breeder reactor that will produce electrical power on a commercial scale, the Soviets have already built two and are finishing plans for a third.

The third Russian breeder, to be completed in the late 1980s, is called BN-1600. It will produce 1,600 megawatts of electric power, more than five times that of the proposed Clinch River breeder reactor. Carter stopped the Clinch River project last year because it conflicted with his nuclear non-proliferation policies. The reactor, which still has strong support in Congress, was to have been built near Oak Ridge, Tenn.

Until recently, the LMFBR was the U.S. government's main energy research program. It was considered to be the next generation of nuclear power plants, one that would begin to dominate power production in the United States by the 1990s.

One difference between the breeder and conventional reactors is that breeders operate at much higher temperatures, requiring a molten metal, sodium, as a coolant rather than the water that is used to cool and to carry the heat out of conventional nuclear reactors.

The breeder reactor is also designed to operate in a way that physicists call "fast." In a breeder the flow of fast-moving sub-atomic particles, called neutrons, is encouraged. In the conventional reactor the flow is inhibited.

The neutrons have the capacity to change the atomic structure in the metals surrounding the reactor and so breeders are designed with a blanket of natural uranium around the reactor's core. Under bombardment by neutrons, the uranium turns into plutonium suitable for a re-use as reactor fuel.

According to Troyanov, the Soviets hope to use LMFBRs, "very intensively" in the 1990s. The reactors will be designed to create about 1.3 times the amount of plutonium fuel they burn up, and to eventually shift the basis of their energy economy to plutonium fuel, rather than coal, oil, uranium or natural gas.

While U.S. scientists maintain that the U.S. breeder program is still ahead of the Soviets' in terms of basic research, they admit the Soviets are now well ahead of the United States in terms of testing equipment under actual operating conditions.

Obninsk is the home of the world's first commercial nuclear power plant, which began sending small quantities of electric power into the Moscow area electrical power grid in 1954, at a time when the United States was concerned with smaller experimental devices.

Almost immediately, according to Troyanov, the basic thrust of the Soviet research program was shifted into the breeder area because of the promise of virtually limitless supplies of plutonium fuel.

Unlike U.S. nuclear engineers, who dress up visitors in white gowns, shoe covers and special radiation monitors, the Soviets have a much more relaxed attitude about displays of nuclear hardware.

They don't use shoe covers, which protect the reactor area against dirt, and they believe that radiation monitors are unnecessary. They like their machinery and they want people to see it up close, even touch it.

For a lecture on the main Soviet breeder research reactor, BN-5, reporters were assembled on the operating reactor's metal cover, just a few yards away from the machine's radioactive fuel.

Next year BN-5 will celebrate it's 20th birthday and the engineers here are looking for a way to celebrate what they say has been 20 years of trouble-free breeder operation.

"We could fill it up with cognac," joked one engineer, "but that would slow down the reaction."

The Soviet equivalent to the proposed Clinch River breeder is called BN-350. It began operating at Shevchenko, on the shore of the Caspian Sea, in 1972.

It now produces electricity and also steam for use in water desalination although, as Troyanov admitted it has had "certain difficulties."

Sodium is a very tricky chemical to handle in large quantities. It burns on contact with air and can explode upon contact with water.

An explosion occurred in 1974 after some 100 gallons of water leaked into the sodium in one of the steam generators at Shevchenko. Some reports say the explosion was rather large, but Troyanov dismissed these reports as "rumors," saying that the plant remained in operation and that the damage it sustained would not have been noticeable from the outside.

A somewhat larger facility, BN-600, is being completed near Byeloyarsk in the Urals and is expected to begin operations sometime next year.

Recently there has been some discussion among Russian and U.S. scientists that American equipment, such as steam generators, should be tried out in the Russian breeders.

The second article "Nuclear Plant in Finland Showcase for Soviets" appeared in the Washington Star on October 4, 1978, and a companion piece in the Post on September 29, 1978, "Soviet Reactor in Finland Seen as Economic Threat to West" describe how the Soviets have put their foot in the door in the nuclear power market which has been long dominated by this country. I pointed to this disturbing trend in my May 1978 report to the Congress, "Oversight of European Nuclear Energy Development." The administration has done little since to change the views I expressed at that time.

OVERSIGHT OF EUROPEAN ENERGY DEVELOPMENT

To the rest of the world the United States policy of deemphasizing atomic power is a no-growth policy of "pull back." Other nations look in amazement at a policy designed to keep us on an oil binge destined to let the world leave us behind in nuclear technology. Our shifting position on nuclear safeguards has given our Nation a reputation as being an unreliable nuclear partner.

This country's radical change in policy toward the development of nuclear energy and peaceful export of nuclear technology has raised grave doubts among our friends. We are losing credibility with these nations and losing business in the export of peaceful applications of nuclear energy as well.

Our reneging on past nuclear commitments not only means that this country's technological capability will be wasted but also leaves open the market to nations who may share our concerns about the peaceful uses of the atom.

The fact that the United States is requiring foreign countries to renegotiate the terms of nuclear agreements has literally put these countries in a mood of "quite rage." We are destroying our image as good neighbors and raising serious questions in the international community about whether we honor the traditional American view of "sanctity of contracts." In the case of Eastern bloc countries such as Yugoslavia we are undercutting them as they attempt to "walk the tightrope" in

relations with the United States and the Soviet Union.

I recommend these articles to my colleagues so that they can see the extent to which the gap has increased between our nuclear program ant that of the Soviets:

THIRD WORLD CUSTOMERS GIVEN TOUR: NUCLEAR PLANT IN FINLAND SHOWCASE FOR SOVIETS

(By John J. Fialka)

LOVIISA, FINLAND.—The large, silo-like structure built near here on an island in the Gulf of Finland bears witness to the first success of the Soviet Union in what appears to be a major push to sell nuclear power plants in the West.

Finnish engineers, who have labored mightily to make the Soviet nuclear equipment conform to much tougher U.S. safety standards, have dubbed the plant "Eastinghouse" for its marriage of a Soviet reactor, German control equipment and an emergency cooling system designed by the Westinghouse Electric Corp.

The Soviets are so proud of the completed reactor that they have begun bringing potential customers from Third World nations, including Iraq and Iran, to visit the site. One reason for the Soviet pride is that the plant has been operating at about 85 percent efficiency—considerably higher than most American-built reactors.

The plant at Loviisa is the Soviets' foot in the door of a market long dominated by American and, to a lesser extent, European companies. The Soviet Union is bound to gain a larger share of nuclear business when it opens the world's largest reactor manufacturing facility sometime in the 1980s. That operation will have the unprecedented capability of manufacturing entire nuclear plants on an assembly line—turning them out "like cookies," in the words of one diplomat.

As the Finns have learned, much of the Soviet Union's commercial nuclear power operations are shrouded by military-style secrecy.

No Westerners have seen the massive atomic reactor plant, called "Atommash," which is believed located in the vicinity of Volgodonsk, south of Moscow.

When the Finns decided to build a plant near Loviisa, they invited a number of Western companies to submit designs and bids. However, they ended the competition by inviting their powerful neighbor, the Soviet Union, to underbid the competition. The Soviets sold the plant for $250 million, roughly half the going U.S. price at the time. They also sweetened the deal.

"It came with very, very favorable long-term financing for us," explained Kalevi Numminen, a member of the board of the state-owned Imatran Voima Co., which owns the Loviisa plant.

Politics have tended to flavor much that has happened at Loviisa since.

The Soviet construction crews, numbering up to 1,000 workers, arrived in 1970 and established self-contained communities apart from the population of Loviisa, which is 60 miles east of Helsinki.

The Finns ran into a political wall early on when they decided they had to visit Soviet plants to see exactly how the nuclear fuel was made before they could certify that the plant was safe to run at peak capacity—slightly less than half that of the current generation of U.S. plants.

Although the request was made at the highest levels, sources said, the Soviets were adamant in their refusal, saying it was against Soviet law for any foreigner to see Soviet uranium enrichment plants where the exotic isotope U-235, which is used in nuclear fission, is separated and concentrated.

Because the Soviet plants, like their American counterparts, are used to supply enriched uranium to their nation's nuclear weapons program, the Soviets have never publicly revealed their whereabouts. Western observers believe they are located in Siberia, where vast amounts of hydroelectric power are available.

Nor have the Soviets ever revealed exactly what they do with the long-lived radioactive nuclear wastes.

Under Soviet contract provisions, fuel supplied with the plant is retrieved and returned to the Soviet Union when it is spent.

"What they sell they take back," explained Anders Palmgren, superintendent of the Loviisa plant. "For us, the fuel is more or less leased. After that, it's their problem."

Under U.S. and European contracts, user nations buy the fuel for keeps and must devise waste disposal systems of their own. They also are left with substantial amounts of plutonium, a residual component of the spent fuel.

Because plutonium is also the primary material used to make nuclear weapons, the question of ownership of the plutonium in fuel purchased from the United States currently is troubling the Carter administration. Japan and Austria are pressing the United States for permission to send their used fuel to third countries for reprocessing a matter that requires U.S. approval under current contracts.

The Soviets "have total control (of nuclear fuel)," said a U.S. diplomat. "When it comes to non-proliferation, they are almost holier than thou."

According to Western estimates, the Soviets have sold nuclear power plants under similar arrangements to Bulgaria, Poland, East Germany and Czechoslovakia. There are also believed to be negotiations under way with Libya and Cuba.

The Soviets also have begun contracting to enrich uranium fuel purchased elsewhere. So far France, Great Britain, West Germany and Italy have arranged to send uranium to the Soviet Union for enrichment.

As for the Finns, they say they are happy with their dealings with the Soviets. Next month a Finnish envoy will go to Moscow to see whether the Soviets are interested in a joint venture in their nuclear export business using Finnish engineers to equip Russian plants with U.S. style safety features.

Meanwhile a second Soviet plant at Loviisa is near completion, and the Finns are considering a third—one of the first to be produced at the "Atommash" plant.

SOVIET REACTOR IN FINLAND SEEN AS ECONOMIC THREAT TO WEST

(By Thomas O'Toole)

LOVIISA, FINLAND.—The Finns who operate the first nuclear power plant to be exported to the West by the Soviet Union jokingly refer to it as their "Eastinghouse" reactor. But they see the future for Soviet nuclear power as anything but laughable.

The Finns call their Soviet-built plant "Eastinghouse" because it so closely resembles the 38 nuclear electric plants built round the world by Westinghouse, the American company preeminent in the field.

Westinghouse tried to land this contract eight years ago but lost to the Soviets even though it bid 20 percent less than the $250 million the Finns paid the Soviets. Therein lies a story.

For the last two years, Westinghouse has told the White House and the Congress that stricter controls on nuclear exports will mean a staggering loss of sales. Insisting that nuclear energy is here to stay, Westinghouse has said that if American companies fail to build the world's nuclear power plants, the French and the West Germans will.

There is little doubt that American companies such as Westinghouse may lose some of their share of the nuclear market but there is doubt that the French and Germans will capture that loss. If the Finnish experience is a guide, it may be the Soviets who win a large share of the market.

A trip to this small town on the Gulf of Finland by touring American journlists offers evidence that this may turn out to be one of the most serious economic threats the Soviet Union has ever mounted on the West.

The Soviet-built plan is already in operation, a shiny, whirring machine that last week started its fourth straight month without missing a kilowatt. An almost identical second plant is nearly constructed, less than 100 yards from the first. More than 600 Soviet construction workers are still at work there.

Talks are taking place concerning a third plant, which at 1 million kilowatts will be more than twice the size of the 440,000-kilowatt plant now in service. The Finns say they don't have to decide on this plant for another two years but it is clear from conversations here with executives of the government-owned Imatran Voima Power Co. that a decision of sorts has already been reached—the plant will be built by the Soviets.

"Why change something when it works?" asked Kalveli Numminen, director of Imatran. Anders Palmgren, superintendent of the Loviisa power station added: "The plant we have here happens to be one of the best in the world. The fuel works well, the vibrations in the turbines are low and we have not had a single fuel leak in more than 10,000 hours of operation. We are delighted with this nuclear power plant."

The Finns talk bluntly about how they would like to become salesmen for Soviet nuclear power around the world. The Finns here think that the Soviet nuclear power design is as good as any in the West and want to share in the profits they see tumbling into Soviet coffers once others turn to Moscow.

Until the Finns bought their first Soviet plant, things did not go well with Soviet nuclear exports. The Soviets have exported nuclear plants to East Germany, Poland, Bulgaria and Hungary but in the last few years lost bidding battles to Westinghouse for a plant in Yugoslavia and to a Canadian firm for a plant in Romania.

None of these Communist countries thought the Soviet nuclear design was safe. Five years ago, the Soviets were trying to sell nuclear plants without the thick concrete containment buildings around them that are the American trademark.

The Soviets did not build redundant cooling systems favored by American companies to cool down the reactor if its nuclear fuel should accidentally overheat. The Soviet computer controls of the plant were also incomplete.

The Finns convinced the Soviets to change their ways. They bought not only the Soviet reactor but also steam generators and turbines. Then they went to a West German firm for the controls, a Dutch company for the concrete containment and to Westinghouse for a $10 million system to flood the reactor with 1,000 tons of ice if its heat and pressure need to be subdued in a hurry. The Soviets got the message and will now supply these items.

Currently said to be negotiating to buy Soviet nuclear plants are Cuba, Libya and a third, unnamed country. Visitors now flock to Loviisa to watch the plant work and to talk about it with the Finns.

The Loviisa plant could win the Good Housekeeping award for industrial cleanliness. It is nearly spotless, from its white turbines to the dark green of its cooling tanks along the walls of the main reactor building. The reactor itself is silent. The only

noise is the high-pitched whine of the turbines.

The Finns say one reason they picked the Soviet plant over the Westinghouse design is the financing, which other countries might not get from the Soviets. They loaned the Finns money at low interest rates, gave them uranium fuel free of charge for the first year and let the Finns subcontract almost half the construction work to Finnish firms.

The way the Finns tell it, the country needs nuclear energy. Finland has no oil, coal or natural gas and pays out more than $1 billion a year to import energy. The country is so flat it has only six dam sites left to exploit, all of them expensive. The only domestic fuel is peat.

Nuclear power presently supplies 8 percent of Finland's electricity, and that figure is likely to rise to 35 percent within a few years. That would make Finland the world's most nuclear-dependent nation, but the Finns hope that their experience with plants such as "Eastinghouse" will turn to profits when other energy-strapped countries are shopping for Soviet nuclear technology.●

GENNADY KHASSIN DENIED PERMISSION TO EMIGRATE TO ISRAEL

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SOLARZ. Mr. Speaker, I am proud today to have the opportunity to bring to the attention of my colleagues in the Congress and the American people, as part of the continuing "Vigil for Life" sponsored by the Union of Councils for Soviet Jewry, the plight of Gennady Khassin and his wife, Natasha Khassin, and their children—all Soviet Jews who have been denied the right to immigrate to Israel by the Soviet Government.

Although a signatory of the Helsinki Final Act which committed all signatory nations to pursue policies consistent with basic human rights, including the rights of religious freedom and free travel between countries, the U.S.S.R. has refused since 1976 to allow the Khassin family to emigrate from Russia. In addition, Gennady Khassin, a prominent mathematician and author of 4 textbooks and 16 scholarly articles which have been widely published and which are available abroad, is now unemployed and nearly destitute. Why? Because in 1976 he requested permission to emigrate to Israel to be reunited with his mother. Now his only means of support is by teaching Hebrew—an occupation the Soviet officials do not regard as a registered profession. Thus, he has been called in by the police twice and threatened with prosecution for being a "parasite."

Mr. Khassin has never been given any reason for the refusal of his requests to emigrate. He and his wife participated in the Babi Yar memorial service in Kiev in 1976 and were both arrested. When they attempted to go to the Babi Yar memorial service in 1977 the KGB confiscated their train tickets and took them to the police station.

Undaunted they have continued to request permission to leave Russia. They have also continued to participate in activities that protest the policies of the Soviet Government which prevent them from being reunited with their families, or to even hold the positions for which their background and education would qualify them, because they are Jews determined to raise their children in Jewish traditions, and because they long for the opportunity to live in peace and freedom.

I commend the courage of the Khassins and hope that this small "Vigil for Freedom" effort will aid them in their efforts to soon win the right to emigrate.

As signatories of the Helsinki Accord, we in the United States call upon the U.S.S.R., as another signatory, to live up to its promises to pursue policies consistent with the basic principles of human rights—particularly the reunification of families, religious freedom, and the right of citizens to free travel.●

S. 274—PROHIBITING UNION ORGANIZING OF THE ARMED SERVICES

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, at the beginning of the last session of Congress, during the 95th first session, I cosponsored a bill, H.R. 2477, which was introduced by my colleague, Congressman G. V. MONTGOMERY of Mississippi, to prohibit union organization of the Armed Forces. A similar bill this session, S. 274, was considered and passed by both the House and Senate on September 16 and 28, respectfully.

Congress must move swiftly to deal with this critical piece of legislation, as there is currently a movement afoot within several of our Nation's labor unions to recruit members from our Nation's military services.

In late September of 1976, the American Federation of Government Employees (AFL–CIO) voted to amend the union's constitution to permit recruiting members of our military forces. This organization is now in the process of polling its members to see if they want to try to unionize the 2.1 million service men and women on active duty. They have already voted to raise a $13,000 a month "war chest" to unionize members of the Armed Forces, making it painfully evident that if the members of the union concur, military unions could, indeed, become a reality. Last month Gen. David C. Jones, Air Force Chief of Staff, warned that the Nation's armed services would be unionized "within 5 years" if something is not done to stop it.

It is up to us, as Members of Congress, to see to it that General Jones' prediction does not become a reality. The institution of military unionization could only serve to severely undermine our national security by dividing the allegiance of those pledged to defend our country between the Government and a union, while fragmenting command authority in a branch of the public service where such a condition would be intolerable and self-destructive.

The Constitution charges Congress with the responsibility to "raise the Army." It charges the President with the responsibility of Commander in Chief. He carries out these responsibilities through a change of command in the Defense Department, the Army, the Navy, Marine Corps, the Air Force, and Coast Guard.

A unionize defense force would play havoc with this military chain of command which is so crucial in our present electronic-nuclear war age, when every strategy, every policy, every tactic is based upon the instantaneous, unquestioned response to orders. There is no place in this system for strikes, slowdowns, shop-meetings, pay bargaining sessions, and so forth, that are inherent to any union organization. Legitimate as they are in industry, union relations must continue illegal in the Armed Forces; the life of this Nation could depend upon it.

The detrimental effects of military unionism are clearly evident when one considers the toll it has taken within the Armed Forces of some of our European allies, such as Holland, Denmark, and West Germany.

While the official lines in these countries is that all is well with military unionization, the facts speak differently. Capable, experienced officers have resigned rather than face the humiliation of shop steward meetings. Raw recruits have challenged military commands and discipline at times, electing to demonstrate loyalty to their union at the expense of their assigned duties and their obligation to their country. Indeed, the involvement of Portugal's armed forces with leftist unions played a major role in that country's recent unrest that brought down one government and threatened Portugal's role in the North Atlantic Treaty Organization. The words of Gen. Marcel Bigeard, a legend in the French army and now France's Secretary of State Defense, regarding the unionization of the European military are undoubtedly a more reliable yardstick for measuring the effects of military unionization than are many countries "official lines." General Bigeard said:

> There is afoot an enterprise of demoralization of armies on a French and European level which has been going on for five or six years. . . . The matter is serious (Newsweek, March 8, 1976, p. 43).

We should learn from the European precedent rather than allowing the U.S. military to become an example to other nations considering military unionization.

Advocates of unionization of our Nation's Armed Forces argue that to deny members of the military the right to form unions would be a deprivation of their constitutional rights, using the first amendment's freedom of association clause as a basis for their argument. What they conveniently fail to mention is that section of the U.S. Constitution, article 1, section 8, clause 14, which specifically grants Congress the power "to make rules and regulations of the land and naval forces." Furthermore, in a decision upholding articles 133 and 134 of the Uniform Code of Military Justice, the U.S. Supreme Court has said:

This court has long since recognized that the military is, by necessity, a specialized society separate from civilian society.

Thus, while members of the military are not deprived of the freedom of association granted by the first amendment, the different character of the military requires a different understanding of this community and of the military mission right. The fundamental need for obedience and the consequent need for discipline make it impossible for service men and women to do some of the things that civilians are entitled to do. This small abridgement of rights, as guaranteed by the first amendment, is necessary to guarantee citizens the protection of a disciplined, responsible, and effective military force.

The "separate society" doctrine enunciated by the Supreme Court plainly suggests that prohibiting unionization of the military is a valid exercise of legislative authority.

By denying members of the military the right to form unions we are in no way subscribing a "grin and bear it" type of philosophy to those who have voluntarily pledged their services to preserve our Nation's liberty and security. There are channels which members of the Armed Forces may utilize to air grievances and present problems through the chain of command. Such procedures currently include the Inspector General System, and complaints under article 138 of the Uniformed Code of Military Justice. In addition there has been a trend in recent years whereby individual commanders now have open door policies. Many bases have instituted enlisted and junior officers councils and other similar programs, all attesting to the flexibility of the chain of command in providing appropriate means of communication for voicing complaints. There is no place in this chain of command, however, for organizations that would rely on bargaining and negotiations.

We must not allow a system to be instituted that would give servicemen and women the upper hand in determining the course of action the military will pursue. The ramifications of such a situation are particularly alarming when considered within the context of a situation in which the very life of the Nation would be at stake. Should we merely sit by, idly allowing an organization to be instituted that would leave our national security to the whims of those who, by the very nature of their position, are not able to see the potential hazards of ignoring high level military commands?

In addition, I wish to point out my serious reservations about section III of S. 274, dealing with our National Guard technicians program.

I am unalterably opposed to unionization of any type in the Armed Forces. I regard the existence of Government employee unions in the National Guard technicians program as a foot in the door which could lead to the erosion of the command and control processes of the Active Forces.

National Guard technicians are Federal employees who provide day-to-day continuity for National Guard units. They work full time at helping their units achieve and maintain combat readiness and a rapid mobilization capability.

All but a small fraction of the Guard's technicians are required by law, as a condition of their employment, to be military members of the organization they serve as technicians. The technician force exists to assure that, in a State or National emergency, the National Guard will be able to send effective, smoothly functioning units to active duty in the shortest possible time. Congress wrote the military membership requirement into law for Guard technicians in 1968, when it enacted the National Guard Technicians Act.

Since the conversion of the National Guard technicians to Federal status on January 1, 1969, challenges to the military characteristics of the technicians program by labor organizations have continued to increase each year. In 1970, there were but 14 labor agreements and 2 unfair labor practice charges filed. In 1976, 113 labor agreements were negotiated and 37 unfair labor practice charges filed.

Information compiled from data furnished by State adjutants general show that they are continually challenged by local and national labor organizations in their efforts to direct day-to-day operations of the National Guard with their technician workforce. The unions continue to strive for a complete separation between military and technician duties.

Strong differences of opinion exist between Federal employee unions and National Guard leadership over the purely civilian nature of the jobs performed by technicians; so strong, in fact, that some National Guard leaders declare the situation has produced an intolerable adversary relationship between technicians and their military commanders.

There is simply no substitute in the Armed Forces for unqualified obedience to authority. The security and tranquility of our Nation in peace, and its defense in war, depend upon it. When our men and women are called up to defend our country, a commander must have the unquestioned authority to order them into battle and the power to enforce his orders. Any action that would diffuse or weaken this power and authority would amount to a self-inflicted wound to our defense effort—one from which we might never recover.●

GE'S 100TH ANNIVERSARY

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mrs. HECKLER. Mr. Speaker, I would like to bring to the attention of my colleagues that Thursday, October 15, marks the 100th anniversary of the founding of one of the most technologically innovative corporations of our time—the General Electric Co.

It was 100 years ago, October 15, 1978, that a small company was founded to financially back Thomas Alva Edison's attempt to turn a dream—the development of the incandescent lamp—into reality.

It was this company, General Electric's predecessor, through its financial support of Edison's early experiments, that helped launch the world into a new era of technological achievement.

From this great beginning, the General Electric Co. would in its first 100 years furnish the world with many more great and diverse technological advancements.

These notable technological innovations and achievements include: Turbine engines which produce our electricity and act as propulsion systems for jet aircrafts and ships; the electric stove and refrigerator and other home appliances; pioneer radio and television, and development of mass communication systems; electron radio tubes which were the heart of the first early warning radar; computer time-sharing systems; man-made materials such as diamonds and silicone for use in industry; re-entry systems to house and protect space payloads; and helping man to achieve one of his greatest aspirations—landing man on the Moon.

Yankee ingenuity is the cornerstone of our great economic growth as a Nation, and General Electric's century of innovation has been an important part of this progress. On the occasion of General Electric's 100th anniversary, we congratulate each individual in the company for their contribution to this outstanding American success story.●

A DEBT OF GRATITUDE TO THE REVEREND HARRY W. HEERMANS FOR THE FAITHFUL SERVICE TO OUR COMMUNITY AND COUNTRY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. KEMP. Mr. Speaker, it is with great pleasure that I take this opportunity to recognize before my colleagues a leading member of our community, the Reverend Harry W. Heermans, for his innumerable contributions to the community of Orchard Park, N.Y. Retiring this month after 29 years of service as rector of St. Mark's Episcopal Church, his reach has extended beyond the parameters of this single parish to touch our entire community, embracing all of us with his deep commitment, constant understanding, and tireless dedication.

Thirty-six years after his graduation from Virginia Theological Seminary and ordination into the Episcopal Church, and over 1,900 sermons later, Reverend Heermans continues to exemplify those attributes of leadership and participation upon which the future of our communities, indeed, our Nation depends. His endless generosity and continued involvement have left our community with many invaluable contributions for which he will always be remembered.

As dean of the Southern Erie Deanery of the Diocese of Western New York, and through his service on countless

liturgical and social service commissions, he has been instrumental in fostering an ecumencial understanding among our churches as well as furthering a long-standing commitment to meeting the needs of every sector of society. The elderly as well as the young, the poor, and comfortable alike have all benefited from Reverend Heermans' keen sensitivity and strong sense of purpose and community service. Through his civic work on the board of directors of both Freeport and the Orchard Park chamber of commerce, he has demonstrated the strength of a church involved in society not separate from society, and has earned the highest regard and esteem of our entire community. The respect which he has gained was perhaps best reflected in his selection as recipient of Orchard Park's Citizen of the Year award for 1977.

Mr. Speaker, the character, integrity and constant good will of Reverend Heermans have enriched the lives of all he has known to surpass even his greatest contributions. It is in such citizens that the hope of tomorrow lies—citizens who are able to overcome the limitations of self-interest to channel their compassion into positive action, giving themselves freely for another. So it is with great pride and appreciation that I commend Reverend Heermans for his outstanding achievements and thank him for the vision he has shared with the entire community. I join all our mutual friends in wishing him Godspeed and many years of health and happiness, fully confident that his commitment to community involvement will continue long into retirement.●

FOREIGN ASSISTANCE APPROPRIATIONS ACT

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. HEFTEL. Mr. Speaker, this statement is intended to explain my "nay" vote on the conference report on H.R. 12931, the Foreign Assistance Appropriations Act. The conference report as reported back to the House included an additional $1,831,640,000 for U.S. participation in the Supplementary Financing Facility of the International Monetary Fund. This provision was added after the August 14 House consideration of the measure. It is my strong feeling that the Congress must better utilize and comprehend the consequences of IMF funding. A mechanism which serves to finance foreign imports to the United States may also threaten a facet of our domestic industry, a specific example of which is sugar. At the very moment that we are increasing the potential for foreign sugar, the President is threatening to veto a sugar bill which provides $0.16 per pound. That price is sorely needed for the continuation of much of the sugar beet industry of America, including but not limited to Louisiana and Idaho. It is unfortunate that the Foreign Assistance Appropriations Act includes funding for IMF as well as economic and military assistance programs and foreign military credit sales. Such measures must be categorized separately so that effective scrutiny and control may be exercised by the Congress.●

GOVERNMENT INTERFERENCE WILL NOT CURE OUR NATION'S ILLS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CRANE. Mr. Speaker, it has been said that commonsense in medicine is the master workman. Commonsense hardly dictates entrusting our health to the Government that brought us Amtrak and the Postal Service. The health care issue has been discussed in almost every Congress for the past 36 years. We have looked at experiments in other countries and in fact toyed with two programs of our own: medicare and medicaid. We have accused the AMA of a monopoly on health care; we have blamed the hospitals for rising costs. We have placed blame on every group and organization and yet left out the most obvious culprit: the Federal Government. Government intervention in health care has caused tremendous increases in taxes, an enormous bureaucracy to administer the regulations, fraud and abuse that grow yearly. Within the past 6 years Government expenditures in the health care field have doubled; protests about our present health care system have also risen. It seems an analogy can be drawn between the degree of Government intervention and amount of public complaint. We must not let Government gain more control of health care. Dr. Yuri H. Vassilier warns: "Government control of medicine begins with the removal of responsibility from both doctor and patient, bit by bit, chunk by chunk." We must keep ever present the fact that the real tragedy of socialized medicine is not in its material cost, however, but the cost in terms of human suffering. Government control of health care is not the answer.

The argument that Government has ignored the health of the American people is unfounded. Recent years have witnessed a steady rise in Government expenditures for health in this country. Expenditures for health purposes in the United States in fiscal year 1977 were almost $163 billion. This doubles that of the previous 6 years and represents a per capita outlay of $737 for every man, woman, and child. The Government share of the national health bill has increased substantially over the past 10 years: from 24.5 percent to the present level of 42.2 percent of the total. This growth of Federal control over the practice of medicine has augmented the already bloated Federal budget and created a need for more bureaucracy. We find ourselves today trying to regulate the regulators. For hospitals, regulatory actions alone account for 25 percent of their costs. A new study by the Hospital Association of New York shows regulatory efforts cost $1 billion per year as a consequence of their 164 regulatory agencies. These immense regulatory bureaucracies cannot help but duplicate one another; what has been created is a massive tangle of Government preoccupied with administrative redtape rather than provision of health care.

To a large extent, medicare and medicaid demonstrate only a fraction of what Government control and bureaucratic inefficiency can do to the health care system. Abuse, fraud, and waste in medicare medicaid amounted to $4.5 billion. This astronomical sum is a direct result of Government attempts to control health care. If we had a comprehensive program, $4.5 billion would become petty cash. Such amounts of waste are unimaginable.

No one would presume to suggest that our present health care system is perfect. There is no perfect system anywhere. Increasingly, however, Americans are doubting the benefits of Federal controls on any aspect of the health care field. The National Opinion Poll recently had an enlightening report on the issue of Federal controls of hospital costs. Even though hospital costs have been rising at a rate of 14 percent per year, 63 percent of voters polled thought Federal controls were not the answer. Interestingly enough, blue collar workers, those over 50, and those in lower income groups all said "no" by large percentages. The fact is, those groups at which national health insurance is aimed did not favor Government intervention to deal with rising hospital costs.

As if problems with our own medicare/medicaid programs were not sufficient to convince proponents of national health insurance of its chaotic consequences, we may look at national health insurance programs in other countries. Australia, Britain, Canada, Russia and Sweden are all striking examples of the failures of socialized medicine. Dr. William D. Rossen returned to the United States after a 6-day factfinding tour in Britain and stated: "The British National Health Service is a bankrupt disaster." His findings make evident the ugly fact that in Britain the public is not being served by the physician. For every practicing doctor there are 1.8 administrators. Ultimately, policy determination is administered by the Secretary of State; party line is followed for political reasons. Medicine manipulated through politics at best results in ineffective, unrealistic planning. Thus, there appears to be a struggle between the Government, the public, and the doctors. In Britain the general practitioners outnumber the specialists three to one. The GP has a list of patients to whom he must be accessible 24 hours per day, 365 days per year. If he wishes to be exempted from nighttime calls he must pay for the service at $4,000 per year.

The average doctor has an income of between $12,000 and $16,000 per year before taxes. To make that amount of money he must see 21 patients per hour, 80 patients per day, plus 8 house calls. Thus the British physician is paid on the basis of quantity of patients not

quality of service. There is consequently no consumer control. The condition of British hospitals is similarly tragic. Massive inefficiency is the character of the system and there are manifold examples of waste and abuse. The inflation fires are stoked; poor planning results in the decline of quality care; between 400 and 500 British trained physicians leave Britain each year; taxes continue to soar; and waiting lines for care grow progressively longer. Meanwhile, administrators play politics with the health of a nation on the threshold of economic collapse.

Today, the same people who described the British National Health Service as the "envy of the world", carefully steer their remarks away from Britain and toward Canada. Canada has become the fashionable example. The consistent problem throughout the health care plans is one of cost controls. Canada has been unable to curb the growth of medical expenditures. In fact, health care spending has grown faster in Canada than in the United States: From 1960 to 1975 health expenses in Canada increased 425%, while in the United States they increased 325%. Similarly, doctor's bills in Canada rose 71% while those in the United States rose 65%. As in Britain, large numbers of disconsolate physicians are leaving their country. "Free" services have resulted in the overutilization of hospital care and thus the waiting time for care increases. An analysis by the University of California at Los Angeles indicates that although the low-income groups do get more health care, they pay for it eventually in cutbacks in other welfare programs.

When looking at the problem of health care today we tend to fall prey to emotional arguments such as "equal care for all" and "medical care is a right that should be provided by the Government." We tend to lose sight of the complex realities of Government intervention in a health care program. How much will it cost? Where will the money come from? What will we get for the money? These are the questions that must be faced, and when examined, an effective program becomes more of a myth than a possibility. We must not be propelled into chaos by experimenting with programs proven ineffective in other countries. The philosophical implications for a free society are also grave. We cannot in any sense afford more Government intervention. We must determine to remain a free society, unburdened by confiscatory taxation and overregulation. All of the evidence demonstrates that Government health care is an idea whose time has passed.●

SUPPORT NEEDED

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WEISS. Mr. Speaker, I am today joining my colleagues from Wisconsin and Illinois, Mr. CORNELL and Mr. SIMON, in introducing legislation to provide the President with standby authority to institute wage and price controls, including restraints on interest rates, dividends and similar transfers.

The ravages of inflation must be halted now. Every sector of the economy is being damaged by an overall inflation rate that has exceeded 6 percent for each of the past few years. Food and health costs are soaring, with prices for other goods and services continuing to spiral as well. As the purchasing power of the dollar declines, people with low, moderate and fixed incomes suffer most.

The American people are demanding relief from runaway inflation, and the President has indicated that he will soon propose a voluntary wage and price standard program. I applaud this step, but it is unlikely to be sufficient to prevent a new surge of double-digit inflation.

For any voluntary program to be effective, there must be a strong option available for enforcing the guidelines. If Congress grants the President this standby authorization, his ability to encourage voluntary economic restraints will be measurably enhanced. Hopefully the President will never need to impose the controls created by this legislation, but it is essential that they be at his disposal should the need arise.

I urge my colleagues to join me in supporting legislation which will signal our willingness to attack inflation head-on.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Economic Stabilization Act of 1978".

PRESIDENTIAL AUTHORITY

SEC. 2. The President is authorized to issue such orders and regulations as he may deem appropriate to stabilize prices, rents, wages, and salaries at levels not less than those prevailing on October 1, 1978, and to stabilize interest rates and corporate dividends and similar transfers at levels consistent with orderly economic growth. Such orders and regulations may provide for the making of such adjustments as may be necessary to prevent gross inequities.

DELEGATION

SEC. 3. The President may delegate the performance of any function under this Act to such officers, departments, and agencies of the United States as he may deem appropriate.

PENALTY

SEC. 4. Whoever willfully violates any order or regulation under this Act shall be fined not more than $10,000.

INJUNCTIONS

SEC. 5. Whenever it appears to any agency of the United States, authorized by the President to exercise the authority contained in this section to enforce orders and regulations issued under this Act, that any person has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of any regulation or order under this Act, it may in its discretion bring an action, in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. Upon application of the agency, any such court may also issue mandatory injunctions commanding any person to comply with any regulation or order under this Act.

EXPLANATION

SEC. 6. The authority to issue and enforce orders and regulations under this Act expires at midnight September 30, 1981, but such expiration shall not affect any proceeding under section 4 for a violation of any such order or regulation, or for the punishment for contempt committed in the violation of any injunction issued under section 5, committed prior to October 1, 1981.●

NEIGHBORHOOD DECAY SOLVED IN TROY, N.Y.

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTISON of New York. Mr. Speaker, over the past few weeks, we have been working very hard to complete work on authorizations and appropriations aimed at helping solve some of the Nation's serious problems. In a very few days, when we adjourn, we will be able to spend time visiting and examining programs in our districts made possible by previously enacted bills. We will be looking first hand at local programs and talking face to face with the local people who make them successful.

Before my colleagues return to the neighborhoods and cities in their districts, I would like to share with them the story of Troy, N.Y., the largest city in my district, which is creatively solving some of the serious problems of neighborhood decay. Through a combination of skillful leadership, widespread community involvement, and the use of Federal community development funds, one Troy neighborhood has been largely rehabilitated. This program could well be a model for other communities wishing to involve citizens in problem solving and to stretch Federal dollars as far as they can.

I would like to insert in the RECORD an article from a recent Journal of Housing describing this successful neighborhood renewal program.

The article follows:

CITIZEN INVOLVEMENT RESULTS IN SUCCESSFUL REHABILITATION OF A TROY, NEW YORK, NEIGHBORHOOD

(By Duncan Barrett and Chandler Harrison Stevens)

A traditional neighborhood improvement program has been carried out with community development funds in Troy, New York, but the program was unique because of its thorough involvement of neighborhood residents in the planning and implementation stages. That citizen involvement is credited with stimulating almost a half million dollars in private reinvestment in the low- and moderate-income neighborhood, which consists of two- and three-family brick rowhouses built shortly after the Civil War.

Results in the neighborhood are concrete. After a three-year program that involved a total of $486,000 of community development funds, the area has turned around. A total of 163 of the 255 structures there have been repaired and brought up to code standards. The city has demolished unsound buildings, cleaned up vacant lots and beautified the

streetscape, improved two existing city-owned playgrounds, repaved streets, improved water and sewer lines, and installed additional street lighting. In addition, the city used $148,000 of its $486,000 to defray the cost of home repairs to homeowners, effectively reducing the interest rate on home improvement loans to about 6 percent. This $148,000 leveraged nearly $500,000 in private investment in the neighborhood. The grants to homeowners under this program averaged about $1,000 per structure, going to 141 homeowners (slightly more than 20 homeowners were not interested in the grants).

The three-year project, which is nearing the completion stage, involves several firsts. It was the first neighborhood rehabilitation program for the city of Troy (previous redevelopment or rehabilitation projects centered around the central business district). It prompted the first agreement with the four savings banks in Troy to provide loans for inner city reinvestment: the four banks agreed to reserve 1 million dollars for the project. And its success has prompted three other neighborhood projects in the city. Finally, the project's success was achieved without causing displacement.

The neighborhood began to decline after World War II as middle-income residents moved to the suburbs. Then, in the 1950s, a road-building project threatened to clear part of the area. Some clearance did occur and continuing uncertainty over the road project in the ensuing years caused disinvestment in the remaining housing stock.

By 1975, when project planning began, only 54 percent of the neighborhood's 265 structures were owner-occupied. A slightly higher percentage of the structures—55 percent—had serious code violations. Median annual income in the area was $7800, according to the 1970 census. The population was racially mixed but predominantly white. Of the 255 buildings in the area, 18 were vacant and abandoned. There were 44 small parcels of vacant land, mostly city-owned and unkept.

The area was chosen for Troy's first neighborhood revitalization project funded with CD monies. The decision was based on need and the probability of success, as argued by the original advocate for the program, the Troy Rehabilitation and Improvement Program (TRIP), a nonprofit housing rehabilitation organization. TRIP and the city planner recognized the need for an extensive redevelopment effort.

PROGRAM APPROACH

The development program approach chosen was a traditional neighborhood improvement program. Program components include incentive grants for home improvements, code inspections and enforcement, capital improvements, technical assistance to property-owners, and citizen participation.

It was the citizen participation component that was unique. It called for the community to develop not only a long-term redevelopment plan but also a structure and process for implementing and updating that plan.

It was clear from an examination of the existing conditions in the project area that redevelopment and not simply stabilization was required. The actual format for that redevelopment, however, was unclear. It was clear only that the redevelopment effort should lead to a neighborhood that was sound, stable, and self-sufficient. That sound residential neighborhood was defined as one in which (1) the housing meets code standards; (2) the area is perceived internally and externally as a good place to live; (3) land uses are consistent with and supportive of residential use; and (4) housing quality is maintained through private investment and no extraordinary public services or investment are required to maintain stability.

Both TRIP and the city planner believed that a sound and self-sufficient neighborhood could result only if neighborhood residents took some initiative to turn the neighborhood around. The redevelopment plan had to start with the citizen participation plan but there wasn't even an active neighborhood association.

TRIP sought and received a grant from the New York Council on the Arts, architecture and environmental arts section, to design and sponsor a series of workshops in the neighborhood on community design. TRIP contracted with Participation Systems, Inc., a citizen involvement consulting firm from Winchester, Massachusetts, to design the workshop series. The workshops were intended to lead to a redevelopment plan and ongoing neighborhood association.

THE INVOLVEMENT EFFORT

The scenario developed by PSI and TRIP called for a traditional three-step process: (1) problem identification; (2) potential solution identification; and (3) the choice of the best solution. Each step had a series of activities, including outreach, feedback, workshop, and product. Because it was the sponsor's intent that the community attain "ownership" of the process and any products through origination and continuation of the project, flexibility was required and an exact timetable and series of steps could not be projected.

We did, however, prepare a scenario that depicted the probable flow of events and a management plan that defined the process-management principles to which the staff would adhere. The projected scenario focussed as much on what should go on before and after each of three workshops as it did on the workshops themselves. We called these before-and-after process components "outreach steps," in order to emphasize that the overall process should be seen as a series of concentric circles of involvement rippling out into the community. The workshops served only as denser nodes in a planning process that otherwise had to reach out into the community.

During both the outreach steps and the workshops, emphasis was on interaction rather than on the type of one-way information flow that is so often associated with public relations or educational aspects of the centralized planning processes. In fact, the feedback associated with each of the outreach steps provided content for the agenda and also participants for the workshop to follow. At each workshop those in attendance saw their main purpose to be making the next outreach step penetrate deeper into the neighborhood. As the scenario (see page 358) unfolded, TRIP and PSI became less important since the script was being developed not by manipulated "actors" but by self-motivated residents. These participants were largely volunteers rather than recruits as is so often the case in citizen participation processes.

Our schedule was defined by the city's community development program timetable. Everyone agreed that the public works should start in the spring of 1976. It was important, then, that the workshops be held during the winter and spring of that year so that the conclusions of those workshops could guide the public works. The city demonstrated great flexibility in holding off on finalizing plans for public works until the last possible day in order to allow community input.

TECHNIQUES APPLIED

A management team was formed that included the TRIP staff, a newly hired outreach worker/community organizer for the project, and Participation Systems, Inc. In February, the first outreach step began. In addition to knocking on doors, a series of mini-workshops was held to explain the intent of the three main workshops and of the NIP and to begin to solicit help in identifying problems. As a follow-up to this outreach step, tape recordings were made of several residents voicing their complaints about and aspirations for the neighborhood. A synchronized slide show was prepared, documenting the tape-recorded problem statements, and the slide show and tapes were used as the opening of Workshop 1.

After about six weeks of outreach, Workshop 1 was held on a Saturday afternoon in the hall of a church near the center of the neighborhood. Attendance was modest—only about 25 of the nearly 300 adults residing in the neighborhood—but the spirit and enthusiasm of the participants made for an exciting afternoon.

The slide show and taped neighborhood interviews, as well as related posters, quickly established a context for the workshop. Then the workshop began with a brainstorming session to list problems. We broke the workshop participants into three small groups, each of which keep a record of its suggestions. The recorder for each group kept notes on a large sheet of easel paper, which served two purposes. First, everyone in each group could be sure of just what ideas were being recorded. Second, when the groups reassembled, the larger workshop could easily focus upon each group's list as the list was explained by a group's recorder. The groups reviewed each other's brainstorming lists then prioritized the results by voting.

When time allowed, workshops could split into small groups a second time to conduct even more specialized discussions. Each of these specialized groups then would focus upon one of the most important problems as identified by the workshop as a whole.

Our scenario called for such specialized discussions to take place at Workshop 2 several weeks later. In the meantime, through Outreach Step 2, people who attended Workshop 1 were to take their neighborhood concerns back to their neighbors, some of whom would then become involved in Workshop 2.

In a matter of a week or so, attendees at the first workshop and a few of their friends were given assistance in structuring their neighborhood outreach efforts. They were given a feedback ballot containing questions derived from the results of the first workshop.

This questionnaire looked a bit like an opinion poll. But its structure was different, as was its purpose, which was to involve citizens not just in planning but in implementation as well. The questions were designed to stimulate thought and discussion about neighborhood revitalization.

The questionnaire (see page 357) contained 10 questions to probe how individuals felt about the neighborhood. Each of these questions contained seven alternative answers, four of which were written by us while the remainder gave the respondent a chance to write his own answer. The 10 "issue" questions were based upon the citizen brainstorming that had taken place at the first workshop.

Our feedback questionnaire was not intended to be an opinion poll or a referendum but rather an involvement technique. That is why the final question asked respondents to identify themselves. This type of information can lead to development of a talent bank that the neighborhood could use when forming various types of task forces.

AN OPEN PROCESS

If the overall involvement process is viewed as open by those involved, then the results of the process are likely to be accepted by the neighborhood as a whole. Success is not determined by the number involved but by the depth and effectiveness of involvement.

The second workshop was based on the conclusions of the first and a tally of the issue questionnaires. It focussed on the problems identified: (1) recreation facilities; (2) housing conditions; (3) traffic; (4) people helping people; (5) streetscape and beautification; and (6) youth recreation.

The workshop was held late in the spring of 1976. The 40 participants reviewed the

conclusions of the first workshop. Then they broke into six smaller groups to discuss the six specific problem areas. Each of the six subgroups had a predetermined discussion leader/expert. The subgroups reviewed their problem and prepared a shopping list of solutions. In each case, it was clear to the subgroup that it needed to gather more information and solicit the opinions of the neighborhood before reaching a conclusion.

Each subgroup, except the "people helping people" group, formed itself into a task force to develop a solution for its problem area. Each reported back to the reassembled gathering and a decision then was reached to form a neighborhood association. A temporary chairperson was election and the group named itself the Hillside NIP Association.

The task forces—now committees of the neighborhood association—met regularly, often weekly, over the next three months. By this point, neighborhood association activities were so frequent that TRIP and PSI could not keep up with them and became observers rather than initiators.

Two of the task forces—recreation and traffic—conducted specialized feedback questionnaires to solicit more input and participation in their deliberations. The housing task force immediately identified a city procedural problem: ineffective and often belligerent code enforcement. The task force organized a neighborhood meeting with the city administration. Over 150 people attended, vehemently attacking enforcement procedures. The meeting led to a change in procedures and, more importantly, to a more formal structuring of the relationship between the city and the new neighborhood association. The city agreed to seek association review on NIP policy and procedures.

Each task force developed a recommended course of action for its area of concern. At the staff's suggestion, these recommendations took the form of a five-year goal, a program policy statement, and a description of activities out during the coming year.

THE FINAL RESULT

The third workshop was a forum for each task force to present its recommendations. The workshop was again held at the church hall, where the street grid of the neighborhood had been laid out with tape. Chairs were set up within each "block" and people were asked to sit where they "lived."

The meeting was a systematic presentation of each task force report. Since each task force report consisted of a goal and policy statement, the reports were debated from that perspective. The debates were spirited and block as well as neighborhood interests emerged which was the purpose of seating people according to the blocks in which they lived. In the end, each task force report was presented in the form of a motion to adopt as policy. All were amended in varying degrees and passed.

This adopted policy became the foundation of the redevelopment plan. The policy was goal-oriented enough that the city expanded the amount of CD funds available from a start-up level to an operating level.

Much grew out of this community-based planning effort. The association is an ongoing, respected organization. For example, it was effective enough to secure three years of CD funding—enough to complete the neighborhood project. It also has proven to be a model for other neighborhood organizations in areas where projects are just beginning.

But the most exciting activities have been self-help actions outside the CD effort. The association sponsors an annual "war on trash" day as a spring clean-up program. Thirty cubic yards of trash were cleaned from the streets the first year. Also, a committee from the association is responsible for picking up trash in the two improved public playgrounds and on the vacant lots in the area. Also, the association is responsible for transforming a graffiti-strewn retaining wall at one of the playgrounds into a mural. Area teenagers designed and painted the six-section mural, which, to date, is unmarred by graffiti.

TRIP, the original advocate for the neighborhood improvement program, became the administrator of the program under a contract with the city. The citizen involvement process that led to the redevelopment plan and the neighborhood association not only stimulated self-help activities but also solved some administrative problems such as the strategy to quickly create a reinvestment atmosphere. The involvement of the residents cannot be overstated. They, and they alone, are responsible, for example, for recruiting new owners for abandoned buildings. After conventional advertising methods failed, the members of the association began talking up the neighborhood to friends and relatives. Of the 10 buildings that can be rehabilitated, the association has found new owners for six. The city already has demolished eight buildings that were unsound. If owners cannot be found for the four remaining abandoned structures, these also may be demolished.

Further, the association has been effective at exerting pressure where the city and TRIP couldn't. Peer pressure has led to several facade restorations where no public enforcement effort could have succeeded. Public discussion on redlining by the association also is believed to have hastened the adoption of an affirmative lending policy by local savings banks.

Probably most significant, because of its long-term implications, is the reinvestment that has occurred. With a leveraging ratio of five private dollars to every one public dollar in a low- and moderate-income neighborhood, we can conclude only that reinvestment has occurred because the residents believe in the future of their neighborhood. They see it as a good place to live and want to make their long-term homes there. This is the most encouraging result of the citizen involvement effort.●

ICBM SURVIVABILITY AND SALT: THE NEED FOR AN EARLY DECISION ON THE MX

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. KEMP. Mr. Speaker, in 1972, the United States embarked upon a diplomatic experiment of great potential significance—the negotiated limitation of strategic nuclear delivery system deployments with the Soviet Union. This experiment was both hesitant and hedged. It did not include all strategic delivery systems, nor was the agreement expected to endure in its 1972 form; a 5-year limitation on the terms of the 1972 agreement was provided with respect to the executive agreement covering strategic offensive delivery systems. The purpose of the interim offensive agreement was to "freeze" the number of strategic delivery vehicle deployments at approximately their 1972 levels to provide a suitable environment to permit subsequent negotiation of "permanent" limitations.

Regrettably, the expectations which arose during the euphoria of June 1972 have given way to the sobering reality of 1978. While the United States has not added a single new strategic system to its inventory since the deployment of the Minuteman III and Poseidon submarine launched ballistic missile systems in 1970, the Soviet Union has been able to substantially modernize every element of its strategic forces within the scope of the 1972 agreement—except ABM's which were, of course, constrained by treaty; adding not only five new strategic ballistic missile systems and a new strategic bomber, but more than doubled their number of deployed reentry vehicles, most of which are capable of destroying hardened missile silos. Moreover, the Soviet R. & D. community has "caught up" with the U.S. qualitative advantage in deployed ballistic missile delivery accuracy with the latest versions of their advanced ICBM's (the SS–18 mod 4 and the SS–19 mod 3). As a consequence, the United States faces the likelihood that a far greater number of RV's will be deployed on Soviet ballistic missiles, both in their land- and sea-based modes than was anticipated when the Congress ratified the first round SALT accords in 1972. Thus, U.S. forces whose location is known—for example, silo-based ICBM's and bomber aircraft escape areas—will inexorably become vulnerable to destruction as the Soviet modernization program, begun in 1973, nears completion.

The element of U.S. strategic forces most affected by these developments is the U.S. land-based ICBM force. Although the land based force contains only 30 percent of the equivalent megatonnage in the U.S. strategic arsenal, it contains approximately 70 percent of the equivalent megatonnage in U.S. forces which are on a day-to-day alert, the forces available for early and reliable retaliation in the event of a Soviet first strike. The potential consequences of such an eventuality are both dangerous and well understood, so I will not discuss them in great detail here. Suffice to say, that the incipient vulnerability of the ICBM force will gravely risk the diminution of the probability of survival of the remaining elements of U.S. strategic forces by permitting the Soviets to direct their vast defense investment to anti-submarine warfare, depressed trajectory missiles, and anti-aircraft defense to diminish the survivability and/or effectiveness of the SSBN, bomber, and cruise missile forces which remain.

The United States has had an active development program for several years, the advanced ICBM program, better known as MX—to provide for a less vulnerable ICBM system to offset the post-SALT I build-up of Soviet ICBM warheads. As presently paced, the initial operating capability (IOC) would not occur until fiscal year 1986, and full operational capability might not be available until as late as 1991. The pace of this program was appropriate to the expectations generated in 1972, but the unanticipated rate of improvement in Soviet strategic forces and the subsequent reduction in the survivability of U.S. strategic forces clearly makes a faster pace necessary.

The need for a faster pace is evident due to the fact that the threat to the Minuteman force—already threatening 30 percent of the force, will grow to 80

percent as early as 1983. Thus, the United States will be compelled to face the military and diplomatic consequences of 3 to 8 years of acute vulnerability to a Soviet attack on its land based ICBM's. I have, as a member of the Subcommittee on Defense of the Committee on Appropriations investigated the technical, economic, and bureaucratic feasibility of a 3-year acceleration in the deployment schedule of a survivable ICBM to forestall the prospect of the United States having to "live"—or perhaps die—with the dangerous and uncharted world of acute ICBM vulnerability.

The primary scientific advisory body to the Secretary of Defense, the Defense Science Board, has completed an exhaustive series of studies of the design and feasibility of the properties of both a survivable basing mode and a follow-on missile to the 1960's vintage Minuteman III. Parallel studies have been carried out by the primary U.S. Air Force scientific advisory body, the Scientific Advisory Board as well. The result of these studies is a consensus that a multiple aim point system of 4,000 to 5,000 vertical shelters to house 200 to 250 randomly deployed ICBM's is both technically and economically feasible. The design of a new ICBM would permit its use by both land- and sea-based forces.

It is both technically and economically feasible to initiate full-scale development of both the multiple aim point (MAP) basing and the new 82-inch-diameter MX missile in fiscal year 1979 that could result in deployment of 1,000 aim points by December 31, 1984.

Full operation capability (FOC) of the system of 4,000 aim points could be achieved by fiscal year 1986, at least 3, and perhaps as much as 5 years ahead of current planning.

There is ample time—given suitable support by the President—to resolve bureaucratic obstacles within the U.S. Government such as land transfer from one Federal agency to another, et cetera.

To carry out such an acceleration of the survivable ICBM deployment schedule, a supplementary authorization and appropriation for fiscal year 1979 is required of approximately $200 million. The early decision to begin MX/MAP deployment that would be compatible with such a budgetary request would have a salutary impact on both the U.S. defense and diplomatic postures.

The sine qua non of a successful conclusion of SALT is a situation where neither the United States or the Soviet Union will have an incentive to strike first in an intense political crisis. Should the ICBM force be perceived as vulnerable, the United States will inevitably be pushed to adopt a less stable defense posture—some variant of a launch-on-warning policy, a policy which could increase the risk of nuclear war. An early MX/MAP full scale development decision as well as a commitment to deploy will resolve the doubts which have emerged about the survivability of U.S. strategic forces.

Second, an early decision by the President moving toward an accelerated IOC for MX/MAP will have a favorable impact on the course of the Soviet strategic buildup by undermining the rationale for their focus on ICBM-based hard-target killers. Once the Soviets are convinced that the President is determined to deprive them of the focus of their investment—destroying Minuteman on a first-strike, it will be possible to discuss reductions in strategic delivery systems in subsequent strategic arms limitation negotiations.

Third, a determination by the President to go forward with an early IOC for MX/MAP will have a beneficial impact on their perception of the resolve of U.S. defense policy replacing the apparent sluggishness in the U.S. response to the Soviet buildup.

The ability of the United States to accelerate the development and subsequent deployment of a survivable ICBM is one of the most compelling attributes of American power. The present circumstances provide the United States to exercise one of its strengths for the benefit of both its arms control and defense policy objectives, the opportunity should not be lost.●

LEON DESPRES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SIMON. Mr. Speaker, through the years Illinois has been fortunate to have a variety of leaders, sometimes political mavericks, sometimes business and labor leaders, people whose contributions have varied with the circumstances.

Recently the Chicago Sun-Times printed an article by M. W. Newman about one of the finest Illinois leaders I have known in my years on the Illinois political scene, Leon Despres, former alderman in the city of Chicago.

Like his predecessor from the Fifth Ward in Chicago, Senator Paul H. Douglas, Leon Despres was often a lonely voice in the Chicago City Council. But he was always a respected voice.

Life is strange in its twists and turns, and I have often thought that if circumstances had been slightly different Leon Despres would have followed his predecessor, Paul Douglas, into the U.S. Senate and would have become one of the great Members of that body. The fact that the political fortunes did not fall in that way is the Nation's loss, but gain for Chicago.

In any event, I hope some of my colleagues will read this story about a politician with integrity, heart, brains, commonsense, and a certain spark that set him apart.

LEON DESPRES

At age 70, Hyde Park's Leon M. Despres surely is entitled to leap off his bicycle and look back, but you'll forgive him if he doesn't. He's too lively—to young, really. You can find him every workday in suitable weather, wheeling from his 56th Street townhouse to his Loop law office. He whips along the tree-dotted lakefront he has fought so hard to preserve, and says jauntily: "The bicycle path is magnificent. Not an interruption during a 40-minute ride."

As always, Despres is busy being himself, the ultimate Hyde Parker—brisk, assured, cultivated. He has thrived on riding into the civic arena to battle and bleed for independent ideas.

Despres spent 20 slashing years as a Chicago alderman during the heights and depths of the Daley years, fighting City Hall—often by himself. It was the party machine's golden age, in more ways than one. He was the egghead who turned out to be hard-boiled—the thundering voice of Hyde Park and just about everyone who cared to dissent.

A Phi Beta Kappa with street savvy, he outtalked, frequently outfoxed and generally outbaited his fellow aldermen in an epic guerrilla war on corruption. They had the numbers, but often he had their number. ("Last week I saw him speechless for the first time in 20 years," Ald. Roman Pucinski once said triumphantly—for no one ever has seen Pucinski speechless.)

But Despres, although a world-class orator, was far more than that. He may well have been the outstanding alderman in our time—a deft battler and endless fount of proposals and resolutions. True, his ideas almost always were put on ice. He was the magnificent loser. But by that very reason he became the civic conscience of an era. In that sense he won, in the end.

Fortunately, he has a sardonic wit big enough to enjoy it all. He needed it. The machine had a way of burying or laundering his crusades—such as a fair-housing law and controls on lead-paint poisoning—only to later on revive some of them as its own.

"They borrowed my ideas and called me a lot of names," he concedes with a grin. Ald. Vito Marzullo publicly labeled poor old Len a "nitwit" (Despres' nickname is Len). Ald. Burton Natarus sorrowfully concluded that the problem was senility. Tom Keane, the council's high honcho, ticked him off as a "loudmouth," and Ald. Paul Wigoda detected the stigma of "an intellectual crook." Ald. Claude Holman called him everything under the sun in numerous grotesque shouting sprees.

And everybody yelled, "Shut up." Mike Royko once estimated that during Despres' City Council years, he was told to shut up more than 6,000 times. Even so, it didn't work.

Despres gave as good as he got, and was re-elected about as often as Mayor Richard J. Daley and usually by even bigger percentages. He managed the last word and the last guffaw rather frequently. Meanwhile, Keane and Wilgoda landed in prison, along with half a dozen other City Council statesmen busted for grab-bag politics during the Daley era. There eventually were so many greedy ex-aldermen confined in stone crocks that Despres can't remember their names.

And Daley himself, Despres' noblest target, has passed on. Their exchanges while the mayor presided over the council were sometimes epochal, sometimes not, but always worth a headline.

"You and your ilk are trying to tell us that you are being stepped on," Daley once huffed at Despres. "As long as I am mayor, no one will be stepped on. And that goes for you, too."

Despres: "I don't want you or anyone else to call me an ilk."

Daley: "I did not mean to call you an ilk. I meant to call you an elk."

Despres, elk-like, had a habit of horning his way down front to lecture His Honor personally. If the finger-wagging made Daley turn red, so much the better. "It's the only chance I get to talk to him," the alderman explained.

Len Despres obviously is an original. "He was Daley's Lucifer—and educator," says a veteran Chicago reporter. "Daley may even have enjoyed him—particularly since he had the votes, and surely didn't need Despres' vote."

Despres joined the council in 1955, the year Daley first was elected mayor. He stepped down in 1975, a year and a half before the mayor's death. The alderman came out of a tradition—the independent Democrat from the 5th Ward, centering on the University of Chicago. Among those who went before were Paul H. Douglas (later a U.S. senator), and young Robert E. Merriam.

Despres was born at 41st St. and Michigan, but settled into Hyde Park, for life, when he was 3. His father was a clothing manufacturer, a political populist who was named to the library board when Len was about 6.

"I always thought that was great," says Despres. He has been a lifelong fighter for freedom to read—including freedom from political interference with schools and libraries.

If you don't think that's significant, consider that in 1965 a Chicago City Council committee voted in favor of removing James Baldwin's novel, "Another Country," from required reading at Wright Junior College. The book deals in part with interracial sex and homosexuality, and really was a matter for the schools to decide.

But it was the heyday of Chicago book censorship and smut-hunting. Ald. John Hoellen, usually anti-administration, challenged Despres to spout passages from Baldwin's novel. The things that happened in the book didn't happen in his neighborhood, Hoellen said. Despres, not one to pass up a public joust, dared Hoellen to read aloud certain Bible passages.

"This resolution equates Chicago's Tammany with Moscow's Kremlin," Ald. Despres assured the world. Eventually Chicago's city fathers moved on to other matters.

Despres' own education included two years in Paris and Rome, but other than that it was all Hyde Park—Ray School, the U. of C. lab school, and the university itself, class of '27.

"When I was growing up," he recalls, "Hyde Park was much less densely populated than now. I could look out of my window and see fishing boats. Later the lakefront was filled in. And black people were restricted to three blocks on Lake Park Av. There was a young black man in my class and I considered myself lucky to be able to meet one."

Hyde Park-Kenwood now is possibly the most stable racially mixed community in the U.S., a change that Despres fully approves. Racial equality has been a major cause for him since his early days as a lawyer with a specialty in labor and civil-rights cases.

He surfaced politically in 1954, when the 5th Ward's crime-busting Ald. Bob Merriam decided to run for mayor. Merriam gave Daley his closest call ever—but first, he asked backers to find a successor to him. Despres was on the committee, and one day it met without him and tapped him for the job. It was a surprise, but he ran and defeated a Democratic regular. He rallied independents, university dons, some black and labor votes, and Republicans—quite a team.

So began the Despres years. By 1959 Daley and City Hall, egged on by U. of C. bigwigs, consented to an all-out fight to beat him. He had offended the powers-that-be by advocating poor people's housing in the elite renewal of Hyde Park-Kenwood.

Luckily for Despres, ward committeeman Barnet Hodes uncovered a groundswell demand for the candidacy of his nephew, Allen H. Dropkin, and yielded to it graciously. Despres was able to yell, "Bossism, nepotism, corruption." It was a terrific battle that split campus ranks, and the party. Despres came through, and after that the Democratic brass and he tacitly agreed to agree at election time. They never laid a glove on him in an election again.

Over the years, Despres was into an enormous number of issues, from elevator-door safety to architectural landmarks and CTA fare cuts for the elderly. Daley's overstuffed and under-explained budget always touched off the filibustering combat spirit of Despres and the little bloc of council dissidents.

Marshaling statistics, satire and apt passages from Shakespeare, Despres also zeroed in on aldermanic land profiteering and party patronage, police corruption and spying, treeslaughter and highway widening in lakefront parks, the proposed airport in the lake, and racism in innumerable forms ("the city's big problem—it distorts everything we do"). He honed a rampant style. "Chicago's Watergate" was the way he assailed council approval of taxicab fare increases. ("This is an Ehrlichman-Haldeman committee run by a small band of conspirators.")

He needled Daley to do more for the poor and hungry, and hammered for open government, public hearings, civic efficiency. And he ignored the jeers that sometimes rained from a stacked City Council gallery.

If he was the only dissenter to the stop-and-frisk ordinance, so be it. If he sometimes shouted and waved his hands to get the floor—all in vain—he took his lumps regularly. ("I hope insanity is not catching," Ald. Keane snapped at him.) When Mayor Daley grumbled about Seymour Simon's Bobby Kennedy hair spread and suggested that he see a barber, Depres proposed that the council forestry committee set standards "for the foliage of aldermen." He unloosed a barbed rejoinder to Daley's order that policemen "shoot to kill" arsonists: "The mayor has no right to change the penalty for a crime."

Those were the days, and nights. Some saw Despres as the eternal shrill obstructionist and nay-sayer. He considered his role to be "creative opposition." Actually, he voted with the majority on 9 out of every 10 routine items, but it was that 10th one that angered the party rubber stamps.

His formula for fighting City Hall was to punch, squeeze, cajole, push the issues and win the spotlight: "I make my point. Never get angry. Always leave room for the other side to have friendly feelings toward you." Well, almost always.

Was the battle worth it? These are bland times, when everything seems paved over. Despres acknowledges that the few remaining council independents face battles for survival, but has no regrets. He feels he helped Joe Citizen pierce Chicago's entrenched machine more than a little. And he looks ahead, to tomorrow's elections. He's an optimist by trade. Late in 1967 he was shot by street hoodlums near his home, but now brushes it off: "It could have happened anywhere."

These days Despres cultivates his own garden—one of his hobbies. Another is the Hyde Park Historical Society, for which he is working on a community map. He likes the new Hyde Park, although he finds it antiseptic and short on street life. "What it mostly needs is a good city around it," he says. In his law practice, he has interesting clients, such as Ed Sadlowski, the maverick Steelworkers Union leader.

Despres always has enjoyed traveling abroad with his wife Marian, a social psychologist and distinguished Chicagoan in her own right. One day he read an article about the Jews of the Lorraine district of France, and it led to a typical Despres fact-finding expedition—his own "Roots."

We knew that his family came from somewhere in that part of the world. So he wrote to the author of the article, and the trail led to an obscure village. Despres excitedly went through old records from the time of Napoleon, when Jews were ordered to adopt family names.

"I found the signature of my great-great-grandfather. Until then he had been known as Matthiah, son of Moses. The laws at that time limited Jews to a few trades such as peddling and horse trading. He had the good fortune to work for a man who was able to set up a textile factory. I learned a lot about him—but not why he chose the name of Despres."

No matter. Great-great-grandson Leon has made the name very well-known in Chicago in the time of Daley.—M. W. NEWMAN.●

WALTER KANER

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ADDABBO. Mr. Speaker, for the last quarter century, Queens County has been lucky enough to have in its midst a very distinguished person: Walter Kaner, newspaper columnist, broadcaster and concerned citizen, especially where handicapped children are concerned.

I have known and admired Walter Kaner for more years than I care to remember, and so it pleased me immensely when he was presented the Long Island Distinguished Leadership Award recently by the Long Island Business Review.

I could catalog Walter's many talents as well as his dedication to helping people unable to help themselves but I think that the award speaks for itself. Accordingly, I ask unanimous consent to insert the text of the award in the RECORD.

LONG ISLAND DISTINGUISHED LEADERSHIP PRESENTED TO WALTER KANER

Walter Kaner of Rego Park . . . widely read Long Island columnist for 25 years . . . veteran broadcaster . . . sensitive humanitarian with a loving concern for handicapped and underprivileged children . . . charity and community leader . . . dinner toastmaster . . . year long and distinguished record in the fields of journalism, philanthropy and community service merit the gratitude of all Long Islanders.

As a newspaper columnist for the past quarter century, for 23 years with the Long Island Press and now with the New York Daily News, you have reported on Long Island life with fairness, accuracy and integrity reflecting the highest standards of journalism.

Your popular and widely read column, in lively, interesting fashion, has reported on people, places and happenings on Long Island; performed outstanding public service; contributed to community life; and assisted hundreds of charitable, religious, fraternal, and business organizations on the Island.

Your concern, dedication and tireless efforts on behalf of homeless, handicapped and needy children over the past quarter century have earned you the respect and admiration of your fellow Long Islanders and justly won you awards of recognition and appreciation from more than 35 organizations.

Your annual Thanksgiving party for 750 children and your summer outing to Rockaways Playground for 500 children, along with your other parties, have become a LI tradition. You have brought laughter and joy to children in hospitals, orphanages and shelters; to children afflicted with crippling diseases; to underprivileged children.

Over the past 25 years you have entertained more than 57,000 children and deservedly won the praise of former President Nixon, former Vice President Rockefeller, Gov. Carey and former Mayors Lindsay and Beame.

A life-long LI resident, you have been deeply involved with its community life, giving unstintingly of your time and experience in serving as president, trustee or direc-

tor of many philanthropic, health and cultural organizations.

Since its first publication on Oct. 6, 1953, your column served as an important journalistic voice on LI. Your crisp, candid and witty style of writing has won you a legion of devoted readers who regularly turn to "Kaner's Column" to learn about the doings of their fellow Long Islanders.

Above and beyond news reporting, your column has reflected your personal concern and dedication to helping others by aiding worthy LI causes and campaigns and assisting community groups.

Your Sunday columns have made us laugh, and sometimes cry. You have brought laughter as you poke fun at our human foibles, and tears with sensitive writings that deeply touch all of us. Your Mother's Day column, which has been reprinted annually; your column, "Doesn't Anyone Care . . .?", about a LIGI killed in Vietnam; your column "And the Children Die", about starving children in Africa; and your column "I Saw Santa Claus Cry", about your children's parties; received deserved tribute by being reprinted in the "Congressional Record."

In keeping with your deeprooted concern for others, you have served as president of the Lifeline Center for Child Development, a Queens school for mentally ill children; and president of the Queens Chapter of the National Multiple Sclerosis Society. You have served as L.I. chairman of the Association for the Help of Retarded Children Telethon and Queens chairman of the United Cerebral Palsy Telethon.

Indicative of your community involvement you presently serve as a trustee of the Queens Museum and the Industrial Home for the Blind. You currently are also a director of the Samaritan Halfway Society, the Queens Speech and Hearing Center, the National Conference of Christians and Jews-Queens Region, the Queens Society for the Prevention of Cruelty to Children, the Muscular Dystrophy Assn.-Queens Chapter and the Queensboro Council for Social Welfare. Further, you are an Advisory Board member of the Association for the Help of Retarded Children-Nassau Chapter, and the Queens Boy Scouts Council; as well as an honorary director of the American Cancer Society-Queens Chapter.

In recognition of your efforts in behalf of children, four Borough Presidents have proclaimed "Walter Kaner Day" in Queens and you have been cited by Nassau County as well as Hempstead and Oyster Bay Towns for your humanitarian endeavors. You have been honored also for this work by a resolution passed by the N.Y. State Legislature.

You have been the recipient of many deserved honors including the Community Service Award of the Queens Bar Association, the Humanitarian of the Year Award of the N.Y. State Knights of Pythias, the Inter-Faith Award of the Queens Inter-Faith Clergy Council, the Man of the Year Awards of the Queens March of Dimes and the Queensboro Council for Social Welfare, and the Service to Children Award of the Brooklyn Diocese.

Following military duty with the 97th Infantry Division in Europe and the Pacific, you presented shows at veterans hospitals and aided veterans groups in your column which won you citations from the American Legion and the Jewish War Veterans. While stationed in Tokyo, you conducted a daily program over 18 Armed Forces radio stations in Japan and Korea and wrote a column for the Pacific edition of "Stars and Stripes," the G.I. newspaper.

Upon completion of military service, you resumed your broadcasting career as a Broadway-Hollywood commentator on WINS, interviewer on WMCA and disc jockey on several other New York City stations before your entry into journalism as a columnist.

Your distinguished 25 years of service as a LI newspaper columnist, your concern and efforts in behalf of homeless, handicapped and needy children, and your personal involvement and service to charitable and community organizations have won you the respect, affection and gratitude of all Long Island.

A REASONABLE APPROACH TO THE ENERGY BILL

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LaFALCE. Mr. Speaker, there have been many strident claims and counterclaims about the energy bill in general and the natural gas segment in particular. There have been claims that the compromise provisions of the natural gas section will bankrupt gas producers, and there have been counterclaims that it will bankrupt the American consumer. Amidst these obviously contradictory assertions, it is extraordinarily difficult to find that essential middle ground which is so necessary for calm and deliberate thought and the search for the inevitable, but yet the often productive, compromise.

The natural gas section of the energy bill is a compromise, and like all compromises it is not a polished gem. However, the Buffalo News in an editorial from its September 30, 1978 edition has weighed this compromise very carefully in light of the general energy crisis and has found it "certainly acceptable." I want to share this composed and reasoned analysis with all of my colleagues.

The editorial follows:

FINALLY, ACTION ON GAS BILL

Nobody claims it's perfect but the natural gas compromise now passed by the Senate is certainly acceptable. We hope the decisive 57–42 vote there foreshadows similar approval by the House.

In this world of limited oil supplies and America's own over-reliance on insecure foreign sources that could be cut off quickly, the energy crisis is still very real, and resolution of the natural gas dispute can contribute meaningfully to lessening its dangers.

What the compromise does is split the difference between those who want to continue existing, unrealistic price controls over natural gas and those who want to end price ceilings immediately. The proposed arrangement calls for a gradual lifting, through 1984, of controls over the price of newly discovered natural gas, with complete removal coming in 1985. Even then, it is estimated that gas prices will be lower than those for fuel oil. Thus, the federal Energy Department says oil imports will be shaved by 1.4 million barrels a day by the mid-80s.

The higher prices allowed, moreover, ought to spur producers to expand gas supplies. And these same higher prices should also encourage conservation by consumers.

A portion of the compromise is especially tailored to aid the Northeast. That is the extension of the price-control system to intrastate gas—gas sold in the same states, like Texas and Louisiana, where it is produced and where now-unregulated prices are higher. The change will diminish financial incentives of producers to withold their product from consumers in other states.

Finally, too, as the Carter administration has repeatedly emphasized, adoption of the natural gas bill will be read by foreign nations as a signal of America's determination to confront the energy crisis seriously.●

ILLINOIS LEADS IN BATTLE AGAINST REDLINING

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. HYDE. Mr. Speaker, the problem of "redlining" has plagued communities throughout our land. I am proud that my State, Illinois, has been a leader in combating this evil. Two articles worthy of my colleagues' consideration appeared in the Chicago Tribune of September 24, 1978:

ILLINOIS A LEADER IN BATTLE AGAINST INSURANCE REDLINING

(By Janet Key)

The insurance industry—companies and consumers alike—has been bedeviled by "redlining" charges for more than two years, but recent legislation, new reporting requirements for the companies, and changes in policies have made Illinois a leader in combating the problem.

One of those changes, which requires companies doing business in Illinois to report all cancellations, nonrenewals and new business by Zip Code, has even changed the perception of what "redlining" actually is and what it does.

Illinois is the only state that requires such Zip Code reporting—and one of only three in the country with an antiredlining law. That law, along with other legislation, prohibits insurance companies from refusing to write homeowners' insurance because of the geographic location or age of the property.

The companies also are prohibited from refusing business because a homeowner's agent had been terminated, or because he had been turned down by another company, or because he did not live in a particular agent's area.

The new reporting requirements have shown that redlining, defined by the Illinois Department of Insurance [IDI] as any discriminatory practice which makes getting homeowners' insurance more difficult or impossible because of a property's geographic location, is not the blanket practice it has commonly been assumed to be.

"Everyone" in the 22 areas identified by the Metropolitan Area Housing Alliance [MAHA] as those with the greatest insurance problems, is not being canceled or nonrenewed by insurance companies. For example, in South Austin, 785 of the 858 one- to four-unit dwellings insured were new or renewed between January and March and 73 were insured under the FAIR plan. Only 94 were canceled or nonrenewed.

But what those statistics—and state investigations—do show is that those 94 uninsured homes represent a grave problem that cannot be answered by the insurance industry's statistically accurate, traditional "We do not redline" response.

Cancellations and nonrenewals are not a wholesale, but a creeping problem. And they often are done, not in response to conditions in a riot-torn or blighted area, but in anticipation that an area will become blighted. As such, they can create a self-fulfilling prophesy for urban areas.

"Insurance is only one of a group of investment decisions made in urban areas," said Richard L. Mathias, director of the IDI. "But to the extent that any one investor loses confidence and begins to pull out, others will follow."

Increasingly, insurance companies are beginning to share that view. "I think everyone would have to agree that the problems of cities didn't start with insurance, but that it is a good part of the solution," said Fred J. Gasser, vice president and associate general counsel of Allstate Insurance Co.

This spring, Allstate launched one of the industry's most innovative efforts to become an active part of that solution with its Basic Homeowner's policy. Based on the actual cash value of a home, the new policy is designed for homeowners who were turned down, canceled or nonrenewed by the company because the cost of replacing their houses exceeded their market value by more than 150 per cent.

"We will still not insure substandard property," said David Murphy, Allstate's vice president of underwriting. "But environmental risks—the proverbial house next to the fireworks factory or the only home left standing in a burned-out block—can go into the FAIR plan and get homeowner's insurance there after December 1."

Because the policy limits are less, Murphy said the basic policy on a $40,000 home would cost about 10 per cent less than the company's Deluxe Homeowner policy.

By Sept. 1, Allstate had sold 423 of the new policies, the majority of them in Chicago. But following an agreement with MAHA, Allstate agents have been calling approximately 3,000 former policyholders to offer them the new policy—and the numbers are expected to increase dramatically.

"Between our basic policy and the homeowner's policy that will be available in the FAIR plan after Dec. 1, we think insurance availability will be greatly enhanced," said Murphy. "Hopefully, more companies will embrace this concept."

Some companies, such as State Farm and Fireman's Fund, are studying the idea but have not yet come to any conclusions. Others, such as United States Fidelity and Guaranty, recently have begun using a model basic policy put together by the Insurance Service Office [ISO], and advisory organization for the insurance industry. Aetna Casualty and Surety Co., Chicago's third largest personal lines [which also includes auto] insurer, uses a replacement cost endorsement clause in its standard policy. "It's definitely for the older homes," said Vincent T. Regan, general manager of the Chicago branch office.

"It allows us to insure a house for at least 100 per cent of its market or cash value and 50 per cent of its replacement cost," he said.

A model for similar replacement cost endorsement clauses has been drawn up by the ISO and is available to any insurance company that is affiliated with it.

But the changes in the FAIR plan are perhaps the broadest-ranging response to the needs of "changing" or "deteriorating" urban areas. Previously, the FAIR plan offered only fire and extended coverage to homeowners who were unable to get insurance in the voluntary market—there were no provisions for theft or liability coverage.

But on Dec. 1, the FAIR plan will include a basic homeowner's policy, based on either the actual cash value of the home or the cost of replacing it—thus taking policyholders out of the "less coverage for more money" rut.

"Older homes would probably be insured only for actual cash value," said Charles Cliggett, head of the Illinois FAIR plan. "The replacement cost provision is designed for newer homes or an inspected, rehabilitated home."

Other changes in the FAIR plan include initiating a system of installment payments, expanding the board to include four community members, and binding [putting the policy into effect] within one day of receiving the application.

The FAIR plan has also recommended that it again be allowed to inspect all dwellings before insuring them and that it be allowed to cancel a policy where arson is suspected within five days. The Department of Housing and Urban Development is expected to approve the inspections shortly, said Cliggett.

More changes will stem from the report of the Illinois Citizens Task Force on Homeowners Insurance Availability, a 15-member committee appointed in July by IDI director Mathias. The group, a cross-section of the insurance industry, community groups, the investment community, and independent agents, will report to Mathias Jan. 15.

"I think we've seen a definite failure of communication between consumers and insurance companies, and perhaps from our point of view as a regulator," said Mathias.

"The task force will try to define what's going on in the marketplace and then work on the problems," he said.

The task force is analyzing the FAIR plan, looking at new kinds of insurance policies for urban residents, studying new marketing efforts, and analyzing the need for new legislation to allow the IDI to review insurance rates.

Four public hearings are scheduled for October—three in Chicago—to allow community groups to spell out their problems and suggest remedies. Hearings for groups on the South Side will be held Oct. 3 at the Memorial Missionary Baptist Church, 1546 W. 87th St.; on the West Side Oct. 10 at the Resurrection Parish Hall, 5082 W. Jackson Blvd.; on the North side at Alphonsus Parish Hall, 1429 W. Wellington Ave.; and in East St. Louis Oct. 24.

REDLINING HOME POLICY VICIOUS CYCLE

(By Janet Key)

Joseph Simmons is explaining why he and his community group, Auburn Gresham Community Concerned Citizens, joined three others in the Metropolitan Area Housing Alliance's (MAHA) insurance coalition. He is getting angrier by the minute.

"I bought a 48-year-old house in 1970 and got a three-year Allstate policy for $55 a year," he said. "The next policy was $76 a year, but when it was renewed in 1976, I only got a one-year policy and for $126. In 1977, I had to pay $198—all for the same coverage."

But in Joe Simmons' neighborhood, Allstate paid out $1.69 in claims for every $1 it collected in premiums, not including underwriting expenses of about 28 cents for for each dollar.

To Allstate the issue is administrative—it is in business to generate profits for its stockholders and raising Simmons' rates was the only way it could begin to recoup on those kinds of losses.

Losses for the other three members of the MAHA coalition were equally high. In the Greater Roseland Organization's zip code, Allstate paid $2.40 in claims for every $1 it wrote in premiums, in Garfield Park $2.05 and in South Austin $1.84.

Yet the company continued to write in those zip codes, taking 26 per cent of the market in Greater Roseland, 26.5 per cent in South Austin, 19 per cent in Garfield Park, and 26.2 per cent in Auburn Gresham. To Allstate, the problem was simple—someone had to pay.

To Joe Simmons, the issue is more personal—he isn't getting any more coverage and his rates have increased astronomically. Neighbors had been forced by similar rates to drop their insurance altogether. Or they had been cancelled and forced into the industry-subsidized FAIR plan, where—for premiums that were sometimes double what they had paid companies like Allstate—they got only fire and extended coverage.

What that does to a neighborhood—and eventually to a whole urban area—has been documented carefully by the Illinois Department of Insurance (IDI) as well as the community groups. "Those kinds of premium increases can put you behind in your mortgage payments and then you get foreclosed," said Joy Williams, another Auburn-Gresham leader.

"Everything follows," said Lettye Bell, a leader of the Greater Roseland Organization. "When the foreclosures start, the homes are abandoned and boarded up. The next thing you know, your perfectly good house is surrounded by abandoned buildings—and you get a letter telling you that you've been cancelled or not renewed by your insurance company. It becomes a cycle."

It is a cycle with a vicious ripple effect throughout the Illinois insurance industry. Of about 400 companies writing in Illinois, only 12 write 83 per cent of the homeowners' business in Chicago—thus doing what many refer to as "the real red-lining."

"The problem is that urban areas or parts of urban areas shouldn't just be written off because of the loss ratio," said Philip R. O'Connor, special counsel for the IDI. "We're looking for viable ways for companies to write that business, not altruism."●

A VIGIL FOR DR. SEMYON GLUZMAN

HON. S. WILLIAM GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GREEN. Mr. Speaker, it is my privilege to join in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals under detention in the U.S.S.R. because of the Soviet Government's repressive emigration policies.

Regrettably, the Soviet Government has disregarded the human rights provisions of the Helsinki Final Act, signed by 35 nations in 1975. This act committed the signatories to pursue policies consistent with the basic principles of human rights, including religious freedom, free travel between countries, and the reunification of divided families whose members live in different countries.

I bring to the Members' attention today the case of Dr. Semyon Gluzman. Dr. Gluzman, 31, is a psychiatrist who was imprisoned in 1972 after refusing to obey an order from the KGB to classify certain dissidents as mentally ill, a designation which would have led to eventual imprisonment in the infamous Soviet mental hospitals. Together with fellow inmate Vladimir Bukovsky, Gluzman wrote a guide for fellow dissidents describing techniques to avoid being classified as psychotic by government psychiatrists and smuggled it to the outside world.

Until May 15, 1978, Dr. Gluzman was imprisoned at the Perm 36 Prison Camp; however, his present whereabouts are a mystery to everyone except the Soviet Government. Before his disappearance it was known that Dr. Gluzman's health was rapidly declining due to a combination of self-imposed hunger strikes in protest of the harsh treatment of fellow prisoners and his subsequent inhuman treatment by the prison guards.

Semyon Gluzman and his family wish to emigrate to Israel to join relatives living there. Along with 49 cosponsors, I have introduced House Joint Resolution 1097 which calls upon the Soviet Government to release Dr. Gluzman and permit him and his family to emigrate. It is my deep hope that this vigil for freedom will help him soon to be granted his freedom to realize the desire of him and his family to live together in Israel.●

A "RACIST" U.S. POLICY TOWARD THE RHODESIANS

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SIKES. Mr. Speaker, the U.S. policy toward Rhodesia is a very puzzling one. We insisted for many months that our quarrel with Rhodesia was the fact that they did not have a coalition or black majority government. Now they have such a government. A gradual transition toward black control in Rhodesia is underway. However, this did not change our policy of supporting the black terrorist leaders who are based outside Rhodesia. We should have been willing to give the new government a reasonable chance and to lend it support where policies indicated a sincere effort for change. Instead, we continue to court the black terrorist leaders, unmindful of the fact that they have raised armies which are armed and equipped by the Russians and trained by the Cubans under Russian supervision. Their mission now appears almost certain to result in a civil war and a takeover in Rhodesia, with the whites killed or driven out, many peaceable blacks killed, and a new Russian-dominated state in Africa.

One of the black terrorist leaders recently was received with open arms in this country as a visitor. When Ian Smith, the Rhodesian leader, sought to come to this country, the State Department resisted and the administration lagged for weeks before granting him permission. Since he has been in this country, equally as much attention has been shown to an opponent of the Rhodesian Government, even though that opponent speaks only for himself. Our treatment of the Prime Minister of Rhodesia is cavalier, to say the least.

The situation does not reflect credit upon the United States or our skill in diplomacy. William Safire, in a column in the Washington Star of Thursday, October 12, spells the problem out in very clear terms. We do not have much time if we are going to exercise a realistic policy to help prevent the destruction of a nation and the slaughter of thousands of its people, black and white. I submit Mr. Safire's statement for printing in the RECORD.

[From the Washington Star, Oct. 12, 1978]

A "RACIST" U.S. POLICY TOWARD THE RHODESIANS

(By William Safire)

If the word "racism" has any meaning, the Andrew Young-Jimmy Carter policy toward Rhodesia can only be defined as racist: its clear intent is to undermine the compromise reached by blacks and whites within that country, and to impose a rule by two black terrorist leaders determined to drive out the remaining whites.

By his recent praise of Mr. Young for "outspokenness" and by his agonized approval of the visa for Rhodesian leaders Smith and Ndabaningi Sithole to present their case in the U.S., President Carter has reaffirmed his preference for an all-black, anti-election dictatorship.

Why? Certainly no human rights case can be made for demanding that all Rhodesians submit to rule of the Marxist Mugabe and the terrorist Nkomo. That way lies the massacre of whites foolish enough to remain, and of all the blacks who mistakenly placed their faith in honest compromise, majority rule, and free elections.

The Carter-Young position is the ultimate in amoral pragmatism, based on pure defeatism: That the other black states in the area prefer the victory of the terrorists, that the terrorists will therefore win, and that the U.S. is better off being on the side of the ultimate winners.

Even if that assessment were accurate, the policy would be morally bankrupt.

If the outside world were to let the "internal settlement" work, goes the Carter-Young reasoning, the Cubans would soon move in on Rhodesia and we would be forced to watch them take over. Better the loss of a chance at liberty now for millions of black and white Africans, than a loss of face for the U.S. later when the Cubans move in.

Such defeatism should never be the basis of U.S. policy. The defeatists may also be wrong: if we are willing to allow the possibility that a pro-Western, free-election Rhodesia can exist, then our support of the black-white alliance within that nation could lead to its salvation. The West's prediction—and lifting of economic sanctions—could become a self-fulfilling prophesy.

The last-ditch plea now underway faces great odds. Not only must it counter the defeatists, who are legion, but some American civil-rights militants who insist that Rhodesian whites be punished for their history of discrimination. Defeatism at the State Department has combined with retribution in the minds of Andrew Young and the "get-even" brigade.

Does the internal settlement have a chance to win enough support in the U.S. to modify the Carter position? Will we give a fighting chance to the people of Rhodesia to have a form of government different from their "one man, one ruler" neighbors?

I think it's worth the effort to try. We have seen that Mr. Carter is educable in foreign affairs. Only a year ago, he was insisting on a "comprehensive" settlement in the Mideast, trying to bring Soviet pressure to bear on the Israelis at Geneva, and deriding Israeli pleas for a separate peace with Egypt first. When Israel and Egypt saw the folly of that Carter approach and went their own way, Mr. Carter swung around 180 degrees and was able to arrest his own political collapse by arranging for that separate peace.

The internal settlers of Rhodesia are not as strong as the Israelis, nor do they yet have support throughout the U.S. electorate. And they face a formidable, intractable opponent in Andrew Young, who has apparently convinced Mr. Carter that his black-bloc support hinges on the humiliation of all whites in Africa.

But Mr. Smith and his black partners are on the side of the right, and have the political right in the U.S. on their side. They are the only side ready to meet, ready to compromise, and ready to vote. Is Mr. Carter a big enough man to change his mind again?●

CRITICAL MASS 78: NATIONAL ANTINUCLEAR CONFERENCE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McDONALD. Mr. Speaker, Ralph Nader's Critical Mass Antinuclear Organization held its third national conference, October 6–8, 1978, at the Capitol Hilton in Washington, D.C. As at Nader's two previous Critical Mass meetings in 1974 and 1975, the estimated 1,000 participants were exposed to leading antinuclear activists who urged doing away with both peaceful and defense use of nuclear materials by tactics ranging from lobbying and litigation to mass demonstrations, civil disobedience, sabotage and terrorism. What was new, was that at Critical Mass 78, the chief advocate for sabotage and terrorism to stop nuclear powerplants, Samuel Holden Lovejoy of the Clamshell Alliance, was listed on the program as a leader of a workshop on organizing demonstrations, indicating Nader's continuing flirtation with extra-legal tactics against nuclear energy.

At Critical Mass 75, Lovejoy was not a scheduled workshop leader or "resource person," and Nader had indicated embarrassment at sitting on stage with Lovejoy while his calls for "direct action" against "nukes" were cheered, although he made no spoken protest and not walk out. Indeed, in an interview published in the Village Voice on April 4, 1977, Nader indicated no opposition to the argument for sabotage, saying:

> What the activists are trying to do is make new law based on the settled Anglo-Saxon tradition of self-defense that stretches back through Blackburn's commentaries. That is, if someone tries to break into your house you can retaliate lawfully. In the case of a nuclear reactor, the self-defense is projective. But what are you going to do, wait until radioactivity is all over the place?

Sabotage and violence has been Sam Lovejoy's constant theme since 1974, when he admitted he destroyed a $50,000 weather tower at a nuclear powerplant under construction near Montague, Mass. Following a week-long trial in which Lovejoy argued his action was a bizarre sort of "public service" and in which he was supported by a number of activists from the disarmament and anti-Vietnam movements who came to testify at his trial, Lovejoy was acquitted at the direction of the judge who ruled that Lovejoy's indictment was faulty—he had been charged with destroying "personal" instead of "real" property.

Lovejoy, like others in his Montague collective and organization called Nuclear Objectors for a Pure Environment (NOPE) a veteran of the Venceremos Brigade to Cuba, took that court decision as vindication of his sabotage tactic. He has repeatedly urged others to emulate him and has claimed to find ready acceptance of sabotage tactics among the members of the environmental and antinuclear groups. In an article published in the June 1976 issue of the newspaper of the People's Party,

Dr. Spock's Socialist organization, Lovejoy gave an account of his speech to an anti-nuclear power group in San Luis Obispo, Calif. Lovejoy wrote:

* * * first I suggested that a big demonstration and sit-in at the plant gates might stop the workers, or maybe a fuel shipment from entering * * *. Then I blurted out what was honest in my head, "If I lived here, and was afraid for the life of my community, and thus decided to stop the plant's operation (and yet I couldn't actually tamper with the nuclear machine itself), the only way was to make the machine useless by cutting the umbilical cord." * * * then almost the entire crowd was on its feet applauding!

* * * So there I was suggesting sabotage of the nukes' transmission lines (with a P.G. & E. [Pacific Gas and Electric] representative there!) and concerned citizens with little prior knowledge or experience in direct political action were enthusiastically responding.

In the February 9, 1978, issues of WIN magazine, founded by and closely associated with the War Resisters League (WRL), an allegedly pacifist group and which has supported revolutionary terrorist violence by the Weather Underground Organization, Karl Armstrong, the Vietcong and other organizations and individuals, Lovejoy discussed the implications for antinuclear activists of the "choice of evils" theory to justify "direct action" against nuclear power plants. Since a "choice of evils" defense against nuclear power requires an operating nuclear plant containing radioactive substances, Lovejoy again returned to his obsession with destroying power lines. He wrote:

Citizens could occupy (or even disrupt) the power lines * * *. There is no point running the factory if you can't deliver the goods—a shut down reactor is vastly more safe than one in operation.

Lovejoy exhibited his power line sabotage mania during the Critical Mass 78 conference. On Sunday morning, Lovejoy was a leader of a workshop on organizing demonstrations moderated by Kitty Tucker of the Supporters of Silkwood and active with the National Labor Task Force of the National Organization for Women (NOW). Afterwards, Lovejoy shifted from organizing massive sit-ins and occupations of nuclear facilities to destroying power lines as a likely way to "do something physical to stop the nuke."

Lovejoy described the campaign against a new, powerful electrical power line in Minnesota which he and Clamshell Alliance affiliates had supported. Lovejoy boasted that nearly $8 million in damages had been done to power lines in Minnesota during the past year and warned, "more of this is going to be happening around the country and throughout the world."

The Critical Mass 78 conference differed from its 1974 and 1975 predecessors in having a considerable number of representatives of foreign antinuclear movements present as program speakers and participants from countries including the Philippines, Australia, Brazil, Canada, France, and West Germany.

The 1978 conference also gave a markedly increased role to the disarmament and anti-intelligence coalitions which have ties to the Soviet bloc.

The demonstration organizing workshop, scheduled for the Capitol Hilton's Senate Room, was followed by a workshop, "Civil Liberties: Is Nuclear Power incompatible with a democratic society?" moderated by David Comey of Citizens for a Better Environment of Chicago. The leaders of the workshop/lecture were Donna Warnock, Syracuse Peace Council; and two veterans of the anti-intelligence lobby, Morton Halperin and John H. F. Shattuck.

Shattuck, a former coordinator of the Vietnam moratorium committee who has worked for the ACLU since his graduation from Yale Law School in 1970, former counsel for the Project on National Security and Civil Liberties, jointly operated by ACLU and Halperin's Center for National Security Studies, Shattuck denounced a proposed bill to prevent terrorists or unqualified persons from holding jobs in sensitive areas of the nuclear industry and suggested that an employee in a nuclear facility suspected of contact with terrorists might be "tortured."

Halperin, a supporter and contact of CIA defector Philip Agee, was wearing both his anti-intelligence lobby hats, representing the Center for National Security Studies (CNSS), which he now directs, and the Campaign to Stop Government Spying (CSGS), his grassroots pressure group. Halperin delivered a long attack on private utility companies for having security units to protect their property and nuclear facilities, on private security companies who provide guards to protect utility companies, and on police for telling utility companies when their property or their personnel may be the target of an attack.

Apparently Halperin thinks that private, profitmaking companies have no right to know about threats to their property, to their managers or employees and that if companies take precautionary measures, such as having extra security people in targeted area, they are being somehow "unfair" to terrorists and revolutionaries.

Halperin called on antinuclear activists to join with his "antisurveillance" campaign group. He encouraged them to seek ways to force public disclosure of corporate security activities, particularly the utilities. He suggested that the utilities be placed under various governmental regulations including a "freedom of information" type regulation that would require public disclosure of company personnel and security files to the persons or groups mentioned in them.

International antinuclear activists were featured in a workshop moderated by Terry Provance, former director of the Stop the B–1 Bomber Campaign of the American Friends Service Committee (AFSC) and the Coalition for a New Foreign and Military Policy (CNFMP). Since his participation in a 1976 disarmament conference run by the World Peace Council (WPC), an internationally active Communist propaganda front run by the KGB and the Soviet Communist Party Central Committee, Provance has taken an increasingly active international role in the international disarmament movement and serves as head of the international task force of the Mobilization for Survival (MFS).

Participants in the international workshop incidentally, "workshop" is a misnomer, "seminar" would be more appropriate—included Australian Helen Caldicott, a pediatrician and leader of the Mobilization for Survival, who delivered an impassioned call for U.S. unilateral nuclear disarmament as an "example" for the rest of the world. Dr. Caldicott provided an account of how she and others argued Australian trade unions into not transporting uranium ore so that it could not be refined or exported.

Another participant was Nicky Perlas of the Philippines Movement for Environment Prctection which shares an office address with the Center for Development Policy in Washington, D.C. Perlas has been active with the Anti-Martial Law Coalition (AMLC), a U.S.-based leftist group whose members include supporters of Filipino terrorist groups such the New Peoples Army, a Maoist organization, and the Moro National Liberation Front. Perlas encouraged antinuclear activists to join in the campaign to prevent the Nuclear Regulatory Commission from licensing Westinghouse to export a nuclear power reactor to the Philippines.

Perlas stated that an "international day of protest" against export of the Westinghouse reactor has been scheduled for November 30, 1978. He said a Washington demonstration would be sponsored by the Coalition for a Nuclear Free Philippines, Friends of the Filipino People, Friends of the Earth and other organizations.

Another speaker, Otto Buchsbaum, head of Resistencia Ecologica in Brazil, claimed that "Nazis" ran the West German-Brazilian nuclear energy program. He also attacked as controlled by Nazis and Third Reich officials the West German rocket firm, OTRAG, which he said was providing assistance for the construction of Roland and cruise missiles in Brazil. It is interesting to note that an unclassified CIA report on KGB manipulation of the media published in the House Intelligence Committee hearing, "The CIA and the Media," (p. 538) reported on a KGB campaign of vilification against OTRAG, a company stated to be developing rockets to lanuch satellites for commercial customers.

Gerd Nichelson of the Okologie Institut of Freidburg, West Germany, in response to a question about the political orientation of the European anti-nuclear movement, said that "opportunists—Communists and other doctrinaire leftist groups" were "trying to use the environmentalist movement for their own purposes." Mr. Michelson, who seemed quite out of place in the international meeting, was greeted with an embarassed silence from some participants and suppressed amusement by others.

The action calls and energy in the Critical Mass 78 Conference derived primarily from the radical left activists present. The real keynote speech of the conference was provided by Tom Hayden, head of the California Campaign for Economic Democracy (CED)—"economic democracy" being a catchier

phrase with which to mislead people than "socialism" which most Americans understand and reject.

Hayden, who was introduced as Gov. Jerry Brown's appointee to the Federal Solar Energy Conference, said, "The antinuclear struggle should be to America during tht 1980's what the antiwar movement was in the 1960's." Hayden did not mention the obvious fact that the antiwar movement was actually directed against the free countries of Southeast Asia in support of Communist aggression. What he meant was that the antinuclear movement can be a weapon against the Free World and against capitalism.

Hayden, who gave indications of wanting to be Governor Brown's Presidential campaign manager in 1980, called on the antinuclear activists to challenge the President's nomination for the Presidency in 1980 based on his solar power versus nuclear power record.

Ralph Nader's keynote speech, in contrast, provided a brief amount of praise for the Seabrook, N.H., mass civil disobedience demonstrations as a new development in the antinuclear campaign. However, most of his speech was a sharp attack on James Schlesinger, Secretary of the Department of Energy. In sum, Nader called for Schlesinger's resignation and replacement with someone who will do what Nader wants.

Critical Mass 78 also had a strong representation from U.S. groups who support the so-called "Eurocommunist" movement including the New American Movement, and the Democratic Socialist Organizing Committee (DSOC). This orientation was particularly strong in the session on "jobs and energy" and the anticapitalist bias of moderator Richard Grossman was made plain. Antinuclear activists intend to bring progressive unions such as the autoworkers, oil, chemical and atomic workers and others into their campaign.

In contrast to previous critical mass conferences, no resolutions were submitted to any plenary for consideration. The conference consisted of panels and speeches delivered to the whole audience, and seminars and panels delivered to smaller "workshops."

Among the listed workshop leaders and panelists were:

FRIDAY, OCTOBER 6, 1978

Hazel Henderson, Co-Director, Princeton Center for Alternative Futures, Inc.

Dr. Helen Caldicott, Children's Hospital Medical Center, Boston

GENERAL SESSION PANEL ON NUCLEAR POWER

Dr. Henry Kendall, Union of Concerned Scientists

Dr. Thomas E. Mancuso, Professor of Occupational Health, University of Pittsburgh

Randall Forsberg, Dept. of Political Science, Massachusetts Institute of Technology

Peter Montague, Director, Center for Environmental Research and Development, University of New Mexico

June Allen, President, North Anna Environmental Coalition

Moderator: John Seigenthaler, Publisher, *The Tennessean*

SATURDAY, OCTOBER 7

Earl Craig Jr., Urban Coalition of Minneapolis

Hon. Leo J. Ryan, U.S. House of Representatives

General Session Panel on "Jobs and Energy"

Michael Olszanski, United Steelworkers of America, District 31 Enviromental Committee

Carolyn Brancato, Professor of Economics, New York University

Valerie Pope Ludlam, Director, San Bernadino Community Development Corporation

Edward J. Carlough, President, Sheet Metal Workers International

Moderator: Richard Grossman, Environmentalists for Full Employment

Dr. Barry Commoner, Director, Center for the Biology of Natural Systems, Washington University

SUNDAY, OCTOBER 8

GENERAL SESSION PANEL ON SOLAR ENERGY

Jim Benson, Council on Economic Priorities

Tom Hayden, California representative to Western SUN, the federal solar energy conference

Denis Hayes, Senior Researcher, Worldwatch Institute

Dr. Benjamin Spock

Closing address by Rev. David Eaton, All Souls Church, Washington, D.C.

WORKSHOPS

(Saturday, October 7, 2:00–3:30 p.m.)

1. INTERNATIONAL ENERGY MOVEMENTS

Moderator: Jacob Scherr, Natural Resources Defense Council, Washington, D.C.

Terry Provance, American Friends Service Committee Pennsylvania.

Nicky Perlas, Phillipines Movement for Environment Protection.

Vincent Richet, Natural Resources Defense Council.

Gerd Michelson, Okologie Institut, Freidburg, Germany.

Otto Buchsbaum, Editor, Abertura, Brazil.

2. ENERGY ALTERNATIVE: SOLAR

Moderator: Ken Bossong, Citizens Energy Project, Washington, D.C.

Ron Pogue, Alternative Energy Resource Association, Montana.

Dick Munson, Solar Action, Washington, D.C.

Michael Freedburg, former Director, 11th St. Movement, New York City.

3. RADIOACTIVE WASTE

Moderator: Marvin Resnikoff, Professor, Rachel Carson College, New York.

Ronnie Lipshutz, Union of Concerned Scientists, Massachusetts.

Judy Johnsrud, Environmental Coalition on Nuclear Power, Pennsylvania.

Phil Greenberg, Resources Agency, State of California.

Peter Montague, Director, Center for Environmental Research and Development, University of New Mexico.

4. ECONOMICS OF NUCLEAR POWER

Moderator: Charles Komanoff, Komanoff Energy Associates, New York.

Saunders Miller, Dain, Kalman and Quail Inc., Minneapolis.

Dale Bridenbaug, MH Technical Associates, California.

5. LOW-LEVEL RADIATION AND HEALTH

Moderator: Michael Bancroft, Public Citizen Litigation Group, Washington, D.C.

Dr. Rosalie Bertell, Senior Cancer Research Scientist.

Dr. Thomas E. Mancuso, Professor of Occupational Health, University of Pittsburgh.

Dr. Karl Z. Morgan, School of Nuclear Engineering, Georgia Institute of Technology.

Dr. Thomas Najarian, Medical Consultant, Massachusetts.

Dr. Arthur Tamplin, Natural Resources Defense Council, Washington, D.C.

(Saturday, October 1, 3:30–5:10 p.m.)

1. TRANSPORTATION

Moderator: Chip Reyolds, American Friends Service Committee, North Carolina.

Jim Paschall, Attorney for Eastern Railroads, Ohio.

Bill Cox, Airline Pilots Association, Connecticut.

2. REACTOR SAFETY

Moderator: Bob Pollard, Union of Concerned Scientists, Washington, D.C.

Dale Bridenbaugh, MHB Technical Associates, California.

William Smart, former general foreman, Callaway Nuclear Power Plant.

3. EMERGENCY PREPAREDNESS

Moderator: Jan Beyea, Center for Environmental Studies, Princeton University.

Pete Cleary, Citizens for Better Environment, Illinois.

Lou Sirico, Rutgers Law School, New Jersey.

4. ENERGY ALTERNATIVES INDIRECT SOLAR

Moderator: Harriet Barlow, Institute for Local Self-Reliance, Washington, D.C.

Lee Johnson, Editor, *RAIN*, Oregon.

Skip Laitner, Citizens Action Research Group, Iowa.

Scott Sklar, N.Y. Alliance to Save Energy; Aide, Sen. Javits.

5. INDUSTRY EXPORTS AND WEAPONS PROLIFERATION

Moderator: Terry Provance, American Friends Service Committee, Pennsylvania.

Keike Kehoe, Center for Development Policy, Washington, D.C.

Paul Leventhal, arms control consultant; Forthcoming book, *On Nuclear Proliferation.*

Gloria Duffey, Rand Corporation, California.

(Sunday, October 8—9:00–10:20 a.m.)

1. CITIZENS LEGAL RECOURSE AND STRATEGY

Moderator: Anthony Z. Roisman. Natural Resources Defense Council, Washington, D.C.

Ellen R. Weiss, Sheldon, Harman, Roisman and Weiss, Washington, D.C.

Karen Sheldon, Sheldon, Harmon, Roisman and Weiss, Washington, D.C.

Chauncy Kepford, Environmental Coalition on Nuclear Power, Pennsylvania.

2. DEMONSTRATION ORGANIZING

Moderator: Kitty Tucker, Environmental Policy Center, Washington, D.C.

Kathy Wolff, Clamshell Alliance.

Bret Burcy, Palmetto Alliance, South Carolina.

Sam Lovejoy, Clamshell Alliance.

Pam Solo, Trojan Decommissioning Alliance, Oregon.

3. CONSERVATION

Moderator: Gary DeLoss, Environmental Policy Center, Washington, D.C.

Jan Beyea, Princeton University.

David Knepper, Rural America, Washington, D.C.

Robert Goble, Professor, Clark University, Massachusetts.

4. ORGANIZING TACTICS

Moderator: Franklin Gage, National Task Force Against Nuclear Pollution, Washington, D.C.

Victor Fisher, Linton, Mields, Reisler & Cottoni, Washington, D.C.

Whitey Bluestein, Sheldon, Harmon, Roisman, & Weiss, Washington, D.C.

Jeanine Honicker, Nashville, Tenn.

Chuck Sheketoff, Vermont PIRG.

5. FUNDRAISING

Moderator: Lindsay Mattison, Center for Development Policy, District of Columbia.

Russ D. Hemenway, National Committee for an Effective Congress.

Herman Warsh, Foundation Executive.

Charlene Divoky, Union of Concerned Scientists.

Joan Flanigan, Grass Roots Fundraising.

(Sunday, October 8, 10:30–11:50 a.m.)

1. UTILITY RATE STRUCTURES

Moderator: Rick Morgan, Environmental Action Foundation.

John Stutts, Energy Research Systems, Massachusetts.
Aldon Meyes, Connecticut Citizens Action Group.
Jack Mould, ACORN, Louisiana.

2. CIVIL LIBERTIES

Moderator: David Comey, Citizens for a Better Environment, Illinois.
Morton Halperin, Director, Center for National Security Studies, District of Columbia.
John Shattuck, Executive Director, American Civil Liberties Union, Washington, D.C.
Donna Warnock, Syracuse Peace Council.

3. MEDIA AND PUBLICITY

Moderator: Noreen Banks, Peoples Business Commission, Washington, D.C.
Harvey Wasserman, Clamshell Alliance.
David Fenton, Independent Publicist, New York.
Nancy Quinn, Nuclear Information and Resource Service, District of Columbia.
Lindsay Audin, Pacifica Radio Network (WBAI), New York.

4. COALITION BUILDING

Moderator: Gail Daeneker, Environmentalists for Full Employment, District of Columbia.
Chuck Matthei, Clamshell Alliance.
Jan Schakowsky, Illinois Public Action Council.
Mina Hamilton, Sierra Club Task Force on Radwaste.

5. FEDERAL, STATE, AND LOCAL LEGISLATIVE REVIEW

Moderator: Dave Moulton, Congress Watch, Washington, D.C.
Scott Skinner, Skinner and Skinner, Vermont.
Jim Cubie, Union of Concerned Scientists, Washington, D.C.
Robb McDougal, Washington.
Marc Messing, Environmental Policy Center, Washington, D.C.

Organizations participating in the Critical Mass 78 conference included:

American Civil Liberties Union (ACLU), Washington Legislative Office, 600 Pennsylvania Avenue, S.E., Washington, D.C. 20003.
American Friends Service Committee (AFSC), 1501 Cherry Street, Philadelphia, PA 19102.
Boston Clamshell, 2161 Massachusetts Avenue, Cambridge, MA 02140.
Campaign to Stop Government Spying, 201 Massachusetts Avenue, N.E., Washington, D.C. 20003 (202/547-4644, 4705).
Citizens for a Better Environment, 59 E. Van Buren, Chicago, IL 60605.
Coalition for Safe Electric Power, 140 Public Square, Rm. 312, Cleveland, OH 44114.
Coalition for a New Foreign and Military Policy (CNFMP), 120 Maryland Avenue, N.E., Washington, D.C. 20002.
Coalition for a Nuclear Free Philippines, 317 Pennsylvania Avenue, S.E., Washington, D.C. 20003.
Congress Watch/Public Citizen, 133 C Street, S.E., Washington, D.C. 20003 (202/546-4996).
Clamshell Alliance, 62 Congress Street, Portsmouth, NH 03801.
Center for National Security Studies, 122 Maryland Avenue, N.E., Washington, D.C. 20002.
Critical Mass, 133 C Street, S.E., Washington, D.C. 20003 (202/546-4790).
Democratic Socialist Organizing Committee (DSOC), 853 Broadway, Room 617, New York, NY 10003.
Democratic Agenda, 853 Broadway, Room 617, New York, NY 10003.
DSOC Washington, D.C. Youth Caucus, 1346 Connecticut Avenue, N.W., Washington, D.C. 20036.
Energy Policy Information Center, 3 Joy Street, Boston, MA 02108.
Environmental Action Foundation, 1346 Connecticut Ave., N.W., Washington, D.C.
Environmental Policy Center, 317 Pennsylvania Avenue, S.E., Washington, D.C. 20003 (202/547-6500).
Environmentalists for Full Employment, 1101 Vermont Avenue, N.W., Washington, D.C.
Friends of the Filipino People, 110 Maryland Avenue, N.E., Washington, D.C. 20002.
Friends of the Earth.
Institute for Local Self-Reliance, 1717 18th Street, N.W., Washington, D.C.

THE CASE OF SAADIA IGILOVITCH SHAMUILOV, WHO IS BEING DETAINED IN RUSSIA, APART FROM HIS FAMILY

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SYMMS. Mr. Speaker, I am pleased to join in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry. I support this vigil not for the Jewish people alone, but for all individuals who suffer under the repressive emigration policies of the Soviet Union. No one in the Soviet Union will have any freedom until he or she is allowed to travel freely.

I bring to the attention of my colleagues, yet another case where human rights have been violated by the Soviets. The right of families to be reunited is guaranteed under the Helsinki Final Act which although signed by the Soviets is commonly rejected by them. The Helsinki accords are consistently violated by the Communists, as in this case, when a man is kept from his wife and children.

Our pleas cannot rest on general arguments alone; sounded only for the purposes of whole peoples; whole worlds; we must look to the effect it has on the individual and base our judgment upon this criteria. I therefore introduce the case of Saadia Igilovitch Shamuilov as an example of Soviet tyranny over their citizens. Saadia is a foreman of building construction in the Uzbeck region of the U.S.S.R. He is forced to live thousands of miles from his wife and children because the Soviets will not allow certain citizens to leave the country because of their political or religious beliefs.

Saadia's wife Tsipora, and his children Olga, Rambam and Rafik want their father with them in Pardes Hans, Israel, but the Communists in Russia say no. Since 1976, Saadia has applied for emigration and has been refused. There has never been a reason given for this bureaucratic refusal. The refusal goes unexplained and there is no way that Saadia can appeal because the Soviet law does not work in such a manner. It is my hope that this vigil for freedom will help in the early emigration of Saadia Igilovitch Shamuilov.●

NATHAN SHAPELL, A MAN OF CIVIC ACHIEVEMENT

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTERSON of California. Mr. Speaker, on October 25 the American Jewish Committee will honor Mr. Nathan Shapell with a 1978 Civic Achievement Award.

Mr. Shapell is the owner of S. & S. Construction Co., which is a residential construction firm headquartered in Orange County, Calif. He is also a much respected businessman in southern California.

His achievement in the business community is a remarkable one, for Mr. Shapell emigrated to this country after losing his home and family to that infamous period in human history that has become known as the Holocaust.

One could say that Mr. Shapell's success in America is an all too common story, one that equates strength with success. But his strength lies not solely in his successful business enterprise. His greatest strength is an inner strength which could not be broken. This does not come only from the fact that he survived the most inhuman tortures ever imposed on man by others of his kind, but primarily from the fact he witnessed and endured such atrocities and still found it in his heart to love his fellow man.

I find it ironic that a homeless man who drifted across Europe after World War II is now a builder of homes for thousands of American families. Such ironies can sometimes be found only in this great country of ours, where a man can be assured success through hard work and sacrifice.

I ask my colleagues to join me in paying tribute to Nathan Shapell. His life serves as an inspiration to those who see the United States as a beacon of hope in a world still persecuted.●

POST 572'S MAN OF THE YEAR

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MOTTL. Mr. Speaker, I wish to pay tribute to Mr. Martin J. Gallagher, executive board member of 9 years standing of American Legion Post 572, who will be honored by the post as its "Man of the Year." Mr. Gallagher will be presented the Legion Man of the Year Award at the Sixth Annual Award Banquet to be held at the post home on the evening of November 4, 1978.

Mr. Gallagher, a Legion member for the past 16 years is being honored for his many years of outstanding devoted service to the American Legion and for the many years of service to his community.

As a present member of the Legion post executive board, and present building chairman, Mr. Gallagher has been a leading and moving force in bringing about the recently completed expansion and remodeling program of the post 572 home located at 6483 State Road, Parma, Ohio.

Prior to getting involved with the post building expansion program, Mr. Gallagher was, and presently is, a front runner when it comes to lending his assistance to insure the success of the Legion's sponsored Boy's State program, to its "Americanism Tests" given annually to the students in our local high schools, volunteering his services to raise fund's through the Legion's "Gifts for the Yanks," a program designed to make our hospitalized veterans life a little more bearable. In his continuing efforts to serve, Mr. Gallagher is always counted on to give a helping hand for worthwhile community projects. On the post level Mr. Gallagher is always called upon to put to use his skill as an electrician as well as his all-around ability which are so important to the proper maintenance of a post home.

A veteran of World War II, Mr. Gallagher spent his service time (1943–46) with the U.S. Navy in the Pacific theatre. Trained by the Navy, Mr. Gallagher became a first-class electrician, which training served him well through the years that followed.

In 1948, Mr. Gallagher became employed by the city of Cleveland in its municipal light division. After spending 30 years of service with the light plant, at age 53 Mr. Gallagher is now enjoying retirement. Another special occasion for the Gallaghers to celebrate will be in order on the very same evening and that is their 30th wedding anniversary. It was in November 1948 that he and his wife Colletta were married. They have three daughters, Rita, Kathleen, and Nancy. Grandparents of one, the Gallaghers reside at 2806 Priscilla Avenue, Parma, Ohio.

A lifelong resident of the Cleveland area, Mr. Gallagher was raised on Cleveland's East Side, in the East 116th and St. Clair area. A product of Collinwood High, Mr. Gallagher has been a resident of Parma for the past 25 years.

His parents, Michael and Ann, along with his sisters, Betty and Ann, will join the rest of the Gallagher family and his many Legionnaire friends, celebrate this festive occasion.

One again the local American Legion has plucked from its ranks one of its many unheralded Legionnaires to be honored as its "Man of the Year."●

HEALTH CARE FOR OLDER VETERANS—THE VA SYSTEM

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PEPPER. Mr. Speaker, we are all aware of the fine contributions to the Nation's health which have been made by the Veterans' Administration. It operates the largest health care system in the United States, and the lessons which have been learned from the VA experience can be of valuable assistance as we look toward the enactment of a national health insurance program.

Ms. Dena Belinkoff, who served as a summer intern with the Subcommittee on Health and Long-Term Care of the Select Committee on Aging, both of which it is my privilege to chair, prepared a fine paper which examines the VA health care system—particularly with respect to its programs for elderly veterans—and recommends several areas for further study and examination. Ms. Belinkoff is a recent graduate of the University of California at Berkeley.

Mr. Speaker, the 65-and-over population of the United States is expected to nearly double over the next 50 years. Ms. Belinkoff points to a similar trend among the aging veteran population. In 1970, she indicates, there were 2.3 million veterans over the age of 65; by the year 2000, there are expected to be 7.1 million elderly veterans. The VA system of providing long-term care services for this important segment of our population can offer important lessons in relation to our deliberations regarding improvements in medicare and the eventual adoption of a national health insurance plan.

I commend Ms. Belinkoff's paper to the attention of my colleagues and include part I at this point in the RECORD:

INTRODUCTION

The Veterans' Administration (VA) has established an admirable record in providing comprehensive health care to those who have served in the United States armed forces over the past 110 years. As the VA plans to expand medical services to meet the needs of the coming decades, there is growing concern over the increasing number of elderly veterans who, like all senior citizens, will require a greater amount of acute and long-term care as they become more infirm.

Exactly what services and which facilities call for expansion, however, is subject to debate. Assessments differ as to the VA's role in geriatric health care, depending on the priorities that are set and the predictions that are made regarding the future of national health insurance.

The purpose of this paper is to outline and discuss the services available to the elderly veteran and review the criticisms of them; to assess VA policies which affect the elderly; to suggest the issues which demand further investigation by Congress and to make policy recommendations.

DEMOGRAPHY

As the largest health system in the country, the VA operates a nationwide network of 172 hospitals, 88 nursing homes, 16 domiciliaries and 228 outpatient clinics. In addition, the VA contracts with community hospitals and nursing homes and veterans are cared for in state-run veteran facilities. In total, the cost to taxpayers for health care provided by the VA in fiscal year 1979 will be over $5 billion. Some 1.4 million inpatients will be treated and over 18.2 million outpatient visits will be made to VA and contract facilities in the coming year. The VA is an executive agency, funded by an annual appropriation from Congress and, therefore, subject to Congressional oversight and review.

Legislation enacted in 1973 (Public Law 93–82) directed the VA to contract with the National Academy of Sciences (NAS) to perform a study of VA medical facilities. Beginning in 1973, the NAS conducted a three-year appraisal of the VA and produced a report containing 37 recommendations. Because of the controversial nature of some of the recommendations, the VA issued a formal response to the NAS report.

The immediate concern over VA planning stems in large part from demographic data on the veteran population. While in 1970 there were 2.3 million veterans over the age of 65, the projection for the year 2000 is for 7.1 million elderly veterans. Veterans comprised 26% of all U.S. males over 65 in 1970, and that figure is expected to grow to nearly 60% by the year 2000, and then decrease gradually, barring future large-scale wars. The bulge in the projected elderly population is attributable to the cohort of 13.2 million World War II and Korean Conflict veterans whose average age is currently 56.3 years.[1]

Out of a total of over 27 million veterans of all ages, only 3 million receive VA-sponsored medical care. The eligibility structure, access and the availability of other medical insurance plans all serve to reduce the number of actual VA beneficiaries.

In the NAS study, "Health Care For American Veterans," veterans receiving VA treatment were characterized as being older, poorer, more likely to be black, less likely to be married and less likely to have other health insurance, when compared to the veteran population at large. In light of these findings and the changing demographics of the armed forces in general, it is evident that current utilization patterns of VA facilities should be considered in analyzing the impact of national health policies on the Veterans Administration and in subsequent plans for expansion.

ELIGIBILITY

The mandate of the Veterans Administration is first to provide health care for all veterans with service-connected disabilities and second, if capacity is available, for those without service-connected disabilities. From this basic premise stems a complicated priority structure, unique to each medical service, which also takes into account age, financial need and receipt of a VA pension. Veterans over 65, regardless of their financial situation, are automatically eligible for VA health care and more or less follow the service-connected group in priority.

Despite the complex eligibility restrictions, only 1% of the veterans who apply for medical, surgical or psychiatric care are turned down. Ample space appears to be available in VA facilities under current admittance procedures and application rates.[2]

[1] *World Almanac 1978*. Newspaper Enterprise Assoc., Inc., New York.

[2] *Study of Health Care for American Veterans*, National Academy of Sciences (NAS) 1977, p. 29.

Eligibility provisions for other services, however, are narrower, because of inadequate VA resources. In the case of outpatient services, the eligibility standards were widened under Public Law 93–82 in August, 1973, to authorize care for patients without service-connected disabilities, if the care was provided "to obviate the need for hospitalization." This provision stimulated a significant increase in the number of outpatient visits and alerted Congress to the heavy financial consequences of an eased eligibility structure. In response, Congress again revised the outpatient status laws in the Veterans Omnibus Health Care Act of 1976, Public Law 94–581, demonstrating an intent to limit eligibility according to priority. The new provision may result in the unnecessary hospitalization of patients, since outpatient care is less available.[3]

In summary, the VA has expanded its health services well beyond the original mandate to care for the service-connected disabled. The complex eligibility provisions now serve as one method of controlling the patient census and, therefore, the budget. Both Congress and the VA should be mindful, however, of alterations in eligibility policy which trigger unforeseen changes in utilization patterns.

SERVICES

The VA offers a full range of medical services and health programs to its beneficiaries under the Department of Medicine and Surgery. Through its extensive affiliation with medical schools since World War II, the VA has been heavily involved in "acute, mainstream medicine." The commitment to a professional, research-oriented health organization has, in the past, been an obstacle to the development of a comprehensive, multi-level care program particularly suited to the needs of the elderly.[4] Although a continuum of care is now evolving, certain procedures and restrictions continue to emphasize acute hospital care, where less intense levels of care are now thought to be adequate.

Veterans Administration health services include:

Hospital Care.
Psychiatric Hospital Care.
Nursing Home and Intermediate Care.
Hospital Based Home Care.
Personal Care Homes.
Domiciliaries.
Outpatient Care.

HOSPITAL CARE

The 172 hospitals in the VA system are located in every state except Hawaii and Alaska. The National Academy of Sciences (NAS) Committee surveyed inpatient care in 21 VA hospitals and found the quality of care to be outstanding in 5, adequate in 13 and inadequate in 3, as measured using site visits and medical records. Only 5 percent of discharged patients gave physician and nursing care a poor rating; 50 percent rated the care excellent.[5]

The NAS report criticized the VA for keeping patients for inordinately long periods of time, in comparison to non-VA hospital practices. In response, the VA cited the high incidence of chronic patients and the comprehensive nature of VA care to explain the length-of-stay statistics.

Once a patient is admitted to a VA facility, comprehensive examinations and treatments are given. This policy has several consequences, both positive and negative, on VA practices and patient well-being. An elderly veteran benefits upon admittance to a VA hospital or nursing home because he receives dental, eye and foot check-ups, a battery of medical tests and the drugs he needs, all free of charge, along with treatment of the original ailment. Total care is not reimbursed under Medicare and Medicaid, and notably would require multiple doctor visits in the private sector.

On the other hand, this policy can also lead to the unnecessary hospitalization of an older person, who does require the comprehensive medical monitoring, but need not be retained overnight in an acute care bed. Over hospitalization of patients drives up the cost of health care. Moreover, institutionalization, which has long been the mainstay of care for the elderly, is thought by many to adversely affect a patient's physical and mental well-being.

Another often cited reason for greater lengths of stay in VA hospitals accrues to the budgetary process. Annual VA appropriations are based on census data, a system which creates an incentive for a facility director to keep his census high or risk losing funds. An analysis in Public Policy magazine stated that, "The concern over the so-called bed census is so blatant, in fact, that Chief Medical Directors have periodically had to issue directives to the hospitals reminding them that decisions to admit or retain a patient in the hospital should be made only on medical grounds and never to keep the census artificially high." [6] The former Chief Medical Director, Dr. John Chase, clarified the process, explaining that while patient census served as the primary allocation guideline in the past, it is no longer adequate as the sole determinant of workload and therefore, budgetary requirements. Census is now one of several criteria used, though it probably remains the most significant.

While VA hospital care has a fine overall record, this incursion of the budgetary process on the quality of medical services is bound to be detrimental. The incentive of the hospital to keep a high census works together with the attraction of comprehensive health services to extend hospital stays and raise health care costs.

PSYCHIATRIC HOSPITAL CARE

As the largest centralized mental health care system in the country, the VA operates 10 percent of all psychiatric beds currently available. Parallel to the national trend, the total number of VA psychiatric beds has decreased from 59,000 in 1965 to almost 30,000 in 1975, due to the advent of new drugs, improved therapies and the expansion of outpatient and community resources. In 1975, the VA handled 2.7 million psychiatric visits in 326 outpatient clinics and paid for 406,000 more on a fee-for-service basis in the private sector.

Although only 8 percent of all veterans are now over age 65, some 23 percent of all veteran patients with diagnosed psychiatric disorders are elderly. This imbalance is explained in part by the enhanced priority rating of senior citizens in obtaining covered care, combined with the attractive comprehensive nature of VA services. The same factors contribute to the NAS study's observation that lengths of stay in VA psychiatric hospitals are longer than in non-VA facilities.

An important criticism discussed in the NAS report concerned the suitability of inpatient psychiatric care for a significant minority of the surveyed patients. Stated the NAS:

"A large fraction of patients in VA psychiatric beds—at least 40 or 50 percent—do not require the services associated with a hospital bed. About half those deemed not to require hospitalization were judged to be treatable as outpatients, and the balance in another type of setting." [7]

The VA responded to concerns of this type with the implementation in 1974 of an HSRO (Health Services Review Organization) program to assess each patient's level of care. In addition, the VA has proposed the expansion of their Personal Care Home program (discussed later) which organizes placement of psychiatric patients in the community.

LONG-TERM CARE

The VA operates a full range of long-term care programs utilized principally by elderly veterans. On the whole, the NAS praised VA nursing home programs, saying they "compare favorably with a non-VA example of adequate nursing home care." [8]

A philosophy of long-term care has structured the development of VA services. The underlying assumption is that high quality long-term care is best provided in a setting adjacent to an acute care facility, because such an integration best meets the fluctuating needs of the long-term patient. An additional benefit of concentrating services in one central locale is the easing of VA research and education efforts.

INTERMEDIATE CARE

Intermediate Care, in VA parlance, refers to care for "patients who have passed through the acute stage of their illness, but who are till unstable and will require several months of further hospital care before a stable course can be anticipated." [9] Treatment involves skilled nursing, frequent physician supervision and various professional therapeutic services. This level of care should not be confused with the non-skilled "intermediate care" as defined by Medicaid and Medicare.

The 10,456 beds designated as Intermediate Care within VA hospitals serve a group of chronically ill, greatly disabled veterans and a smaller group of convalescent patients. These facilities often provide care for periods of several years.

The quality of Intermediate Care was rated by the NAS as "custodial" in over half of the units—the lowest ranking on a four point scale devised by the NAS to compare VA facilities with those in the private sector. The reason cited was inadequate personnel for the appointed workload. In reaction, the VA initiated a reassessment of the Intermediate Care program to evaluate its function in the continuum of care and to review the program's standards.●

THE CASE OF YAKOV KARMANITSKY

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BLANCHARD. Mr. Speaker, I am pleased to join in the "vigil for freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and inqividuals who are being detained in the Soviet Union as a result of the Soviet Government's repressive emigration policies.

In 1975, 35 nations signed the Helsinki Final Act, which committed the 35 signatory nations to pursue policies consistent with basic principles of human rights. These rights included the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

It has become painfully clear that the Soviet Union has chosen to disregard the

human rights provisions of the Final Act. In the many occasions where they have denied basic human rights, such as the right to emigrate and join relatives in other countries, they have flagrantly violated the provisions agreed to at Helsinki.

Today, as part of this "vigil for freedom" I want to share with my colleagues the case of Mr. Yakov Rakhlenko Karmanitsky of Moscow. Mr. Karmanitsky and his mother have been trying to emigrate from the Soviet Union to join his sister in Israel for the past 6 years. Their applications to emigrate have been refused supposedly because Mr. Karmanitsky had served in the Soviet Army from 1969–71. * * *●

THE 60TH ANNIVERSARY OF CZECHOSLOVAKIA

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BLANCHARD. Mr. Speaker, October 28 will mark the 60th anniversary of the birth of modern Czechoslovakia. It was not long ago, in August of this year, that we sadly commemorated the Soviet occupation of Czechoslovakia—a day that has become known as the "Soviet Day of Shame."

The Czechs and Slovaks have a long and proud history which goes back over a thousand years. In 1918 they were united in the newly formed state of Czechoslovakia, just as they had been originally linked together under the Great Moravian Empire.

Foreign occupation and domination have been a great blot on the history of this young nation. In the first 20 years of her independence, prior to the Nazi invasion and occupation, Czechoslovakia proved to be a highly progressive, democratic country. It was a country that stood out to the world as a haven for the persecuted who were fleeing from the Bolshevik revolution in Russia and from the Nazis in Germany. Czechoslovakia was a country that quickly became a symbol for the kind of freedoms, human rights, and democratic principles that we hold so dear today in our country.

Since the original Nazi occupation, the Czechoslovak people have been mired under totalitarian rule. First by the Nazis, then as a satellite state of the Soviet Union, and finally under the flagrantly illegal formal occupation by the Soviet Union in 1968. Yet, the great spirit of the Czechoslovak people has not waned. That same spirit, which 60 years ago boldly instituted a freedom-loving democracy, strives with even greater determination today to return those freedoms to Czechoslovakia.

That is why it is so important, on this 60th anniversary, to recall the birth of this democratic nation with both fond remembrance, as well as perseverence for the future.

I hope that all of my colleagues will join with those Americans of Czech and Slovak descent in this noble and worthy struggle.●

CONGRESSIONAL SALUTE TO THE EASTSIDE HIGH SCHOOL MARCHING "100" BAND AND MARCHING UNITS OF PATERSON, N.J.

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ROE. Mr. Speaker, the Eastside High School Marching "100" Band and Marching Units has completed the 1977–78 season with a year of competitive victories and "blue-ribbon" championship performance record which have brought great pride to the city of Paterson, my congressional district and State of New Jersey. May I take this opportunity to commend to you the following members of Eastside High School Marching "100" Band and marching units whose personal commitment, hard work and training under the directorship of the Honorable William Peter Nelson, Jr., and his assistant, Hon. Thomas Lee Page have enabled them to achieve national recognition and award-winning performances in this highly competitive field of endeavor. The team membership is, as follows:

Altheria Alston, Sandra Artis, Michelle Brown, Melinda Cunningham, Sandra Dixon, Myava Fields, Audrye Grey, Antionette Hackney, Michelle Harrell, Rosetta Jackson, Marilyn Johnson, Angel Jones, Angela Jones, Kim Jones, Shelia Jones, Vivian Jones, Francella LaGarde, Bridgette Macklin, Margaret Miller, and Denise Robins.

Melinda Robinson, Carolyn Thompson, Andrea Wheeler, Tanya Barbour, Sharon Boone, Monica Bracey, Beatrice Jones, Lora Jones, April Martin, Beverly McCoy, Vermell McLeod, Paulette Moses, Abigail Nelson, Janice Parker, Patricia Pipkin, Kim Rogers, Anthony Prater, Harris Price, Alan Richardson, and Hope Richardson.

Cassandra Risher, Esther Rivera, Gordon Robins, Anthony Robinson, Sam Robinson, Vincent Robinson, Darrin Rogers, James Shawell, Jessie Sims, Catherine Smith, Vickie Smith, Gregory Stewart, Alteta Thomas, Donna Thomas, Charles Thompson, Richard Thompson, Kevin Tucker, Bryant Warren, Wayne Warren, and Janet Wesley.

Matthew Wideman, Jeffrey Willis, Peggy Wright, Kenneth Harrison, Myron Hicks, Cheryl Hinton, Ellis Hogges, Michael Horton, David Isaac, Randy Jackson, Jerome Jiggetts, Derald Jones, Warren Judge, Crystal Keeling, Garry Kersey, William Lawrence, Nina Lewis, Pamela MacDonald, Roberto Maldnaldo, and Ralph Melendez.

Perry Mann, Phyllis Martin, Reggie Matthews, Eva Monteaqudo, Deidra Moore, Denise Moore, Jerry Myers, Alexis McCray, April McCray, Michael McCormick, Gina McGowan, Neal McKinley, Gerald Nuttry, Frankie Oliver, Peter Peterson, Carmen Pino, Doris Pointer, Kimble Arrington, Nyles Arrington, and Diana Branch.

Genneace Buie, Matthew Buie, Wendy Butler, Daria Bullock, John Brodie, Jayson Brown, Gregory Byrd, Kevin Carter, Dennis Chambers, Terri Clark, Mary Clyburn, Charles Cobb, Horace Cobbs, Sherry Cobbs, Luis Colon, Sam Colon, Bennie Cook, Taryn Council, Brenda Cunningham, and Tommy Davis.

Peter Daye, III, Connie Drakeford, Elizabeth Dugans, Sharon Dunston, Kenneth Durant, Keith Evans, Dexter Farrar, Lisa Farrar, Kevin Fields, Mary Fields, Walter Gaston, Dale Glenn, Rosalyn Glover, and James Godbolt.

Mr. Speaker, in recognition of the esteem with which the Eastside High School Marching "100" Band and Marching Units is held, with your permission, I would like to insert at this point in our historic journal of Congress the testimonial dinner program celebrating their victorious achievements in which I was pleased and honored to participate. The program which includes a list of the exemplary community leaders and highly reputable citizens who have strongly supported and sponsored the Eastside High School Marching "100" Band and Marching Units, is, as follows:

PROGRAM

Invocation, Mr. Frank Oliver.

Introduction to Mistress of Ceremonies, Mrs. Bertha Farrar.

Mistress of Ceremonies: Mrs. Vera P. Thompson.

DINNER

Presentation of Awards: Marching Units.

Presentation of Awards: Marching Band—Band letter and certificates, Secretaries, Section Leaders, Seniors, Jazz Band, Outstanding Fresh., Soph., Jr., Sr., Outstanding Section, Drum Majors, Outstanding Musician and Band Person.

Closing Remarks, Mr. William M. Kline.

COLLEGE BOUND SENIORS

Marching Band

Walter Gaston, University of Wisconsin.

Connie Drakeford, William Paterson College.

Carmen Pino, William Paterson College.

Eula Davis, Rutgers University.

Sharon Dunston, Rutgers University.

Vickie Smith, Rutgers University.

Jayson Brown, Florida A. & M. University.

Daria Bullock, Florida A. & M. University.

Brenda Cunningham, Florida A. & M. University.

Keith Evans, Florida A. & M. University.

Kenneth Harrison, Air Force.

Gregory Stewart, Air Force.

Elizabeth Dugans, Ramapo College.

April McCray, Jersey City State College.

Marching Units

Juanita Tate, Stevens Institute of Tech.

Jackie McMillan, Bethune-Cookman College.

Sharon Boone, William Paterson College.

Abigail Nelson, Delaware State.

Antionette Hackney, Montclair State College.

Althea Jones, Miami Biscayne.

Patrons

Mr. and Mrs. Everett Martin, Mr. and Mrs. Ardie Ferrell, Mr. and Mrs. Charles Redmond, Ms. Jeanette Martin, Mrs. Jeannette Thornton, Quentin Martin, Ms. Faustina Martin, Betty Pippins, S. Horowitz, Best Friends–Erica Abigail "78", Mamie Williams, Vanessa Horton, Grady James IV, April McCarthy, and Ophelia B. Chavis.

I. Grassi, V. Maus, Gary Kosdan, Michael J. Donow, Vicki Madden, Paula DePaola, Ms. K. M. Perry, Mrs. Clara Robinson, W. Lucky, Margaret Hicks, Mr. Lepescu, Ernest Gans, Rosalind Ellerbee, Mr. Spinelli, and J. Kutner.

Sally Glazer, Mr. Bennick, Pearl Tannassee, Lynette Tannassee, Eva McClennon, Rosalyn Thorne, Ramona Milete, Maritza Perez, Alba Mulero, Cindy Torres, Mary Demas, Aida Caraballo, Louise Little, Dr. Leo Rus, Nancy Reyes', and Lucy Martinez.

Randy Covington, Mrs. Normell Chappell, Pauline Woodhouse, Mr. Roosevelt McClennon, Mr. Abraham Woodhouse, Mrs. Bertha McClennon, Beverly McCoy, Roberta Fazio, Arnita Bullock, Douglas Clark, Florian George, Terri Belfield, Williams Albert, Jamie Nuttry, and Neil Mclean.

Mary Thomas, Vanessa Nuttry, Johnnie

Nuttry, Rosemarie Haten, Ruth Dowd, Wilimae Brown, Donald Rives, Rufus, Daughn Rembert, Kelly Rembert, Tracey Rembert, Mr. W. Rembert, Mrs. J. Rembert, Mr. Parker, and Mrs. Parker.

Mrs. M. Collins, Barbara Collins, A. Martucci, M. Lechleiter, Trudy Moore, J. Hajas, L. Lopas, Mr. Curtis Mason, Mrs. Mary Sims, Mrs. Leah Moore, Miss Raetha Sumter, Mrs. Rosetta Sims, Mr. Roger Sims, Mr. Jesse Sims, and Minnie Jackson.

J. Grimes, Mr. Lechlieter, Cal Maxwell, J. Agnoli, Henry Baker, E. Goematt, Robert Christie, James Stringer, Thompsons, Cornwell, G. Stanton, James Dassano, M. Myrick, Carolyn Little, and Maude C.

C. Simmons, Tommy Cowan, M. Campbell, Susan Wallace, Bessie Greenblatt, Peter Peterson, Donna Peterson, John Peterson, Mrs. Peterson, Wilberto Rosa, Mrs. Allen, Rodney Ruth, Mrs. Maggie James, Katie Ruffier, and Ernestine Bulter.

Cume Harrison, Ruth Hayes, Steve Kayne, M. Carlos, Nick Moretta, Rise Itkin, Wilburt M., Robert Powell, R. L. Migliarino, Jane Goldberg, Benjamin Itkin, Lizzie Wilbur, Rev. and Mrs. Louis McDowell, Ms. Atkins, Mrs. Beatrice Davis, Mr. and Mrs. Riland Stewart, and Mr. and Mrs. Howard O. Cumberbatch.

Ms. Denkins, Gregory Stewart, Mrs. Ana Nieves, Mr. Thomas Nieves, Mrs. Deniase Castro, Lillian Garcia, Gladys Torres, Hilda Adorno, Ralph Melendez, Thomas Lee Page, Lee Carter, Wardell Carter, Wardell Carter, Jr., and Kevin Carter.

Alice Page Gant, Dale Gant, Christine Page, Kapers Page Sr., Malcolm Cobb, Mr. William Peter Nelson, Denise Moore, Vickie Smith, Keith Evans, Dolly Cobb, Eleanor Council, Michael Council, Taryn Council, June M. Backman, Benjamin Thomas, Doris R. Thomas, Aleta Rei Thomas, and Mrs. Gibbs.

ACKNOWLEDGEMENTS

Mr. Frank Napier—Superintendent of Schools.

Mr. Joseph Goldberg—Asst. Superintendent.

Mrs. Vera P. Thompson—Asst. Superintendent.

Mr. Charles Riley—Business Administrator.

Mr. Robert Schwartz—Legal Consultant.

Ms. Angela Giella—Acting Supervisor of Music.

Rev. Robert Kirchgessner—President.

COMMISSIONERS

Mr. Robert Cornish Jr., Rabbi David Panitz, Mr. William Pascrell, Mr. Juan Torresola, Mrs. Claire Salviano, Rev. Albert P. Rowe, Mrs. Alberta VanWinkle, Mr. Edward Zonenberg.

ADMINISTRATION

Mr. William M. Kline—Principal.
Mr. James Bradshaw—Vice-Principal.
Mr. Angelo Martucci—Vice-Principal.
Ms. Emilie Renna—Vice-Principal.
Mr. Paul Barnes— Dean of Boys.
Mrs. Buelah Philpotts—Dean of Girls.

Mr. Speaker, the following narrative which was presented to me by the Honorable Vera P. Thompson, assistant superintendent of schools, Board of Education, Paterson, N.J., will provide you with some very interesting highlights on "what the Eastside High School Marching Band is all about":

The E.H.S. Band and Units have been the talk of Paterson.

Under the direction of Mr. William Peter Nelson Jr. and his Assistant, Mr. Thomas Lee Page, the band and Units has to do more than just demonstrate their playing and marching abilities, but the members of the band and Units also have to prove themselves academically and scholastically, attending classes, and getting the work done, achieving an A, B, or even a C, plays an important part in keeping the standards of these two perfectionists, along with the Marching "100" and Units themselves.

Since Mr. Nelson has taken charge, he has stressed to not only their members, but to their classes also, that whatever group or extracurricular activity you get involved in, you must keep in mind that just being in it is not enough. You must attend classes and take part in the advantages of the class, worth and value and strive to do your best in that class, then if you feel that you are able to maintain a good grade and would like to participate in an extracurricular activity, by all means do so The students are never forced to participate in any of the school's extra curricular activities. This has been the number one asset, on behalf of the students in making a very successful band and marching unit.

Another aspect and very important role in having a successful band and marching units is having the parents take an active part in the band's activities and functions. The parents are the backbone of the band and with their number one support and effort they keep us together as one unit.

In addition to these qualifications, we must never forget the words, "7:30 Practice" and "Be on time". It's these very important factors that make Eastside High School Band and Units what it is.

With all of this in mind, the awards and accomplishments fall right into place. The band and Marching Units in the past years, while Mr. Nelson was the band director, has accomplished the following: The band has been invited to Florida to participate in the 1974 Florida Orange Blossom Classics Parade, and today the rewards and comments haven't ceased. The trip was also planned to visit various colleges and to give graduating seniors a chance to audition for scholarships.

In 1976, the band played in the Great Falls Festival, here in our own city, and was recommended and commented very highly, by the former President of the United States, Gerald R. Ford. It is a Paterson's first for a president to even come to our city and it has been a big step for not only the band and units, but for the city of Paterson to get a comment from Mr. Ford about one of the highlights of Paterson, New Jersey, the E.H.S. Marching "100" and Units. But still the accomplishments and rewards still go on.

In 1977, the band was involved in another first. An exchange program with the Paul Laurence Dunbar High School from Baltimore, Maryland.

On May 14, of this year, the Band and Units were to have marched again on 5th Avenue and 44th Street, but due to the storm and the hazard to the health of the students, we didn't march. All this proves that with the support of the parents and with the cooperation of the students, one can have a band of great achievement and great accomplishments.

Not only the marching band and units accomplished great tasks but we must also look upon the E.H.S. Stage Band. The Stage Band has had its share of success this year. They have been involved in many active functions such as The Social Services Workshop at the Brownstone, and they have participated in Jazz Band Clinics at the Indian Hills High School in Paramus, New Jersey.

They also won first place in the AllCity Talent Competition at Eastside.

This year the Concert Band and concert was considered the high point of the year as well as being the most sophisticated one. We were dressed in all white. The boys in white tuxedos and the girls in white gowns.

The banquet this year is to honor the thirty eight seniors for their academic school year.

This is the E.H.S. Bands, the victories, the work and a taste of success. This is what the E.H.S. Marching Band and Units, and Stage Band is all about.

Mr. Speaker, the Eastside High School Marching "100" Band and Marching Units has engendered deep admiration and respect from all of the residents of my Congressional District and State of New Jersey and their musical excellence, marching proficiency and sparkling exemplary performance are a special source of great pride and honor to all of us, their parents, teachers, classmates and many, many friends. Deepest appreciation is also extended to the families, supporters and school administrators for their continuing encouragement and confidence.

Mr. Speaker. I appreciate the opportunity to seek this national recognition of the outstanding contribution the team members have made to the recreational enjoyment of our community. We do indeed salute the Eastside High School Marching "100" Band and Marching Units.●

SEPARATE GOVERNMENTAL ENTITY CELEBRATION

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CONTE. Mr. Speaker, as my colleagues who have been fortunate enough to visit my district in western Massachusetts know, autumn is one of the most beautiful seasons of the year in that area. The fall foliage will be at its peak in many parts of Massachusetts' First Congressional District this weekend. But besides celebrating the natural beauty of the region, residents of Adams, Mass., will also be marking and making history this Sunday by commemorating the 200th anniversary of the incorporation of the town as a separate governmental entity.

This weekend, Adams will officially celebrate the anniversary of the date of incorporation with a "rededication" program in the center of the town. The community has held various bicentennial activities throughout this year culminating in a gala weeklong slate of events in August, featuring a parade, art show, concert, road race, picnics, and other appropriate festivities.

So that my colleagues might know the reasons behind all of this celebration, let me provide this "thumbnail" history of the town of Adams, Mass.

The town of Adams lies in the northwest corner of the Commonwealth of Massachusetts in Berkshire County. As early as 1749, this area was explored. It was then that the town's borders were set up, 7 miles from north to south and 5 miles from east to west, and they remain the same today. At first, it was known only as "number one." Later, the name was changed to East Hoosac. When it became a township in 1778, it was named Adams after Samuel Adams, the patriot who stirred the people of Massachusetts to war against the British in the American Revolution.

The neighborhood of Adams was the last to be settled in the State. The territory, to prospective settlers, appeared defenseless, borderless, and surrounded by forbidding wilderness. Originally, the town was accessible only by an Indian trail known as Pastoosac Path, which led from southern Berkshire to join the Mohawk Trail in North Adams. It was required of new townships to have 60 settlers within 5 years; the settlers must have built their own houses and cleared, fenced, and cultivated 7 acres of land each. A Protestant minister of Gospel must also make his residency there. The Quakers were among the first settlers in the town in 1762. The first settlers of Adams decided who would own which lot by holding drawings. The Reverend Samuel Todd bought 400 acres in 1765. He came from Connecticut and, as expected, many of his parishioners followed him to Adams and settled there. In 1778, the town divided to become North Adams and Adams.

The town lies in the heart of the Berkshire Hills, to my mind, one of the most beautiful places in the world. Mount Greylock towers above the town and is the highest peak in the State—and in southeastern New England—at an altitude of 3,505 feet Peaceful farms, natural caves, lime formations, brooks, waterfalls, deep ravines, gorges, an abundance of wildlife, ski areas, and the scenic Mohawk Trail all add to the natural beauty and interest of this town and surrounding areas.

The town of Adams is famous as the birthplace of Susan B. Anthony, the courageous advocator of women's suffrage. She was born in 1820 and her house still stands. I think it is particularly important to note that the legislation creating the Susan B. Anthony dollar coin was signed into law this very week as the town of this great American woman's birth celebrates its 200th anniversary. I was pleased to be a cosponsor of the bill that became law this week.

It was from Adams also that George Nixon Briggs came (1796–1861). He served as Governor of Massachusetts and represented the Berkshire District in Congress for six terms.

The sons of Adams have been well represented in every war from the Revolution to Vietnam. The Friends were exempt from early military service, but some volunteered at the Battle of Bennington. Some also took part in Shays' Rebellion, 1788–87, an armed citizen revolt against taxation and depressed economic conditions, but were pardoned afterwards. Memorial Tower, which was erected on Mount Greylock at the 105 mark, pays tribute to the sailors and soldiers of Massachusetts.

Industrial development in Adams began in the early 19th century when William Pollock sold a horse he won in a lottery and bought and operated a mill. Soon sawmills, gristmills, and tanneries flourished. In 1811, the first cotton mill was built in Adams by a joint stock company of 20 citizens of the town. In 1845, the railroad was completed in Adams and this development changed Adams into an early center of American cotton manufacturing and an important area for business. Textiles and paper products remained the center of the town's industry until well into the 20th century. So prominent was this business that in 1890, President McKinley came to lay a cornerstone at the Plunkett Mill.

Today, Adams is home in 11,000 residents. Although its earlier industrial base has been eroded by migration of the textile and paper industries from the Northeast to the South, Adams remains a community of industrious men and women who continue to take pride in their community, its past, and its future.

Yes, the town of Adams has much to be proud of on its 200th anniversary. I am proud, in turn, to represent this fine community in the U.S. Congress. I invite my colleagues to join me in extending a warm "Happy 200th Birthday" to Adams, Mass.●

LEGISLATION TO REQUIRE SEARCH WARRANTS FOR CERTAIN CUSTOMS SERVICE MAIL OPENINGS

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PREYER. Mr. Speaker, I am introducing today H.R. 14328 which would require customs officers to obtain a search warrant before they can open incoming sealed international mail that weighs one ounce or less.

This requirement would implement the recommendation recently approved unanimously by the Government Operations Committee in House Report 95–1681 and based on more than a year of examination of Customs Service mail-opening practices by the Subcommittee on Government Information and Individual Rights, which I chair.

I believe that this warrant procedure will strike an appropriate balance between the interest in protecting privacy of correspondence and permitting Customs to perform its missions.

Customs officers currently can open sealed international letter-class mail entering the Customs territory of the United States without a search warrant if the officer has seasonable cause to suspect the presence of a prohibited or dutiable article in the piece of mail. Customs regulations prohibit the officer from reading any enclosed correspondence without a warrant.

The Supreme Court in 1977, in United States against Ramsey, upheld the warrantless opening process, saying the need to protect the Nation's borders made the warrantless search reasonable under the fourth amendment. The Court said the regulatory prohibition on reading correspondence should protect first amendment speech and privacy interests.

An examination by the subcommittee found, however, that correspondence was improperly read in some instances and referred to other investigators. Customs also had no data on how much mail was being opened or for what reasons.

In response to the committte's earlier recommendations, the Customs Service began keeping detailed mail-opening statistics this year. These figures show that customs officers are opening barely one-fifth as much mail as the 270,000 pieces the Government estimated was annually being opened when it argued the Ramsey case before the Supreme Court. Openers are finding improper contents in about 60 percent of the openings, compared with about 17 percent stated in the estimates given the Court. In another response to the committee's recommendations, the Postal Service is now observing all mail openings by customs officers.

Despite these improvements, however, the committee concluded that a warrant requirement for lightweight mail would better protect first amendment interests without imposing an onerous administrative burden on the Customs Service. Letters weighing 1 ounce or less would be presumed to contain only correspondence. They could be opened only if the customs officer obtained a search warrant based upon a showing of probable cause to believe the letter contains something other than correspondence. The committee reasoned that heavier mail articles can more easily conceal contraband or dutiable merchandise, hence should continue to be subject to opening without a warrant.

In addition to requiring the warrant for lightweight mail, the bill would also elevate from regulation to statute the prohibition on reading any correspondence in sealed mail of any weight without a search warrant.

By introducing the bill at this time, we hope to set the stage for early consideration and passage in the next Congress. Members who would like to join in cosponsoring this bill when it is reintroduced in January should contact the staff of the Government Information and Individual Rights Subcommittee.

I also wish, without objection, to insert into the RECORD at this point documents concerning two of the administrative actions which have been taken in response to the committee's earlier report on Customs Service mail-opening, House Report 95–794. The first is an agreement between the Postal Service and Customs Service providing for postal observation of mail-opening by Customs. The second is Postal Service procedures implementing that agreement. The third is a Defense Department decision to stop specially referring certain suspected mail items to the Customs Service.

The documents follow:

AGREEMENT

Since existing administrative procedures for the customs clearance of sealed letter class mail entering the Customs Territory of the United States include two rules particularly designed to safeguard the privacy of correspondence, namely, that (1) no such mail shall be opened by the Customs Service if it appears to contain only correspondence and, (2) no Customs officer or employee shall read any correspondence found inside such mail, or allow anyone to do so, except under a search warrant authorized by law; and public confidence that these procedures are being followed may be enhanced by providing for the independent observation of customs sealed letter class mail opening and examination by a responsible postal employee;

therefore, the United States Postal and Customs Services agree through their undersigned representatives as follows:

I. The Place That Sealed Letter Class Mail May Be Opened And Its Contents Examined.—No sealed letter class mail item may be opened, nor may its contents be examined, except in a facility jointly designated by the Postal and Customs Services for that purpose. Nothing in this section shall be construed to preclude either the lawful seizure of any sealed letter class mail item or some or all of the contents thereof (with or without a search and seizure warrant, as provided by law), or the lawful removal from the designated facility of such an item or its contents, or its opening, examination, treatment and disposition in accordance with law, after it has been lawfully seized.

II. Observation Of Opening.—No officer or employee of the Customs Service shall open sealed letter class mail addressed for delivery within the Customs Territory of the United States, which originated outside of it, unless a responsible postal employee is present to observe the opening. The Postal Service, upon receiving notice from the Customs Service that sealed letter class mail is to be opened, shall make a responsible postal employee available to observe such openings without undue delay.

III. Examination Procedure.—After sealed letter class mail has been opened no officer or employee of the Customs Service shall examine the contents of sealed letter class mail, unless a responsible postal employee is present to observe the examination, or measures are taken to prevent the contents of the mail item which appear to be correspondence from being exposed to view.

IV. Definitions.—For the purposes of this agreement:

A. The Customs Territory of the United States consists of the 50 States, the District of Columbia, and Puerto Rico.

B. A responsible postal employee is the employee designated by the Postal Service to observe the opening of sealed letter class mail, and the examination of its contents, and to report any failures to follow the proper procedures with respect to such openings and examinations.

V. Joint Implementing Regulations.—The Postal and Customs Services with each other's consent shall issue, amend, and maintain in effect any regulations necessary to implement this agreement.

VI. Delegations Authorized.—Either the Postal Service or the Customs Service may delegate any of the responsibilities vested in itself by this agreement to any of its subordinate officials, including the heads of different field units, so long as each delegation shall be in writing and reasonably available to inspection by the personnel of the other agency for official purposes upon request.

VII. Relationship of Agreement to Existing Regulations, Agreements, and Procedures.—This agreement is intended to supplement and be generally consistent with existing regulations, agreements, and administrative procedures. No action or inaction is authorized by this agreement's failure to prohibit such action or inaction specifically. No action or inaction is prohibited by reason of this agreement's failure to provide specifically for it.

VIII. Field Office Procedures.—Field customs and postal installations may agree to any details of administration (such as the joint designation of the hours in which mail may be opened and examined in the presence of a responsible postal employee) which are not otherwise provided for, not inconsistent with this agreement, and not inconsistent with the requirements of any applicable laws or regulations.

IX. Effective Dates.—This agreement shall become effeotive immediately after its execution by an authorized representative of each agency. The procedures required by this agreement shall be initiated as soon as practicable on such date or dates as may thereafter be jointly agreed.

For the U.S. Postal Service:

W. F. BALGER,
Postmaster General.

March 21, 1978.

For the U.S. Customs Service:

R. E. CHASEN,
Commissioner of Customs.

March 22, 1978.

U.S. POSTAL SERVICE,
Washington, D.C., April 25, 1978.

Subject: Postal Procedures to Implement Agreement between U.S. Customs and U.S. Postal Service.

To: Regional Postmasters General—Northeast Region, Eastern Region, Central Region, Southern Region, and Western Region.

On March 21 and 22, 1978, an agreement was signed by Mr. Chasen, Commissioner of Customs, and Mr. Bolger, Postmaster General, for postal representatives to observe the opening of sealed letter-class mail and to safeguard the privacy of correspondence. Attached is a copy of that agreement. (Attachment No. 1)

Under this agreement, the U.S. Customs is required to advise the U.S. Postal Service whenever it intends to open sealed letter-class mail. The U.S. Postal Service is required to furnish a responsible postal supervisor to observe the opening of sealed letter-class mail. Attached is a list of those offices where Customs indicates it intends to open sealed letter-class mail. The complete list of offices must not be distributed. Each office will be individually advised. (Attachment No. 2)

It is suggested that, at most points where examinations will take place, a supervisor from each tour be designated as the responsible postal employee. Each Postmaster in the city on the attached list will furnish to the Postal District Manager, your General Manager, Logistics Division, and local Customs Mail Managers the name, title and duty hours of each employee and alternate designated to be the responsible postal employee. Postmasters must furnish to all concerned any changes in the list of employees immediately as they occur.

The General Manager of each Regional Logistics Division must assure that each designated employee understands the requirements of this agreement.

The Postal regulations on all aspects of Customs clearance of mail are in Postal Service Manual 115, as published in the Federal Register on April 5, 1978 (Attachment No. 3) and USPS Publication 42, International Mail, Part 820 (Attachment No. 4). Note especially PSM 115.91 and the exemptions from Customs clearance in Publication 42, Section 821.1 a, b and c. Customs regulations on mail clearance are in Part 145 of the Customs Regulations 19 C.F.R. 145 (1977), as amended in the Federal Register on April 6, 1978 (Attachment No. 5). Note especially 145.0 through 145.3, as amended. We anticipate that certain revisions of Part 820 of Publication 42 will be issued shortly.

Postal supervisors responsible for observing Customs mail procedures shall specifically observe whether each of the following four requirements is satisfied before a sealed letterclass mail is opened without a search warrant.

1. The item originated outside the Customs Territory of the United States (abbreviated "CTUS" and defined as the 50 states, the District of Columbia and Puerto Rico).

2. The item is addressed for delivery within the CTUS.

3. The item is excluded from each of the three categories of diplomatic and governmental mail listed in Publication 42 (Sec. 821.1 a, b and c) as exempt from Customs clearance.

4. The item appears to contain something other than correspondence and that the Customs officer records his reason for opening and has not read the correspondence.

After sealed letter-class mail is opened without warrant or consent, the supervisor shall specifically observe whether the following four requirements are observed.

1. The inspection of the contents without a warrant is confined to articles other than any contents appearing to be correspondence.

2. Inspection or seizure of any contents appearing to be correspondence is authorized by a valid search warrant.

3. If Customs inspection of the contents of the item is not completed by the end of the observation period, measures are to be taken to prevent any contents which appear to be correspondence from being exposed to view. If the Customs examination of a letter-class item cannot be completed due to insufficient time or other reasons, the item will be re-enclosed in an envelope, sealed, initialed or signed by the USPS and Customs officials and secured until the process can be completed.

4. If the item is not selected for a controlled delivery, the item is stamped with the appropriate Customs endorsements, including the opener's badge number or other identification, the coded reason or reasons for the opening and the Postal witness' initials.

Irregularities noted by the supervisor will promptly be brought to the attention of an appropriate Customs supervisor. A memorandum report of the irregularity, to include the result of discussions with the Customs supervisor, will be prepared and forwarded to the Postmaster who will, in turn, furnish a copy to the Inspector in Charge; General Manager, Logistics Division' Director, Office of Transportation Services, USPS Headquarters; and Customs Service Headquarters, 1301 Constitution Avenue, Washington, D.C. 20229.

Normal Customs hours of operation are similar to Postal Service operations and, therefore, should not cause any major problems.

Any sealed letter-class mail will be furnished to Customs upon the request of the local Customs official. Letter-class mail may include items up to four pounds from all foreign administrations except Canada, where sealed letter-class mail is up to sixty pounds. None of the above mail can be open without the local responsible postal supervisor in attendance. Green label mail openings do not have to be observed because green label mail is not considered to be sealed letter-class mail under this agreement.

It is not the intention of these instructions to change in anyway the rules and handling of registered mail or parcel post mail entering the Customs Territory of the United States.

The implementation date of these new procedures will be June 1, 1978.

E. V. DORSEY,
Senior Assistant Postmaster General Operations.

MARCH 13, 1978.

Mr. JOHN B. O'LOUGHLIN,
Director, Duty Assessment Division, U.S. Customs Service, Washington, D.C.

DEAR MR. O'LOUGHLIN: In your December 22, 1977 letter regarding termination of the suspect letter class mail program, you stated that the program had not been particularly effective and that you had no objection to the military terminating the program. Subsequent to this letter, the Military Postal Services, the Military Investigative Services, and the Defense Investigative Program Office were contacted to determine the benefits of the program to DOD. It was unanimously agreed

to that the value of the program to DOD was minimal and did not merit continuation. This resulted in a decision to terminate the program of letter class mail referral.

This decision was informally presented to staff members of the House Government Information and Individual Rights Subcommittee, Committee on Government Operations, and was favorably received.

After receipt of your February 13, 1978 letter requesting continuation of the program for Europe only, another review of the justification presented was undertaken. In view of the low number of referrals from Europe and the small number of seizures resulting, DOD remains of the opinion that the continuation of the program is not beneficial to DOD. Continuation of the program for Europe only would, in effect, be discriminatory to personnel assigned to that theater of operations. The inspection of letter class mail by U.S. Customs Service personnel and sniffer dogs in CONUS, could provide just as effective a system for intercepting contraband.

It is DOD's intention to notify military postal activities, worldwide, that effective 30 April 1978, the military suspect letter class referral program is terminated. DOD Regulation 5030.49R will be changed to read in paragraph 6003c: "All outgoing letter class mail evidencing drug/narcotic contents is subject to surveillance in compliance with regulations of the respective military services."

Should the U.S. Customs Service determine that military letter class mail later becomes a route of introduction of commercial quantities of contraband or a serious threat to prevention of the introduction of narcotics to the customs territory of the United States, and supportive evidence is presented, discussions with DOD, USPS, and USCS should be initiated by your office to determine the most effective means of countering such activity.

Sincerely,

NATHANIEL R. THOMPSON, Jr.,
Brigadier General, GS, Director of Transportation, Energy and Troop Support.

CARL KARCHER, AN AMERICAN SUCCESS STORY

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTERSON of California. Mr. Speaker, on November 9 the Orange County chapter of the National Conference of Christians and Jews will honor Mr. Carl Karcher, of Anaheim, Calif., as "Humanitarian of the Year."

Mr. Karcher, who is a strong believer in the American free enterprise system, owns one of the largest, privately-owned fast food chain of restaurants in the United States. His patriotism and dedication to our American ideals are impeccable.

His success in the business world symbolizes the American dream. Mr. Karcher ended his formal education in the eighth grade. He left Ohio in 1937 and moved to Anaheim, Calif., where he worked in his uncle's feed store.

He launched his business enterprises in 1941, when he borrowed $300 to buy a hot dog stand in downtown Los Angeles. From this humble beginning grew Carl Karcher Enterprise, which include Carl's Restaurants and Taco de Carlos.

Mr. Karcher is very active in California politics and has appeared in Who's Who in American Politics. He has also been knighted into the Order of Malta, the highest honor a law person can attain within the Roman Catholic Church.

I know my colleagues join me in honoring Mr. Karcher for his patriotism and dedication to the American way-of-life. His success in American business serves as a reminder that in America opportunity for a better life is truly a reality.●

NITRITES CONTROVERSY

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BLOUIN. Mr. Speaker, I recently had the opportunity to present my views before the House Agriculture's Subcommittee on Dairy and Poultry concerning the nitrite controversy. Given that, this is a subject of great concern to the people of my home State of Iowa, as well as the people of this country, I would like to insert in the RECORD at this time my remarks on this matter for the House's consideration.

The testimony follows:

Mr. Chairman, I realize that it is often fashionable to seek out "band wagon" issues. The matter I want to bring to committees' attention, however, is a very serious one and could result in a disastrous state of affairs, economically speaking, for my home State of Iowa if agencies of the Federal Government make any hasty determinations as it relates to the use of nitrites.

I do not believe that there is one person in this country who is not genuinely interested in the physical well-being of their fellow man. Nitrites are not a "convenience," but rather a "necessity" in the fight against botulism.

As most of the members of this Committee are aware, I have the honor of representing a state whose economy is dependent upon pork production. The question we address today, however, is not one of who we represent, but rather how can we find a reasonable and common sense solution to protect the physical and economic health of this country.

In an attempt to address this problem before any arbitrary action is taken on this matter, I recently joined with Congressman Wampler and Mathis in co-sponsoring legislation that effectively prohibits the HEW and USDA from banning or phasing out nitrites unless certain requirements are met.

Both bills would require that it be proven beyond a reasonable doubt that nitrites as a food preservative have a significant carcinogenic effect on humans. Second, the bills require that there be a commercially available substitute before there is a ban, but most importantly that such a substitute is as effective in preventing botulism. Finally, the bills require that any "substitute" be economically affordable for both producers as well as consumers.

Most reasonable people agree that banning nitrites in meats will not eliminate these chemicals from the digestive tracts of individuals. I do believe, however, that it is important that the Congress enact legislation of this type to assure that reasonable guidelines will be followed in dealing with this matter. It is my belief that these bills represent a modest approach in dealing with this issue and I strongly urge that they be given the speediest of consideration.●

THE IRS ATTACK ON THE INDEPENDENT SCHOOLS—NONGOVERNMENT SCHOOLS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McDONALD. Mr. Speaker, the Internal Revenue Service has recently proposed that new regulations require that private or independent schools claiming tax-exempt status, arising out of being church operated, must affirmatively demonstrate that it is not guilty of any form of racial discrimination. In other words, the school is guilty unless it can prove it is innocent. The whole approach of the IRS is a very thinly veiled attempt to secure control of some private and independent schools via the back door method of IRS regulation. Dr. Gary North has recently written a very lucid article on this controversy, which appeared in the Temple Times, the weekly voice of Calvary Temple in East Point, Ga., on October 8, 1978. The article follows:

THE I.R.S. ATTACK ON THE INDEPENDENT SCHOOLS

(By Gary North)

We are beseiged with so many crises these days that one more crisis is hardly newsworthy, even in the crisis newsletter markets. It seems that every week brings us another major disruption of the American system. We seem to be losing a battle every time we turn around.

Over the past decade, however, there is one area where those of us who are fearful of the constantly expanding messianic State have made some important gains. This is in the area of education below the college level. The independent day-school movement has been giving fits to the public schools, the same way U.P.S. has been giving fits to the Postal Service, and for many of the same reasons. Any monopoly that is several generations old is an easy mark for innovators. Nowhere is this more true than in the field of education. And an innovator here is very often someone who is assigning students readings from the century-old McGuffey Readers.

Simultaneously, the disintegration of the public schools has called attention to the need for alternative schools. This disintegration is so widespread that long-time political liberals are aware of its effects. A neglected government publication in 1975 was the Preliminary Report of the Subcommittee to Investigate Juvenile Delinquency, which was titled (incredibly), Our Nation's Schools—A Report Card: "A" in School Violence and Vandalism. Even more incredible than its incendiary title is the fact that this Senate Judiciary Subcommittee was chaired by Sen. Birch Bayh.

How bad are the public schools? Here are a few statistics from the report, based on data from 1970 and 1973:

Homocides increased 18.5%

Rapes and attempted rapes increased by 40.1%

Robberies increased by 36.7%

Assaults on students increased by 85.3%

Assaults on teachers increased by 77.4%

Drug and alcohol offenses on school property increased by 37.5%

This was not confined to any single geographical region; crimes were up everywhere. Some areas had their specialties. Robberies in the West increased by 98.3% The South's specialty is student assaults on other students: up 276.9%. In the North-Central region, drug violations were up 97.4%, and

rapes were up 60%. In the Northeast, the increases were usually below the national level. The reason is clear: the disintegration in the Northeast began a generation ago; they had a lot larger base of crime and assaults to build from. In other words, it is the white, suburban, middle-class high school that has exploded upward in the grim statistics. Busing has helped, but the philosophical disintegration is the basic cause. (If you want a free copy of the committee report, a few may still be available. If not, the bulk of the report has been reprinted in the scholarly journal I edit, The Journal of Christian Reconstruction. You can buy a copy of the "Education" issue for $4.00 from Chalcedon, P.O. Box 158, Vallecito, Ca. 95251.)

Meanwhile, the scores on the national college entrance exams have fallen each year for thirteen consecutive years. What about costs? The figures are supplied by Frank Armbruster's masterful (and ridiculed) study, *Our Children's Crippled Future: How American Education Has Failed* (New York Times-Quadrangle, 1977). In 1950, the total spent by all levels of government on primary and secondary education was $6.7 billion. Total expenditures by 1974 had risen to $61.6 billion. Most of this increase came after 1960, when the decline of the schools began to set in. Yet the school population increased from 28.6 million in 1950 to 49.7 million. The cost per pupil, *when adjusted for price inflation,* rose 141% more than the general price level in these years.

The crisis of American public education is only just beginning. The bad years lie ahead. The teachers who will be coming into the school systems next year, 1979–1980, are those who started first grade in 1963–64—the year academic decline became noticeable in the high school college entrance scores, the beginning of the curricula upheavals of the mid-1960's. The products of the disaster are now coming on stream. The best hope we have for public education is that they will not be able to find jobs teaching. Of course, this means very little; the graduates of 1970, who spent their college years in the campus turmoil, have been teaching in the public schools for the whole decade. You wonder why Bayh's committee found signs of total disaster?

THE INDEPENDENCE SCHOOLS

The [true] Christian schools were not established to escape integration. Most of the successful ones were established in communities in the North, West, and Midwest where the public schools were legally integrated. They were not built in the inner city; they were built in white suburbs, and long before busing was a major threat to local school stability. These schools were begun to challenge the monopoly of tax-supported socialist education, not to escape blacks. These schools are based on an honest to God hatred of the public schools, not a hatred of blacks. Let me assure you, the administrators of the government schools know towards whom the hate is directed. They are pulling the same familiar tactic that white politicians in the South after 1875 used so successfully: use the Negro as an excuse for every corrupt bargain possible. The public school administrators resent the very successful academic challenge of the independent schools, so they are trying to pin the charge of racism on their enemies. The southern politicians wanted to "outsegregate" moderate politicians, and the modern politicians wanted to "out-integrate" the private schools, who constitute a real threat to the system. In the old days, politicians "worried" *about* Negroes; these days they "worry" *for* Negroes; and the only thing that stays constant is the third-rate education that government schools provide *to* Negroes. The *real issue,* then as now, is *the preservation of monopoly power.*

The Christian schools are religious in character. They are based on the premise that education is always the product of a world-and-life perspective, and that to subsidize "neutralism" is to subsidize a rival religion. The Christian schools that are seriously independent—and the strictly parochial schools of the past were not always consistent on this matter—want no government tax dollars, no government school textbooks, no government interference, no government licensing, no government anything. They are religious in the broad sense of the term: they want no subsidies for their religion, and none for anyone else's. They see the public schools in the same way that independent churches saw the State-supported churches 200 years ago: an infringement on religious freedom. The established churches of both eras resented this criticism of their tax-supported position. Priesthoods like your tax dollars. They would like a monopoly even more. And a monopoly with compulsory attendance: that would be heaven on earth.

FOR THE PRIESTS

Now that monopoly is being seriously challenged. Furthermore, those who have attended schools without major discipline or vandalism problems, schools supported by parents, schools that assign homework, schools that cannot afford frills, schools that concentrate on basic education, schools that are openly committed to a specific philosophical perspective, schools that encourage student competition, are usually far better prepared academically than children in the same grades in the government schools. Surprise, surprise: free enterprise is more efficient than government monopolies. Isn't that amazing?

What this indicates is that a real revolution is in the making. A new generation of several million students is being created. These students share a basic philosophical perspective—one which usually is hostile to expanded State power. They are better trained than the average student in the government schools They will be more willing to take their children out of the government schools later on in life. They tend to have larger families than government-trained students. (Genesis teaches men and women to be fruitful and multiply.) This generation is also quite willing to vote no on school bond issues. They are, in a real sense, a corrupting influence, as far as the public school administrators are concerned. If the independent school movement continues to grow for the next ten years as it has in the past dozen years, the leadership of the future could be significantly altered. Those secular humanistic priests who are now using our tax-collected revenues to maintain their stranglehold on American thought are scared. They have a right to be. This is probably the most important area of conservative successes in the country. It is the fight of our time. Will there be freedom for those not sharing prevailing government views to educate their children in terms of a totally different political and economic philosophy? Will the established priests stay established?

THE COUNTERATTACK

The bureaucrats are really frightened. They are taking Christian parents to court in state after state to get them to take their children out of unlicensed schools. They are jailing parents, pastors, and school administrators. I am not exaggerating. They are taking children out of homes and putting them in foster homes. They are taking schools to court daily. The Christian Law Association, which is headed by the lawyer who got the Amish their freedom from public education in the early 1970's, is being flooded with requests for legal defense. Almost one request per day comes in. Their success in beating the state so successfully in the Ohio case last year has led other states (like North Carolina) to crack down fast, hard. Anyone doubting the nature of the war against parents who send their children to Christian schools should send in five or ten dollars as non-tax deductible gift and ask for a copy or two of the CLA Defender, the magazine chronicling these horror stories. Write to: CLA Defender, P.O. Box 30290, Cleveland, Ohio 44130. Another organization that is in the forefront of this independent school movement is the Christian Schools of Ohio. The director, Alan Grover, has written the story of the Ohio case, which is a landmark decision against the regulatory powers of a state school department, Ohio's Trojan Horse. You can order a copy for $5 from Christian Schools of Ohio, 6929 W. 130th Street, Suite 600, Cleveland, Ohio 44130.

A fight is beginning that will help to determine the future of freedom of speech in the nation. The issue is nothing less than this. If one group of people can capture a monopolistic agency, compel all children to attend it, write its textbooks, indoctrinate the victims for a dozen years, minimum, and then send them out at age 18 to vote, where do you think we are headed? Hayek, in The Road to Serfdom (1944), inserted a chapter, "Why the Worst Get on Top." If the stakes are high enough, and the power is centralized enough, it will be worth capturing. The most ruthless men will strive to capture that power. The generation of public school textbooks over the last two generations, but especially since 1964, is testimony of the reality of Hayek's principle.

THE I.R.S. STRIKES

On August 22, 1978, the Federal Register published a frightening document [4830–01]. The Commissioner of the I.R.S. has announced that schools, including church-operated schools, that started operations about the time of school integrating (meaning after 1957, but especially after 1960), will, as of the end of October, be automatically assumed to be racially discriminatory, at which time their tax-exempt status will be removed. Guilty until proven innocent has always been the legal status of those challenged by the I.R.S., the courts have determined. (Did you know this?) Now the schools are under the auspices of the I.R.S., and they are guilty until proven innocent. Schools will be able to appeal this removal of their tax-exempt status in October by proving:

1. That they are hiring racial minority teachers.
2. That they are actively recruiting minority students.
3. That they have established scholarships for racial minorities.
4. That they are increasing the proportion of racial minority students.
5. That they now have his percentage of minority students: 20 percent of the percentage of minority students in the school ages in that community.

They are now doing to private schools what the boys at HEW are doing to every private college and university in the country: integrate, by percentage numbers. Pay for their educations, now. Recruit them, now. Pay taxes to the public schools, pay tuition at the school, make donations to the church or school in addition, and now, to make certain you conform to the new rules, pay for minority students to come and fill the percentage slots.

They are trying to bankrupt the schools. The war is being waged at every level, from every side. It is a war against those who deny the sovereignty of the messianic State. It is a campaign of harassment. How many of these schools were established, outside of the South (and even inside the South), in order to escape blacks as blacks? (To escape blacks as products of secular humanism, welfare, and the rhetoric of Stokely Carmichael, I will admit my guilt. I'd run just as fast to get away from Abbie Hoffman, Tom Hayden, and the old Jerry Rubin, too.) Most of these schools have a few black students, but not many black parents have

understood the threat to their future as schools pose to them. There are exceptions, like the remarkable mother of Texas Representative Clay Smothers, who started a private school for black students. I would rather have my kids in her school than in a government school. But the fierce independence of a woman like that, or the conservatism of her son, is a very rare commodity in any community. It costs in dedication, money, time, and sweat far more than most people are willing to pay. And if the bureaucracy gets its way, Mrs. Smothers' school will probably be shut down, since their enrollment does not include enough Mexican-Americans, or whites, or Jews, or South Moluccans.

Lyndon Johnson once drew a lot of applause for telling the following story. He said he was talking with a southern Congressman, and the man told him how sad it was that a fellow couldn't give "an old-fashioned Democratic speech" back home any more. He couldn't talk about the old issues of economics and the plight of the little man. No, if you went back home, the politics of the day compelled you to give the same speech over and over: "Nigra, nigra, nigra." So said Sam Rayburn.

Well, that was a good line back in 1964, and Johnson got a five-minute ovation from the Democratic liberals. I have news for them: it's still the popular litany today, only the HEW bureaucrats and the I.R.S. bureaucrats are the ones chanting it. Today, as in 1937, it has little to do with Negroes, and everything to do with men's political power. If you doubt my analysis, consider the Bakke case. It didn't hit the front pages because of Mr. Bakke, whose charisma is something less than that of Calvin Coolidge. The issue is this: who controls the schools?

It's a phony issue. The ultimate issues are far, far deeper. They are issues of the First Amendment. Will one man's religion be subsidized by other people's tax dollars (the religion of secular humanism) at the same time that another man's religion is not even allowed tax exemption, let alone access to the public treasury? Will alternatives to the government monopoly of education be permitted? Will other textbooks than state-approved ones be allowed in schools throughout the nation? Will every parent be compelled to finance the destruction of his children's values—the values he tried to give them before the State took the children away?

Some of you worry a lot about taxes. Yet you don't worry about what is happening in the public schools. You have tried to reduce your tax burden, but you have allowed the messianic State to take your children into its indoctrination centers for a minimum of twelve years, or in some cases for lots longer (though the later years were not compulsory). We live in an era in which men grumble about 25 percent tax brackets—those who have only recently been forced into them by inflation—and never give a thought to the confiscation of their children. The State has stolen men's children and they have remained quiet. And will they protest when the same State takes their money? Are children worth less to us than money?

If the drift into socialism continues, do you think it would be a good idea to have alternate schools, teaching totally different curricula, financed by parents or other voluntary organizations, so that your grandchildren will have a better place to learn than the compulsory, monopolistic, tax-supported government schools? If you think it's a good idea, you're running out of time. I am not exaggerating. We are literally at the crossroads. This month.

Please, for the sake of the First Amendment, write a letter, no matter how short, and make six photocopies (as required), protesting this massive infringement on freedom of speech and religion. You athiests, Jews, anarchists Mormons, Baptists, Roman Catholics, buddhists, and worshippers of anything except the State, write a letter. You're next. Don't sit around tossing your neighbor to the alligators, on the assumption that he will be satisfied. That alligator is hungry. You're next.

There are only a few days remaining. All letters of protest (6 copies) should be addressed to: Jerome Kurtz, Commissioner of Internal Revenue, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

Be polite. Be firm. Just let them know that there are people out there, of many faiths, of many perspectives, who resent the fact that a basic Constitutional rights is being threatened. This is a First Amendment issue, not a tax issue, not a race issue, and certainly not a neutral issue. If you have to put it on lined paper, do it. If you have to write it in crayon, do it. But please stand up and be counted on this one. If the I.R.S. succeeds in bankrupting these little schools before there are enough of them to warrant numerous competing curricula, then we have speeded up the timetable on the march into socialism.

If you can get a few other people to follow through on this project, it will really help. I am, therefore, suspending my copyright privileges for this issue. Xerox all you want. Take them to your pastor. If he can't get enthusiastic over this topic, you might try locating a new church. If they shut down tax-exempt church schools on the basis of racial discrimination, how do you think the churches are likely to fare? Or the synagogues? (Where are your Puerto Ricans, Rabbi Stein?)

It can't happen here, right? Not to our churches. Sure, the bureaucrats can require busing, even in Los Angeles, where white students will be driven for up to an hour and fifteen minutes to ship them into ghetto schools. After all, schools are tax supported. And private schools have tax exemption; the exemption is really a kind of subsidy, since the treasuries aren't getting any money from them. Yes, even church-oriented schools are getting a subsidy, since they also have tax exemption. I guess the logic holds up. But churches are completely different. The State can assign racial quotas to churches just because they're tax exempt. Right?

It is always amazing to me how the "alligator" mentality dominates people. They won't get me. You, maybe; I can understand sacrificing you. But not me. I'm immune. I'm part of the American tradition. I'm a *little* guy.

Tell it to Solzhenitsyn.

This incredible I.R.S. persecution has been kept very quiet. Christian school administrators are absolutely unaware of it. There is no mobilized campaign. I am asking you to join an effort which will probably lose until the courts overturn it, if ever. All I'm asking is that you go down fighting on this one. If they close our independent schools, and you have done nothing, then you are, in some small degree, responsible. Write your letter, now. It needn't be eloquent. It needn't even be typed, although that would help. All it needs is five copies and the original. (Bureaucrats, after all, are bureaucrats.) ●

MANDATORY DEPOSIT LEGISLATION: WHY IS THE TIME NEVER RIGHT?

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. DRINAN. Mr. Speaker, as this Congress draws to a close, I note with great disappointment that we have again failed to enact mandatory beverage container deposit legislation. There is no question that enactment of such legislation would save significant amounts of energy and raw materials. But for too long we have allowed a powerful special interest to block consideration of this valuable legislation which would contribute significantly to the goal of making our Nation more efficient in its use of energy and natural resources.

While opponents of this measure warn that its enactment would be unpopular, ineffective, and result in increased costs and lost jobs, the experience of the States which have adopted mandatory deposit legislation has been uniformly positive. In Oregon, which enacted its deposit law in 1972, public opinion polls document that 91 percent of the people are pleased with it, and studies reveal that 90 percent of the bottles and 80 percent of the cans are being returned. No price increase has been attributed to the deposit law, and after the first 2 years of the law roadside litter was down 42 percent on a volume basis, and beverage container litter was down 83 percent. Oregon's law is not only saving money and resources—including 1.4 trillion Btu's annually—it has also created a net gain of 365 jobs, according to a study prepared at Oregon State University.

There is less data available on the experience of the other States, which have adopted deposit legislation more recently, but there is no doubt that both Vermont and Maine are pleased with their laws. Their experience mirrors that of Oregon: less waste, lower costs, decreased energy use, and increased jobs. Michigan, Connecticut, and Iowa have recently adopted legislation of this kind, which is further confirmation that the American people have confidence in the validity of the Oregon, Vermont, and Maine experience and in the value of deposit legislation.

The time has clearly come to adopt a national deposit bill. Such action would aid the industry by creating a single uniform deposit standard, but more importantly a national bill would greatly reduce litter, and save significant amounts of energy, resources, and money, while providing a net increase in jobs.

In January of this year the Federal Interagency Resource Conservation Committee (RCC), which includes representatives of the Energy, Labor, Commerce, Interior, and Treasury Departments, as well as the Environmental Protection Agency and other government agencies, released a comprehensive study concerning national deposit legislation. While a recommendation for or against a national deposit bill will not be issued until March 1979, this preliminary study concluded:

> The imposition of mandatory deposits is an effective means for reducing litter associated with beverage containers.

It also includes the best available estimates on the probable impact of the enactment of national mandatory beverage deposit legislation.

According to the RCC, enactment of a national deposit law would yield energy savings of at least 70 trillion and quite possibly as much as 130 trillion Btu's

annually, the equivalent of between 12 and 23 million barrels of oil per year. Such an energy saving, for example, is roughly twice as large as the amount of energy that will be saved by the solar tax credits approved by the House.

The RCC also estimates that enactment of this legislation would allow the United States to significantly reduce our imports of bauxite and iron ore. This is particularly important because the United States spends more to import bauxite than any other non-fuel mineral, and it is the only non-fuel mineral believed to be subject to control by an OPEC-like cartel.

The total amount of litter by piece count in the United States would drop 20 percent, and the volume of litter would decrease 40 percent, according to the RCC. In addition to the tremendous esthetic benefit this represents, the Government would save about $200 million annually due to the reduced need for litter removal. The experience of Vermont is illustrative in this regard: it reduced its clean-up expenditures by 76 percent.

Further, deposit legislation would reduce the amount of solid waste generated annually by 4 percent, and would reduce the beverage industry's pollution of the air and water by 50 percent.

Prices would also be reduced by a deposit bill. The industry would save at least $656 million and perhaps as much as $1.7 billion in packaging costs which, if passed on to consumers, would reduce the price of a 12 ounce serving by $0.006 to $0.015.

Finally, the RCC estimates that a net increase of 54,000 jobs would be generated by enactment of legislation of this sort. While there might be job losses in the glass and can manufacturing sectors, there would be increases in the distribution and retail sectors. These jobs would be well suited for the large number of unemployed, unskilled young people that are so badly in need of work. New openings might also occur for skilled workers in the machinery manufacturing industry, inasmuch as there would be increased demand for beverage container processing, washing, and recycling equipment. It should be emphasized that virtually every private and government study conducted on this subject supports the conclusion of the RCC: that there would be a substantial net increase in jobs. The experience of Oregon and Vermont lends further credence to this conclusion.

Even members of the beverage industry are finally beginning to acknowledge that deposit legislation would be good for the country and harmless to them. Coors and Falstaff, two of the Nation's major brewers, and Shasta, a major soft drink company, support mandatory deposit, as do a number of trade associations and scores of smaller bottlers and distributors. Even Alcoa, for years a principal and vigorous opponent of deposit legislation, has dropped its opposition. Equally significant is Pepsico's recent admission to the Securities and Exchange Commission:

Pepsico believes that it will be able to earn an adequate return on the investment which might be required by it as a result of restrictive container legislation and does not anticipate a material adverse impact on the sales or profits of its soft drink business if such legislation is adopted.

Clearly, deposit legislation would not be a mortal blow to the Nation's beverage industry.

Mr. Speaker, numerous studies and actual experience indicate that tremendous savings of energy, materials, and cost would be achieved by enactment of mandatory beverage deposit legislation, while jobs would be created. Public opinion polls consistently show that well over 70 percent of the American people favor the adoption of such legislation. But despite a wealth of supporting evidence and overwhelming public support, a small but powerful special interest has managed to discourage the Congress from seriously considering this matter.

Mandatory beverage deposit legislation will be reintroduced early in the 96th Congress. At that time I hope my colleagues will stand firm against the "throwaway" mentality that has come to permeate our society. I hope my colleagues will resist the special interests and demonstrate their commitment to conservation and the environment by rapidly enacting this valuable legislation.●

STEUBEN SOCIETY OF AMERICA RESOLVES THAT ANDREW YOUNG MUST GO

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, October 14, 1978

● Mr. McDONALD. Mr. Speaker, the National Convention of the Steuben Society of America adopted a resolution calling for the ouster of Ambassador Andrew Young at its convention in Cleveland, Ohio on August 24–27, 1978. The resolution says things about previous American Ambassadors to the United Nations, whose work did not impress me, but certainly they were better in the position than the present incumbent. I commend the text of the resolution to the attention of my colleagues:

RESOLUTION ADOPTED DURING THE NATIONAL CONVENTION OF THIS SOCIETY, CLEVELAND, OHIO, AUGUST 24–27, 1978

Whereas, Andrew Young was appointed by the present administration to represent the general opinion and feeling of people throughout our country as it reflects in their attitude towards others throughout the world, and

Whereas, Andrew Young has not accurately reflected the attitude of this nation, and

Whereas, he has confined his somewhat biased and contradictory views almost entirely to the continent of Africa, and

Whereas, Andrew Young appears to have insufficient knowledge or interest in other foreign policy matters, and

Whereas, outstanding men of high caliber and fine background served in the past in the position of U.S. Ambassador to the United Nations, such as Warren Austin, Henry Cabot Lodge and Adlai Stevenson,

Be it resolved, therefore, that the Steuben Society of America, a patriotic organization of U.S. citizens of German descent, assembled in National Convention here, feels today that the time is long overdue for the present Ambassador to the United Nations to step down, or be replaced by an individual of the highest caliber who would truly represent this nation.●

S. 1816—A PROGRAM WHOSE TIME HAS COME AGAIN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, October 14, 1978

● Mr. BROWN of California. Mr. Speaker, I applaud yesterday's action by the House in passing S. 1816 as amended, the Native Latex Commercialization Act of 1978. A good deal of work has gone into this version of the bill and I believe that it is a good compromise between the original House and Senate versions which differed substantially.

I think it is particularly important that the Congress act at this time. The Department of Agriculture has long been urged by myself and others to undertake agricultural research aimed at improving the yields of the guayule plant. But to the regret of many who long ago foresaw the potential for the development of a domestic natural rubber industry based on this plant, the Department has been extremely slow in taking the initiative. Authority was specifically given to the Department in title XIV of the farm bill 2 years ago, but there has been only the most limited response.

This bill would direct the Department to enter the field in a substantial way. I hope that as soon as the President signs it into law a concerted effort will be made by Secretary Bergland, for whom I have only the highest respect, to get the plans and programs for this effort going at full speed ahead.

The bill establishes a Joint Commission on Guayule Research and Demonstration. This Joint Commission is included in the bill as part of the proposed compromise between the House and Senate versions. It would provide a bridge between the two departments, Agriculture and Commerce, who were to have charge of the guayule program under the House and Senate bills respectively. The bill specifically authorizes both the Secretary of Agriculture and the Secretary of Commerce to delegate to the Joint Commission one or more of their responsibilities under the act. I urge the Secretaries to work together to speedily appoint the three Commission members each which the law provides for, and I urge the Secretary of Agriculture to select a Commission Chairman of vision and ability who, with his backing, can mount a vigorous and effective guayule program.

I want to stress one aspect of the proposed legislation which has not received a lot of attention. That is the authority to both Secretaries to make grants to, among others, Indian tribes. The guayule plant will grow throughout the Southwestern region of the United States, and might provide a new cash crop for many Indian-Americans who now live on the reservations in that part of the country. It is here that the economic development

aspect of the legislation should take on particular significance. I am hopeful that eventually many thousands of acres of guayule will be cultivated on the reservation lands and thus provide employment and income in this part of the country where it is so strongly needed.

The Congress can be proud of this program that comes at a critical time in the development of guayule in the Southwest. This program is placed at the edge of our commercial competence in this crop and thus its timing should serve as a model for all Government research and demonstration efforts. It infuses just enough Government assistance, just long enough for private market forces to take over and then it ends, preventing the establishment of a permanent, cumbersome Government effort in the field. Time and money is thus freed up to address new problems on the fringe of our expertise.

Mr. Speaker, S. 1816 has been developed through the joint effort of the House Agriculture Committee, the House Science and Technology Committee, the Senate Public Works Committee, and the Senate Agriculture Committee. I applaud the efforts of all of those involved in overcoming what seemed, at times, to be insurmountable problems. I urge all of the agencies and departments involved in this program to follow the model of communication and cooperation that has been exhibited in the enactment of this bill.●

REMARKS BY ADM. T. B. HAYWARD

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BOB WILSON. Mr. Speaker, we have just recently finished a go-around on the Department of Defense authorization bill, which was originally vetoed by the President because it made provision for a nuclear aircraft carrier that the President did not want.

During the months of hearings and investigations that the House Armed Services Committee engaged in prior to reporting out the bill, we heard a great deal of testimony regarding the nuclear aircraft carrier, both pro and con. But at no time did I hear as astute and concise an argument for the nuclear carrier than the following remarks by our Chief of Naval Operations, Adm. Thomas Hayward, at the National Aviation Club and Aero Club, and I commend them to my colleagues:

REMARKS BY ADM. T. B. HAYWARD

It may seem strange to have the Chief of Naval Operations appear before the Aero Club and National Aviation Club speaking not as the CNO but as an amateur zoologist—but the fact is, this noon I want to talk a bit about a favorite subject of mine, the dinosaur. As you know, dinosaur's have been much in the news of late, at least dinosaurs of the naval variety, as have other creatures in the animal world, incongruously finding themselves spoken of in numerous articles on the editorial pages—creatures like "sitting ducks", and "turkeys", and other rare species with unmentionable names.

Now reports about "sitting ducks" and "turkeys" are not particularly troublesome to me, but I must admit to having more than a bit of difficulty with the dinosaur, because as everyone knows, the dinosaur is extinct—and I worry about that.

So after reading one particularly troublesome piece the other day, I decided to do a bit of research about dinosaurs, and it brightened my day up considerably. For you know, dinosaurs weren't so unsuccessful after all. They ruled the animal world for nearly 100 million years—not a hasty or premature departure by any means. An enouraging thought to this naval officer.

As a group, dinosaurs were powerful, speedy, and extremely well armored. In short they were highly survivable. At sea, the Plesiosaurus pretty much ruled the waves while the Tyrannosaurus Rex and his relatives projected power over most of the earth. In fact, recent fossil finds even tell us of a flying dinosaur with a wing span of more than 50 feet—that's 12 feet larger than our new F–18 Hornet.

About the only thing that could reasonably challenge a dinosaur was another dinosaur. With that knowledge, we in the United States Navy take a certain amount of comfort.

You recognize the analogy, of course, to that gargantuan of the seas—the aircraft carrier.

I regard as unfortunate the use of such careless hyperbole when discussing an issue so critical to our national naval strength, and our defense posture as the aircraft carrier? A turkey? I'll be damned. A sitting duck? No way! But a dinosaur—perhaps. For the carrier is powerful, fast, well armored, and highly survivable. And though it is gradually becoming a rare species, it is yet to be extinct. God help us if in this century it is.

So, with the future of our carrier force having figured so prominently in the news recently it seems appropriate at this point in time for the Chief of Naval Operations to be heard on the issue of the aircraft carrier to set the record straight about its true value in today's naval strategy—not because I stand here before you wearing wings and voicing parochialism as an ex-commanding officer of one of our better dinosaurs, the USS AMERICA, but because I represent the views of your operational commanders as one who recently commanded your Seventh Fleet and the U.S. Pacific Fleet—to tell you explicitly what the professional naval officers' assessment is today of the true value of the aircraft carrier.

We all know it to be a popular game these days to direct criticism at us stodgey old carrier Admirals who are wedded to the past, just as were the battleship Admirals of yore, steeped in our tradition of ultra conservativism. The truth is, those who voice such blatant platitudes do so in the safety and comfort of knowing how popular it is to needle the "brass" while having no responsibility whatsoever for executing the naval strategy that unfolds. One should be required to compare objectively these carelessly expressed views with those held by the men who wear the uniform of the naval service, those who have been there and who speak unanimously of the vital importance of today's carrier force strength and you would get . . . the time has come for much more public debate involving facts, avoiding the shallowness of fuzzy strategic thinking of which we have a plethora these days.

First, it is important to recognize that the United States Navy today is considerably outnumbered by that of the Soviet Union. This substantial imbalance pertains even when both sides include their allied naval forces. Yet we still maintain a margin of superiority for several reasons: our qualitative, technological edge—our superb submarine force—and most especially our ability to control the air in its totality due to the presence of our sea based tactical air. Make no mistake about it—the margin of difference between ourselves and the Soviets today, at sea, resides in our carrier based offensive capability.

In historical perspective we are all well aware of the carrier's significant contribution to victory during World War II, and the high value of the carrier aircraft during Korea and Vietnam. Not to be overlooked in the post World War II environment is the frequency with which U.S. policy makers turned to the use of naval power structured around our aircraft carrier battlegroups—as in Lebanon, or the India-Pakistani crisis, and the Arab-Israeli conflicts. Henry Kissinger recently summed up his evaluation during an address before the Naval War College at Newport recently when he said, "In the crises in which I was involved, the use of naval power—particularly the carrier—turned out to be almost invariably the crucial element." These views do not pertain solely to the Atlantic and Mediterranean. We can and should reflect back to the period following Vietnam, when virtually no residual presence on the mainland of Southeast Asia. A large inventory of bases and aircraft was left behind under North Vietnamese control and considerable uneasiness existed with respect to what the future might hold. About all we had left was an off-shore presence maintained largely by the carrier striking forces of the Seventh Fleet.

More than any other force these carriers provided the stability necessary to reorient our Asian defense policy with a lower but still credible profile. They maintained a presence in the South China Sea, reinforced our position in Northeast Asia, and continued to give substance to our alliance with Japan.

Now what about that "sitting duck" complex—the carrier's vulnerability? It seems to me the real question that needs to be asked is, "compared to what?" Can there be any rational questioning as to which would be harder to locate and attack: a fixed-site shorebased airfield or a carrier at sea: an ammunition depot, a truck park, or a mobile naval force? I don't see how. The carrier wins, hands down in that comparison.

Likewise, in weighing the arguments about the degree of vulnerability between one category of ship and another, there can be no question but that the carrier is the least vulnerable of all ship types. While its large size can make it more detectable and discernible to a radar scope, on the other hand, radars can be spoofed and misled—a task neither too complex nor overwhelming.

And we build them tough in anticipation of going in harms way. The flight deck and hangar decks are constructed of one-inch thick high-yield steel, with an additional 2½-inch armored deck below them, designed to protect the carrier from major caliber, semi-armor piercing explosives. These ships are designed with over 2000 watertight and shock resistant compartments for the sole purpose of controlling and limiting damage. Missile and torpedo protection is accomplished with side-plating and new energy absorbing hull designs. And extensive firefighting capability is built throughout the ship, with highly redundant systems of all kinds within the engineering and propulsion systems.

To give you a feel for the carrier's durability, during a major flight deck accident aboard USS ENTERPRISE in 1969, nine 500-pound bombs exploded on the flight deck, the equivalent of six Soviet cruise missiles—yet ENTERPRISE could have commenced flight operations within hours had the situation so demanded.

Which brings us to the issue of comparability between our overseas base structure and the availability of aircraft carriers. Contemporary history shows that time and time again we have had to defend out interests overseas with inadequate numbers

of bases and enormous problems related to base security.

Take the case of Vietnam. Time allowed the United States to build a massive complex of air bases in Southeast Asia at a cost of over $525 million for runways, taxiways, parking aprons, etc. This did not include the cost of logistics support facilities such as harbors and ports, petroleum and ammunition storage and other support required by the TACAIR units. Nor does it include the high cost of defense installations had the situation so warranted. Notwithstanding this heavy investment, the vulnerability of air bases in South Vietnam was a major problem that led to the loss of over 400 allied aircraft to ground attack alone. An additional 4000 aircraft were damaged due to such action. Not one seabased air asset was lost or damaged on board any of our aircraft carriers as a result of enemy action. Furthermore, today our operational overseas base structure has been reduced from the 105 that existed ten years ago to less than 40 today. It is questionable that this trend can, or will be, reversed. In shore, all military systems and installations are vulnerable to attack and damage—the aircraft carrier standing out as least vulnerable of them all—hardly a sitting duck!

Then there is the issue of cost. Believe me, no one has more heartburn than I when it comes to talking about $2 billion anythings. The aircraft carrier is expensive. But we need to keep its high cost in reasonable perspective—compared to what? The Metro? Super Dome? Or that new house of yours? Three factors deserve our consideration.

To begin with, one needs to understand that the acquisition cost of ships is not expressed in today's dollars as you and I understand them. Let me explain. By virtue of the budgeting rules of the Congress, the services are required to fully cost out the price of any weapon system proposal at the time the item is first requested of the Congress. This requirement impacts uniquely on ship building costs in that in general, one can anticipate that it will be seven years or more from the time of appropriation until a ship's construction costs are terminated. In essence at least seven years of inflation are built into the original cost estimate which you and I hear about so frequently. That is to say, while the Navy might ask the Congress to authorize and appropriate a carrier today at the cost of about 1.7 billion dollars, its real cost in today's dollars, if there were no inflation to consider, would be more like one and a quarter billion dollars, a substantial reduction.

Another way to look at the mis-perception of the high cost of the aircraft carrier created by the fact of inflation can be seen by considering how one might amortize the cost of an aircraft carrier over its lifespan. For instance, in 1961 the United States Navy built the USS ENTERPRISE, our first nuclear attack carrier, at an end cost of about $450 million dollars. At that time, there was the characteristic criticism levied against the exorbitant cost of that carrier, just as is common today. Yet, we expect ENTERPRISE to be in the force for 45 years, which means that its initial acquisition costs amortizes out over its lifespan at 10 million dollars a year. Quite a bargain! It is my personal view that today's apparently high cost carrier will appear equally as fiscally prudent in the year 2000, a point at which the carrier will have reached only its half life.

Lastly, there is the frequently held view that it is the high cost of carriers that prevents the Navy from getting on with constructing other ships; that it is the high cost of carriers that inexorably compels the Navy to reduce its overall size because funds do not remain to buy the vast number of other ships so badly needed. Compare that judgment with the fact that over the past 20 years the Navy's investment in aircraft carriers has been but 5.4 percent of our total shipbuilding costs. 5.4 percent! Hardly a major proportion of our ship construction budget.

Which leads me to a final question—has the hour arrived for another Billy Mitchell? Is there a new and better way to do the Navy's mission than to perpetuate this gargantuan of the seas? Clearly, the time is now to insist that the Navy remove its blinders, if it has them on, and explore realistic alternatives to the future of tactical aviation. We must not be wedded to conventional solutions to tomorrow's threat. The most promising near term development seems to be associated with vertical life aviation, VSTOL, or as some call it—powered lift. In other words, is there a way to do away with the catapult and arresting gear in the design of aircraft carriers in the future? Surely the Navy must not be found parochial on this issue; and let me assure you, we will not. I have recently established a policy requiring that we pursue a program of VSTOL alternatives in just as aggressive a manner as the Department of Defense and Congress will permit.

Further, I am intent that we will examine ways in which to put more sophistication into our weapons themselves, minimizing the complexity of the airplane and the carrier to the maximum degree possible. I am convinced we must capitalize on our technological superiority if we are to maintain our lead over the Soviet Union and to fulfill the basic mission of the United States Navy as it is understood by your countrymen. We will not be found wanting. So for those of you who find particular encouragement in the concepts of smaller, more numerous and inexpensive ships you will especially appreciate the manner in which the Columbia Encyclopedia suggests the dinosaur met its demise, and I quote:

". . . The inability of the large, clumsy dinosaurs to compete with the small, fleet mammals, which were gradually becoming more numerous at the time, contributed to the dinosaur's extinction."

The carrier is far from that situation today, but the suggestion is clearly worth heeding.●

1978 INTERNATIONAL CHORUS CHAMPIONSHIP

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. AMBRO. Mr. Speaker, I have the great pleasure to inform this body that the Island Hills Chorus of Huntington, Long Island, won the 1978 International Chorus Championship at the Sweet Adelines' 32d annual competition in Los Angeles, Calif. This group, a 93 member championship chorus, has performed for many Long Island functions. Most chorus members live in Suffolk, Nassau, and Queens.

The Island Hills Chorus, region 15 champions won over regional champions from Ontario, Canada, Connecticut, Kentucky, Missouri, Minnesota, Kansas, Colorado, Alabama, Texas, California, Washington, North Carolina, Ohio, Pennsylvnia, Maryland, Nebraska, and Wisconsin.

Competition was held Friday October 6, 1978, in the 6,000 seat Shrine auditorium in Los Angeles, Calif. Under the direction of Estelle Grau of Wantagh, the chorus performed George Avener's arrangement of "Strike Up The Band" and "Soldier," to a standing ovation by the crowded auditorium.

I would like to add my congratulations and best wishes to the many other accolades received by this talented group.●

PANAMA CANAL TREATIES

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SNYDER. Mr. Speaker, it is my conviction that the American people are not happy with the proposed Panama Canal treaties, since they will deprive the United States of the right to permanently maintain a military presence in the Canal Zone.

The people are aware of the fact that there have been differences over the question of sovereignty, over the ability of Panama to operate the canal, over the constitutional right of the House of Representatives to vote on the disposition of the Canal Zone, and over other aspects of the treaties.

But the people know that the most crucial issue is the defense of the great waterway that permits our warships, the great bulk of our military supplies, and the greater number of our fighting men to go from the Atlantic to the Pacific and vice versa across the American Continent. No leader on either side of the treaty debate has ever claimed the Republic of Panama alone can defend the canal against any and all enemies.

Under the proposed treaties, that do not become effective until 6 months after the effective date of the exchange of the instruments of ratification, the United States shall surrender the right to maintain any armed forces onsite close to the canal after December 31, 1999. The treaties take effect October 1, 1979.

I have introduced legislation which would postpone entry by this country into the treaties "until the United States of America is assured of the right to permanently maintain a military presence in the area presently known as the Canal Zone." The bill would require representatives of the United States to begin negotiations with the Republic of Panama at the earliest practical date to achieve this purpose.

My proposal will be objected to by treaty proponents.

But the American people who object to the proposed treaties will have a chance to make their objections known by supporting my bill.

Of course, this proposal will die when the House adjourns sine die. It is my hope to return with the next Congress and reintroduce this proposal.

In the meantime, I urge my colleagues and the citizens of our great country to give serious thought to the wisdom of adopting my proposal by which we can insure that the Panama Canal will always have onsite protection by the Armed Forces of the United States.●

DISTURBING TRENDS IN COMMUNICATIONS TECHNOLOGY TRANSFER

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BROWN of California. Mr. Speaker, in the past few days two articles have appeared in the papers which outline a policy trend for this country that disturbs me. One article in a recent Washington Star details the U.S. approach to the upcoming World Administrative Radio Conference (WARC), an international meeting to reallocate radio frequencies in the next 20 years. The other article in the Los Angeles Times outlines the administration's new space policy, marked by major cuts and policy shifts. Together these articles signal a conservative technology transfer policy that will hurt us in the long run.

Let me preface the insertion of these articles into the RECORD with a few words of background and commentary. In 1976 at the UNESCO General Conference this country promised to help establish a communication capability for Third World countries. This was done to side step a confrontation, and one that the United States would certainly lose, over claims that developed countries controlled communications and information technologies to the detriment of lesser developed countries. Since 1976 this country has done nothing to live up to its promise.

This month there is another UNESCO General Conference and communications and information technology issues will be raised again. This country plans to go into the conference with a "hang tough" attitude and no innovative attempts to make good on its promise after 2 years have elapsed. This is not due to a lack of planning and attention to the upcoming Conference, but rather is due to a lack of sensitivity to the needs of the developing countries on the part of those doing the planning.

Following this UNESCO Conference is the WARC Conference discussed in the Star article. While this is a technical conference, it deals with the control over radio communications frequencies and thus communications technology. The potential impact of the UNESCO Conference upon the WARC is a serious one if the United States fails to adequately deal with the advocates of the "New World Information Order." As much as policymakers would like to divide policy and technical issues into neat, separate boxes, the demands of the Third World may not allow this.

Following this WARC meeting is the United Nations Conference on Science and Technology for Development at which time developed countries will again be called to demonstrate their commitment to meaningful technology transfer. How easy would be the life of a policymaker if the common thread of these three international meetings could be found and anticipated. A country with the imagination and technical ability that ours possesses should be offering solutions and not turning a deaf ear at these meetings. I have stated this opinion before, it has been included by the Senate in the foreign relations authorization, and it needs stating again.

Our space technology offers an excellent way to deal with the potential problems of these conferences in an effective way. This technology is highly attractive to developing countries and at the same time can provide new markets for our advanced industries. An international satellite communications net with adequate Third World access would be a strong demonstration of our determination to deal with developing countries as equals. An "international library cooperative" was being discussed by the administration earlier this year, an idea rich in potential, but it apparently has been dropped. A stepped-up Landsat program with adequate interpretation training and wider access to data would help dispel objections and suspicions toward our remote sensing operations. In short, a switch from a research and demonstration mode to an operational mode for our civilian space programs can turn them into our most effective foreign policy tool.

This brings up the second article entitled, "White House Cuts Space Goals for Next 10 Years." In this article, the details of the administration's space use policy is detailed and, at first blush, seems to run counter to the international policy needs outlined above. The planned joint military-civilian space missions that are outlined jeopardize the integrity of our peaceful uses of outer space and further add to Third World suspicions of our space activities. A curtailed, pay-as-you-go Landsat system cannot account for the nonmonetary benefits that would accrue from an expanded data sharing effort with developing countries. In our urge to economize, we jeopardize our standing in international conferences such as WARC and may end up paying in restraints being placed on our international operations and our activities in space.

Just as we need an expanded space technology effort in the developing world for policy reasons, we need it for economic reasons. The French have been great innovators in this area and are undertaking a number of joint ventures in outer space with other developed countries. The Japanese are developing satellite communications system hardware and software and are aggressively seeking new markets. A German private corporation, OTRAG, is seeking to develop low-cost launch vehicles that will allow many developing countries to engage in their own space porgrams. These and other efforts signal a realization of the economic potential that the peaceful uses of outer space hold for those innovative enough to anticipate the coming boom.

The French, at the recent U.S. Special Session on Disarmament, proposed a global satellite monitoring system to aid disarmament efforts. This shiny, new initiative should have been surfaced by the United States as a signal of its commitment to disarmament but our stance at this meeting was anything but innovative. The French are now reported to be discussing a plan to develop a global telecommunications and information network for use by the Third World. Ironically, this action is in response to rumors about the U.S. establishment of the "international library cooperative" mentioned before. The French are fearful of a system that would link countries to U.S. data bases and thus give U.S. ideas and equipment an edge in the Third World. Apparently, however, the French need not fear such innovation on our part at present, nor in the near future if my interpretation of our policy is correct.

I urge my colleagues to read the following articles and ponder the consequences of the actions outlined. This country has the potential to regain much lost stature in the world with a meaningful sharing of aerospace and communications technology. But a shortsighted space policy that increasingly blurs the military-civilian space use issue and discourages a new Third World policy centered around our advanced technologies is a mistake. Likewise, our inability to anticipate and innovate at international conferences makes us the victim of events rather than being in control of them. We have more to offer the world than hollow promises of help.

The articles follow:

[From the Washington Star, Oct. 8, 1978]

RADIO SPECTRUM PARLEY FACES KNOTTY PROBLEMS

(By Ernest Holsendolph)

The World Administrative Radio Conference normally takes place only once every 20 years, but the one next year may be one of a kind. Part technical skull session, part political struggle and part bazaar, WARC, as it is affectionately known, is likely to be all of the above and yet neither.

On neutral turf in Geneva, more than 1,100 delegates from about 140 nations will meet for 10 weeks starting next September under the ausnices of the International Telecommunication Union to allocate radio frequencies and revise operating regulations that will govern use of the spectrum through 1999.

Because of the explosion in broadcast technology, the proliferation of needs for radio services and the fact that so many nations were born in the last two decades, the work of this upcoming WARC may be more strenuous, far-ranging and tension-filled than any other, according to communications specialists interviewed here.

Communications officials in the United States have been actively preparing for WARC for two years, and some planning was taking place five years ago. For the vast and far-flung enterprise, the preparations are being carried out under the auspices of the Federal Communications Commission, but contributions are being made by industries, public interest organizations and several major government agencies. The State Department is supposed to see that the final U.S. position agrees with the nation's foreign policy.

A triumvirate of officials is guiding the preparation, including Commission Chairman Charles D. Ferris; Henry Geller, who directs the National Telecommunications and Information Agency of the Commerce Department, and the chief of the American delegation, Glen O. Robinson. Geller, whose agency oversees the communications requirements of the federal government, and Robinson, a law professor of the University of Virginia, formerly had ties with the commission. Geller was once general counsel for two years earlier in the decade.

The big meeting, so filled with complex issues, is nearly a year away, but already

some spirited controversies have arisen, even as the Americans try to chart their prepared position.

The American agenda, put in simple terms, aims to see that a framework of rules and spectrum allocations is created to accommodate the huge communications services that the nation will need for the next 20 years. But at the same time, most officials agree, it is in the national interest to see that the worldwide communications system develops smoothly and facilitates international commerce and cooperation.

In a presentation this week, Robinson said that essentially these American national needs are parallel to those of the Soviet Union, even though their positions on the issues are not likely to be identical.

Already public interest groups, such as the Office of Communications of the United Church of Christ are asserting in filings with the Federal Communications Commission that U.S. preparations are preoccupied with industrial and commercial needs and that not enough attention is being paid to "broader public interest concerns" or "critical foreign policy implications."

"Despite plans to do otherwise, the preparation for WARC seems to be going ahead without paying adequate attention to the concerns of public-interest organizations," says Curtis T. White, a Washington lawyer pressing the concerns of such groups.

African and Asian developing nations are primed to demand their "share" of the high frequency spectrum to meet their growing needs for domestic communication links from fixed stations—a need that no longer exists in industrial nations such as the United States, where land-line and microwave transmissions serve that purpose. They will also be seeking to set aside time for satellite use.

However, the United States is nonetheless expected to file for the high frequency spectrum for growing maritime, land mobile and amateur broadcasting use, providing an area of likely conflict with the developing nations, and others as well.

"Despite the rhetoric that we are hearing," Robinson said, "our talks so far with Third World nations have not yet revealed a clear picture of their needs. I expect that these will become clearer as we hold more bilateral discussions between now and next year."

While developing nations may press their case to get their foot in the door of the international communications house now dominated by the industrial nations, the United States and others will be seeking spectrums for such Buck Rogers applications as environmental sensing satellites, now in operation, and later for a string of special satellites for wireless transmission of solar power to earth.

Sensing satellites such as Landsat and Seasat, not to be confused with spying "eyes in the sky," are used to measure crop condition, plant diseases, meteorological conditions.

Some observers have pointed out that however sophisticated or technically persuasive the case of the industrial nations, the rules and allocations will be made by majority vote, and so accommodations will be necessary.

Conflicts will occur not just between the industrial and developing nations, however. For instance, there is a pressing disagreement between the United States and Canada about the conflicts between UHF television broadcasting and land mobile users along the northern tier of the United States.

Another, related potential arena of controversy will be an effort by some delegations to pursue a "new world information order," with the aim of redistributing communications facilities and power, and providing a more "balanced" flow of information between the "North" and "South" nations—a formulation roughly equivalent to industrial world powers and the developing countries.

"We are resisting any suggestion that the spectrum should be carved up equally among all nations regardless of needs, or that satellite time must be so divided," said Robinson. "We don't see that as sensible or necessarily as equitable."

Moreover, Robinson and others close to the evolving American position say they prefer preservation of the traditional "first come, first served" doctrine in communications, which holds that users who occupy a spectrum have priority in maintaining it.

Robinson said a reasonable compromise might be for the United States and other world leaders in communications to promise access and rights of sharing frequencies and facilities, where practical, as the needs of emerging nations materialized.

"Redistribution of technology and service is certainly one way to redress imbalances between the West and the Third World," he said.

"Speaking for myself, it is my feeling that the nation is unlikely to do anything dramatic, such as put up a separate Third World satellite—that does not seem to be in the cards, mostly because of the expense."

Some Third World delegations reportedly may see such a U.S. position as a turnabout from Western goals espoused at an international conference in Nairobi in 1976 that included a promise to encourage expansion of Third World communications capability. Whether others agree or not, most American strategists say that such efforts are probably more appropriately addressed in other world bodies.

"Basically this will be a technical conference," said Kalmann Schaeffer, foreign affairs advisor to the FCC. "As much as possible, we would like to see the conference conducted on a technical level and not on a political level."

The question, of course, is whether the world leaders will be allowed to do business as usual.

The requirements of most of the committees working on the nation's WARC position should be in next month or early in December. Then the final collective position should be ready by Jan. 20 for submission for the ITU. In the following months papers will be exchanged and many bilateral meetings will be held.

[From the Los Angeles Times, Oct. 12, 1978]

White House Cuts Space Goals for Next 10 Years

(By Robert C. Toth)

WASHINGTON.— The White House Wednesday released a detailed statement of its space policy for the next decade in which spectacular, costly missions are rejected in favor of projects of unmanned scientific exploration and practical applications of existing technology.

Even this modest program is promised only "adequate" funding in the policy statement. The National Aeronautics and Space Administration's budget, now $4.3 billion, may shrink significantly when spending for its biggest project, the shuttle orbiter, tails off, the document suggests.

The four-page statement also indicates that military and civilian projects will be increasingly consolidated, when possible, to save money and increase efficiency.

All told, the statement, which expands on an Oct. 1 speech by President Carter at Cape Canaveral, directs a far more conservative space policy than those of his predecessors.

Former President John F. Kennedy committed the nation to the $24 billion Apollo project to land men on the moon. Former President Richard M. Nixon directed development of the reusable shuttle spacecraft whose program cost approaches $10 billion.

But the economic health of the nation and the mood of the people are quite different today, said Frank Press, the Presidents science adviser and chairman of the presidential review committee whose four-month study formed the basis for Carter's space policy statement.

"Nobody in Congress or the federal government or the public has put forward a case for a U.S. manned Mars mission," Press said in an interview. "And if the Soviets decide to spend $70 billion to land men on Mars in five years, we say: 'God bless them'."

There have been hints that the Russians are aiming eventually at Mars in their present series of manned flights. Soviet cosmonauts have spent record times of 96 days and, currently, 117 days in an orbiting space station that has been resupplied three times. But a Mars mission would probably be preceded by thorough manned exploration of the moon and use of the lunar surface as a jumping-off base.

The White House statement says that America's civil space policy revolves around three basic tenets:

—The activities "will reflect a balanced strategy of applications, science and technology development."

—Activities will be pursued in space, not just because space is there to be explored, but "when it appears that national objectives can be most effectively met" by conducting them in space.

—"It is neither feasible nor necessary at this time to commit the United States to a high challenge space engineering initiative comparable to Apollo. As the resources and manpower requirements for shuttle development phase down, we will have the flexibility to give greater attention to new space applications and exploration, continue programs at present levels, or contracts them. To meet the objectives specified above, an adequate federal budget commitment will be made."

Other high-cost projects rejected by Carter include space colonization, space manufacturing and solar-power satellites.

The solar-power system, claimed by its champions to be the answer to the energy crisis, would cost an estimated $100 billion. Satellites would collect solar energy and convert it into microwaves that would be beamed down to giant receivers and converted into electricity.

The space policy statement further erodes NASA's original image as a solely peaceful agency.

When created 20 years ago, NASA was purposely set apart from military activities in space. Its space shuttle, however, is now programmed to carry secret Pentagon payloads and military pilots, as well as scientific instruments and NASA astronauts.

In the future, the civilian and military agencies will share the same weather satellites and probably ocean surveillance satellites as well. Each agency will have separate communication channels to transmit data from their instruments on board.

"I see no objection," Press said, "if efficiency improves and we get more for our money, provided NASA remains an open agency, with all its data being made public. It will remain open, and all data will be open.

Carter has rejected proposals to establish an operational Landsat system whose photographs of earth have been widely hailed.

The White House statement promised to continue providing data from the present experimental Landsats, run by NASA, to anyone wishing to buy the data. It directed a continuing review of the technology and market demand for the data by government and private groups.

But indications are that only when and if enough money—an operational Landsat system will cost $70 million to $200 million—will the federal government consider expanding the present system into an operational network.

Communications satellites got significant support in the policy statement. NASA is authorized by the document to resume research on such craft, and the Department of Commerce is ordered to study and stimulate public-service use of these satellites for education, health and basic communication needs in remote areas of the country.●

AMERICA AND SOUTH AFRICA

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MAGUIRE. Mr. Speaker, I wish to insert two statements issued by our colleague, EDWARD J. MARKEY of Massachusetts, concerning U.S. policy toward South Africa and the imminent danger in the squatter settlement of Crossroads that a tragedy may be about to unfold.

EDWARD MARKEY joined me, THOMAS DOWNEY of New York, PAUL TSONGAS of Massachusetts, and a number of other House Members last fall—in the wake of the death in a South African jail of the civil rights leader Steve Biko—to form the Congressional Ad Hoc Monitoring Group on South Africa. Since that time, he has spoken out with great force and passion on the issue of the denial of basic human rights inside South Africa.

Earlier this year, I visited the community of Crossroads, a squatter settlement founded by black Africans in 1975 so that men working in Capetown could live with their families. Because of the threat to this community by the South African Government, 80 Members of this House are cosponsors of House Concurrent Resolution 720, expressing the concern of this body for the safety of the residents of Crossroads, and urging the South African Government to reconsider its plans to destroy this community, and instead to allow the residents to continue to live there.

Both EDWARD MARKEY and other members of the Ad Hoc Monitoring Group, including myself, and members of the Congressional Black Caucus, joined Mr. BRADEMAS and Mr. ANDERSON in cosponsoring this resolution.

Because it is crucial that more Americans are aware of the tragedy which may be about to take place in Crossroads, I wish to insert in the RECORD the prepared remarks of EDWARD MARKEY on this important subject.

The South African Government indicates it will demolish Crossroads by the end of this year. Indeed, on two specific occasions in September, armed South African police invaded this peaceful community, broke into homes, and arrested hundreds of people for the crime of illegal residency. The people arrested were women and children who simply seek to live with their husbands and fathers. Many people were injured and at least two people died. The words of EDWARD MARKEY on Crossroads warn each of us that we cannot turn aside from the deeds which may shortly be committed.

I also wish to insert the remarks delivered by EDWARD MARKEY on April 30 of this year in Boston, Mass., at a rally calling for a tougher policy of opposition by this country to the policy of apartheid in South Africa. In his speech titled "The United States and Apartheid—A Call to Disengage," Mr. MARKEY called for us to disengage ourselves economically from the support—which may be indirect, but is nevertheless both real and substantial—of the system of racial oppression in South Africa.

As we fear the possibility of another Sharpville massacre or another Soweto massacre in Crossroads, we must consider how U.S. policy ought to be changed to address the underlying causes of the monstrous and oppressive system of apartheid. Mr. MARKEY issues a call for such a change, a call which policymakers in our Government ought carefully to consider:

SOUTH AFRICA AT HER "CROSSROADS"

(By EDWARD J. MARKEY)

Mr. Speaker, I rise in support of H. Con. Res. 720.

In August of this year, Dr. Willie Vosloo, deputy minister of plural relations and development for the Republic of South Africa, told the approximately 20,000 residents of Crossroads that they must leave the camp by the end of this year. If they fail to do so, warned Dr. Vosloo, the residents of Crossroads will face the force "of every method available to the Government" to make them move.

The deadly seriousness of Dr. Vosloo's intentions—and those of his Government—was made crystal clear to us all when, on September 14, armed South African riot police charged into the squatters' camp of Crossroads, shooting tear gas and swinging clubs, beating, and arresting residents indiscriminately.

We know that the South African Government has promised to bulldoze Crossroads within the very near future. We know that the raid of September 14 was simply one stage in the forcible eviction of these several thousand families from their 3,000 shacks. We know also that Crossroads could become another flashpoint—another Sharpville or Soweto—and that it is doubtful that the impact could be contained within South Africa's borders.

Crossroads was built a few miles outside of Capetown so that Africans working in that city would have the "luxury" of coming home to their families, something that we in this country consider a right.

The Government of South Africa has for 23 years enforced a policy of phasing out Black Africans from the region around Capetown. Yet, this proudly segregated society depends greatly on black labor to keep the economy running.

This means that Blacks who work daily in Capetown cannot live in or near their place of employment with their families. It reminds us yet again that South Africa is the only country that determines where you will work, what you will do, and what you will be paid, solely on the basis of the color of your skin. This simple struggle for the basic right to live with one's family brings a cry in our hearts at the awful price in human decency now paid to maintain the immoral system of Apartheid.

Yet we cannot today address the larger problem of that wretched system which has created Crossroads, and denied the nonwhites of the Cape area any alternative save that of a squatters' settlement. Instead, we are here to call for a remedy on behalf of Crossroads. We are here to urge support for H. Con. Res. 720.

This Resolution urges the South African Government to reconsider its decision to destroy Crossroads. I urge the Members of this House to speak with one voice to this end.

THE UNITED STATES AND APARTHEID—A CALL TO DISENGAGE

(By Representative EDWARD J. MARKEY)

Repression of basic human rights is a tragedy that is encountered world wide. But massive denial of human rights based solely on race is a situation unique to South Africa. South Africa is the only state where an entire segment of the population—namely, four-fifths of all the people in the country—is denied participation in national politics solely due to race.

For what, after all, is Apartheid but a carefully calculated and meticulously planned network of racist laws explicitly building a society which bestows or denies basic human rights simply according to the color of your skin?

This point cannot be repeated too often. The vicious reality is that South Africa is a black country, ruled by a wealthy racial minority whose grasp on power grows tighter as its insecurity grows more intense.

Although blacks comprise 18 million of South Africa's 26 million people, they are virtually prisoners in their own country. They are forced either to live on 13 percent of the land, or to live in crowded urban townships like Soweto. They are denied all political rights. They are paid only one-sixth the average white wage. They are denied basic educational opportunities that whites have. They are jailed without charge and held incommunicado when they protest.

For more than three-quarters of a century, black South Africans have insistently and persistently sought to establish organizations to voice their aspirations to the government. Every time, the government has given its reply—brutal suppression.

Now, this climate of repression has intensified to the stage at which South Africa stands on the brink of voiding the last rights of all people, white and black, who oppose its policies. Indeed, the unmistakable scent of police is now in the air.

Until the death in prison of Steve Biko last fall—a death he met naked on the floor of a jail after being beaten by his captors—there had been some faint reason to hope for the future.

But now, in the wake of his murder and then the crackdown against political moderates that followed the protests against his death, hope has grown even more dim than before. For many blacks, the death of Steve Biko was the final straw. Biko—a man felt by many as likely to be a future prime minister of his country—was perhaps the last remaining voice of moderation, a man able by his vision of a multiracial society to inspire others to bridge the growing gap between the races.

I experienced personal outrage at his senseless, violent and cowardly murder last September by the South African police. I met in Washington with South African Ambassador Donald Sole in the hope of finding out the true circumstances of Biko's death. Yet the Ambassador answered probing questions with evasive replies. He either did not know, or did not care to confront, the truth.

Our duty today is to testify to this truth, to remember the words of the great black South African newspaper editor Percy Qoboza: "Unless the truth is spoken and the facts are told like they are, the process of self deception will continue unabated."

"When history catches up with us—as it will inevitably do," Qoboza continued, "I suspect the tragic words of 'I did not know' will come from many a mouth."

After meeting with Ambassador Sole, I decided to introduce a Resolution before the U.S. House of Representatives, expressing the

deep concern of Congress over the appalling deed of Biko's murder.

I testified before the House subcommittee on Africa, which took my resolution and blended it with another that went to the House floor. For the first time in history, the House of Representatives voted to condemn Apartheid. This vote was overwhelming—347 to 54. But even more important, the Resolution called upon President Carter to take "effective measures" to implement this reproach to South Africa. Therefore, I met with President Carter in a delegation of House members, and urged him to begin to strengthen U.S. policies opposing the regime in Pretoria.

Standing here today, however, I must tell you that our Government still hesitates, still waits, still seeks to delay, the imposition of the stern measures which this situation demands.

Therefore, in Congress we have begun to move—albeit slowly—to set these measures in motion.

Beginning last fall, Congressman Paul Tsongas and myself, together with Robert Drinan, Michael Harrington, and Gerry Studds and others formed an informal group of House members we call the Ad Hoc Monitoring Group on South Africa. Today, nearly 40 members of the House join in this work.

Our most recent victory—aided by the hard work of people like yourselves—came just this week in Washington. The first, clear step toward imposing an economic sanction against South Africa won strong support in the House Banking Committee, thanks especially to the tireless effort and eloquent testimony of Congressman Paul Tsongas.

Though the issue is still open to reversal, at this moment it appears likely that the full Banking Committee will remain steadfast in its vote to cut off all U.S. loan guarantees to South African business firms which receive import aid from the U.S. Export-Import Bank. This bank currently has about $200 million invested in insurance and other guarantees on loans obtained from private U.S. banks by South Africans importing U.S. goods.

The Senate Banking Committee begins its own work on the Export-Import Bank bill next week. I am hopeful they will follow the lead of the House and make a clear commitment to take the battle against Apartheid one significant step further.

But the final battle will not come until it is fought on the floor of each House. Once again, your efforts and those of people all across the country will be vital to ensure enactment of this measure.

On yet another front, too, the members of the Congressional Ad Hoc Monitoring Group on South Africa are once again forming the cutting edge for a bolder U.S. policy to oppose Apartheid.

Early this year, I joined in introducing legislation to make sure the mandatory U.S. arms embargo becomes a total arms embargo. Far too many loopholes exist in the current arms embargo, loopholes which are literally wide enough to fly airplanes through them . . . airplanes like the Cessna light aircraft, which can be, and are being, flown by the civilian air militia in South Africa, the so-called "Air Commandos."

Our own State Department is unwilling to admit that such items as these aircraft, and other items like explosives, police-style .38 caliber revolvers, and telecommunications equipment, can contribute to the defense of Apartheid.

Our bill aims to plug these loopholes.

Already, the Majority Whip of the House is a co-sponsor, and we will soon seek hearings on this bill before the House International Relations Committee.

A third step is now already in the offing. Many South Africans, both white and black, call for an end to all new U.S. investment in their country. Steve Biko urged this action. I support moving to ban such new investment now, and together with nearly 30 others in the House last week I joined in sponsoring such a bill.

Some would say this step is premature. But I do not agree. The tragedy of South Africa has worsened the longer our economic ties have continued. Blacks and other non-whites are now more separate and less equal than ever before. We—in the United States—have a clear duty to ourselves as a nation, and as a people committed to the pursuit of liberty and human dignity for all. We have a duty to act, for if not us, who shall spearhead the calls for justice?

Thus, we must begin now to think ahead to what may be required to disengage U.S. economic backing for the regime in Pretoria. To begin this national debate on the ultimate step which U.S. policy might take, I introduced a bill last fall which I named the "South African Trade Limitation Act." Quite simply, this bill would amend the Tariff Act of 1930, a law which forbids U.S. trade with any nation practicing slave labor. My bill would add racial discrimination in the labor force as a sufficient condition for halting U.S. trade with any nation.

South Africa is the only country that determines where you will work, what you will do, and how much you will be paid solely on the color of your skin. This is unacceptable—just plain unacceptable.

Remember that the final outcome of Apartheid will be that the vast majority of South African blacks are herded onto reservations comprising only 13 percent of the land and even less of its resources, or they will live in conditions like Soweto.

Government officials speak seriously of this "homelands" policy as a way out. Urban blacks, who know that white society depends on cheaper black labor, find these "homelands" absurd.

This insanity, like so many others, flows from one basic and over-riding irony confronting white society in South Africa. They are afraid to live with their black fellow citizens, yet they cannot live without them.

Indeed, the final outcome of Apartheid is a South Africa without a single black citizen. Yet black people won't go away. They will simply be aliens in the cities where they work.

Thus, white power seems firmly set on a road that leads to a confrontation with black power. This is not something that will be resolved overnight. For white power is colossal. But unless some force can begin in the painstaking process of racial reconciliation, the battle lines are now drawn. In the poignant words of one liberal white in Johannesburg, "It is very sad. South Africa should not have come to this."

In the words of Alan Paton—the great white South African novelist, the author of "Cry the Beloved Country"—"The Afrikaner whites sometimes think of Apartheid as a fort. Often, it is seen as a prison. But it is really a grave the white Afrikaner has dug for himself."

The world-famous journalist Donald Woods warns that, unless the South African government can be compelled to come soon to the bargaining table, "there will inevitably be racial war in South Africa."

"One incident could spark this off," continues Woods. "White South Africa is being placed on a war footing. . . . The enemy is seen to be everywhere—on the borders, within the borders, throughout South Africa, throughout the world."

"The war psychosis rages, and for war on many fronts. The gray areas in South African political life are being washed away and the scene is increasingly being deep-etched in black and white."

"The express train of white racism is now rushing at full speed on a collision course with the express train of black anger."

I am reminded here today that the campaign slogan of the Vorster government in last December's all-white elections was "Go Forward Together." But in the prophecy of Helen Suzman, who holds a seat in the white Parliament, "It will be forward together over the cliffs and into the sea,' like lemmings rushing unthinking towards their death below.

Thus, strikes and civil disobedience are likely to intensify in the months ahead, interspersed with urban terrorism. Eventually, we may even see border crossings by soldiers of a liberation army. The white government can certainly sustain a protracted rearguard action. But for how long? And at what tragic cost?

What can a concerned world do to halt the terrible doom of this gathering storm?

As Americans, our goal must be simple . . . to foster a process in which all South Africans play a real part in determining the future of their country, with firm constitutional guarantees to protect the human rights of all citizens in that country.

The basic demand of most black South African leaders is also this simple . . . to convene a national conference where freely chosen representatives of all groups have the chance to help shape the future of their society, and to decide on the steps needed to get there.

Robert Kennedy spoke of this dream twelve years ago when he visited South Africa. His words are inscribed today on his tomb in Arlington Cemetery.

"It is from numberless diverse acts of courage and belief," Robert Kennedy told the South African students, "that human history is shaped."

"Each time a man stands up for a ideal, or acts to improve the lot of others, or strikes out against injustice, he sends forth a tiny ripple of hope."

"And crossing each other, from a million different centers of energy and daring, those ripples build a current that sweeps down the mightiest wall of oppression and resistance."

Remembering his words here today, let us declare that a dialogue among the races in South Africa is surely the last, best hope for reaching a negotiated and peaceful settlement.

For it is surely not beyond the capacities of delegates of good will—black or white—to negotiate a fair deal for all concerned.

Today, the logic of events is moving—and should move—toward American economic withdrawal from South Africa. Left to itself, South African society appears to possess neither the will nor the way to make basic changes in its political structure with strong pressure from overseas.

The presence of Western business is enormously important to white South Africans, psychologically as much as economically. They talk about standing alone against the world, but they are desperate for links—especially with the United States.

Americans should not profit from the political system and the economy of a nation rooted in racist doctrine and based on the permanent exploitation of its vast majority. It is long overdue for us to begin to disengage.

Such action offers the hope—though not the certainty—that it can prompt reconciliation rather than warfare. Without external pressures now that will cut deeply, blacks seeking a clear-cut transfer of power may well decide they have no recourse but to violence.

As for the government of South Africa, there is already the unmistakable evidence that in the only other example of concerted pressure applied by the West—in sports—such pressure eventually brought about real change in Afrikaner policies, despite defiance and bluster on their part at the starts.

Therefore, so there is time for the message to sink in clearly, America should be heading for the exit economically in South

Africa. How fast and how far to do so are still open for debate. But the direction of movement by America must be clear and unequivocal.

American policy on South Africa must be for the long haul. Thus, it is vital that we convey the unambiguous message that whatever we do next is just another step in a gradual, step-by-step tightening of our pressure for change. We must invite other nations to join us in a public timetable for turning the screw tighter and tighter. But we must be prepared, also, to go it alone if necessary.

There is a minimal standard of human rights which cuts across all national boundaries. Without exception, South Africa fails this test. America must not, and cannot, stand idly by as the rights of millions are systematically trampled and destroyed.

We cannot condone Apartheid by our silence.

We must act, to demonstrate to the world that our dedication to the principle of basic human rights is sincere, total, and unequivocal.●

DeMARTINO CASE

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RINALDO. Mr. Speaker, I would like to call the attention of my colleagues to an effort by an outstanding public servant, former Elizabeth Councilman Michael J. DeMartino, to vindicate himself in our State and Federal courts.

Mr. DeMartino has waged a long battle to have his good name restored and reputation cleared. He wants our Federal courts to give his case the same thorough scrutiny they have given to some of the more glamorized cases that have captured newspaper headlines throughout this country and in my own State of New Jersey.

It would be improper for us to judge the merits of the DeMartino case since that is a function of the judicial branch of our Government. I merely ask my colleagues to read the following editorial that was published in the Daily Journal of Elizabeth, N.J., the third oldest newspaper published in the United States. It has fought for many good causes from the earliest colonial times when the rights of our citizens were suppressed by the British Crown.

It expresses an unbiased comment on this case. Today, the case is still unresolved as Mr. DeMartino fights for a full airing of all the evidence.

The editorial, published earlier this year, follows:

NEW QUESTION

It would be premature to attempt to assess the legal impact of the new element in the case of former Elizabeth Councilman Michael J. DeMartino, who has been fighting his 1973 conviction on charges of conspiracy and misconduct in office. That is a matter for the courts.

But the affidavit last week by a Union County Prosecutor's detective, who challenges the testimony of a key witness against the former councilman, does tend to support some of the questions the defense has been raising. It also encourages doubts in the public mind that should not be tolerated.

The remedy lies in a prompt official review of any new evidence to evaluate its relevance to this controversial case.

Mr. Speaker, I know that my colleagues join me in praying to God for a swift resolution to this traumatic trial, with the hope that justice will prevail.●

REPRESENTATIVE JOE FISHER OFFERS US WISDOM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SIMON. Mr. Speaker, as the session winds down and we need some sense of perspective I commend to my colleagues the words of our colleague Representative JOE FISHER and the poetry of his wife, Margaret, known by most of us as "Peg."

The remarks were presented by our colleague and his wife to the Mount Vernon Unitarian Church in Alexandria on August 13.

Few if any of our colleagues have as fine a sense of balance and good judgment, coupled with a good feeling for where this Nation and humanity must go, as does our colleague JOE FISHER.

I particularly like his quote from Yeats:

The best lack all conviction, while the worst are full of passionate intensity.

Too often true, I have observed.

And that is but one of many truths our colleague brings to us:

OF WAR AND PEACE

(By Margaret W. Fisher)

Human nature has a way of dimming memories
Of cruelty of wars, of families thrust apart,
Of lovers weeping, clutching futilely,
Of parents sending off their sons and daughters,
Plagued by doubt and guilt and fear.

Human nature has a way of screening out
The horrors of the holocaust,
Of mass destruction in the cities and the countryside,
Of art and architecture of the ages turned to rubble,
And human minds and bodies shattered in the ruins.

Human nature has a way of shutting out these memories
And sinking into apathy.
The peace so dearly won is soon presumed to be
Our daily fare as we indulge in insulated introspection,
Tunnel vision turning inward with complacency.

Turn, then, outward, humankind,
Beyond the horrors of the wars,
Beyond the loneliness and mass destruction,
Beyond the sacrifice of generations past,
Beyond the clouds of doubt and fear.

Turn the vision outward, then,
To all the possibilities of peace,
To opening communications,
To sharing knowledge, art, and thought,
To build respect for all humanity.

OUT OF THE SHADOW

(By Marget W. Fisher)

Out of the valley of the shadow,
Out of the shadow of wars past,
Out of the shadow of feuding peoples
Whose bitter struggles cast a pall
Upon our dreams of peace—

We seek some greater power
To lift our sights, to give us wisdom
To pursue a course of justice,
Equity, and human dignity,
Of beauty and tranquility.

Out of the valley of the shadow,
Out of the shadow of our fears,
Out of the shadow of pain,
Uncertainty and grief,
The legacy of human frailty—

We pray for vision
And for energy to so direct
Our lives that precious time
Shall not be lost, and peace,
Not war, shall rule the world at last.
Amen.

OF SPEARS AND PRUNING HOOKS

(By JOSEPH L. FISHER)

In this series of essay sermons on Religion and Living the subject of war and peace has to be dealt with. Since the beginning of recorded history war has alternated with peace such that few people have lived out their three score and ten years without at least one war. In my lifetime, for example, the United States has fought in two world wars plus two other major wars, one in Korea and the other in Vietnam. And we have been on the verge of war a dozen times.

More than 10 million Americans now living have served in the military forces during wartime. A much larger number have worked in war industries. Americans killed in war during my lifetime exceed the nuber killed in all our previous wars. Although this country is not at war at the present time, I voted last week in the House of Representatives for the largest peacetime defense appropriation in our national history—not happily, to be sure, and not without first supporting amendments to reduce the spending somewhat.

Most other major countries have suffered more years of war in this century than the United States has and have lost far more soldiers, sailors, air force personnel, and especially civilians. War-caused irregularities in the population distribution in Britain, Germany, the Soviet Union, Japan, and China, along with other smaller countries will continue for several generations. The losses have been staggering in economic terms and especially in human terms.

The brutal depravity of war was brought home to me shockingly and vividly on a pilgrimage I made in the early 1960's to the Nazi concentration camp of Auschwitz, now a national shrine in southern Poland. In addition to the gruesome exhibits of fillings from the teeth of thousands of murdered Jews and the hanks and clippings of their hair was a large barracks almost completely filled with small, cheap cardboard suitcases in which those sent to the camp had been allowed to pack a few personal belongings. One such suitcase near the front caught my eye. Crudely lettered on it in white paint was the following:

Kleinkind Fischer, Geboren 1943, Sterben 1945.

It hit me with the force of a sledgehammer.

Over and against the fact of war has been the yearning for peace, in our time as in former times. This timeless yearning for peace is repeatedly proclaimed by political leaders everywhere, by educators, by preachers and prophets, even by military leaders. Surprisingly, Napoleon once said that war is the business of barbarians. One is not surprised

that Dwight Eisenhower said, "After my experience, I have come to hate war. War settles nothing."

The increasing terror and destruction of war seem to be accompanied by an increasing desire for peace. Similarly, greater insecurity gives rise to a stronger desire for security in many aspects of life. This is true for individuals as it is for nations. But somehow the yearning for peace is not strong enough and persistent enough to maintain the upper hand. Why is this so?

The argument has frequently been made that war is inevitable; that it follows from man's inherent combative nature, from his animal inheritance. Fighting, so this argument runs, is the ultimate test of fitness to survive whether in the jungle of wild animals or the jungle of modern nation-states. Or, it is claimed, wars are deeply set in ancient, unremembered territorial and tribal allegiancies. Or they arise out of the vanity of machismo, the glorification of the man on horseback, the mental-emotional abnormality of a charismatic leader, or something else.

No doubt the roots of war go deep into economics, psychology, biology, and philosophy. Cheap imports of raw materials or markets for manufactured products are thought to be necessary. Security for families, property, or national sovereignty are thought to be threatened. Pre-eminence for a particular political and social philosophy is thought to be essential. Ignorance and fears are played upon so as to magnify differences and transform remote contingencies into imminent dangers. Wider concepts like the family of man, international law and order, and an integrated world economic system—concepts upon which peace can be established—tend to be overpowered by narrow, outworn concepts.

The central issue can be stated in different ways but it is clear: how do we, companions on this particular spinning globe whirling around its particular sun, find our way out of a war-filled past into a peaceful future

Now inspiration is where you find it. I found a bit of it on a poster on the wall of your bathroom upstairs just a few moments ago. It was taken from the writings of Thomas à Kempis:

"Keep thyself first in peace and then thou wilt be able to bring others to peace."

This quote expresses quite well my central theme.

Peace, I assert, has to begin in a person's heart, to be based there, firmly and confidently. Disarmament and other approaches to peace will not succeed otherwise, nor will there be an end to war. This has been asserted before many times but it still has to be the starting point.

Diplomats have no magic wand to wave over the countries of the world so as to bring forth peace. International conferences, however helpful, can't do it. Multinational corporations, for all their need of a peaceful world, can't manage it. Cultural exchanges of artists and scientists, though useful in breaking down some barriers, are insufficient. Tourists visiting back and forth frequently irritate their hosts as much as please them. Certainly wars can't bring peace beyond a temporary period; in the long light of history it would be fatuous to think they can.

This is not to say, however, that the diplomats and political leaders, or any of the others who move on the world scene, cannot be helpful. And it is not to say that organizational effort for peace is futile. On the contrary, without determined action along these lines peace within a person's heart might die aborning or never find its proper outlet in world affairs.

The two—peace within the individual's heart and peace among nations—interact. Peace in one sphere encourages peace in the other. Therefore, governmental and group efforts are worth making as are personal efforts undertaken at the individual level. Both efforts, the individual and the general, will require educational programs, practical demonstrations, and much perserverance. Most of all the building of peace, internal and external, will require religious effort, religious leadership, religious concentration of the highest order.

The great religions of the world have tried to deal with the subject of war and peace but, thus far, not successfully. Buddhism advocates renunciation of struggle, person against person, group against group. Instead, the emphasis has been on inner tranquility, peace of mind, and the prospect of reincarnation in a more favorable form. Such a religion, deeply believed, ought to constitute a promising start toward peace. Unfortunately Buddhism has been limited in geographic scope; countries espousing its meek and fatalistic doctrine have easily fallen prey to marauders from outside. It seems also to lack the positive and energetic attributes without which a combative world cannot be transformed.

In the long Judeo-Christian development one finds schizophrenia: some of the loftiest testaments to peace and love along with examples of arrogance, exclusiveness, and warmongering. Associated with Jesus are such statements as: love your neighbor, go in peace, turn the other cheek, the peace that passes all understanding. Rejecting the invitation to enter Jerusalem as a conquering hero, Jesus in death, even more than life, gave the most profound, dramatic witness for peace and love in our whole religious tradition. But ironically, sadly, tragically, ever since the crucifixion countless battalions have marched in his name: the ultimate perversion of great teaching.

The same division is found in the stories of the Old Testament. Joshua fit de battle of Jericho, Jericho, and de walls came tumblin' in. Yet Micah called out to the chosen people: beat your swords into plowshares and your spears into pruning hooks. War and peace both were glorified in the same set of religious teachings.

The American psychologist and philosopher, William James, advocated what he called "the moral equivalent of war." The idea still seems to have promise today. What are the possibilities?—hard and challenging work, rewards based on cooperation and avoiding conflict, enforcement of international law, the building of world government?

Notable attempts have been made to erect a structure of world peace. Alexander, Julius Caesar, Charlemagne, Napoleon, even Hitler tried to establish peace through war; in the end, sooner or later, each failed. Prime Ministers, foreign ministers, and presidents have tried: Metternich and his Congress of Vienna, Kellogg and Briand with their post World War I pact, Wilson with his magnificent idea of a League of Nations, Franklin D. Roosevelt and the other founders of the United Nations. Each of them had good motives and high expectations, but the results have fallen short. Philosophers, poets, and prophets have described the world of peace—Plato, St. Augustine, Thomas More, Rousseau, Milton, Isaiah, and Micah who preached about spears and pruning hooks. But lasting peace continues to elude our grasp.

Perhaps having these disappointments, among others, in mind, William Butler Yeats poured out his pessimism, even using the metaphor of war:

"Things fall apart; the centre cannot hold,
Mere anarchy is loosed upon the world,
The blood-dimmed tide is loosed, and everywhere
The ceremony of innocence is drowned;
The best lack all conviction, while the worst
Are full of passionate intensity."

In our Twentieth Century now moving insecurely and unpredictably toward its close, war clouds hang dark over the world. Southern Africa struggles toward an uncertain future. Nearly everyone grants the moral inevitability of black control of government there but hardly anyone knows how to navigate the passage to it without vast bloodshed. And no sooner than the black dream is achieved, it may be outdated by onrushing events which will call for submission to a continental or world order. In the Horn of Africa another struggle proceeds, less profound and traumatic for Americans, but still because of its proximity to the Middle East oil countries, of great concern.

The most dangerous part right now undoubtedly is the Middle East, centering on Egypt and Israel but with Lebanon, Syria, the stateless Palestinians, Saudi Arabia, Libya, Iran, and other countries much involved. The problem of securing peace there is so complex and mystifying that it can hardly be described, much less solved. Our own country is about to launch another major initiative, with Egypt and Israel, to pluck from the nettle a solution, or at least an approach to a solution. Yet at the same time, the United States in the name of peace, compromise, and harmony is stepping up its shipments of arms to those two countries and Saudi Arabia, meanwhile continuing to send military supplies to Iran and other countries in that region. How much better it would be to promote peace in the Middle East by a balanced scaling down of United States arms shipments instead of the balanced increase.

Almost in despair one is tempted to cry out for a new messiah, a new prince of peace, to sweep away the tired, worn out policies of the past and put things in a new perspective. But we know deep inside ourselves that progress will have to come from our own effort to listen, understand, gently but firmly lead, have patience, suppress unrealistic expectations, and to persist.

What are the principal underlying conditions for peace, not only in Southern Africa and the Middle East, but in a general sense? I believe these are among the more important ones.

First, an adequately broad set of values and objectives for living, shared among the peoples of the world. Fear of one another or of the horrors of war are not enough, even in the age of nuclear bombs. All agencies of society will have to work on this—education, politics, science, commerce, and, most of all, religion.

Second, an international law system, based on shared values, that has general respect and support, and can be enforced by means of economic sanctions, political pressure, and ultimately police power.

Third, vigorous and dedicated leadership for peace in the various countries of the world moving toward the concept of world citizenship, of rights and obligation, perhaps beginning on a regional scale (the European Economic Community, the Soviet Bloc, Latin America, Southeast Asia, Africa south of the Sahara.)

Fourth, much attention to research on finding ways to peace (in psychology, economics, sociology, ecology, natural and life sciences, even military science devoted to enforcement of peace), to demonstrations of war prevention and peace-keeping, and to education for peace.

Finally, more concern for the religious component of peace, the all-embracing and most essential of all. Niebuhr's insight on this score is prophetic: the dictum of "moral man in an immoral universe" has to be enlarged to "moral man in a moral universe" if man is to be truly moral. In that most magnificent of all historical novels, War and Peace, young Rostov, wounded on the field, cries out, "Can they be coming at me? And

why? To kill me? Me—of whom everyone is fond?"

To obtain those conditions will require a "positive affirmation of peace," to put the matter in the words of Martin Luther King, Jr. It is not a question of peace at any price; obviously a person should not give up his soul for peace. But there will be a price to be paid in sacrifice, hard work, devotion to the cause, willingness to go the extra mile to see the other side in a controversy.

In his jeremiad delivered a few months ago at the Harvard Commencement, Alexander Solzhenitsyn said, "We have placed too much hope in political and social reforms, only to find that we were being deprived of our most precious possession: our spiritual life." He had in mind Americans, Russians, everyone. It would be a mistake to think that a black majority government in Zimbabwe (Rhodesia) or a settlement of the Palestinian homeland issue, or a non-proliferation treaty, or a successful conclusion of the SALT II talks, or all of them together would guarantee peace. Dr. Johnson asked:

"How much of all that man endures
Is that which courts or kings can cure?"

Not much, for all they can help, unless man changes in his own heart. This is the overriding condition for peace.

During the second World War after serving as an infantry soldier, I was assigned to the Army Newspaper, Stars and Stripes, as a reporter and later editorial and feature writer. Not long ago I was reminiscing with my old scrapbook. My editorial of May 22, 1945 was addressed as an open letter to the men and women gathered in San Francisco to agree upon a charter for the organization of the peace and security of the world. I wrote:

"Yours is the difficult task of translating the aspirations of common people everywhere into a workable scheme for the preservation of peace. Yours is the job of bridging the gap between vague, half-formed ideals and hard, political reality; between past disappointments and future hopes. Yours, too, is an unmatched opportunity to earn the everlasting thanks of the human family. You have our prayers."

And on August 15, 1945, the day after V–J Day, I wrote in another editorial:

"The end of the war is not the end of responsibilities. United Nations plans for world peace must be made to work. And that's the business of each individual who would be a world citizen, just as much as it is the responsibility of prime ministers and generals."

As always then, the problem is an individual's control of himself. We need a guidance system to keep the human ship on a peaceful course. Neither a ship of fools nor a ship of angels, we are a ship of ordinary men and women who must realize we have to become extraordinary if we are to survive in peace, if our ship is to stay afloat and moving toward its destination.

The greatness of Tolstoy's War and Peace lies in considerable part in his bringing together hundreds of individuals and thousands of separate actions into one grand experience. "Only by taking an infinitesimally small unit for observation (i.e. the individual tendencies of men) and attaining to the art of integrating them can we hope to arrive at the laws of history." The present task of establishing a durable peace will require the integration of individual hopes and actions with the larger, but not therefore more important, policies of governments: the micro and the macro harnessed to the same task.

War has been a part of living for so many people in our country and virtually all other countries. It has certainly been a part of my life and that of my wife. A religion for living has to address the evils of war and the hope of peace with a moral fervor that is somehow tempered with analytic insight and a sense of the practical and achievable.

In these ways, then, spears can be beat into pruning hooks, until "nation shall not lift up sword against nation, . . . but they shall sit every man under his vine and under his fig tree, and none shall make them afraid."

Give us, god of war,
The weapon for your quiet death
To administer swiftly.
Give us, god of peace,
Not so much peace itself
As the will to seek it,
persistently and patiently,
Until at last it possesses us
And we it.●

CRIMINAL CODE REFORM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WEISS. Mr. Speaker, I would like to take this opportunity to commend both the Subcommittee on Criminal Justice and the full Judiciary Committee for their efforts on the reform of the Criminal Code.

As one who has expressed serious reservations with the bill, S. 1437, which passed the Senate under unusual circumstances, I am very pleased that the committee has decided to devote further study to this extremely complex issue before reporting legislation to the full House.

The subcommittee, ably chaired by our distinguished and soon to be retiring colleague, JAMES MANN, conducted thorough and exhaustive hearings, taking testimony from a number of diverse groups. An underlying theme sounded throughout the hearings, was that reform of the code was simply too massive a task to be effectively accomplished by one bill. The subcommittee recognized that not only was an omnibus bill not a feasible approach, but that the particular bill under deliberation, H.R. 6869/S. 1437 represented a serious threat to our civil liberties. Rather than simply report a bill, with which every Member had expressed grave doubts, the subcommittee attempted to recodify current law. The Members support the idea that reform of the code, if it is to be undertaken, should be accomplished by individual bills. The subcommittee recently reported a recodification bill to the full Judiciary Committee. After much deliberation, the full committee, however, has decided to devote more time to the issue, so that each Member of the House will have ample opportunity to give this legislation the complete and thorough study it demands.

I strongly support this action and commend the committee for a difficult decision, which some may look upon disfavorably. However, I believe it is important to reemphasize that reform of the code is one of the most important and difficult endeavors that the House will ever attempt. Such changes in the law must be undertaken not in haste, but with much thought and reflection.

In conclusion, let me again offer my praise to my colleagues for allowing the House to give criminal code reform its due consideration.●

CIA DOMESTIC INVESTIGATION POLICIES

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PREYER. Mr. Speaker, in February of last year, the U.S. Court of Appeals for the District of Columbia Circuit in a case arising under the Freedom of Information Act, Weissman against CIA, stated in dicta that the CIA did not have legal authority to conduct investigations of persons within the United States without their consent or knowledge on the grounds that such persons may be considered for employment by the Agency at some later date. Indeed, the CIA appeared to have compiled some 50 documents in the course of intestigating the plaintiff in the Weissman case from 1958 to 1963. Similar questions were recently raised but unresolved in another case before the D.C. Court of Appeals, Marks against CIA.

I wrote Admiral Turner last October inquiring about the Agency's current policy with respect to the conduct of domestic investigations. The 1947 National Security Act excludes from the CIA's mandate "law enforcement powers, or internal security functions." Because of the public interest in this issue following the revelations of the last few years, I would like to bring to the attention of my colleagues the reply to my letter from Admiral Turner. The letter follows:

SEPTEMBER 18, 1978.

Hon. RICHARDSON PREYER,
Chairman, Subcommittee on Government Information and Individual Rights, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in further regard to your inquiry concerning the effect of the decision in Weissman v. CIA on this Agency's investigative program.

In our earlier response, we indicated that the scope of the Weissman decision and its impact upon the Agency's investigative practices were under review by the Office of General Counsel and the Department of Justice. During that review Executive Order 12036 was issued. Section 2–208 of the Order limits the collection, storage and dissemination of nonpublicly available information concerning U.S. persons to certain enumerated categories of information, and specifies that such activity must be carried out in accordance with procedures approved by the Attorney General.

We are currently working with the Department of Justice on procedures under Section 2–208, which for CIA will reflect the requirements of the Weissman decision. We will provide you with a copy of the procedures as soon as they have been made final and approved by the Attorney General. In the interim we have revised Agency Headquarters Regulation 7–1, "Restrictions on Intelligence Activities," to reflect our understanding of the Weissman decision.

The enclosed answers are in response to the questions you originally posed concerning the Weissman decision. I want to assure you that any investigation of a U.S. person

now undertaken by the Central Intelligence Agency is in accordance with the Weissman decision as well as with other applicable law and executive orders.

Yours sincerely,

STANSFIELD TURNER.

Question 1: Does the CIA currently conduct investigations of unaffiliated U.S. citizens without their consent or knowledge on the grounds that they may be considered for employment, or as an intelligence source, at some future date? If so,

a. Describe the circumstances which would justify such investigations.

b. Provide the number of persons who are annually subject to such investigations.

c. Provide a copy of the Agency regulation(s) which authorize or govern this practice.

Answer: Except as outlined in (a) below, CIA's current policy is to conduct all such security suitability investigations with either the explicit or implicit consent of the U.S. person who is the subject of the investigation.

(a) In certain situations it is necessary to collect some information prior to approaching a U.S. person for cooperation or consent. For example, if CIA wishes to approach a U.S. person who is in a position to provide unique access to foreign intelligence, it is only prudent to first gather some preliminary information about the individual. There can also be situations in which an approach for consent prior to collecting any background information might jeopardize the security of an operation should the person be unsuitable from a security standpoint. In order to protect the security of a safehouse which the CIA has in the U.S., for example, it may be necessary to establish or confirm the identity of persons residing in the vicinity of the facility. It is also sometimes necessary to confirm the identity of a U.S. person who has volunteered to assist or cooperate with CIA.

The collection of information in the above situations is limited to:

(1) The collection of publicly available information;

(2) Lawful Federal, State or local Government or other records checks; and;

(3) Oral or written inquiries for the limited purpose of establishing or confirming identity.

(b) It is impossible to determine accurately the number of limited inquiries and National Agency checks made annually, since CIA records are not maintained under categories which would make such a compilation feasible. It is roughly estimated that about 100 limited inquiries and about 1,000 National Agency Checks are conducted annually.

(c) Agency Headquarters Regulation 7-1, "Restrictions on Intelligence Agencies," governs investigations of U.S. persons for security suitability. It has been revised to reflect the Agency's understanding of the Weissman decision. The applicable provisions of Headquarters Regulation 7-1 are set out below. In addition, procedures are currently being developed pursuant to Executive Order 12036, Section 2-208, concerning the collection, storage and dissemination of nonpublicly available information on U.S. persons. We plan to incorporate the Weissman decision's limitations in these procedures.

HEADQUARTERS REGULATION 7-1 (EXCERPTS)

(b) Investigations of U.S. Persons for Security Suitability. As used in this paragraph, the term "investigation" means the deliberate and systematic collection or acquisition of information about a selected individual or entity for the purpose of determining security suitability or reliability.

(1) Sections 1-811 and 1-813 of Executive Order 12036 recognize that investigations of applicants, employees, contractors, and other persons with similar associations with the CIA and the Office of the Director shall be conducted as necessary to protect the security of CIA installations, activities, information, and personnel.

(2) Subject to all other applicable limitations, including the restrictions established by E.O. 12036, such investigations of U.S. persons are prohibited unless:

(a) The investigation will involve no more than: (i) lawful Federal, State, or local Government or other records checks; and (ii) inquiries solely for the purpose of establishing or confirming identity or commercial reliability;

(b) The investigation will result in only the acquisition of publicly available information;

(c) The subject is an employee, military or civilian detailee, or independent contractor of the Agency and is witting of his or her status as such;

(d) The subject is performing or has offered or agreed to perform services for the Agency, whether compensated or uncompensated, and is witting that such services are or will be performed for the Agency;

(e) Subject is an Agency contractor or subcontractor under an Agency contract, or an employee of such contractor or subcontractor who will require a security approval to perform work on or in connection with a classified contract, provided that the contractor, subcontractor, or employee thereof, as the case may be, is witting that the contract or work being performed is for either the Agency or the U.S. Government;

(f) The subject is a person for whom security approval has been requested for either unescorted access to Agency facilities or access to classified Agency information or documents; or

(g) The subject has expressly consented to the investigation or has otherwise been informed or has knowledge that inquiries will be made without voicing an objection.

(3) Until further guidelines and procedures for investigations of U.S. persons are developed and approved by the Attorney General as part of Agency procedures on collection of information on U.S. persons (Section 2-208, E.O. 12036), any investigation of a U.S. person other than as permitted above shall require the concurrence of the General Counsel.

(4) The use of any specialized techniques in investigations pursuant to this paragraph shall be in accordance with any restrictions or procedures otherwise applicable to those techniques.

Question 2: Please set forth the Agency's position with respect to the legality of such practices after the Weissman decision.

Answer: The Agency believes the investigative practices outlined in Headquarters Regulation 7-1 are authorized and lawful under the National Security Act of 1947 and Executive Order 12036.

Question 3: If there are current Agency regulations which prohibit such practices, please furnish a copy to the subcommittee.

Answer: See answer to question 1c.

Question 4: If such investigations are no longer undertaken, at what point did the Agency end such practice? For what period of time were such investigations conducted by the Agency?

Answer: The Agency conducted Weissman-type investigations over a number of years beginning in the early 1950's. While we cannot determine the exact date, the Office of Security decided to cease such investigations shortly after the Weissman case was decided in January 1977, and no investigations of this kind have been initiated since the decision. In fact, it is likely that the last such investigation was conducted some time prior to the decision.

Question 5: Please indicate, or provide an estimate of the total number of persons who were subjects of such investigations in the past; and, a further breakdown, if available, of the number of investigations conducted a) where no future employment of, or b) no future use as an intelligence source or contact with the individual, was forthcoming.

Answer: It is not possible to determine the number of persons who were the subject of Weissman type investigations in the past since CIA files are not categorized according to the type of investigation conducted. We believe that the great majority of the subjects of such investigations were subsequently contacted by the Agency.

Question 6: If the Agency believes the collection of such information is illegal, what has been the disposition of records of earlier such investigations now considered improper?

Answer: Agency security records are not indexed or maintained in a manner that would allow the ready identification of Weissman-type records. We are, however, in the process of reviewing all security files to identify any records that are no longer proper for retention. The criteria being used in this review exercise include guidelines for the identification of Weissman-type records. A number of such records have already been set aside for purging.●

NATIONAL PARKS AND RECREATION ACT

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PHILLIP BURTON. Mr. Speaker, I wish to add to my previous remarks regarding the enactment of the National Parks and Recreation Act of 1978 in the following manner:

The Pinelands of New Jersey is a provision of this bill that I have described as one of the "gems." I must thank Jim Florio of New Jersey for his imagination, leadership, and determination in the face of seemingly insurmountable obstacles.

Jim Florio saw the need to preserve the vast wilderness of Southern New Jersey as the parts of the Pinelands in his First District of New Jersey were rapidly destroyed by unplanned development. Jim realized the impossibility of total Federal acquisition and the ecological futility of partial protection of an interrelated resource. Sensitive also to the unique culture, history, and economy of the Pinelands, and inspired by the concept of a "greenline park", he developed legislation through which limited development would be controlled to harmonize with the natural and fragile environment. His initial legislative attempts were met by strong and frustrating opposition from local development interests. In the face of this opposition I am proud to say, Jim Florio defended and advanced his position. Through the months of negotiations and meetings that continued up until the evening of the passage of this bill, Jim and his staff worked tirelessly to achieve a program that would protect the resources of this priceless region using the best resources of the Federal, State, and local governments.

I am happy to say that his efforts have met with success. The provisions of this bill are a tribute to his dedication, but I am sure that the most rewarding results for Jim Florio is not anything that can be printed on these pages. It is the knowledge that long after we all are gone and forgotten, the waters of the Pinelands will continue to flow cold and

pure past the silent oaks and pines of those woods.●

TRIBUTE TO MY FRIEND, BERT SACK, WHO CHAMPIONED HISTORY AND THE STORY OF THE BRONX, THE BOROUGH HE LOVED

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BIAGGI. Mr. Speaker, last month, our Nation lost a dedicated American who made the legacy of our country's past his life's work. Bronx County, New York City lost a native son who made the story of that borough an institution. And history lost an adopted son who became one of its most ardent heros. For Bert Sack had passed away after a full lifetime of devotion and service.

Bert Sack was a soldier himself during World War I, and long after championed the spirit of veterans everywhere. He was to become a foremost activist and educator within the borough he loved, to preserve the lessons of history, and pay proper tribute to the men and women who wrote that story with their deeds and their lives.

Bert Sack touched the hearts and souls of all the people affected by his example and good works. He worked hard to succeed and accomplish his tasks for the sake of the good that would come from it for the benefit of others. He worked all his life, retiring in December 1977 at age 81. In his own very special way, it could be said that Bert Sack made growing old respectable.

Bert was also a familiar figure in local schools and organizations, doing what he liked best—telling those Bronx tales. And it is significant that through the personal efforts of Bert Sack the Bronx obtained its own flag.

Civil War history was a special area of interest for him. His grandfather and great uncle had fought in that conflict. He was to become after many achievements, some of which I will mention here, the president of the Civil War Memorial Committee.

Bronxites and historians will long remember that it was through the work of Bert Sack that the West Farms Civil War Cemetery was saved and brought to the condition that it is today. Some of his other great deeds I can name now were: The restoration of the Civil War Soldier Monument in that cemetery; the flood lighting of Grant's tomb; the repairing of the Soldiers and Sailors Monument and the Ferris Plot on Westchester Square; the finding and restoring of other Civil War soldier statutes, and the establishment of memorial services in West Farms Cemetery every year.

Bert Sacks leaves behind a loving family and many devoted friends from all walks of life. We appreciate that his kind of spirit survives in all of them. His family's pride should be so special in having shared so much of his love and example.

To his daughter, Hermine, and son-in-law, Burton Sills, and grandson, Matthew Sills, we extend our warmest wishes that they will enjoy happiness and prosperity as Bert Sack would have wanted. And we wish his former associates of the Civil War Memorial Committee, Frank Wuttge, Jr., Helen Nelson, Juanita Carter, and Sam Muchnick, our best for their happiness and continued success in the work they have championed alongside Bert Sack.

It was also my privilege to know and work with this very fine man on many projects and endeavors. He will be sorely missed at home and in our neighborhoods, but his dedication and work for the preservation of history will long be remembered.

May he truly rest in peace. His work is done.●

COFFEE COUNTY GENERAL HOSPITAL

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GORE. Mr. Speaker, I would like to take this opportunity to call to the attention of my colleagues two important national and State awards recently received by the Coffee County General Hospital, in Manchester, Tenn.

Recognizing that in emergency situations, hard-of-hearing persons often experience difficulty communicating with medical, and law enforcement officials, the hospital held meetings in the region to explain emergency procedures to these disabled persons.

As part of this project, the hospital then developed a special identification card to enable hard-of-hearing citizens to display vital information in crisis situations. The card was distributed not only to persons with hearing disabilities, but to the hundreds of law enforcement, rescue, and emergency medical personnel in the mid-South region to alert these persons to the presence of the identification card.

Based on its innovative new program of outreach and assistance to the hard-of-hearing residents of the county, middle Tennessee, and the mid-South region, Coffee County General has won the coveted "MacEachern Award". Presented September 12 by the American Academy for Hospital Public Relations, the award cites Coffee County General for distinguished innovative service and "excellence in hospital programing."

More recently, the hospital was also chosen to receive the "Prism Award" from the Tennessee Hospital Association, adding further distinction to the outstanding efforts of the board and staff of Coffee County General.

As the Congress has reaffirmed in this session, the rights and opportunities of our handicapped citizens must be supported with a new vigor. Coffee County General Hospital has made a major step in that direction.

I know you will want to join me in citing the dedicated performance of the many persons responsible for these awards, including Coffee County Hospital administrator Jack Youree, project coordinator June Scarborough, board chairman Joe N. Deitzen and his tireless board members, Rev. L. M. Drinkall, director of Nurses Mrs. Katie Burns, and Chief of Staff Dr. Al Brandon, D.O.●

NOBEL PRIZE AWARDED TO TWO JOHNS HOPKINS UNIVERSITY DOCTORS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Ms. MIKULSKI. Mr. Speaker, the city of Baltimore, the State of Maryland, and the whole Nation, for that matter, applaud the work that Drs. Daniel Nathans and Hamilton Smith have done in the field of medical research to earn the most honored Nobel Prize. They, along with Dr. Werner Arber, of the University of Basel in Switzerland, yesterday won the Nobel Prize in medicine for research that has produced a new method for studying the ways genes determine heredity.

Dr. Nathans, who joined the Johns Hopkins University faculty in 1962, is Boury professor and director of the department of microbiology. Dr. Smith, a graduate of Hopkins Medical School, is now professor of microbiology there.

Both Dr. Nathans and Dr. Smith shared their findings with each other as their research progressed. These two scientists, along with Dr. Arber, were cited by the Nobel Committee for the discovery and use of "restriction enzymes" and their application to genetics. The restriction enzymes are molecules that trigger chemical reactions and, in this particular field of research, allow scientists to separate hereditary genes in much the same way that a person would take apart a watch to determine how it works.

Dr. Nathans' and Dr. Smith's work demonstrated how a restriction enzyme could cut the DNA molecule at certain points in its complex structure for further study. Furthermore these enzymes can be used to analyze the structure of genes. The discovery of restriction enzymes was one of the important threads in the development of molecular cloning, which has been underway for about 5 years. This cloning process involves the joining of a piece of DNA that is being studied to another piece of DNA that has the ability to duplicate itself. As a result, the second piece of DNA duplicates the first piece. This procedure is a means of isolating a piece of DNA under study, and at the same time, making large quantities of the substance.

Dr. Nathans and Dr. Smith have made important strides in the field of microbiology which will lead to new discoveries to benefit all people. I congratulate these two men for their vital contributions to the field of medicine and for their winning of the Nobel Prize as recognition of that work.●

CONGRESS SHOULD HAVE SOME SAY ABOUT TECHNOLOGY TRANSFER TO COMMUNIST COUNTRIES

HON. LESTER L. WOLFF
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WOLFF. Mr. Speaker, I have joined with my colleague, Mr. CLARENCE MILLER, Mr. PRICE, Mr. DORNAN, and Mr. ICHORD and 70 cosponsors in introducing a bill that would give Congress a say in determining what technology could be transferred to Communist countries. The bill would require the President to notify Congress of any license the Secretary of Commerce plans to grant to a Communist country, and Congress would have 30 days to veto the license or it would be approved automatically.

The lack of a clear U.S. policy on technology transfer has become increasingly evident. Congress should have a say in this critical process. Had Congress had such veto power, it is unlikely that the recent Dresser deal of oil drilling equipment would have gone through.

I would like to insert into the RECORD an article which appeared in the Free Trade Union News concerning U.S. policy on technology transfers. This article is a succinct exploration of the issues involved:

SELLING ROPE TO THE KREMLIN

(By Miles Costick)

"I believe we can save her (Russia) by trade. Commerce has a sobering influence . . . trade, in my opinion, will bring an end to ferocity, the rapine, and the crudity of Bolshevism surer than any other method."—British Prime Minister Lloyd George, February 10, 1922.

Since the early days of Soviet Bolshevism, the non-communist world has been trying to coax the communists into not being communists by helping them maintain their closed, totalitarian societies with periodic injections of capitalistic credits and western technology. The hoped-for result echoed in British Prime Minister Lloyd George's statement—now more than 56 years past—has failed to materialize. Yet leaders of the capitalist world continue to charge ahead like so many modern-day Don Quixotes in search of their impossible dream: the merger of totalitarian dictatorship with capitalism à la Wall Street.

The old saying, attributed to Lenin, that "Capitalists will sell the communists the rope with which to hang capitalism," should be updated. Capitalists will not only sell the rope, but sell it on credit.

Few people realize that the western nations and the communists are currently engaged in World War III, and the battlefields are economic. The problem is that the economic warfare and resource war conducted by the communist governments are an intrinsic part of their ideology and the worldwide revolutionary process waged by them. On the free world side of the equation, this is not perceived for what it is, and the result is "economic détente" which facilitates transfer of wealth from the West to the East. By providing technology of a strategic nature, entrepreneurs of the non-communist countries strengthen Soviet capacity to wage a more conventional warfare against the free world.

ECONOMIC DETENTE

The United States does not have a clear trade policy tailored to its strategic and economic interests vis-a-vis the communists. Instead it conducts commerce with the communists based on a vulgar assumption that "one can buy one's enemy."

In a secret talk to the Warsaw Pact (Soviet military block) leaders in Prague in June, 1973, Leonid Brezhnev spoke very frankly about using "economic detente" to consolidate the strength of Soviet bloc economies and to advance their standing strategic objectives.

Brezhnev told the communist leaders that by 1985 they will have achieved most of their objectives in Western Europe and also be powerful enough to exert their will anywhere in the world.

KISSINGER'S BRAINCHILD

Current U.S. policy on trade with the communists was the brainchild of Henry Kissinger. However, the same policy has continued under the Carter Administration. Kissinger's "economic detente" is based on linkage of the two economies, the U.S. and Soviet. The linkage is established by the extension of subsidized credits to the USSR, by transfer of U.S. technology, by exporting grain and foodstuffs, development of Soviet mineral resources, and by U.S.-Soviet ventures in the developing countries of the Third World. Kissinger envisioned that "through a set of strategic and economic agreements, the U.S. could spin a web of vested interests thereby encouraging the Soviet Union to temper its international behavior."

This, of course, has not happened. The USSR remains as aggressive as ever—currently using proxy Cuban troops and its satellites in Eastern Europe throughout the African continent to expand world communist influence and assure its strategic objectives. Meanwhile, the Soviet Union's debt in hard currency to the Western world and Japan has grown to over $20 billion, while the Soviet economic bloc, COMECON, owes the non-communist world over $64 billion.

If the communist governments continue to receive financial assistance from the West at the present rate, they will, by 1980, owe the free world $100 billion. This figure, furthermore, does not include loans to Communist China which only this year has begun to seek financial backing and technology from the Western world.

A great deal of commerce between the United States and the communist government is being subsidized by the American public. Those subsidies take place in direct and indirect ways. A good example of the latter was the 1972 Soviet grain deal.

By suddenly and unexpectedly cornering the American wheat market (by buying 25 percent of the total wheat crop of 1972), the Soviets caused an earthquake on the world commodity market. They bought the wheat at subsidized prices with a loan from the Commodity Credit Corporation. The terms of the loan were highly favorable—the interest rate was below the ongoing market rate. American taxpayers subsidized the Soviet transaction with some $800 million, and the Soviets turned around and resold some American wheat at inflated prices on the world market. They even tried to sell some of it back to the U.S. at inflated prices, while it was still in storage here!

It was estimated that the cost of the 1972 Soviet grain deal to American housewives was over $3 billion as a result of the increase in the cost of living index, due to the increase in food prices.

The U.S. policy of "economic detente" with the Kremlin has allowed the Soviets to obtain numerous advanced technologies of critical importance in effective strategic and conventional weapons systems—many at the expense of U.S. taxpayers.

For example, the U.S. taxpayers subsidized, at over $200 million, the development by Lockheed Corporation of the RB 211 high-bypass turbo-fan jet engine, and Henry Kissinger then approved the sale of this technology to the Soviets. Also approved for sale to the USSR was technology developed to produce the "Seabee" sophisticated cargo ship for which U.S. taxpayers forked out $50 million in research subsidies.

SUBSIDIZED COMMUNISM

During Kissinger's peak years, the American taxpayer was, in effect, subsidizing a foreign aid program to the USSR through the Export-Import Bank and the Commodity Credit Corporation—a new Marshall Plan. But while the post-World War II Marshall Plan made the survival of democracy in Western Europe possible, the Kissinger "Marshall Plan" bailed out the Soviet economy; it thus assured the continuation of totalitarian communism in the Soviet Union, its domination of captive nations, and its growing ability to export subversion and revolution.

In addition, the commerce with the Soviet Union is allowing the Soviets to produce strategic and conventional weapon systems which threaten the very survival of the free world. A typical transaction was the sale in 1972–73 by the Bryant Chucking Grinder Co. of Springfield, Vermont of 164 Centalign-B precision grinding machines. These unique machines are capable of mass production of precision miniature ball bearings to tolerances of one 25-millionth of an inch.

With acquisition of the Centalign-B machines from the Bryant Chucking Grinder Co., the Soviets obtained the capacity to mass-produce guidance mechanisms for the MIRV's (multiple independently targetable reentry vehicles armed with nuclear warheads) which, by 1980, according to U.S. intelligence officials, will allow the Soviets to have at least 10,000 nuclear MIRV's for deployment against targets in the United States.

COMPUTER TECHNOLOGY

The communists know exactly what they want in technology from the U.S. and other free world nations and are often able to get it at bargain-rate prices by playing one company against another for a better deal. For example, by spending a measly $3 million on a large scientific computer system built by Control Data Corp., the Soviets gained 15 years in research and development.

What the communists want most from the U.S. today is the very latest in computer technology and electronics. Computers are the core of today's and tomorrow's strategies, for, without them, there are no modern weapons systems. All the new technologies are dependent on computers and, without them, modern weapons systems could not be built, integrated, tested, deployed, kept combat-ready and operated.

Practically every major computer manufacturer in the U.S. has sold computers and related equipment and technology to the USSR and its satellite governments. These include General Electric, Hewlett-Packard, IBM, Sperry-Univac, Honeywell and RCA, in addition to Control Data Co. of Minneapolis, the principal producer of large strategic computer systems utilized throughout our defense and intelligence establishments.

Last summer it took a letter signed by 309 members of the House of Representatives for President Carter to veto a license for export of one of the world's largest computers to the Soviet Union. Control Data, the manufacturer of the Cyber 76 computer system, still has not given up, however, and has gone to court to try to force the government to issue a permit for the export of Cyber 76 to the USSR.

With such a computer, the Soviets could obtain any information of a confidential nature stored in data-banks in the U.S. Data processing companies in the U.S. have already sold to the USSR services and terminals which enable them to monitor the flow of information of an economic and corporate nature. In other words, with U.S.-generated help, the Soviets are capable of conducting economic espionage in the U.S.

Cyber 76 could improve Soviet conventional and strategic capabilities across the board. It would improve the Soviet air defense system to the point where it could render obsolete both the B–52 and B–1 bombers, seriously threaten our new cruise missiles, and vastly improve the precision of Soviet ICBM's.

The communist appetite for western technology is staggering. In the past decade, governments of the Soviet bloc have set up more than 800 joint manufacturing ventures with western firms, and, according to figures from the Economic Commission for Europe, in the period from July 1975 to July 1976 alone, about 300 contracts on industrial cooperation were signed by the Communist bloc countries and western firms.

SECRET DEALS

American corporations should not be allowed to conduct business with the communist governments and their agencies unsupervised—from the initiating phase to the conclusion of the deal. The Soviet state enjoys a monopsonistic power versus the competing suppliers from the U.S. and is playing one company against the other to obtain desired technology or industrial know-how.

Secret deals between the Kremlin and U.S. private industry often give the Soviets more than was originally intended. For example, many U.S. firms contributed to the construction of the huge Kama River truck plant in Siberia. Only 16 months after providing part of the capital for this multibillion dollar project, Chase Manhattan Bank officials admitted, "We got burned." It was really the security of the free world that "got burned" because the Soviets will use this monumental industrial plant financed by the West to produce heavy duty military trucks, tanks, armored vehicles and other military hardware.

Should the U.S. trade with the communist governments? The argument that trade promotes peace is off base. Commerce was actually growing between the U.S. and Japan just prior to the Japanese attack on Pearl Harbor, and no economies were more "interdependent" than the British and Germans before both World Wars.

Right now the U.S. has no coherent national policy on the transfer of technology to the communist superpowers and their satellites. As a result, the present U.S. export control system is totally ineffective. Concern led Senator Henry Jackson to write President Carter on July 25, 1977: ". . . I am persuaded that the effect of our past and current policies in this area has been to enable the Soviets and their allies to acquire technology that bears importantly on the military balance between East and West. . . . In my judgment, our current condition can best be described as acute hemorrhaging."

The only remedy for this is to set up a governmental board—strictly accountable to Congress—to see that only deals benefiting the American economy and security as a whole are permitted.

Too many executives of gigantic, multinational corporations have loyalty neither to America nor to the Western democracies under whose protective shield they optimize their profits. As an example, an article in the New York Times of February 22, showed how General Electric uses a German firm, the electrotechnical giant, A.E.G., to sell to the Soviets.

Part of A.E.G.'s business involves selling American technology under license to German companies. A.E.G., for example, won a $732 million contract for gas turbine pumps for the "Friendship" gas pipeline from western Siberia to the West German border in 1976, using licenses from General Electric.

General Electric has applied for an export license with the Commerce Department to sell twelve 51,000-pound-thrust CF–6 jet-aircraft engines to the Soviet Union. The CF–6 engine is a strategic and technological asset which should not be sold to the Soviets. This engine is used to power three of our largest aircraft—the C5–A, the world's largest cargo plane; the Boeing 747, capable of carrying 60 cruise missiles; and the DC–10. Moreover the turbo-fan technology in the CF–6 has been adapted for use in the engines of our newest naval frigates, destroyers and cruisers. The CF–6 engine was originally developed for the U.S. Air Force at a cost to the American taxpayers of $315 million.

The proclaimed objective of eventual victory for "socialism" on a world scale makes it clear that any accommodation with Western powers is a purely temporary phase, while the USSR and its satellites build their strength in the advancement of that standing objective.

One of the most urgent tasks is to inform the American public about the deadly potential inherent in the ongoing pattern of the West's strategic technology transfer to communist governments, instigated and carried out on the highest government and private sector levels in the name of "economic detente."

We do not have "economic detente," we have economic warfare waged by the Soviet government and its allies. In other words, in the name of corporate profit, balance of trade and some illusory detente, we are selling Moscow the rope to hang the free world.●

SUPREME COURT STANDS TALLER THAN THE PRESS

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. SIKES. Mr. Speaker, the power and/or arrogance of the press received a setback recently with the decision of the Supreme Court against the appeal of a New York Times reporter M. A. Farber. Farber defied a court order to reveal the contents of his investigative file in a New Jersey murder case. Articles written by Farber in 1975 about the murder case prompted officials to reopen an investigation which resulted in an indictment.

Farber refused to reveal the sources of the information which he published and which had a very direct bearing on the trial. His files were needed for private inspection by the presiding judge. Refusal to provide them resulted in a conviction of civil contempt for the New York Times with a fine of $5,000 per day until the files are produced. Farber was incarcerated on a sentence for civil contempt which was to remain in effect until the end of the trial, now in its eighth month, or until he produces his files. In addition, the Times drew a $100,000 fine and Farber a 6-month sentence for criminal contempt of court. The conviction in the lower court was upheld by the New Jersey Supreme Court. Farber sought action by the U.S. Supreme Court to avoid serving time. A stay of sentence had been issued by Justice Potter Stewart until the Supreme Court could hear the case. The Supreme Court has now ruled against him and Farber must now return to jail.

The courts and administration generally have shied away from facing up to the U.S. media, even when there have been obvious violations of the law in the publishing of U.S. Government security secrets. The Court's decision in the Farber case is a needed indication of courage in the courts.●

THE RAILROADS

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. GORE. Mr. Speaker, during the past year of this Congress, rail passenger service in the United States has come under intense scrutiny and debate. As you know, I have been active in support of a continuing and expanded commitment to this vital form of intercity transportation for our citizens.

Critics sometimes cite lack of public endorsement and interest in the survival of rail passenger service. However, during March of this year, the highly credible Louis Harris survey revealed an unqualified public mandate for improving and expanding service throughout the country.

This expression of support is fast becoming a groundswell of nationwide support as more citizens become aware of the impending threat of route eliminations. As an example of such grassroots interest, I take this opportunity to share an editorial from the McMinnville, Tenn., Southern Standard, September 6, 1978.

[From the Southern Standard, Sept. 6, 1978]

THE RAILROADS

Again this year the railroads, many of them now operated by a federal agency, need more money. Amtrak is not yet in the black, nor is the black even visible in the distant future.

And as earlier, perhaps unrealistic, hopes are not realized and it becomes evident federal money will be needed for a long time to keep the railroads operating, and to continue service on certain routes, some in Congress and among the public advocate less federal aid to the railroads, regardless of the consequences.

But in analyzing the condition of U.S. railroads, the primary fact to keep in mind is that the U.S. subsidized trucks and cars so heavily, by building highways, and the airlines, by building airports, that the railroads were, relatively, handicapped.

If Congress, state and local governments had spent billions in the last thirty or forty years building railroads and railroad stations, the U.S. passenger today would probably be riding on clean, fast, super-modern passenger trains, perhaps doing 150 m.p.h. But the railroads had no such help.

They will have to have federal support so long as the trucking industry and the airline industry enjoy the use of publicly-financed highways and airports. Rather than begrudge railroads federal money, the proper approach is to hope that long-time federal support can restore U.S. railroads to a competitive position. A fuel crisis or a national emergency could quickly make them once again indispensable to the welfare of American people.●

STATEMENT OF FISCAL YEAR 1979 DOE AUTHORIZATION FOR MILITARY AND NATIONAL SECURITY PROGRAMS

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SPENCE. Mr. Speaker, I would like to take this opportunity to compliment Armed Services Committee Chairman PRICE for his leadership in calling our attention to a serious problem in our weapons production capabilities. White House and congressional attention has focused on the ongoing Strategic Arms Limitation Treaty (SALT II) negotiations. A more crucial point of focus is the fact that our nuclear weapons production facilities are in such a state of disrepair that the United States may be on the verge of unilateral disarmament.

Our military production complex, which produces the raw materials for our modern weapons systems, was constructed during and just following World War II. In hearings before the Armed Services Committee on the fiscal year 1979 budget, the Department of Energy (DOE) called our attention to the fact that these weapons production facilities are nearing the end of their operational lifetime. In recent years, their obsolescence is such that spare parts are unavailable and must be fabricated on site. The DOE has further warned Congress that—

> Early indications are that the production facilities are physically and technologically deteriorated.

To investigate further the state of this deterioration, Chairman PRICE sent a special investigative team to inspect and report back on the state of our production facilities. The team's report confirmed the worst fears, stating that the situation "* * * could be called galloping obsolescence." The report further warned that—

> . . . putting off modernization and upgrading of the national security nuclear weapons facilities of DOE could be a form of unilateral disarmament.

This warning was taken to heart by the House Armed Services Committee, whose report on the fiscal year 1979 budget for DOE national security programs clearly stated the dangers. That report noted that the weakest link in our military production complex was "uncertainty," such that "* * * an unforeseen event in one system could result in requiring the shutdown of the total complex." The committee also warned that replacement of these facilities cannot be accomplished quickly and that the cost will be high.

The administration's failure to heed these warnings is yet another example of why the United States is falling behind the Soviets in weapons development. The very core of our weapons production complex needs replacement, on the fastest possible timetable. As the House Armed Services Committee has stated:

> If the United States is committed to producing modern nuclear weapons such as the cruise missile, MX, Trident, Lance, and other warheads, it must also be committed to producing nuclear materials for those weapons.

There are three potential solutions to remedy this situation. First, the present maintenance budget for DOE could be increased in an attempt to extend the lifetime of the existing facilities. DOE officials acknowledge that the cost of this option might run as high as $260 million for fiscal year 1979. Second, new production facilities could be constructed to fill the void that will be left by shutting down the existing facilities that are now near the end of their operating lifetimes. Third, DOE could use the Barnwell nuclear fuel plant in South Carolina to replace the aging production reprocessing capacity at DOE's Savannah River reservation. DOE studies have shown that the Barnwell plant is capable, with minor technical modifications, of reprocessing spent fuel from Government production reactors.

When the Senate considered the fiscal year 1979 DOE budget for military programs on September 30, Senator JACKSON amended that legislation to direct DOE to study the state of deterioration of the weapons production complex and report back by early next year. Senate action was prompted in large part by the House committee report and Senator JACKSON is to be commended for reacting along with the House to a potential crisis situation.●

FEDERAL LABOR-MANAGEMENT RELATIONS PROGRAM

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CLAY. Mr. Speaker, I am pleased to note the statement by Mr. FORD of Michigan on the Civil Service Reform Act of 1978 with special focus on title VII of that act. Mr. FORD and I were House conferees on this bill and have both worked shoulder to shoulder over the years to insure a strong Federal labor-management relations progam. Struggling with the major differences in conference between the Senate and the House on this detailed legislation was so time consuming that many of us feared we would be unable to come back with a conference report early enough to insure passage before adjournment. In fact, the conference documents were finished only hours before final Senate floor action.

With this in mind, we contented ourselves with a statement of managers that was not as complete as we would have preferred. Consequently, I am pleased that Mr. FORD, who has already made significant contributions to the understanding and enactment of title VII of this legislation during House debate, has offered a more detailed summary of the actions of the conference with particular focus on the statutory labor-management relations program. As my colleague from Arizona noted in the House debate on September 13, Mr. FORD, as a major contributor to title VII, is in a unique position to explain with thoroughness and understanding the work of the conference on title VII. It is my hope that this statement will help to guide others in understanding the important legislation.●

CARTER ADMINISTRATION OFFERS SATELLITE TO RED CHINA

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ASHBROOK. Mr. Speaker, the Carter administration seems intent on transferring our most advanced technology to the Communist regimes. In the past the Soviet Union, Red China, and other Communist countries have obtained from the United States sophisticated computer systems and unique petroleum exploration equipment.

Now the Carter administration has offered to sell the Communist Chinese an American communications satellite. In fact, the United States will even launch it for them—as well as provide ground stations for receiving and transmitting the signals.

The Atlanta Constitution calls the prospective United States-China deal "the most sophisticated transfer of technology between the two countries." U.S. officials concede that the sale might improve Chinese military communications, but apparently the Carter administration could not care less.

This is an extremely shortsighted policy. Our technology is being used to build up the industrial and military might of our enemies.

Every year the United States spends billions of dollars on defense, a defense made necessary by the threat of Communist aggression. At the same time we are spending these billions, however, we are helping to build up the enemies we are defending against.

This makes no sense. We should stop exporting our sophisticated technology to the Communist world.

Following is the text of the October 13 Atlanta Constitution article on the United States-China satellite deal.

PEKING PERMITTED TO BUY U.S. COMMUNICATIONS SATELLITE

WASHINGTON.—The Carter administration has informed Peking that the Chinese will be allowed to buy an American communications satellite and that the United States will launch it, administration sources said Thursday.

The sources said the administration is waiting for the Chinese to reconfirm that they are interested in making the deal, which would represent the most sophisticated transfer of technology between the two countries.

The Washington announcement came as a West German-led industrial consortium announced in Duesseldorf that it will bid to construct one of the world's largest steel mills in China, sweetening its offer with a record $14.7 billion credit pledged by German bankers.

Washington sources said the administration is fairly confident that the Chinese will make the satellite deal. Chinese representatives discussed it with White House science adviser Frank Press during a meeting in

July. Several years ago they "reserved" a slot for a communications satellite with the United Nations agency that monitors the field.

The sources emphasized that the discussions are still at a very tentative stage. If the Chinese choose to pursue the offer, they would have to make a deal with one of the handful of American companies that manufacture the satellites. To make the satellite effective, they would also have to buy an undetermined number of ground stations for receiving and transmitting the signals.

The cost could run into hundreds of millions of dollars. A satellite would cost $15 million to $17 million, according to industry sources. The cost of placing it in orbit would add another $13 million to $23 million, depending on the rocket used.

The satellite sale would not technically violate the longstanding U.S. policy against the sale of military equipment to the Chinese, the sources said. But they acknowledged that it might improve Chinese military communications.

Whether it had direct military implications or not, the sale would likely irritate the Soviets, who have repeatedly warned in recent months that it is dangerous for Washington to "play the China card"—a reference to cultivating closer ties with the Chinese while Peking-Moscow relations are strained.

In West Germany, Heinrich Weiss, head of the Duesseldorf engineering and plant construction company Schloemann-Siemag AG, said Chinese Metallurgy Minister Tang Ke invited his firm to form the bidding consortium when the minister toured West European cities in July.

If the bid is successful, the size of the order would be a record for West German companies and would be accompanied by one of the largest credits ever granted.

Weiss said the steel mill in Hopei province would have a planned production capacity of 10 million tons of crude steel a year when completed.

A first stage with a capacity of six million tons a year would be completed in 1985, he said.

Meinhard Carstensen, a director of the Frankfurt-based Dresdner Bank AG, confirmed that his bank has promised to finance the package.

If the German tender is accepted, Dresdner Bank would form a Western credit consortium—possibly including non-German banks—to supply up to $14.7 billion in buyers' credit to the Bank of China, he said. Funds drawn on the credit would be repayable in 10 years.

The sales to Peking would continue a trend of dramatically growing trade and technical ties with mainland China that began with the death of Mao Tse-tung and accelerated when the pragmatic Teng Hsiao-ping became deputy premier under Hua Kuo-feng.

Teng and Hua have embarked on an ambitious program to modernize China's educational, technological and military base, opening the country to the West in unprecedented ways.

An educational delegation from China is visiting Washington this week to make the final arrangements for the first of what is expected to be an influx of 500 Chinese students to American universities. In return, the Chinese have indicated willingness to allow significant numbers of American scholars to visit China on a long-term basis.

The Chinese are also making educational exchange arrangements with several nations in Western Europe and with Japan.

Trade between the United States and China is expected to triple this year to more than $1 billion, according to the National Council for U.S.-China Trade.

Most of the goods exchanged are still in the agricultural category, but the council says business in more sophisticated goods such as computers and petroleum exploration equipment is growing rapidly.●

AMENDING THE FARM LABOR CONTRACTOR REGISTRATION ACT OF 1963

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. FITHIAN. Mr. Speaker, S. 976 contains an amendment to the Farm Labor Contractor Registration Act of 1963 (FLCRA), which exempts companies producing hybrid seed corn and sorghum for seed to the extent that such companies do not use traditional migrant and seasonal workers and professional farm labor contractors.

When Congress passed FLCRA in 1963, we recognized the need to protect migrant and seasonal farm workers from exploitation by professional farm labor contractors. In 1974, FLCRA was amended in order to provide better protection for these workers. The 1963 Act (as amended in 1974) requires farm labor contractors to register each year with the Secretary of Labor and be fingerprinted, to designate the Secretary as their agent for service of process, to supply detailed information regarding the housing accommodations for workers, and to comply with insurance regulations for vehicles and drivers.

FLCRA was intended to help those migrant and seasonal farm workers who traditionally have been victims of exploitation. The report accompanying the 1974 FLCRA amendments described the exploitation of migrant workers:

> It is unfortunately an all too common experience for workers to be abused by farm labor contractors. Testimony revealed that in many cases the contractor: exaggerates conditions of employment when he recruits workers in their home base, or that he fails to inform them of their working conditions at all; transports them in unsafe vehicles; fails to furnish promised housing, or else furnishes substandard and unsanitary housing; operates a company store while making unitemized deductions from workers' paychecks for purchases, and pays the workers in cash without records of units worked or taxes withheld.

The act, however, was never intended to interfere with the longstanding relationship, common in the seed industry, between seed companies and students and other young people who are permanent residents of a given locality and who perform a variety of tasks for a few weeks during their summer vacations. Yet, the Labor Department began enforcing FLCRA's provisions last year against the seed industry even though these young people clearly are not migrant workers and they are not supervised, hired, or transported by professional farm labor contractors.

Congress did not intend FLCRA to be applied to students and other young people who work for a few summer weeks to detassel seed corn, to eliminate rogue plants and to perform other incidental farm activities for a variety of crops. Because the Department has unjustifiably interfered in the seed industry, we have amended FLCRA to exclude explicitly the seed industry to the extent that it employs young people not regularly required to be away from their place of residence other than during normal working hours.

Passage of this amendment is not the first time that Congress has acted to prevent the Labor Department from regulating a similar labor situation under FLCRA. The 1974 amendments included a similar exemption for the strawberry industry in the Pacific Northwest. In the report accompanying the 1974 amendments we stated that FLCRA was not intended to apply to students or other community-based berry-pickers in the Pacific Northwest.

The seed industry's summer workers are in a similar situation, and clearly do not need FLCRA's protections. These workers are residents of the communities where the seed companies produce their products, and a strong personal relationship exists between them, their adult supervisors, and the seed companies.

The American Seed Trade Association has estimated that over 280,000 young people are temporarily employed in the seed industry each year. Most of the people so employed are vacationing students who are recruited, not by professional contractors, but by seed company employees or school teachers and other community residents doing part-time work. Registration and fingerprinting of such supervisory personnel is unnecessary and would be counterproductive. If registration were required, more than 19,000 people would have to register, according to the American Seed Trade Association. In contrast, only 12,000 people in all other agriculture activities had to register in 1977.

The seed industry is a complex one. To the extent that corporations or farmers employ traditional migrant and seasonal farmworkers, they will remain subject to FLCRA. However, the amendment we are considering today provides an exemption with respect to students or other temporary local workers hired to detassel and rogue seed corn, to rogue sorghum or other crops, and to perform incidental farm activities. This amendment is not as broad as many Members would have liked, but Congress had insufficient time to consider fully a broader exemption for the seed industry.

Flexibility, however, should be exercised by the Labor Department in administering FLCRA with respect to seed crops other than hybrid corn and sorghum, which are specifically covered by this exemption. If the same temporary workers are used to detassel seed corn one day, then to rogue another crop the next day, it should be obvious that Congress intended to exempt such activity with respect to the other crop because the exemption applies to engaging "in other incidental farmwork," as well as to detasselling or roguing hybrid corn and sorghum for seed. Similarly, FLCRA would not apply where the same type of temporary workers are utilized in related activities, such as research on new types of seed, or to perform hand-pollination

and other functions related to the production of seeds.

Mr. Speaker, the fact that this amendment is needed at all sugegsts that the Department of Labor has misread its legislative mandate. It is my hope that from this point on, the Department will use its resources to protect those migrant and seasonal farmworkers for whose protection FLCRA was first enacted. I hope that further amendments will not be necessary, but they will be forthcoming if the Department continues to apply the act to groups of workers for whom FLCRA coverage was never intended.●

WINS SOFTBALL CHAMPIONSHIP

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MINETA. Mr. Speaker, while the Nation's eyes this week turned to the World Series, members of my staff turned their after-hours energies to battles closer to home. On Tuesday, October 10, they won the final game in the House softball league playoffs. While I am pleased with the team's victory, I think their attitude in their games has been even more interesting: Completely prepared to lose, they happened to win. They were sure they would have a good time, either way.

I would like to say a few words in praise of their achievements, but team captain Hal Stemler has taken care of that for me in the following rather one-sided description of the game.

The description follows:

MINETA-WIRTH WINS SOFTBALL CHAMPIONSHIP

It was written all over shortstop Jim Ray's face as he lunged to make the final putout of the game.

This was a team whose momentum had steadily built up. Sure, it had started slowly at the beginning of the season, but the machinery had fallen into place. The dozen players that constitute Mirth, Mineta-Wirth, with assists from Bedell and Markey, had streamrolled their way through four tough playoff games to the House of Representatives softball championship.

Second baseman Brian Hernon let the peg from rightfielder John Dalsanto through to Jim Ray, who found himself with the ball, fifteen feet from third base and staring at the opposition's errant base runner who had made the big turn and was now regretting it.

Jim Ray dove for the kill while the baserunner frantically tried to reverse his direction. Both players found themselves in the air at the same time, but the ball made contact with the runner before the runner landed on the base and the game was over. Despite the final drama, it wasn't even close. Mirth had defeated Ammerman-Pettis, 13–4.

Mirth's big guns battered the outfield ramparts with two blasts paving the power alley over the leftfield fence, one by John Dalsanto in the third and another by Jim Ray in the sixth.

The rest of the team aimed lower and settled for nasty line drives for extra bases. Paul Schoellhamer, Michael Rattigan, Bill Shem, and Brian Hernon all kept the outfield honest, and the attack produced runs in every inning except the seventh, when the game was already on ice with a nine run lead.

Bill Shem revived the lost art of base running, cleverly anticipating three enemy errors in a nonstop romp around the bases. On a second trip home, he was surprised to find himself awaited at the plate by a ball-brandishing shortstop. Sliding in like a piston in a a cylinder, Shem persuaded the prostrate defender to drop the ball.

Talk about RBI's and you have to talk about pitcher Jannelle Rattigan, whose vicious swing, deceptively cloaked in the calm exterior of a demurring southern belle, repeatedly sent penetrating drives through the infield when it counted, bringing home three runs. Catcher Chris Simone and firstbaseperson Stephanie Dean added their share to the offensive assault, crossing home so often they were charged rent.

The big difference, though, was defense. The game was won in the outfield where the acrobatic Mirth hawks shagged many a drive with "disaster" written all over it. The low slung lights of the Bolling Airforce Base field made the task even more difficult. Centerfielder Paul Schoellhamer did lose one in the glare, but made up for it with a beautifully executed shoulder roll to climax his next catch.

Thirdbaseman Michael Rattigan clamped an iron gate on the hot corner, converting seering furrow diggers into quick outs. And sure-handed Stephanie Dean added another night of flawless ball to her consistent season.

Starting shortstop, Captain Hal Stemmler, imposed strict standards on his players' performance on the field and was, therefore, the first to go. One hot grounder between his legs and he put himself on the bench, muttering his regret at leaving his ball-stopping chaps at home. His replacement, Mike Bobseine, made a fine catch in the outfield in the bottom of the seventh to stunt a threatened Ammerman rally.

Captain Hal then diverted his energies to Stengelizing with the fans and aiding the astute monitoring of the game by Chellie Campbell, substitute pitcher, catcher, and utility infielder, whose careful accounting during the lineup and snatched victory from the jaws.

"The fans were the key to victory," said Captain Hal, "all eight of 'em." He had special words of praise for the gallon of hot chocolate. Captain Hal estimated the number of fans turned away before the surly sentry at the airforce base guardhouse was bound and gagged at 100–200.

Following the game, Mirth players posthumously squashed empty beer cans in honor of former players Michael Jacobson and Kathy Anderson, to whom life was more important than the team, and who now reside in Colorado and Oregon, respectively.

There's talk now of a Capital Hill World Series, pitting the House champs against the Senate chumps, Captain Hal said.

There's also talk of skiing in Vail, suntanning in Acapulco, and a reunion of the Beatles.

Whichever happens first.●

PERSONAL EXPLANATION

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. STEERS. Mr. Speaker, on Friday, October 13, 1978, the House considered H.R. 13471, the Financial Institutions Act of 1978 by means of House Resolution 1439. The House passed this measure by a vote of 341 for, 32 against, and 9 voting present. I did not vote either for or against this measure, but simply recorded myself as "present."

On January 4, 1977, I submitted a copy of a personal statement of net worth for public consideration in the CONGRESSIONAL RECORD—the first Member of the 95th Congress to do so. In that statement I recorded ownership of shares of the Government Services Savings and Loan. In order to avoid even the appearance of voting in favor of legislation that could be construed as being in my own personal interest, I voted "present."

I might also add that when H.R. 13471 was considered for final passage by the House Committee on Banking, Finance and Urban Affairs, I was recorded as "present but not voting." ●

GRAZING LANDS MANAGED ACCORDING TO TAYLOR GRAZING ACT

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BAUCUS. Mr. Speaker, for the last several months I have been involved in discussions with the Department of Interior regarding a serious Federal land problem in Montana. I met with Secretary Andrus this morning to discuss the problem again, but we have not yet come to a satisfactory solution.

Thus, I am introducing legislation today that I believe should be enacted legislatively if Interior will not change its policies administratively.

The Missouri Breaks region of Montana has unique values for both livestock and wildlife. Recognizing this, President Franklin Roosevelt created the Fort Peck Game Range in 1934. Roosevelt's order stated that the lands be reserved for the conservation and development of natural wildlife resources and for the protection and improvement of public grazing lands and natural forage resources.

The range, now called the Charles M. Russell Game Range, was originally managed by the Bureau of Land Management under a joint agreement with the U.S. Fish and Wildlife Service. Grazing permits are issued under the Taylor Grazing Act.

The joint BLM-Fish and Wildlife jurisdiction on the range led to some conflicts and in 1976 Public Law 94–223 placed the range under the sole jurisdiction of the Fish and Wildlife Service.

I believe congressional intent was for grazing on the range to be continued under terms of the Taylor Grazing Act. It was the clear understanding in both the House and the Senate that the assumption of sole administration by the Fish and Wildlife Service would not act to prejudice or jeopardize existing grazing use by ranching operations in the area.

Fish and Wildlife does not agree with this view and their policies are threatening the livelihoods of local livestock interests. The major problems are:

First. Prohibition of transferring grazing permits as part of the base property when selling ranch units;

Second. Reduction in the length of grazing leases from 10 years to 1 year; and

Third. Gradual loss in permitted numbers of animals grazed.

Fish and Wildlife policy has led to rapidly deteriorating relationships between the administration and the residents of northeastern Montana. The Federal hardheadedness is completely unjustified. A more reasoned grazing policy would in no way detract from the wildlife values of the CMR.

Several months ago Mr. UDALL, chairman of the Interior Committee, Mr. RONCALIO, chairman of the Public Lands Subcommittee, and I expressed concern about Fish and Wildlife policy on the CMR to the Secretary of Interior. Since then, we have been pressing the Department to change some of these policies. In particular, we would like recognition of the fact that grazing permits have historically been attached to base properties and should transfer automatically with those properties and that the length of grazing permits should be 10 years to encourage ranchers to protect their rangeland and to give them a basis for long-term planning.

During several months of meetings and correspondence with Interior, no resolution has been reached. For that reason, I now offer this bill which would mandate that grazing on the Charles M. Russell Game Range be administered in accordance with the Taylor Grazing Act as are other BLM lands. This amendment offers a quick solution to the problems we are having on the CMR. And if it does not pass this session, and if Fish and Wildlife policies do not change, passage of this amendment should be a major priority of the Montana delegation next year.

The text of the bill follows:

H.R. —

A bill to require grazing management of Charles M. Russell National Wildlife Refuge in accordance with the Taylor Grazing Act and the Federal Land Policy and Management Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, The Secretary shall manage the Charles M. Russell National Wildlife Refuge in accordance with the Taylor Grazing Act (43 U.S.C. 315–315 (o)), the Federal Land Policy and Management Act of 1978 (43 U.S.C. 1701–1782), and other applicable law.●

CIVIL SERVICE REFORM

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mrs. SCHROEDER. Mr. Speaker, as a conferee on the Civil Service Reform bill and one who had a particular interest in several sections of the bill, including the labor relations portion, I was pleased to see Mr. FORD's statement today amplifying the intention of the conferees on title VII of that bill. In conference we were confronted with not only a long, but a particularly intricate bill, and because our work fell close to adjournment, we were forced to settle for a statement of managers that is somewhat brief.

As a former employee of the National Labor Relations Board, I found Mr. FORD's statement reflected a thorough understanding of the work of the conference on title VII. It is my hope that this statement will serve to complete the record about the actions of the conferees on S. 2460.●

STATEMENT BY THE HONORABLE H. M. PATEL

HON. JOHN J. CAVANAUGH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CAVANAUGH. Mr. Speaker, the Honorable H .M. Patel, Minister of Finance and Governor for India of the International Bank and the International Monetary Fund, recently spoke to the annual meeting of those institutions. Mr. Patel's speech is an important, detailed description of current international economic forces as seen by a highly qualified spokesman for a major developing country. I am pleased to be able to share his views with my colleagues.

The text of the statement of September 26, 1978 follows:

STATEMENT BY HON. H. M. PATEL

At this time last year, the small and faltering recovery in the industrial world seemed to portend, if not recession, generalized stagnation from which a way out could only be found if the leading industrial countries were prepared to take urgent corrective action. As the year advanced, pessimism gave way to moderate optimism and during the Interim Committee meeting in Mexico City the prognostications were predominantly favorable.

Since then, the pendulum once again swung back and the outlook for the coming months began to look decidedly gloomy. This was because the coordinated corrective action on which our hopes of recovery rested did not materialize. The continued sluggishness in economic activity in the developed world, the low rate of expansion in world trade and the instability in exchange markets observed since the last Annual Meeting have had, and will have, a number of adverse repercussions on the developing world. These will obviously further depress the already low rate of income growth among non-oil developing countries and delay the removal of poverty of millions of their people. It was expected that the declining trend in the developing countries' balance of payments deficits from the peak of 1975 would be reversed in 1978. As it is, the aggregate deficit would be about 45 per cent larger than the level last year, partly owing to an unfavorable movement in the terms of trade. The debt servicing problem of some of these countries might, therefore, become acute and force them to adopt deflationary measures and/or severely restrictive import policies unless adequate relief/credit is made available.

I cannot help feeling that the health of the world at this time would have been better if there had been greater cooperation and coordination among the leading economies notwithstanding the limitations on the maneuverability of the authorities imposed by unacceptably high inflation and unemployment rates. Some efforts were no doubt made in this direction but they have failed to yield the desired results because of inadequate and halting implementation which again was the result of excessive caution and conservatism. We welcome the renewed initiative of the Bonn Summit declaration and feel encouraged that, this time, the needed policy measures will be expeditiously implemented. Whatever be the preferred development strategy—the "locomotive", the "convoy" or any other—the fundamental fact is that because of the sheer weight of their economies, the policies and performances of major industrial economies will have far greater multiplier impact, in either direction, on the rest of the world. We would, therefore, urge them to set their growth targets as high as possible commensurate with reasonable price stability.

In the field of international payments, the most striking feature has been the pronounced instability of exchange rates and its unsettling effects on the growth of the income and trade of developing countries. These countries have had to deal with this phenomenon at a time when they were faced with the difficult task of undertaking domestic adjustment measures in the face of a severe deterioration in their terms of trade since the early seventies. The slump in the U.S. dollar and the continued inflation in the industrial world have sharply reduced the real purchasing power of developing countries' reserves. One does not have to be an unflinching believer in fixed exchange rates to be convinced that the world could do without the extreme volatility of exchange rates we have experienced in recent months. Given the inflation differentials among countries and the distribution of balance of payments surpluses and deficits, exchange rate movements are inescapable; but we have serious reservations whether the observed movements could be characterized as orderly or even appropriate. Here again, lack of adequate cooperation among major economies has caused unwarranted fluctuations. Leading economies should undertake (i) timely and appropriate policy measures, (ii) concerted action to resolve the underlying destabilizing factors, and (iii) prudent intervention to ensure orderly movements in exchange rates. The International Monetary Fund should make effective use of its powers of surveillance under the amended Articles to prevent the persistence of disorderly movements in the exchange markets.

In the context of the persistent and large imbalances on the external account, and to meet the members' needs arising from future growth in international transactions and disequilibria emanating therefrom, it is essential that adequate resources are placed at the command of the International Monetary Fund. We are happy to note that the expected augmentation in the resources of the Fund as visualized under the Sixth Quota Review has come about. We also note with satisfaction the agreement reached by the Interim Committee last Sunday regarding a 50 per cent increase in Fund quotas in the process of Seventh Quota Review. It is our earnest hope that the new quota will become effective early next year.

There is now an almost complete agreement on the need for a fresh allocation of special drawing rights. In this context, we note with satisfaction the agreement reached by the Interim Committee at its last meeting regarding the allocation of SDRs in each of the three years 1979 to 1981. We are however disappointed at the size of the recommended allocation. In our view, the figure of 4 billion SDRs of annual allocation during the next three years falls short of the genuine needs of the international monetary system. We are also not very happy with the recommendation of the Interim Committee that 25 percent of the next quota increases be paid for in SDRs. However, we welcome the decision to reduce the reconstitution requirements in respect of SDRs from 30 to 15 percent of net cumulative allocations. We hope that in due course reconstitution requirements will be totally eliminated.

The stiffness of conditionally attaching to Fund drawings and the widespread feeling

among developing countries that they are discriminated against in this respect are matters which merit serious attention. We are happy that a comprehensive review of this aspect is being conducted by the Fund Executive Board and hope that it would lead to such modifications in conditionality as would encourage the members to approach the Fund before their problems assume serious proportions. Recent experience of developed countries suggests that the task of orderly economic management involving the reconciliation of often conflicting requirements of internal and external balance is not an easy one. I very much hope that, when it comes to handing out policy prescriptions to developing countries, donor countries as well as international organizations would draw appropriate conclusions from the recent experience of developed countries. In particular, the conditionality of Fund drawings must take adequate account of economic, social, and political constraints. Our objective should be to ensure that the Fund assistance is not in the nature of "last resort"; on the contrary, members really should be encouraged to knock at the doors of the Fund first. As we would very much like to have this kind of relationship developed between the Fund and its members, it is necessary that the members should feel assured that what they are asked to do for receiving assistance is about the minimum necessary. We would also urge a further liberalization of the Fund's compensatory financing facility involving, among other things, the calculation of export shortfalls in real terms and an increase in the limit of compensatory drawings from 75 percent of quota as at present to 100 percent.

Last year I had expressed concern at the restrictive tendencies on the trade front. This undesirable trend appears to have gained strength. The Fund's 29th Annual Report on Exchange Restrictions concludes that during 1977 and early 1978 several countries in Europe and elsewhere made more frequent use of protectionist trade measures. This is increasingly hurting a growing number of developing countries partly because it has coincided with a drop in the rate of expansion of world trade. The social and economic problems connected with structural adjustments needed to absorb more imports from developing countries are difficult but these should not be exaggerated. In any case industrial and creditor countries should not attempt to throw the burden of adjustment on poor developing countries through the erection of trade barriers. The developing countries just do not have the economic capacity to bear the burden of adjustment. In this respect, the determination of the Bonn Summit leaders to maintain and strengthen the open international system is welcome. However, the manner in which the multilateral trade negotiations are being conducted raises serious doubts in the minds of developing countries about the outcome of these negotiations. It is my sincere hope that in the coming months there will be greater awareness of the aspirations and concern of developing countries so that in line with principles accepted in the famous Tokyo declaration these negotiations are able to make a major contribution to an orderly and equitable management of the growing interdependence of the world.

While on the subject of trade, I cannot but point to the serious deterioration which the non-oil developing countries have suffered in their terms of trade in the last few years. Many of them have made strenuous efforts to expand the quantum of their exports, but their over-all balance of payments position continues to be under strain. A degree of instability in export prices has contributed to this but the increase in the prices of their imports have also been a factor of great significance. Therefore, while measures to stabilize export earnings at a higher level are necessary, this is only a partial solution to the wider and more complex problem of their balance of payments vulnerability. A review of compensatory financing facilities should keep these wider aspects in mind. It is certainly not beyond our ingenuity to devise appropriate mechanisms which would enable developing countries to withstand the danger of disruption of their external payment situation.

Of equal concern to us is the overall situation with regard to international resource transfers. Official development assistance levels have declined as a percentage of the Gross National Product of donor countries from 0.36 in 1975 to 0.33 in 1976 and the projections of the World Development Report suggest that they may rise to no more than 0.39 by 1985. This is a grossly inadequate measure of progress. What has happened to the target of 0.7 per cent, a target which was an internationally declared objective but whose fulfillment is now confined to a handful of developed countries and some oil producing countries? Capital transfers represent an important aspect of economic interdependence. We believe that an increase in official development assistance is an essential aspect of the international adjustment process in that the surplus countries would be fulfilling not merely their obligations in terms of adjusting their balance of payments but also helping in raising the level of development in the developing world. In fact, such an increase in developmental assistance would help to expand economic activity in many leading industrial countries where at present there is considerable underutilization of productive capacity and unemployment levels are higher than what they should be; and some of these countries also happen to be the ones whose official development assistance performance is disappointingly low.

An analysis of recent trends of external capital flows to developing countries shows that concessional capital flows have increased far more slowly than commercial capital flows. Since the capacity of low income countries to absorb external capital on commercial terms is extremely limited, it is not surprising that these countries have failed to attract external resources commensurate with their objective needs and growth potentialities. There is an urgent need to correct this growing asymmetry so that external capital inflow on soft terms to the lower-income countries is encouraged. There is indeed no real substitute for larger official development assistance.

The increase needed in levels of official development assistance reflects also our recognition of the need for concessionality in assistance to the poorer among the developing countries. It is a matter of gratification that several Development Assistance Committee members are now providing assistance to the low income countries on a grant basis. While this is welcome, it must also be pointed out that the problem of debt servicing remains a serious one for many poor developing countries. The logic behind the provision of new assistance on a grant basis clearly needs to be extended to debt relief or any other form of retroactive application of the currently prevailing soft loan or grant terms. I would like to take this opportunity to express our appreciation of the measures taken by Canada, the Netherlands, Switzerland, Sweden, and the United Kingdom in canceling the official debt owed to them by several developing countries.

While the importance of concessional aid to low income countries has received universal recognition, it is a matter of regret that the replenishment of International Development Association resources regularly runs into problems, even to a point where its commitment authority appears to be seriously jeopardized. Although the funds available to IDA V will not be fully committed before June 1980, we strongly support Mr. Namara's plea for start of negotiations for the Sixth Replenishment latest by the end of the current year. In view of the great importance of the International Development Association to the poorer among developing countries, it is absolutely essential that the next replenishment should involve a substantial expansion of resources of the International Development Association in real terms.

The problem which the International Development Association is facing is part of the larger issue of mobilization of resources for the multi-lateral development institutions. The World Bank has expanded its activities in a significant manner during the last decade under the inspiring leadership of Mr. McNamara and as he begins his third term, the Bank is poised for an even greater role. The proposal for a capital increase of the Bank has come not a day too soon and we strongly support the enlargement of the Bank's capital, so that it might be enabled to play an even more helpful role in the future. We welcome President Carter's declaration affirming the support of the United States for the increase in resources both of the Bank and the International Development Association.

The Bank's expanding activity is not merely a matter of numbers. I believe its activities are beginning increasingly to make a qualitative difference to the lives of the people it serves, for they are oriented essentially toward alleviation of poverty and the provision of basic human needs. This change in the Bank's approach is completely in line with the thinking of my country. The objectives of India's new Five Year Plan are precisely these, namely, the removal of unemployment and significant underemployment, an appreciable rise in the standard of living of the poorest sections of the population, and the provision of some of the basic needs of the people in these income groups like clean drinking water, adult literacy, elementary education, health care, and rural housing. Accordingly, we are planning not merely to achieve a higher rate of economic growth than has been feasible in the past but to move toward improving the productivity of the lowest income groups and thereby effect a significant reduction in the disparities of incomes and wealth.

We recognize that to achieve these objectives, the major effort has to be made by ourselves. India has progressed considerably along the path of self-reliance and the share of external assistance in relation to our own investment effort is indeed low. But at the same time we believe that the extent to which the international community is able to sustain the efforts made by countries themselves makes appreciable difference to the speed and the rate at which the developing countries are enabled to move forward in the achievement of their essential objectives. A favorable international economic environment characterized by forward-looking trade and aid policies by the developed countries can greatly enhance the effectiveness of domestic policy measures adopted by the developing countries.

The message of the World Development Report is that international development ought to be a combined effort of both the developed and the developing world and that the world cannot afford to have large patches of poverty alongside tiny islands of enormous affluence. In this task the international financial institutions have done commendable work and their successful functioning in the future will without a doubt provide valuable support to the grim struggle of millions of the world's poor for a better and more meaningful life.●

TERRORISM AGAINST BULGARIAN EMIGRES

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McDONALD. Mr. Speaker, since the 1917 Russian revolution there have been frequent instances of assassination of political opponents by Communist governments. While the most notorious was the 1940 murder of Leon Trotsky in Mexico by Stalin's secret police, over the years many other less well known opponents of the Soviet regime have been killed to stifle their criticism.

In recent years, while the Soviet terror has continued the Yugoslav secret police have become notorious in Western Europe and, to a lesser extent in our country, seeking out and killing those hostile to Tito's totalitarian regime. And, in Miami, the Cuban Secret Police, the DGI, have followed these examples, killing and maiming some of the most active and vocal of Castro's enemies who had sought refuge in the United States.

Within the past month, two stalwart critics of the Bulgarian Communist regime, living in London have died unnaturally; one without doubt murdered by the administration of poison or pathogen in a cruel and bizarre manner. This same method was used in an attempt to assassinate a third Bulgarian emigre, living in Paris, France; and in Los Angeles an enemy of the Bulgarian Communists, Rev. Stefan Bamkov reports death threats being made against him, and shots being fired at his home during the night hours.

By these terror tactics a climate of fear has been created in the Bulgarian emigre anti-Communist community; the Bulgarian dictatorship has attempted to suppress the murder investigations in London; the head of the Bulgarian secret police has threatened those who dare to criticize the regime of Todor Zhivkov; and Radio Sofia has boasted, "the long arm of State security will always outreach the running feet of dissident traitors."

On September 11, Georgi Markov, 49, the Bulgarian writer and broadcaster who had fled from his country in 1970, died as the result of being stabbed with a poisoned weapon. Markov, who was given a prison sentence in Bulgaria in his absence in 1972, was a member of the British Broadcasting Corporation's Bulgarian service and also broadcast from such radio stations as Radio Free Europe in Munich and Deutsche Welle in Frankfurt. Before he had fled his country, Markov had been very close to the ruling elite and to the president and chairman of the State Council, Todor Zhivkov He knew many details about the private lives of the Communist leadership and used these in his broadcasts which had gained tremendous popularity in Bulgaria. At the time of his murder Markov was planning to write his memoirs, which would have been a sensational exposure of life at the top in the Communist world and devastating to the image that Bulgaria's dictatorship sought to portray.

According to press accounts, Markov on a recent visit to Munich to meet friends in Radio Free Europe, told them that he was being followed by agents of the Bulgarian secret police and had received a telephone call saying that he would be "liquidated," but not "in the normal way."

Markov was murdered in central London by means of an impregnated alloy sphere or pellet, less than the size of a pinhead, being injected into his thigh with a tip of an umbrella. An identical sphere was surgically removed from the back of another anti-Communist Bulgarian broadcaster, Vladimir Kostov in Paris, France, on September 28. Kostov survived the attack, which took place on August 26, but only after spending 12 days in hospital with a high fever.

Intelligence community sources report that bizarre, near-silent weapons, such as those that were used on Markov and Kostov are known to be used to "eliminate" opponents of Communist regimes. While tests continue to determine the substance that was used, experts suggest that the alloy spheres, measuring sixty-eight thousandths of an inch with two holes sixteenth thousandths of an inch drilled into them, may have contained a virus. The spheres were very precisely engineered and it is believed that they were made by a watchmaker or micro-engineer.

According to one report,

A virus that would seed an infection may have been chosen by the murderers, since it would be more difficult to isolate and identify than an organic poison, thus heightening the atmosphere of mystery and terror. Before it was fired, the sphere would have been sealed by some kind of jelly that would melt inside the victim at a precalculated rate, allowing the substance inside to escape at any desired rate. The alloy sphere could have been injected into the body by the use of a low powered compressed air gas gun which would produce no noticable recoil or noise. Such a gun could be concealed in or disguised as an umbrella and would have the capability of placing the sphere or pellet under the skin, where it could easily escape detection. The wound caused would only show as a small red mark resembling an insect bite.

The assassination of Mr. Markov is being investigated by a team led by Comdr. James Nevill who is head of Scotland Yard's antiterrorist squad. As reported in the London press,

Commander Nevill is particularly anxious to trace a taxi-driver who picked up a man who "did not speak very good English" who had jabbed Mr. Markov with an umbrella. The man had dropped the umbrella, picked it up, and entered a passing cab . . .

Three weeks after the murder of Mr. Markov, on October 3, another Bulgarian employee of the BBC, Vladimir Simeonov, 31, was found dead in his apartment. According to the antiterrorist unit who are also investigating his death, he had died of suffocating by blood that had clogged his windpipe due to a broken nasal bone. He was found dead at the bottom of a staircase in his home. According to Scotland Yard,

We treat this as a suspicious death considering the recent murder of Georgi Markov.

On October 4, the Bulgarian Telegraph Agency, the official Government news agency, launched a major radio attack against the British press for their reporting of the deaths of Markov and Simeonov, and the attempted murder of Kostov. This followed an earlier protest by the Bulgarian Embassy in London which had threatened serious consequences if the "hullabaloo" over the murder of Markov continued in the press.

The concerns for favorable reporting were obviously not shared by Dimitar Stoyanov, Bulgarian Minister of Internal Affairs, who is responsible for the notorious Drjavna Sigurnost (DS) the Bulgarian secret police. As reported by the German newspaper, Die Welt (Bonn, October 4, 1978), Stoyanov appeared on Bulgarian television on September 15, saying,

Our enemies cannot evade our action anywhere. Borders do not exist for us. Counter-revolution must know that it has no secure refuge.

And, in the face of such a statement the London Sunday Telegraph of 2 days later, September 17, 1978, very appropriately reported:

If suspicions that Mr. Markov was the victim of a political assassination ordered by the Bulgarian authorities are confirmed, one man likely to figure in inquiries is Dimiter Kendimenov, who works at the Bulgarian Embassy in London.

Though Kendimenov is listed as the Embassy's Counsellor for Economic Affairs, ranking fourth on the diplomatic list of the mission, he is known to be no diplomat at all but the "resident" or official head in Britain of the Bugarian intelligence network. DS which stands for "Drzaven Sigurnost" or Department of Security.

No espionage or subversive network, least of all a Communist one, ever divulges its activities to the regular diplomatic regime under which it shelters for cover purposes only.

Mr. Kendimenov has his own masters in Sofia and his own separate channels of communication with them.

The same applies to all his colleagues in Britain. One of these, who is thought to have made the advance assessment of what sort of danger Mr. Markov constituted, was Kolyo Trankov. Until he returned to Sofia at the beginning of this year, Mr. Trankov worked in the guise of a third secretary in the Embassy's Consular Affairs section.

One of his special tasks was to "keep tabs" on all the anti-Communist Bulgarian emigres in Britain and it is known from friends of Mr. Markov that he tried to win his confidence.

Mr. Trankov was replaced in the same post by Francesco Toskov, who is still at the Embassy.

Mr. Speaker, in light of the long record for brutality and terrorism of the Bulgarian Communist secret police, which included the 1974 kidnaping from Copenhagen, Denmark, of Boris Ilieo Arsov, an outspoken critic of Zhivkov's regime, his subsequent kangaroo court trial, and death in a Bulgarian prison, there are strong indications that secret police chief Stoyanov's statement that "borders do not exist for us" presages a continuing campaign to international terror.

I am urging my colleagues to join with me in urging the Federal Bureau of Investigation to take every measure necessary to protect the safety of Bulgarian emigres in the United States, and in urging the Central Intelligence Agency to give great attention to this matter as

well. Should any incidents occur against U.S. residents, Congress should take action not only against Bulgaria, but against its masters in the Soviet Union.●

STATEMENT OF PETER J. McDONOUGH

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PATTEN. Mr. Speaker, on Monday, October 9, 1978, I attended Columbus Day ceremonies in my district at South Plainfield, N.J. I think that these commemorative ceremonies are important, for they provide us with an opportunity to display pride in our history and an appreciation of the people with whom we live.

State Senator Peter J. McDonough spoke at this ceremony, and he has provided us with a statement which is a true testament of the Italian people and their contribution to the State of New Jersey. It is a story of hard work, dedication, and love of country; and one which I would now like to share with my colleagues.

The statement follows:

STATEMENT OF PETER J. McDONOUGH

New Jersey wouldn't be what it is today without the tremendous efforts of great Italians through the years. For example, during this weekend we celebrate Columbus Day, that great Italian forefather, who left a wonderful legacy for all American generations to follow. New Jersey Italians can be proud of the strides made by their people. The emigration from Italy over the course of a century totaled almost 5 million and was second only to that from Germany. The majority of the Italian immigrants however arrived between 1900 and 1914, with the peak of 285,000 being recorded in 1907. New Jersey experienced the full force of this enormous influx. Its Italian born residents increased from about 42,000 in 1900 to over 191,000 a short 30 years later. However, New Jersey was barren of Italians before the civil war. One of the earliest arrivals, Giovanni Battista Sarrori, settled in Trenton about 1800 and founded the first spaghetti factory in the United States as well as the first Catholic Church in New Jersey. Most of the pioneers came from northern Italy and followed specialized occupations as fruit merchants, music teachers, barbers and plastic workers.

In the 1870's the southern Italians began their epic migration to America. It was from the southern regions of continental Italy and the island of Sicily that most of New Jersey's Italians were to come. The unification of Italy in 1861 had brought neither peace nor prosperity to the Italian south. During this festive time of the year, and the celebration of the Italian pioneer, Christopher Columbus, it brings to mind the day of elementary school, when all of us kids would sing . . . "Columbus sailed the ocean blue in 14 hundred and 92 . . ." Remember that? Well for most Americans Columbus was the father of this great land of ours. Disputed as it may be from time to time, we must all agree that had it not been for Columbus, America would not be what it is today. Had it not been for the large south Jersey Italian population, things might not have been quite the same. Since New Jersey farmers were suffering from a shortage of labor, efforts were made to recruit the Italians as agricultural laborers and tenants. Charles Landis, the foremost promoter of settlement in south Jersey, sought to attract Italian immigrants through agents and advertisements in Vineland, still considered New Jersey's answer to Rome. An even larger colony at Hammonton was later settled in Atlantic County. For half a century, the Italians also played an important role in the agriculture of south Jersey as migrant laborers. The harvesting of vegetable and fruit crops, especially berries required large numbers of pickers.

Even today we see large numbers of Italian farmers still on their land. Farming and farming—keeping New Jersey and the rest of the northeast tables rich with food the Good Lord has provided from his land. Italians are tremendously blessed with the sense of imagination and creativity. And we can see their handiwork wherever we go. In central New Jersey alone, many of the older Italian citizens to this day till their own gardens, build their own homes, and are an active part of the American society.

We hear a lot about discrimination from throughout the country, whites hating blacks, blacks hating whites, and on and on. But if ever there were cases of discrimination, Italians at one time were the target of attack. The parochial spirit of the Italians was nowhere more evident than in their organization. Scores of mutual aid societies were organized, each of which limited its membership to those from a particular town. For example, in Plainfield there is a maddalonese society. This type of association united the townsmen in mutual assistance, providing sick and death benefits and social and sport activities.

They essentially carried on the confraternities of the old country. But things soon began to change in the early part of this century when Italians became more and more politically astute. Today, we see large numbers of Italians becoming deeply involved in the American political process, including all branches of the Government.

Here in New Jersey both the assembly and the Senate see many more Italians taking part in the legislative process. Out of 40 Senators 14 are Italian and 16 of the 80 assemblymen are Italian. Politically, Italians here in New Jersey are becoming much more involved. There are 11 Italians now chairmen of the 21 Republican county committees here in New Jersey alone.

In Washington Secretary of Health, Education and Welfare, Joseph Califano too is an Italian. So more and more we see many Italians become involved. Italians no longer are relegated to just the blue collar jobs in industry, although I don't see anything wrong with that type of occupation. We are seeing more and more corporate managers and corporate owners coming out of the Italian ranks.

Yes it's true that Columbus started a trend. But it was most definitely a trend for the betterment of mankind. He obviously saw that the battle would be tough for Italian recognition, but nonetheless he fought hard because of the pride of his heritage.

I, too am proud of my heritage. And can honestly say that life in these United States is a wonderful experience for all ethnic groups.●

CARGO SECURITY ACT OF 1978

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PICKLE. Mr. Speaker, because our Government is doing nothing effective to fight cargo theft, and because the transportation industry would rather deny the problem than act, I am again introducing legislation to fight this cancer on our transportation system. I cannot understand the lack of courage and commitment on the part of DOT to do something about this problem.

I recognize the rhetoric from this administration and from industry. I have heard it before. It is a line that has several aspects. One is that the Government/industry voluntary effort is successful. The facts show otherwise—for the facts are that direct losses continue around $2 billion per year, and that news story after news story highlight cargo theft in city after city. Ironically, one news series this year described the problem in Seattle, Wash.—the hometown of our Secretary of Transportation Brock Adams.

Another line is that cargo theft is no problem, just a little stealing here and a little thieving there. Unfortunately, the American consumer is paying the big costs—both indirect and direct, and statements to the contrary by certain spokesmen from the industry are not credible.

Mr. Speaker, the bill I introduce today is revised legislation, but it maintains the moderate approach of limited, and I emphasize limited, cargo security regulation by the Secretary of Transportation over the bulk of our transportation system.

The bill would give the Secretary authority to issue regulations adding security measures in four fields: First, packaging; second, documentation and labeling; third, comprehensive, continuous and uniform loss reporting; and fourth, personnel security.

In the port of entry area, this authority would be given to the Secretary of the Treasury.

The bill also creates an interagency council on cargo security.

New features of my legislation is to include shippers in the category of people who would have to follow the security provisions, makes it a crime to break seals and bonds of cargo in transit, makes it a crime to lie on an employment form for work in interstate commerce, and drops the creation of an Office of Cargo Security since this office already exists in the Department of Transportation.

Mr. Speaker, many people will ask why drop a new cargo security bill in the last day of the 95th Congress. There are several good reasons. First, our distinguished colleague LESTER WOLFF and his Select Committee on Narcotics will be holding hearings on cargo security problems at John F. Kennedy Airport the end of this month. JFK has long been a trouble spot of cargo theft, and I suspect that Congressman WOLFF and his fellow committee members will find the situation unimproved. Congressman WOLFF tells me that narcotics is no longer being smuggled into this country in a traditional manner; he says that the dope peddlers now package up the dope in regular packages so that they can be stolen. In other words, it is easier to steal dope off the docks than to smuggle it into the country. The cargo thief's job is so easy he is putting the smuggler out of business.

Also, Mr. Speaker, I think we are going to see the GAO speak out on this problem real soon, and in a very forceful way. Right now the GAO is in the final stages of writing a report on the lack of security

in the shipment of arms and explosives—a frightening prospect in this day of terrorism.

Finally, I have information that more and more Federal agencies are supporting my push for legislative action in this field. If the pressure builds, perhaps we can bring the Department of Transportation and the Office of Management and Budget around to a more realistic position.

So, Mr. Speaker, events may be running in positive course for a change, and come next January the push will begin again.

My action today can be described as an opening ploy for the offensive planned in the 96th session of Congress.●

THE UDALL RECORD—II

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. UDALL. Mr. Speaker, I am continuing today a listing of my votes for the 95th Congress, second session. The list includes my votes from August 16, 1978, to October 11, 1978. It does not include the votes for the last few days of the session, because some time is necessary to prepare them for printing. I will insert them here when available.

The list is arranged as follows:

Official rollcall number;

Number of the bill or resolution;

Short description of the measure;

Date of the action;

My vote on the motion (Y=yes; N=no; NV=not voting);

The overall vote of the Arizona House delegation (in the order: Yeas—Nays—Not voting);

An indication whether the measure passed or failed; and

The total vote.

I have again left out noncontroversial votes, such as quorum calls, votes to approve the Journal of the House, and motions to resolve into the Committee of the Whole House.

I have additional material relating to these measures in my district office (301 West Congress, Tucson, Ariz.), and I invite any of my constituents who have questions to come in and look it over. My staff and I will be happy to answer any questions, or to explain any of the measures listed here, upon request.

The list follows:

(707) H. Con. Res. 683. Amendment to the substitute to provide for the following budget aggregates: budget authority, $539 billion; outlays, $840 billion; revenues, $445 billion; deficit, $35 billion. August 15, 1978. N(3–1–0) Rejected 201–206.

(708) H. Con. Res. 683. Amendment to the substitute to reduce budget authority by $223 million and outlays by $673 million to reflect Senate Committee cuts in anti-recession aid to states and cities and House cuts in the Comprehensive Employment and Training Act. August 16, 1978. Y(4–0–0) Adopted 271–204.

(709) H. Con. Res. 683. Amendment to the substitute to provide for the following budget aggregates: budget authority, $539 billion; outlays, $480 billion; revenues, $450 billion; deficit, $30 billion. August 16, 1978. N(1–3–0) Rejected 198–204.

(710) H. Con. Res. 683. Amendment to the substitute to reduce budget authority and outlays by $5 billion. August 16, 1978. N(1–3–0) Rejected 155–241.

(711) H. Con. Res. 683. Amendment to the substitute to reduce budget authority and outlays by $753 million to reflect elimination of all money for anti-recession aid to states and cities. August 16, 1978. N(3–1–0) Rejected 187–208.

(712) H. Con. Res. 683. Substitute to the substitute to balance at the following levels: budget authority, $519 billion; outlays, $464.1 billion; revenues, $464.1 billion. August 16, 1978. N(2–2–0) Rejected 153–235.

(713) H. Con. Res. 683. Adoption of the Second Budget Resolution setting the following budget levels: budget authority, $561 billion; outlays, $489.1 billion; revenues, $450 billion; deficit, $39.8 billion. August 16, 1978. Y(1–3–0) Adopted 217–178.

(715) H.R. 13467. Adoption of the conference report on the bill to appropriate $6,808,778,686 in supplemental funds for fiscal 1978 operations of the government. August 17, 1978. Y(1–3–0) Adopted 217–178.

(716) H.R. 13467. Motion that the House recede from its disagreement to the Senate appropriation $54,853,000 for the Hart Senate Office Building. August 17, 1978. N(1–3–0) Rejected 133–245.

(717) H.R. 12935. Adoption of the conference report on the bill to appropriate $1.118 billion for operations of Congress and related agencies for fiscal 1979. August 17, 1978 Y(1–3–0) Passed 255–123.

(718) H.R. 12935. Adoption of the conference report on the bill to appropriate $3,880,863,000 for construction projects of the Department of Defense for fiscal 1979. August 17, 1978. Y(4–0–0) Passed 355–24.

(719) H.R. 13468. Adoption of the conference report on the bill to appropriate $1,597,317,700 for fiscal 1979. August 17, 1978. Y(2–2–0) Passed 339–31.

(720) S. 9. Adoption of the conference report on the bill to revise federal leasing procedures, upgrade environmental standards and to increase state participation in federal decisions regarding the development of oil and gas on the Outer Continental Shelf. August 17, 1978. Y(3–0–1) Passed 338–18.

(721) H.R. 12230. Adoption of the conference report on the bill to authorize a secret amount for intelligence operations for fiscal 1979. August 17, 1978. Y(3–0–1) Passed 323–30.

(722) H.R. 10898. Adoption of the rule (H. Res. 1321) providing for House consideration of the bill to authorize appropriations for the U.S. Railway Association for fiscal 1979. August 17, 1978. Y(3–0–1) Passed 323–26.

(723) H.R. 10898. Passage of the bill to authorize $27.2 million for the U.S. Railway Association for fiscal 1979; to permit the association to modify loan guarantees to permit the continuation of rail service found by the association to be desirable; and to extend by 195 days the 900-day period during which the Consolidated Rail Corp. is permitted to sell surplus trackage, stations and rights of way to states at the net liquidation price. August 17, 1978. Y(2–1–1) Passed 253–67.

(725) H.R. 12432. Amendment to prohibit the Commission on Civil Rights from appraising or studying and collecting information about laws and policies of the federal government, or any other governmental authority, with the respect to the issue of abortion. September 6, 1978. N(2–1–1) Adopted 234–131.

(726) H. Res. 1088. Adoption of the joint resolution to permit the Secretary of the Treasury to guarantee up to $1.65 billion in New York City bonds, as authorized under the New York City Loan Guarantee Act of 1978 and to appropriate funds necessary to pay guaranteed loans if the city defaults on them. September 6, 1978. Y(2–1–1) Passed 233–132.

(727) H.R. 7308. Amendment to allow wiretapping of non-U.S. persons without a warrant, provided that a certificate was issued by the attorney general and a designated executive branch official in the area of national security who had been confirmed by the Senate. September 6, 1978. N(2–1–1) Adopted 178–176.

(728) H.R. 7308. Amendment to eliminate a provision in the bill to establish a special court to government applications of warrants to conduct electronic surveillance in the foreign intelligence area. September 6, 1978. Y(2–0–2) Adopted 224–103.

(730) H.R. 10929. Bill to authorize $36,956,969,000 for Defense Department weapons procurement and military research programs in fiscal 1979. September 7, 1978. N(3–1–0) Rejected 191–206.

(731) H.R. 12930. Motion to instruct House conferees to the House-Senate conference committee on the bill to appropriate fiscal 1979 funds for the Treasury, Postal Service, Executive Office of the President and other independent agencies to agree to the Senate amendment to prohibit the president from imposing fees or quotas on oil imports. September 7, 1978. N(3–1–0) Rejected 194–204.

(740) H.R. 11711. Adoption of the rule providing for House floor consideration of the bill to broaden coverage and liberalize certain benefits to workers and firms under the adjustment assistance programs of the Trade Act of 1974. September 8, 1978. Y(3–0–1) Adopted 303–2.

(741) S.J. Res. 4. Motion to recommit to the Interior and Insular Affairs Committee, and thus kill, the joint resolution to establish a commission to study the claims of aboriginal Hawaiians resulting from the 1893 overthrow of the Hawaiian government. September 8, 1978. N(2–1–0) Agreed 190–148.

(742) H.R. 11711. Amendment to extend the adjustment assistance coverage to workers in firms adversely affected by foreign imports, who were employed at least 26 of the preceding 52 weeks, as under current law, or 40 of the preceding 104 weeks. September 8, 1978. Y(1–2–1) Adopted 206–110.

(743) H.R. 11711. Passage of the bill to broaden coverage and liberalize certain benefits to workers that were adversely affected by foreign imports under the adjustment assistance programs of the Trade Act of 1974. Y(1–0–3) Passed 261–24.

(745) H.R. 11280. Amendment to require each federal agency to establish a personnel office to be headed by a career civil servant. September 11, 1978. N(0–2–2) Rejected 16–336.

(746) H.R. 11280. Amendment to extend the use of veterans preference to Vietnam War combat veterans for 15 years after leaving the service or until 1986, whichever came later. September 11, 1978. Y(1–1–2) Rejected 149–222.

(747) H.R. 11280. Amendments, en bloc, to delete provisions, changing the veterans preference program. September 11, 1978. N(1–1–2) Adopted 281–88.

(749) H.R. 11280. Amendment to limit the number of federal employees one year after the enactment of the bill to the employment level on January 1, 1977, and to impose the ceiling until January 20, 1981. September 11, 1978. N(1–1–2) Adopted 251–96.

(750) H.R. 11280. Amendment to guarantee the FBI at least 140 positions at the Senior executive service levels equivalent to GS–16, GS–17, GS–18. September 11,, 1978. N(0–2–2) Rejected 124–217.

(751) H.R. 11280. Amendment to delete the labor-management relations provisions from the bill. September 11, 1978. N(0–2–2) Rejected 125–217.

(752) H.R. 11280. Motion that the Committee of the Whole rise and report the bill back to the House with the recommendation that the enacting clause be stricken. September 11, 1978. (N(1–1–2) Rejected 46–286.

(754) H.R. 12860. Pass the bill to authorize $3.5 million to purchase land in Charles-

town, R.I., and to establish a Rhode Island-chartered Narragansett Indian corporation to oversee the federally purchased private land and the 900 acres of state land ceded by Rhode Island in settlement of violations of the 1790 Indian Tribe and intercourse Act. September 12, 1978. Y(1–1–2) Agreed 249–122.

(755) H.R. 13311. Bill to mandate higher standards for ship construction and safety equipment. September 12, 1978. Y(2–0–2) Agreed 366–6.

(756) H.R. 12026. Bill to create the Indian Peaks Wilderness Area and Arapaho National Recreation Area and to authorize the secretary of the interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park. September 12, 1978. Y(2–0–2) Agreed 360–9.

(757) H.R. 5265. Bill to provide for the suspension of the duty on importation of flourspar through June 30, 1980. September 12, 1978. N(1–1–2) Rejected 205–166.

(758) H.R. 1337. Adopt the resolution (H. Res. 1342) providing that the House concur, with amendments, in Senate amendments to the bill making certain changes in tax laws and in the Supplemental Security Income program. September 12, 1978. Y(1–1–2) Agreed 304–69.

(759) H.R. 13331. Bill to make certain changes in the location of federal district courts, in the divisions within judicial districts, and in judicial district dividing lines. September 12, 1978. Y(2–0–2) Passed 362–9.

(760) S. 3119. Bill to transfer title of parcel of federal land adjacent to the Southwest Urban Renewal Project area in the District of Columbia to the D.C. Redevelopment Land Agency. September 12, 1978. Y(2–0–2) Passed 354–1.

(761) S. 3075. Adoption of the conference report on the bill to authorize $2,817,500,000 for foreign military assistance, arms sales and economic support programs of the State Department for fiscal 1979. September 12, 1978. Y(2–0–2) Adopted 225–126.

(763) H.R. 11280. Amendment to the substitute to prohibit Federal Election Commission employees from being represented by a union that maintained a political action committee or advocated the election or defeat of any candidate for federal office. September 13, 1978. N(2–1–1) Rejected 166–217.

(764) H.R. 11280. Amendment to establish the right of federal employees to union representation, and to define other federal employees' rights. September 13, 1978. Y(3–0–1) Adopted 381–0.

(765) H.R. 11280. Amendment to limit the outside income of federal employees at levels GS–13 and above to 15% of their federal salaries. September 13, 1978. N(2–1–1) Rejected 134–354.

(766) H.R. 11280. Delete from the bill changes in the veterans preference program. September 13, 1978. Y(3–0–1) Adopted 327–70.

(767) H.R. 11280. Bill to revise the civil service system. September 13, 1978. Y(3–0–1) Passed 385–10.

(768) H.R. 8729. Motion to order the previous question on the adoption of the rule providing for House floor consideration of the bill to provide federal grants for airport operators for airport noise control noise programs and to provide federal assistance to aircraft operators to comply with federal noise standards. September 13, 1978. T(1–3–0) Agreed 199–193.

(769) H.R. 8729. Adoption of the rule (H. Res. 1292) providing for House floor consideration of the bill to provide federal grants for airport operators and airport noise control programs and to provide federal assistance to aircraft operators to comply with federal noise standards. September 13, 1978. Y(2–2–0) Adopted 236–155.

(771) H.R. 8729. Amendment to require airports, whose noise in the opinion of the transportation secretary affected communities in adjacent States, to prepare airport noise compatibility programs. September 13, 1978. NV(0–3–1) Rejected 127–246.

(772) H.R. 8729. Amendment to authorize the expenditure from the Airport and Airway Trust Fund of $25 million annually for fiscal years 1979 and 1980 for the development of general avaition airports, and to divide the funds equally among the 50 States. September 13, 1978. Y(3–1–0) Adopted 213–147.

(774) H.R. 8729. Amendment to substitute provisions of the bill as drafted by the Ways and Means Committee for the Public Works Committee's provisions on changes in air transportation taxes and tax credits and refunds for retrofitting and replacing noisy aircraft. September 14, 1978. Y(2-2-0) Adopted 266–133.

(775) H.R. 8739. Motion to recommit the bill to the Public Works Committee with instructions to delete the provisions of the bill imposing a 2% tax on commercial airline passenger tickets and freight charges for the purpose of providing federal assistance for aircraft operators to comply with federal noise standards. September 14, 1978. NV (2-1-1) Rejected 170–227.

(776) H.R. 8729. Bill to provide federal grants to airport operators for airport noise control programs and to provide federal assistance to aircraft operators to comply with federal noise control standards. September 14, 1978. NV(1-2-1) Passed 272–123.

(777) H.R. 12928. Adoption of the conference report on the bill to appropriate $10,160,483,000 in fiscal 1979 for energy and water development programs of the Interior and Energy Departments. September 14, 1978. Y(4-0-0) Adopted 319–71.

(778) H.R. 9214. Motion to instruct House conferees on the bill to authorize U.S. participation in the Supplementary Financing Facility of the Internatonal Monetary Fund to accept Senate language to require a balanced federal budget beginning in fiscal 1981 and direct the U.S. executive director to the IMF to oppose aid to countries that aided or abetted international terrorists. September 14, 1978. Y(4-0-0) Rejected 286–91.

(779) H. Res. 1242. Adoption of the resolution to disapprove the president's Reorganization Plan No. 3 of 1978 for the reorganization of federal emergency preparedness and disaster relief programs. September 14, 1978. N(0-4-0) Rejected 40–327.

(783) S. 2701. Adoption of the conference report on the bill to authorize $11,733,900 for the Water Resources Council for fiscal 1979. September 15, 1978. Y(3-1-0) Adopted 304–22.

(784) H. Res. 1350. Adoption of the resolution to cite Hancho C. Kim for criminal contempt of Congress and to recommend prosecution of Kim for contempt for refusing to respond to questions by the Committee on Standards of Official Conduct in connection with its investigation of South Korean influence-buying on Capitol Hill. September 15, 1978. Y(4-0-0) Adopted 319–2.

(785) H.R. 11733. Adoption of the rule (H. Res. 1326) providing for House floor consideration of the bill to authorize $66.5 billion for fiscal years 1979–82 for federal assistance programs for highway construction and safety and urban mass transportation. September 15, 1978. Y(4–0–0). Adopted 318–4.

(786) H.R. 11733. Motion that the House resolves itself into the Committee of the Whole for consideration of the bill to authorize $66.5 billion for fiscal years 1979–82 for federal assistance programs for highway construction and safety and urban mass transportation. September 15, 1978. Y(4–0–0) Agreed 303–6.

(788) H.R. 13097. Motion to suspend the rules and pass the bill to liberalize home health benefits and provide certain other benefits for Medicare beneficiaries, through fiscal 1983. September 18, 1978. Y(4–0–0) Agreed 398–2.

(789) H.R. 13817. Motion to suspend the rules and pass the bill to increase nonphysician health professionals' participation in federal professional standards review organizations, authorize Medicare and Medicaid reimbursement for certain long-term nursing care and require coordinated Medicare and Medicaid audits. September 18, 1978. Y(2–2–0) Agreed 359–40.

(790) H.R. 10792. Motion to suspend the rules and pass the bill to allow the Smithsonian Institution to acquire the Museum of African Art, in Washington, D.C., and to authorize $1 million in fiscal 1979. September 18, 1978. Y(2–2–0) Agreed 350–54.

(791) H.R. 7819. Motion to suspend the rules and pass the bill to repeal a 1790 statute granting full criminal and civil immunity to the staffs and servants of diplomats posted in the U.S. September 18, 1978. Y(4–0–0) Agreed 397–7.

(792) H.R. 11488. Motion to suspend the rules and pass the bill to authorize $1.49 billion through fiscal 1981 for health resources planning and development programs. September 18, 1978. Y(1–3–0) Rejected 261–141.

(793) H.R. 12326. Motion to suspend the rules and pass the bill to extend through fiscal 1981 the Developmental Disabilities Act and to authorize up to $399 million for fiscal 1979–81 for programs operated under the act. September 19, 1978. Y(4–0–0) Agreed 397–3.

(794) H.R. 12303. Motion to suspend the rules and pass the bill to authorize $553.5 million in fiscal 1979 for construction or renovating the nursing schools and grants to support nurse training. September 19, 1978. Y(3–1–0) Agreed 393–12.

(795) H.R. 12460. Motion to suspend the rules and pass the bill to authorize $1.98 billion in fiscal 1979–81 for community health centers, migrant and community health centers and other health programs. September 19, 1978. Y(2–2–0) Agreed 302–102.

(796) S. 703. Motion to suspend the rules and pass the bill to allow U.S. citizens living overseas to vote in federal elections in the state of their last domicile without becoming subject to the taxes of that state. September 19, 1978. Y(2–2–0) Agreed 327–78.

(797) H.R. 12101. Motion to suspend the rules and pass the bill to authorize $1.5 million in fiscal 1979 for farmer-to-consumer direct marketing demonstration projects. September 19, 1978. Y(1–3–0) Rejected 237–163.

(798) S. 3040. Adoption of the conference report on the bill to authorize a subsidy for fiscal 1979 of $755 million for the National Railroad Passenger Corp. September 19, 1978. Y(2–1–1) Adopted 267–127.

(799) H.R. 12598. Adoption of the conference report on the bill to authorize $1,969,710,000 for the State Department and related programs in fiscal 1979. September 19, 1978. Y(1–2–1) Adopted 240–153.

(800) H.R. 12222. Adoption of the conference report on the bill to authorize $1,795,000,000 for bilateral economic aid programs in fiscal 1979. September 19, 1978. Y(2–1–1) Adopted 232–159.

(801) H.R. 11401. Adoption of the conference report on the bill to authorize $4,401,600,000 for fiscal 1979 research and development and construction programs of the National Aeronautics and Space Administration. September 19, 1978 Y(3–0–1) Adopted 321–54.

(801) H.R. 8149. Adoption of the conference report on the bill to modernize and simplify numerous procedures of U.S. customs law and to raise the personal duty exemption to $300, from $100. September 19, 1978 Y(3–0–1) Adopted 360–1.

(806) H.R. 1. Amendment to exempt can-

didates for congressional office from the bill's financial disclosure requirements. September 20, 1978. N(0-2-2) Rejected 34-365.

(807) H.R. 1. Amendments en bloc, to require candidates for federal office to report the source but not the amount of income that must be reported under the bill. September 20, 1978. N(0-2-2) Rejected 39-353.

(808) H.R. 1. Amendment to repeal House Rule 47 limiting members outside earned income to 15 percent of their congressional salaries. September 20, 1978. N(1-1-2) Rejected 97-290.

(809) H.R. 1. Amendment to delete provisions in the bill that prohibit a former government employee from making business contacts with his or her former agency for one year after leaving the agency. September 20, 1978. NV(1-0-3) Rejected 112-259.

(811) H. Con. Res. 683. Motion to approve the conference committee's version of the resolution setting the following binding budget levels for fiscal 1979. September 21, 1979. Y(1-1-2) Agreed 225-162.

(812) H.R. 12611. Amendment to direct the Civil Aeronautics Board to authorize a proposed air transportation service unless it determined that the proposed service was inconsistent with public convenience and necessity. September 21, 1978. Y(1-1-2) Adopted 300-86.

(813) H.R. 12611. Amendment to declare unlawful the pooling of revenues by air carriers in order to provide financial aid to carriers shut down by strikes. September 21, 1978. Y(1-1-2) Adopted 299-78.

(814) H.R. 12611. Passage of the bill to encourage airline industry competition by increasing airlines' flexibility to set fares and enter additional routes. September 21, 1978. Y(1-1-2) Passed 363-8.

(815) H.R. 11733. Amendment to declare it to be national policy that expenditures from the Highway Trust Fund be "closely related" to the fund's anticipated annual revenues. September 21, 1978. Y(1-1-2) Rejected 111-238.

(816) H.R. 12452. Amendment to add approximately 100,000 countercyclical public service jobs by increasing the target for jobs to be provided under CETA Title VI to 25 percent, from 20 percent, of the total number of unemployed in excess of 4 percent of the work force. September 22, 1978. N(0-2-2) Rejected 1-335.

(817) H.R. 12452. Motion to recommit the bill to the Education and Labor Committee with instructions to report it back with an amendment limiting spending on public service jobs programs to no more than 30 percent of the amount appropriated for CETA. September 22, 1978. N(1-1-2) Rejected 81-252.

(818) H.R. 12452. Passage of the bill to extend major jobs programs under the Comprehensive Employment and Training Act through fiscal 1982. September 22, 1978 Y(1-1-2) Passed 284-50.

(819) H.R. 11733. Amendments, en bloc, to delete from the bill provisions making changes in the 1965 Highway Beautification Act. September 22, 1978. Y(1-1-2) Rejected 76-199.

(820) H.R. 10584. Motion to suspend the rules and pass the bill to promote the sale of U.S. agricultural commodities by providing intermediate term credit under the Commodity Credit Corporation, to make certain non-market economy countries eligible for short term credit, and to establish six to 16 agricultural trade offices overseas. September 25, 1978. Y(3-0-1) Agreed 325-62.

(822) H.R. 11870. Motion to suspend the rules and pass the bill to authorize $1,008,000 for fiscal 1979 to carry out the domestic tourism programs administered by the Commerce Department's U.S. Travel Service. September 15, 1978. Y(2-1-1) Agreed 289-96.

(823) H.R. 12162. Motion to suspend the rules and pass the bill to authorize $2.2 million for fiscal 1979 for the Interstate Commerce Commission's Office of Rail Public Counsel. September 15, 1978. Y(2-1-1) Rejected 188-196.

(825) H.R. 13655. Motion to suspend the rules and pass the bill to authorize $126 million for fiscal 1980-81 for federal assistance to prepaid group medical practices and to make certain revisions in the program. September 15, 1978. Y(2-1-1) Agreed 327-60.

(826) H.R. 12584. Motion to suspend the rules and pass the bill to authorize $429 million in fiscal 1979-81 for the National Center for Health Services Research and the National Center for Health Statistics and to authorize a Center for Health Care Technology. September 25, 1978. Y(2-1-1) Agreed 306-77.

(827) H.R. 12370. Motion to suspend the rules and pass the bill to authorize $2.7 billion for family planning services and other public health programs through fiscal 1981. September 25, 1978. Y(1-2-1) Rejected 193-193.

(828) H.R. 9486. Motion to suspend the rules and pass the bill to authorize the president to contribute 5,000 long tons of tin to the tin buffer stock in accordance with the 1976 5th International Tin Agreement to stabilize the world tin market. September 25, 1978. Y(3-0-1) Agreed 308-75.

(829) H.R. 13597. Motion to suspend the rules and pass the bill to authorize $3 million to install solar collectors to provide a portion of the energy needs of the Rayburn House office building. September 25, 1978. Y(2-1-1) Agreed 332-48.

(830) H.R. 13488. Motion to suspend the rules and pass the bill to ease the income tax burden on Americans working abroad. September 25, 1978. Y(3-0-1) Agreed 282-94.

(832) S. 274. Motion to suspend the rules and pass the bill to prohibit union activity in the U.S. armed forces. September 26, 1978. Y(4-0-0) Agreed 395-12.

(833) H.R. 9333. Motion to suspend the rules and pass the bill to authorize feasibility studies of eight hydroelectric improvement projects and $151,700,000 for additional construction at three existing projects. September 26, 1978. Y(4-0-0) Rejected 263-143.

(834) H.R. 12728. Motion to suspend the rules and pass the bill to authorize the minting of a new coin bearing the likeness of women's suffrage leader Susan B. Anthony. September 26, 1978 Y(2-2-0) Agreed 368-38.

(835) S. 2727. Motion to suspend the rules and pass the bill to authorize $30 million for fiscal 1980 for athletic training, medicine and administration, and to amend the federal charter of the United States Olympic Committee. September 26, 1978. N(1-3-0) Rejected 244-158.

(837) H.R. 12005. Amendment to prohibit use of funds to bring action to require, directly or indirectly, the busing of students to a school other than the one nearest the student's home, except for mentally or physically handicapped students requiring special education. September 26, 1978. N(3-1-0) Adopted 235-158.

(838) H.J. Res. 1139. Passage of the joint resolution to continue appropriations for existing programs funded in the Labor-HEW-related agencies and defense appropriations bills, which were not expected to be enacted before fiscal 1979 began Oct. 1. September 26, 1978. Y(4-0-0) Passed 349-30.

(839) H.R. 31325. Passage of the bill to appropriate $19,699,776,000 for fiscal 1979 operations and programs of the Department of Agriculture and related agencies. September 26, 1978. Y(2-1-1) Passed 328-31.

(841) H.R. 1. Amendment to allow undercover intelligence agent to falsify the name of their employer and their salary in their financial disclosure reports if the president found it was necessary for national interest, and to provide for review of their reports by the director of the Office of Government Ethics under Central Intelligence Agency procedures. September 27, 1978. N(0-4-0) Rejected 53-347.

842) H.R. 1. Amendment to require repeal after five years of the bill's provisions requiring financial disclosure by executive branch employees and establishing an Office of Government Ethics. September 27, 1978. N(3-1-0) Rejected 138-266.

(844) H.R. 1. Amendment to remove criminal sanctions from the bill's executive branch conflict-of-interest provisions. September 27, 1978. N(2-2-0) Rejected 129-269.

(845) H.R. 1. Amendment to delete the provisions in the bill to require public financial disclosure by federal judges and top judicial branch employees. September 27, 1978. N(0-4-0) Rejected 75-316.

(846) H.R. 1. Passage of the bill to require financial disclosure by high-level federal officials, including members of Congress and federal judges. September 27, 1978. Y (4-0-0) Passed 368-30.

(848) H.R. 11733. Amendment to delete from the bill language to authorize the Federal Aviation Administration to have access to information in the National Driver Registry. September 28, 1978. N(0-4-0) Rejected 12-380.

(849) H.R. 11733. Passage of the bill to authorize $60.9 billion for fiscal 1979-82 for federal assistance programs for highway construction and safety and urban mass transportation. September 28, 1978. Y(4-0-0) Passed 367-38.

(850) H.R. 3816. Adoption of the conference report on the bill to strengthen and expedit the Federal Trade Commission's powers for enforcing its rules and subpoenas and to authorize funds for the FTC for fiscal 1978-81. September 28, 1978. Y(1-3-0) Rejected 175-214.

(851) H.R. 9214. Adoption of the conference report on the bill to authorize $1.8 billion for United States participation in the International Monetary Fund's new Witteveen Facility to assist developing nations meet balance of payments deficits. September 28, 1978. ((2-2-0) Adopted 238-138.

(852) H.R. 12005. Amendment to require the attorney general to promulgate advisory procedures to assist the president in selecting federal district court judges on the basis of merit. September 28, 1978. Y(3-1-0) Adopted 206-151.

(853) H.R. 12005. Passage of the bill to authorize $1,657,224,000 for Justice Department operations for fiscal 1979. September 28, 1978. Y(4-0-0) Passed 322-21.

(854) H.R. 12934. Adoption of the conference report on the bill to appropriate $8,515,-354,000 for fiscal 1979 programs and operations of the Departments of State, Justice, Commerce, the federal judiciary and related agencies. September 28, 1978. NV(1-2-1) Adopted 276-61.

(856) H.R. 12934. Motions to recede and concur in the Senate amendment to the conference report to provide $355,392,000 for obligations to international organizations such as the United Nations rather than the $327,676,000 recommended by the House Appropriations Committee. September 29, 1978. N(0-3-1) Rejected 143-191.

(857) H.R. 12934. Motion that the House recede from its position and agree to the Senate amendment to the conference report to state that it is the sense of Congress that the attorney general admit into the United States 7,500 Cambodian refugees in fiscal 1979 and 7,500 in fiscal 1980 "in view of the magnitude and severity of the violations of human rights" committed by the government of Cambodia. September 29, 1978. Y(1-2-1) Agreed 231-105.

(859) H.R. 14042. Amendment to eliminate from the authorization $209 million earmarked for the payment of naval shipbuild-

ing contract claims. September 29, 1978. NV(0-2-2) Rejected 97-187.

(860) H.R. 12390. Adoption of the conference report on the bill to appropriate $8,983,-261,000 for fiscal 1979 for the Treasury, Postal Service, Executive Office of the President and various independent agencies. October 4, 1978. Y(3-1-0) Adopted 247-137.

(861) H.R. 12930. Motion that the House recede from its disagreement and concur in the Senate amendment to provide a 5.5 percent ceiling on salary increases for federal blue-collar workers. October 4, 1978. Y(4-0-0) Agreed 284-111.

(863) H.R. 12255. Adoption of the conference report on the bill to extend for three years the 1965 Older Americans Act and authorize $4,042 billion for various programs for elderly Americans for fiscal 1979-81. October 4, 1978. Y(4-0-0) Adopted 399-3.

(864) H.R. 11302. Adoption of the conference report on the bill to authorize $400,564,-000 for research development and demonstration programs of the Environmental Protection Agency for fiscal 1979. October 4, 1978. Y(2-2-0) Adopted 387-15.

(865) H.R. 11445. Adoption of the conference report on the bill to authorize $1.636 billion for the Small Business Administration for fiscal 1979, $1.616 billion for 1980, $1.607 billion for 1981 and $1.943 billion for 1982; to subsidize the interest rate on SBA natural disaster relief loans; to strengthen and expand federal small business aid programs; to authorize a new type of SBA small business investment company, and to authorize $5 million for a White House conference on small business. October 4, 1978. Y(4-0-0) Adopted 396-10.

(866) H.R. 7843. Motion to order the previous question on the Rodino motion that the House recede and concur in the Senate amendment to the bill. October 4, 1978. Y (2-2-0) Agreed 285-114.

(867) H.R. 7843. Motion that the House reced and concur in the Senate amendment to the bill, with an amendment stipulating the areas of agreement between the House and Senate conferees on the bill to provide for creation of 117 new federal district court judgeships. October 4, 1978. Y(1-2-1) Agreed 292-112.

(868) H.R. 13845. Motion to suspend the rules and pass the bill to raise license fees and make certain other revisions in the Perishable Agricultural Commodities Act. October 4, 1978. Y(4-0-0) Agreed 399-7.

(869) H.R. 12917. Motion to suspend the rules and pass the bill to establish an interagency task force to study rural transportation problems and recommend improvements in railroad transportation for the agriculture industry. October 4, 1978. Y(2-2-0) Agreed 352-49.

(871) H.R. 14042. Amendment to require approval by both houses of Congress of any future contract claims settlement negotiated under PL 85-804 that cost more than $25 million. October 4, 1978. N(0-4-0) Rejected 111-275.

(872) H.R. 14042. Passage of the bill to authorize $35,235,969,000 for weapons procurement and military research projects of the Defense Department for fiscal 1979. October 4, 1978. Y(4-0-0) Passed 367-22.

(873) S. 1613. Passage of the bill to enlarge the civil and criminal jurisdiction of U.S. magistrates, and to abolish "diversity of citizenship" as a ground for requesting federal district court jurisdiction in most cases involving disputes between residents of different states. October 4, 1978. NV(1-2-1) Passed 323-49.

(874) H.R. 13059. Passage of the bill to authorize $1.29 billion for certain water projects of the Army Corps of Engineers. October 4, 1978. Y(4-0-0) Passed 303-73.

(875) H.R. 12932. Adoption of the conference report on the bill to appropriate $11,-578,692,000 for fiscal 1979 for the programs of the Interior Department and various programs of the Energy Department and related agencies. October 5, 1978. Y(4-0-0) Adopted 382-12.

(877) H.R. 12928. Passage, over the president's October 5, 1978 veto, of the bill to appropriate $10,160,483,000 for energy and water development programs of the Corps of Engineers and the Interior and Energy Departments. October 5, 1978. Y(4-0-0) Rejected 223-190.

(878) H.R. 13635. Motion to table the Dickinson motion to instruct House conferees to maintain the House position in support of consolidating Army and Navy basic helicopter pilot training. October 5, 1978. N(1-3-0) Rejected 165-225.

(879) H.R. 13635. Motion to close to the public the conference committee meetings on the bill to appropriate fiscal 1979 funds for the Defense Department when classified national security information was being discussed, as authorized under House rules but to allow the attendance of members of Congress at all meetings. October 5, 1978. Y(4-0-0) Agreed 387-0.

(880) H.R. 12932. Motion that the House recede from its disagreement and concur in the Senate amendment stating that a basin-wide environmental impact statement would not be required for water projects in the Colorado River basin for which individual environmental impact statements had been filed. October 5, 1978. Y(4-0-0) Agreed 206-186.

(881) H.R. 13471. Amendment to authorize payment of attorney's fees and court costs to persons who prevail in an appeal. October 5, 1978. N(1-2-1) Rejected 153-222.

(882) H.R. 13471. Amendment to strike language exempting the Securities and Exchange Commission from financial privacy provisions. October 5, 1978. NV(2-0-2) Agreed 328-26.

(883) H.R. 13471. Amendment to delete the grandfathering of bank holding company insurance affiliates which had applied for authority to engage in insurance activities. October 5, 1978. NV(1-1-2) Agreed 252-72.

(885) H. Res. 1404. Motion that the House provide for the consideration of conference reports, authority to declare recesses, and motions to suspend the rules. October 6, 1978. Y(2-0-2) Agreed 300-56.

(886) H. Res. 1410. Amendment to the Consumer Product Safety Act to extend the authorization of appropriations contained in such act. October 6, 1978. Y(2-0-2) Agreed 360-6.

(887) S. 2640. Adoption of the conference report on the bill to reform the civil service laws. October 6, 1978. Y(2-0-2) Agreed 365-8.

(888) H.R. 13750. Amendment to add a cost of production escalator to the price objective provisions of the bill. October 6, 1978. N(1-1-2) Agreed 194-164.

(890) H.R. 11545. Amendment to set the minimum level of meat imports at 739 million pounds per year rather than 1.2 billion. October 6, 1978. N(0-1-3) Rejected 131-139.●

HOMER DETRICH—A DEDICATED PUBLIC SERVANT

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BURGENER. Mr. Speaker, the San Diego County government has lost one of its most capable administrators with the retirement of Mr. Homer E. Detrich, the director of the San Diego Department of Public Welfare for the past 22 years.

Mr. Detrich has competently and compassionately directed this important local government department through years of phenomenal growth in San Diego County, introducing modern administrative practices which insure responsive public service.

Mr. Detrich has also held a number of other voluntary community posts throughout his career as a public administrator. He served on the Governor's Committee on Children and Youth in 1958, and was a delegate to the White House Conference on Children and Youth.

He has had an active role in civil defense and disaster preparedness activities in Southern California, and he served on the National Association of Counties Welfare Technical Committee from 1975 to 1977, as well as the San Diego County United Way Budget Review Committee in 1978.

Mr. Detrich exemplifies what is right about the much-maligned civil service, be it local or Federal. He is a dedicated professional who has endeavored to be responsive to the public and give the taxpayer his money's worth. San Diego County government will miss Homer Detrich and his dedicated service.●

CWA NATIONAL WOMEN'S CONFERENCE HELD IN MINNEAPOLIS LAST WEEK

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mrs. MIKULSKI. Mr. Speaker, I would like to call to the attention of the House a very significant conference which was held last week in Minneapolis. It is significant both for the aspirations of the women of this country and the future of the labor union movement.

More than 500 working women from the Communications Workers of America participated in the CWA National Women's Conference, the first national leadership training program for women ever held in the labor movement.

The conference was sponsored by CWA's Concerned Women's Advancement Committee and was planned in cooperation with Cornell University's Institute for Education and Research on Women and Work. The chair of the conference is CWA vice president Dina Beaumont, of Los Angeles.

The entire conference, including plenary sessions, skill workshops, issue discussions and a unique mock convention on the final day—October 1—is intended to provide knowledge and sharpen skills that will advance the careers of participants within the union and throughout society.

CWA president Glenn E. Watts, in announcing the conference last June, said that the union "must struggle to translate from a dream into a reality the right of more women and more minorities to mount the ladder of leadership * * * beginning right here in CWA and winding up right at the top in the AFL-CIO."

Many of the seats at the conference

were reserved for rank and file members, he said, since the program is "aimed directly at the persons who it is hoped will move ahead as the opportunities arise in the future."

Speakers included Koryne Horbal, U.S. Representative on the U.N. Commission on the Status of Women; Janet Bertinuson, Institute of Industrial Relations, University of California, Berkeley; John J. Flagler, director, Labor Education Service, University of Minnesota; Alexis Herman, director, Women's Bureau, U.S. Department of Labor; Gloria Johnson, national treasurer, Coalition of Labor Union Women; Martha Darling, Executive Assistant to the Secretary of the Treasury; Patsy Fryman, assistant to the president of CWA, and Mildred Jeffrey, chair, National Women's Political Caucus.

Themes for discussion included "The Many Hats of Working Women," "Stress on the Job," "The Union's Stake in ERA," and "Rightwing Attack on Labor and Women."

Skill workshops centered on parliamentary procedure, assertiveness training, building union committees and coalitions, public speaking, public relations, and union organizing techniques.

Mr. Speaker, I am sure many House Members will want to join me in commending CWA for this pioneering effort. The result can only help the women involved, the union, the labor movement and the country.●

FINANCIAL REPORT OF THE CONGRESSIONAL STEEL CAUCUS: QUARTERLY STATEMENT OF EXPENSES AND FUND BALANCE FOR PERIOD ENDING SEPTEMBER 30, 1978

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BENJAMIN. Mr. Speaker, in accordance with Executive Committee Order No. 1, I am respectfully submitting herewith the quarterly financial report of the Congressional Steel Caucus for insertion in to the RECORD. The report is as follows:

QUARTERLY REPORT

FUND BALANCE STATEMENT

Total revenues:	
(Clerk Hire and Membership Dues)	$31,367.47
Less expenses:	
January	0
February	2,000.00
March	3,574.20
April	3,287.25
May	3,312.75
June	3,057.15
July	3,006.34
August	3,240.95
September	3,060.16
Total Caucus expenses	24,538.80
Unexpended revenues (as of September 30, 1978)	6,828.67

QUARTERLY REPORT

STATEMENT OF EXPENSES

Salaries	$22,301.66
Travel	0
Stationery	448.01
Postage	41.00
Publications	238.53
Telephone	296.09
Equipment	1,076.01
Miscellaneous	137.50
Total expenses as of September 30, 1978	24,538.80

CONGRESSIONAL STEEL CAUCUS MEMBERS WHO HAVE PAID DUES AS OF SEPTEMBER 30, 1978

Joseph Gaydos, John Selberling, Tom Bevill, Douglas Walgren, W. C. Daniel, Bill Young, Thomas Kindness, Robert Walker, Gus Yatron, Edward Pattison, Robert Duncan, Ralph Metcalfe, Barbara Mikulski, Charles Carney, Allen Ertel, Frank Evans, Benjamin Gilman, Donald Mitchell, Robert Mollohan, Donald Pease, Thomas Railsback, Robert Roe, Clarence Long, and William Walsh.

Jim Weaver, David Evans, John Dent, Michael Myers, John Cavanaugh, E. Thomas Coleman, Philip Ruppe, E. G. Shuster, Morgan Murphy, James Oberstar, Henry Nowak, Edward Patten, Frank Annunzio, Morris Udall, Austin Murphy, John Murtha, John Jenrette, Gary Myers, James Hanley, Ralph Regula, Stanley Lundine, Martin Russo, Robert Michel, and Joseph Addabbo.

Samuel Stratton, George Brown, John Buchanan, Leo Zefferetti, James Mann, Robert McClory, Robert McEwen, Gunn McKay, Marc Marks, John Murphy, Thomas Luken, Douglas Applegate, Carl Pursell, Mary Rose Oakar, William Moorhead, George O'Brien, Fred Rooney, Clarence Miller, Elwood Hillis, Joseph Le Fante, Ronald Mottl, Willian Harsha, Adam Benjamin, and Ted Risenhoover.

Shirley Pettis, David Cornwell, Kenneth Holland, Joseph Ammerman, John Dingell, Tom Corcoran, Jim Lloyd, Richard Ichord, Floyd Fithian, Bob Gammage, William Ford, Daniel Flood, Peter Kostmayer, Raymond Lederer, Walter Flowers, and Clarence Brown.●

ACCOMPLISHMENTS OF THE INDIAN AFFAIRS SECTION OF THE SUBCOMMITTEE ON INDIAN AFFAIRS AND PUBLIC LANDS

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RONCALIO. Mr. Speaker, I would like to submit for the record a brief statement on the accomplishments of the Indian Affairs section of my Subcommittee on Indian Affairs and Public Lands.

The Indian Affairs jurisdiction was combined with the Public Lands jurisdiction at the beginning of the 95th Congress. I have attempted to do justice to both areas of responsibility, and I am satisfied that the accomplishment of my subcommittee in this area will compare well with the record in previous Congresses.

I did not seek the Indian Affairs jurisdiction, but I have found the subject area an education, a challenge, at times, a burden, and, in the end, a rewarding experience.

The Indian people across the country look to the chairman of the Interior Committee, as well as the chairman of the subcommittee concerned with Indian Affairs, to provide guidance and leadership in all matters pertaining to Indians regardless of whether the particular legislation has been referred to the subcommittee or not. The position I leave as subcommittee chairman for Indian Affairs needs to be filled in the next Congress by a Congressman, or perhaps, Congresswoman, with vitality and vigor and a willingness to do battle on Indian issues.

I have observed in this Congress an anti-Indian mood of disturbing proportions which does little credit to this great Nation of ours. It seems to me that ours is a Nation where every person can assimilate and intermingle and be treated as an equal, but also where one, who so chooses, can be different and have that difference respected. It appears to me that our Nation is great enough to be able to accommodate within our borders the semi-sovereign Indian tribes with their desire to retain their culture and their self-determination. I would hope so.

The Indian Affairs section of my subcommittee had 112 bills referred to it for action. The subcommittee took some form of action on 71 of these measures; 32-Indian bills have passed both Houses of Congress and 23 of these have been signed into public law by the President.

Some of these bills pertained only to a particular tribe, while some had more general application; 12 bills dealt with the transfer of land, two bills restored recognition to Indian tribes that had been terminated as federally recognized tribes in the 1950's, three bills made provision for certain Indian tribes to have their claims considered by the Court of Claims. One bill provided for the settlement of an Indian water rights claim and one provided for the settlement of an Eastern Indian land claim—Rhode Island.

I would like to submit for the RECORD the attached list of bills enacted, and I would like to conclude by thanking the members of the subcommittee for their cooperation and good work.

The material follows:

SUBCOMMITTEE ON INDIAN AFFAIRS AND PUBLIC LANDS

INDIAN AFFAIRS SECTION

Legislation passed by both Houses in the 95th Congress:

1. S.J. Res. 10. This resolution extends the time period the American Indian Policy Review Commission has to submit its report and authorizes funds for it, in additional $100,000. Not referred to Committee. P.L. 95–5 (February 17, 1977).

2. H.R. 4992 (Udall, Roncalio, Johnson of Colorado, Young of Alaska). This bill amends the Indian Business Development Program which is title VI of the Indian Financing Act of 1974 by revising the appropriations authorization to extend it for another two years. H. Rept. 95–271; S. Rept. 95–304; P.L. 95–68.

3. H.R. 4585 (Roncalio). Authorizes $2,250,000 to be spent for expenses of the Indian Claims Commission in FY 1978. It also allows for the transfer of cases from the Commission to the U.S. Court of Claims for settlement and subject to Supreme Court review. H. Rept. 95–234; S. Rept. 95–303; and P.L. 95–69.

4. S. 667. Provides that 80 acres of Federal lands in Elko County, Nevada shall be held in trust by the United States for the Te-Moak Bands of Western Shoshone Indians. S. Rept. 95–237; H. Rept. 95–624; and P.L. 95–133.

5. H.R. 8499 (Young) Alaska Native Claims Settlement Act. Amends the Alaska Native Claims Settlement Act of 1971 to allow Sealaska Corporation, which was established in accordance with ANCSA to represent natives of Sealaska Region to select their land entitlements in the area withdrawn for selection by other village corporations. H. Rept. 95–712; No Senate Report; and P.L. 95–178.

6. H.R. 6348 (Santini) (S. 103). Provides that approximately 90 acres of Federal land located in Nevada be held in trust by the United States for the Ely Indian Colony, Nevada. H. Rept. 95–619; S. Rept. 95–233; and P.L. 95–191.

7. S. 1560 (H.R. 7259—AuCoin) Siletz Indian Tribe. Restores Federal recognition to the Confederated Tribes of the Siletz Indians of Oregon, and provides Federal services and benefits, furnished to other tribes, to the tribal members. S. Rept. 95–386; H. Rept. 95–623; and P.L. 95–195.

8. S. 1509 (H.R. 8873—Runnels & Lujan) Lands for the Pueblo Cultural Center. Would allow 191 Indian Pueblos in New Mexico to convey their right to 11.6 acres of land in Albuquerque, New Mexico to the Federal government, who in return would accept it and hold the land in trust jointly for the Pueblos, so as to allow the existence of their cultural center. S. Rept. 95–445; H. Rept. 95–846; and P.L. 95–232.

9. S. 838 (H.R. 2664—Abdnor) Black Hills Sioux Land Claims. Waives certain legal obstacles to permit the Sioux land claim to be considered on its merits. S. Rept. 95–112; H. Rept. 95– 529; and P.L. 95–234.

10. S. 773 (H.R. 3377—Steed) Wichita Land Claims. Allows the Wichita Indian Tribe of Oklahoma and those affiliated bands to file their claims with the Indian Claims Commission for lands taken by the U.S. without just compensation. S. Rept. 95–119; H. Rept. 95–597; and P.L. 95–247.

11. H.R. 2540 (Ullman) Umatilla Inheritance. The bill modifies federal law in regard to inheritance of trust or restricted land on the Umatilla reservation so as to reduce the amount of land going out of Indian ownership. H. Rept. 95–820; S. Rept. 95–718; and P.L. 95–264.

12. S. 482 (H.R. 3787—Runnels & Lujan) Zuni Indian Land Claim. The bill authorizes the Secretary of the Interior to acquire 600 acres of land with religious significance for the Zuni Tribe. It also grants the tribe the right to file a claim with the Indian Claims Commission. S. Rept. 95–111; H. Rept. 95–953; and P.L. 95–280.

13. S. 661 (H.R. 2497—Risenhoover). Restores federal recognition to Ottawa, Peoria, and Wyandotte Indian tribes of Oklahoma. Also extends recognition to the Modoc Indians of Oklahoma by not making the act terminating the Klamath applicable to them. S. Rept. 95–574; H. Rept. 95–1019; and P.L. 95–281.

14. S. 1582 (H.R. 8099—Udall) Ak Chin Water Rights. The bill settles the water rights and needs of the Ak Chin Indians and avoids the costly claims from being filed against the U.S. government and private parties. S. Rept. 95–460; H. Rept. 95–954; and P.L. 95–328.

15. S. 1291 Conveying land to the Cheyenne-Arapaho. This bill provides that 120 acres in the state of Oklahoma shall be held in trust for the Cheyenne-Arapaho Tribes of Oklahoma, and certain other lands held in fee by the tribe shall also be held in trust. S. Rept. 95–239; H. Rept. 95–1309; and P.L. 95–327.

16. S. 947 Conveying Lands to the Creek Nation. This bill gives the legislative authority necessary to transfer the 5 acre lot of land known as Yardeka Day School Land to the U.S. government to be held in trust for the Creek Nation of Oklahoma. S. Rept. 95–238; H. Rept. 95–1305; and P.L. 95–329.

17. S. 785 (H.R. 9480—Santini) Conveying Land to Fallon Indians. This bill provides that 2,700 acres of the public domain shall be held in trust by the U.S. government for the use of the Paiute and Shoshone tribes of the Fallon Indian reservation. It also authorizes consolidation of land holding and allows for the construction of an irrigation system. S. Rept. 95–417; H. Rept. 95–1298; and P.L. 95–337.

18. S.J. Res. 102 (H.J. Res. 738 Udall & Blouin). The law requires the federal agencies to evaluate their policies and procedures and determine if their practices adversely impact upon the Indians' religious freedom and provides that the President shall submit a report thereon to Congress. S. Rept. 95–709; H. Rept. 95–1308; and P.L. 95–341.

19. H.R. 8397 (Udall) Papago Lands/Florence Village. This bill declares that a 20 acre tract of land, known as Florence Village, located in Pinal County, Arizona, and held in trust by the U.S. government for the Papago Indian Tribe shall be a part of the Papago reservation. H. Rept. 95–1020; S. Rept. 95–1133; and P.L. 95–361.

20. S. 3069 (H.R. 13096—Pressler) Sisseton-Wahpeton. Gives a preference right to the Sisseton-Wahpeton Sioux Tribe of the Lake Traverse Reservation to purchase land held in trust for members of the tribe by the U.S. government being offered for sale. S. Rept. 95–983; H. Rept. 95–1511; and P.L. 95–398.

21. H.R. 12860 (Beard) (S. 3155) Rhode Island Land Claims. This act implements a compromise reached by the parties concerned with the Rhode Island Indian claim. It grants to the Narragansetts an amount of land and certain benefits and extinguishes any further claim of the land by the Narragansett and other tribes after a certain period of time. H. Rept. 95–1453; S. Rept. 95–972; and P.L. 95–395.

22. S. 3002 (H.R. 12344—Rhodes et. al.) The bill provides for the settlement of various land and boundary disputes arising on the Salt River Indian reservation in Arizona between the Salt River Pima-Maricopa tribe and other private and public agencies. S. Rept. 95–2270; H. Rept. 95–1498; and P.L. 95–399.

23. H.R. 10581 (McCormack) Yakima Judgment Distribution. This bill allows the award to the Yakima Indians by the Indian Claims Commission to be distributed to the parents or guardians of the minors, which is an exception to a provision of the Indian Judgment Distribution Act. The bill was amended to also include the Mescalero Apache Tribe of New Mexico. H. Rept. 95–1304; S. Rept. 95–1193; and P.L. 95–433.

The following bills have passed both Houses, but have not yet been signed by the President.

24. H.R. 9945 (Quillen) Amend Indian Claims Commission Act. The bill amends the Indian Claims Commission Act to repeal a provision prohibiting former Commissioners from representing Indian tribes within two years of their tenure. As amended, the Commissioners would still be subject to the one year limitation in the general conflict of interest law. H. Rept. 95–1510. S. Rept. —; and P.L. 95– .

25. H.R. 23991. (Johnson of California) Susanville Rancheria. This bill provides that 120 acres of public land will be held in trust by the U.S. government for the Susanville Indian Rancheria of California. H. Rept. 95– ; S. Rept. —; and P.L. 95– .

26. H.R. 14026 (Johnson of Colorado, Young) Kake, Alaska. This bill removes legal impediments to the transfer of title to certain lands owned by the Organized Village of Kake to the Kake Village Corporation so the land may be used as a construction site for a cold storage plant. H. Rept. 95–1615; S. Rept. —; and P.L. 95– .

27. H.R. 10600 (Udall) Hunter Private Relief. This bill allows Thomas Joseph Hunter and Rose Hunter, two employees of the BIA, to negotiate with the Papago Indians concerning the sale of their house, which otherwise would be prohibited by law. H. Rept. 95–1617; S. Rept. —; and P.L. 95– .

28. H.R. 3924 (Lujan) (S. 2588) Santa Ana Pueblo. This bill would allow the U.S. government to hold in trust for the Santa Ana Pueblo 16,000 of public domain lands and 2,000 acres to be acquired by the Secretary of Interior from State school land to be held in trust for the tribe. H. Rept. 1219; S. Rept. 95–1132; and P.L. 95– .

29. S. 2358 (H.R. 10240—Lujan) Zia Pueblo. This bill provides that the U.S. Government will hold in trust 4,850 acres of public domain land in Sandoval County, New Mexico, for the Pueblo of Zia, which will be used for grazing and religious purposes. S. Rept. 95–1131; H. Rept. 95–1220; P.L. 95– .

30. S. 1081 (H.R. 11894—Risenhoover) Osage. The bill makes certain amendments, modification, and additions to the various laws relating to the Osage Tribe of Indians of Oklahoma. S. Rept. 95–1157; H. Rept. 95–1459; P.L. 95– .

31. S. 1214 (H.R. 12533—Udall et al.) Indian Child Welfare. The Indian Child Welfare Act of 1978. Clarifies the jurisdiction of Indian tribes and States with respect to Indian child custody proceedings; establishes minimum Federal standards and procedural safeguards for State proceedings with respect to Indian foster care or adoptive placement; and authorizes the Secretary of the Interior to fund Indian Child and Family Service programs. H. Rept. 95–1386; S. Rept. 95–597; P.L. 95– .

32. H.R. 14224 (Nolan). This bill would authorize the Secretary of the Interior to acquire certain lands for the benefit of the Mille Lacs Band of the Minnesota Chippewa Indians. H. Rept. 95– ; and P.L. 95– .

Other legislation considered during the 95th, but not enacted.

The following bills were considered by the Subcommittee but for various reasons, as detailed herein, were not enacted.

1. S.J. Res. 4 (H.J. Res. 526—Akaka & Heftel) Hawaiian Claims. This bill would have established a Study Commission to examine possible Aboriginal Native Hawaiian claims against the United States for the taking of land and resources. The bill failed of passage and was recommitted Sept. 8, 1978. H. Rept. 95–860; and S. Rept. 95–501.

2. H.J. Res. 612 (Studds) Mashpee Indian Land Claims. A bill to provide for a settlement of the claims of the Mashpee Indian Tribe to certain lands in the town of Mashpee, Massachusetts. The bill was heard, marked up in Subcommittee. No further action.

3. H.R. 4377 (Risenhoover—S. 660) Arkansas Riverbed Settlement. This bill would authorize the Secretary of the Interior to enter into an agreement with the Cherokee, Choctaw, and Chickasaw Indian Nations for the settlement of the tribes interest in the riverbed. The bill was ordered recommitted to Subcommittee for further study from the full Committee.

4. H.R. 2539 (Ullman) Umatilla Indian Reservation. A bill pertaining to land consolidation and development on the Umatilla Indian Reservation. The bill was reported favorable from the Committee, but at the request of the tribe and the sponsor no further action was taken. H. Rept. 95–819.

5. H.R. 5523 (Bonker & Dicks) Cowlitz Judgment Distribution. A bill to provide for the distribution of judgment funds to the Cowlitz tribe of Indians from the award in Indian Claims Commission docket 218. The bill was reported to the House for favorable

consideration, but stricken from the consent calendar at the request of the sponsor. H. Rept. 95–1327.

6. H.R. 8674 (Winn, Keys, Glickman & Sebelius)—Delaware Judgment Distribution. A bill to provide for the distribution of funds appropriated to pay a judgments in favor of the Delaware Tribe of Indians in Indian Claims Commission dockets 27A, 241, and 289. The bill was heard, marked up in Subcommittee, but no further action was taken.

7. H.R. 11489 (Roncalio) Tribal State Compact Act. This bill would authorize the States and the Indian tribes to enter into mutual agreements and compacts with respect to jurisdiction and various governmental functions in Indian country. The bill was heard and marked up in Subcommittee, but no further action was taken.

8. H.R. 11630 (Rose et al.) Federal recognition of Indian tribes. (H.R. 12691, 12830, 12996, 13773). A bill to establish an administrative procedure and guidelines for the recognition of the existence of Indian tribes by the Secretary of the Interior. A full day of Subcommittee Hearings was held, but no further action was taken.

9. H.R. 12529 (Roncalio) Alaska Native Claims Settelement Act Amendments. This bill would amend the Alaska Native Claims Settlement Act to provide for land selection rights for the 13th Regional Corporation. Subcommittee hearings were held, no further action.

10. H.R. 13361 (Marlenee) Fort Peck Indian Reservation land transfer. This bill would provide for the transfer of approximately 1.8 acres of public domain land to the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation. Subcommittee hearings were held, but the Subcommittee was subsequently advised through a Solicitor's opinion that such transfer could be accompanied administratively under present authority. No further action.●

LIVABLE CITIES: AN IMPORTANT PART OF THE 1978 COMMUNITY DEVELOPMENT BILL

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LaFALCE. Mr. Speaker, the 1978 housing and community development bill has been passed by both Houses of Congress and has been in conference for some time now. We are in the last 2 days of session and the bill has not yet been reported back from the conference committee.

I anticipate, however, that compromises on the differing versions of the two Houses' bills will be achieved in time for action before adjournment. That would be welcome news indeed, for this year's bill contains a number of very important provisions. I would like to outline one of them here today and to urge all my colleagues to join me in supporting the bill when the conference report is brought before us for a vote.

The provision about which I speak is not large, in dollar terms, but its significance lies in the fact that Congress will be recognizing an important part of life in America's urban areas—the need people have for artistic, cultural, and historic resources. We will do that through the "Livable Cities" program which will be included in the conference report.

This program will permit the Secretary of HUD, in coordination with the Chairman of the National Endowment for the Arts, to make grants to nonprofit organizations to carry out activities that have significant artistic, cultural, or historic merit and which will help to revitalize communities or neighborhoods and contribute to a more suitable living environment.

The funds provided through this program will supplement other activities, but it is likely, I feel, that activities supported through the "livable cities" program will achieve the difference between those that are "good" and those that are "great." I can visualize a number of communities in the region I represent, western New York, where having this resource would be exceptionally valuable.

One such would be to supplement activities planned for the "Niagara Falls Experience," for which a proposal has already been submitted to the National Endowment for the Arts by the Niagara Council on the Arts. The "Niagara Falls Experience" will be a summer festival, free to the public, serving as a vehicle for bringing residents of the entire region to the heart of Niagara Falls to participate in and enjoy an ethnic and cultural heritage program. And supplemental assistance through "livable cities" would make this festival that much more meaningful.

Another possible candidate for assistance through this program is the "entertainment district" in downtown Buffalo, a presently deteriorated commercial area but one which has immense potential if its historic architectural and cultural resources are preserved, rehabilitated and energized. A magnificent plan to accomplish just that was proposed a short time ago; and the September 29 reopening of Shea's Buffalo theater, once the flagship of this famous chain, with a performance of "Tosca," signals that the time is right to move forward aggressively.

Having Federal assistance in these efforts is essential, and I urge the House to join me in supporting the livable cities program and the community development bill when it comes before us.●

CATCH-22 OF CONSERVATION

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. STEERS. Mr. Speaker, recently there have been reports that a local utility company, Washington Gas Light wants permission from the Public Service Commission to charge more to customers who attempt to reduce gas costs by using energy saving devices such as heat pumps or wood burning stoves.

I believe that the Washington Star of Friday, October 13, 1978 has written an excellent editorial against this proposal. I fully share the Star's opinion on this matter. It makes no sense to me that this utility company or any other one should penalize consumers who attempt to reduce energy consumption. I fully intend to follow this matter closely; to see that the interests of consumers concerned about energy consumption will not be penalized for taking action into their own hands.

I am inserting the editorial from the Star into the RECORD for all of my colleagues to review.

The editorial follows:

CATCH-22 OF CONSERVATION

The Washington Gas Light Company has come up with a gasser.

It proposes to penalize customers who save gas—and consequently money—by installing energy-saving devices.

That means if you have a gas-fired heating system and put in an electric heat pump or a wood stove, which probably would cause your consumption of gas to drop, you're apt to be ticketed for a gas rate boost.

The company's rationale is not completely irrational, of course. It argues that the company must collect enough revenues to construct, maintain and operate a system designed to satisfy all customer demands during peak load periods. A sharp reduction in revenues would put the company in financial difficulty. Therefore, it proposes to guarantee the revenue flow by boosting charges to customers who sharply reduce their consumption.

Obviously the company must have income sufficient to match the outgo, with a reasonable amount left over for investors. But its proposal to penalize customers who save gas not only goes against the grain of national policy—to save energy—but it is bound to be a public relations disaster.

How will it ferret out the culprits disloyal to the gas company? It plans to run bills through computers, which will flag customers whose bills reflect a sharp drop in gas usage. Then the company presumably will make an on-the-spot investigation to see what the customer is using in place of gas.

If it's a heat pump or wood stove, the customer is likely to be in trouble. These devices, you see, are coming into fairly common usage as energy and money savers.

Solar heating devices, as we understand it, are okay for the moment but look out down the road. A company official was quoted as saying that solar heating doesn't "represent a problem yet. . . That's still about five years away."

Does the company have a real problem or is its proposal aimed at heading off competition and scaring customers away from buying energy-or money-saving devices?

If it does have a revenue problem—and the company ought to be required to prove that beyond doubt—penalizing individuals who are trying to save energy or beat the cost of living hardly seems an appropriate way to solve it.

Government units that pass on rate requests ought to tell the company to run the problem through its computers again.●

VIGIL FOR FREEDOM FOR SOVIET JEWRY

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BRODHEAD. Mr. Speaker, today the Vigil for Freedom for Soviet Jewry which I began in March of this year comes to an end. I wish to express my thanks to the many Members who participated in the Vigil on behalf of Soviet Jews whose only crime is a desire to be reunited with their families and live out their lives where they choose.

Much has happened this year. On the other hand, Jewish emigration from the Soviet Union has increased dramatically in recent months. On the other hand, a survey completed by the U.S. Commission on Security and Cooperation in Europe indicates that the discriminatory practices and procedures encountered by applicants for emigration from the U.S.S.R. remain substantially unchanged. Recent reports indicate that emigration from the Soviet Union may become even more difficult because of new Soviet restrictions arising from preparations for the Moscow Olympics. This was also the year of the trials of Anatoly Sharansky and other members of the Helsinki Monitoring Group, who sought to document the Soviet Union's lack of compliance with the human rights provision of the Helsinki Final Act.

Nevertheless, I believe that more people than ever before are aware of the Soviet Union's restrictive emigration policies. It is my hope that we will recommit ourselves to efforts to change them and insure basic human rights for people everywhere. ●

MANY QUESTIONS AT SENIOR CITIZENS SEMINAR

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. EILBERG. Mr. Speaker, the recent Senior Citizens Seminar which I sponsored in my congressional district included a question-and-answer session which I found particularly helpful. The session pointed to many of the concerns which are on the minds of senior citizen leaders in our Nation, and I would like to offer the minutes of this meeting for the RECORD:

MINUTES OF SENIOR CITIZENS SEMINARS

Mr. Harry Silver, of the National Association of Retired Federal Employees, Chapter 1301, opened the question and answer period by inquiring as to what action has been taken on his recent communication with Congressman Eilberg about H.R. 8818, a bill to increase the present tax credit for persons 65 years old and over and to eliminate the adjusted gross income limitation.

Congressman Eilberg informed Mr. Silver that the bill is before the House Ways & Means Committee, where it is scheduled for mark-up soon. He also said that he had notified the proper people with his views on this matter.

Rae Turon (JYC David Neuman Senior Center) asked Congressman Eilberg what he was doing about a national health insurance policy. She also asked what is going on in the Pennsylvania Legislature since they have cut funds for the Philadelphia Corporation on Aging. She said that they have not had any increases for 1978 and 1979. Mrs. Turon described how much the senior centers in the area mean to the community, and said that without the funds, they will be unable to function. She further stated that she would like to see Congressman Eilberg help in seeing that the State provides the appropriation for that purpose.

Congressman Eilberg stated that he would be in touch with the State representatives regarding additional appropriations for the Philadelphia Corporation on Aging. He also explained that, hopefully by the 96th Congress, we will have a national health insurance policy.

Joseph Hutter, of the Pennsylvania Association of Older Persons' stated that the proposed tax relief means nothing to him. What the senior citizens need is real estate tax relief, he said, adding that senior citizens are facing confiscation of their properties since inflation has boosted taxes to enormous figures. Mr. Hutter urged Congressman Eilberg to use his efforts to stop the City Council from taxing senior citizens.

Congressman Eilberg explained that taxes on real estate is a function of the local government and the Board of Revision of Taxes. There is little that Congress can do to lower real estate taxes. Congress should be helping out the cities, he said.

Lillian Holliday, President of the Action Alliance of Senior Citizens directed her question to Chief Inspector John Craig, and asked what can be done about the problem of senior citizens being robbed, especially on buses. She stated that senior citizens are afraid to board buses because of muggers and pickpockets.

Chief Inspector Craig stated that his department does have a policy for uniformed policemen to board buses, depending on the availability of policemen. However, sometimes, there may have been an incident before the policeman boards the bus, and in such a case, there is very little he can do if the thief has escaped.

Bert Share, of the JYC David Neuman Senior Center, stated that senior citizens want $1 prescriptions. He stated that he calls many senior citizens each month who are disabled, ill and lonely. He gets frustrated because the people tell him that they set aside their prescriptions or take less than the prescribed amount because they just can't afford to pay the high prices.

Congressman Eilberg pointed out that $1 prescriptions is a State matter, which should be pursued through State representatives. However, he explained that there is a bill in the Congress which, if passed, would provide drugs for $1 on an outpatient basis for those participating in the Medicare program.

Louis Gross, of the David Neuman Senior Center, Concerned Citizens, remarked about the new bill to reduce airplane fares for senior citizens. Mr. Gross asked how many senior citizens can afford to go by airplane and suggested that the reduction is needed for train and bus transportation, not airplanes.

Millie Marshall, of the David Neuman Senior Center, stated that, as Mr. Cappiella said, inflation is the number one problem of senior citizens. She asked what the Congress is doing about it. When landlords increase the rents of apartments of senior citizens, they have nowhere to go. Also, Mrs. Marshall stated that they have to wait a whole year for an increase in their Social Security benefits.

Congressman Eilberg stated that he is a cosponsor of legislation that would provide increases every 3 months for social security benefits.

Mr. Harry Kaplan, of the David Neuman Senior Center, stated that without wage and price control, we are fighting a losing battle, whether we get an increase every three months or every six months. Before the end of the year, the money is gobbled up because of inflation before increases are even received. Mr. Kaplan said that there must be some form of control or the country will go down the drain.

Congressman Eilberg stated that not only should there be controls on wages and prices, but on profits and interests as well. Congressman Eilberg further stated that the President is opposed to controls. And, although President Carter is taking certain steps to control inflation, Congressman Eilberg thinks they are inadequate. He mentioned also that he would vote for controls in the Congress.

Jesse J. Yanni, of the St. Williams Senior Citizens Club, stated that people on Social Security have difficulties budgeting their money since they receive their checks only once a month. Mr. Yanni made a suggestion that social security recipients could receive their checks every two weeks instead of once a month.

Mel Jenks of the Social Security Administration responded by saying that he thought it would be impossible to administer the Social Security program on a semi-monthly basis. He also mentioned that he had never heard this suggestion made within, or outside, the Social Security Administration. He stated that this idea should be pursued through elected representatives in Congress.

Congressman Eilberg stated that he would look into it.

Elsie Pinkovitz, of the JYC Klein's Concerned Citizens, asked about what the Congress is doing about national health insurance, because hospital costs are so high. She also mentioned the very high cost of nursing home care and pointed out that senior citizens cannot afford to pay such exorbitant prices.

Congressman Eilberg stated that since the 95th Congress will be adjourning in about four months, there will not be enough time during this Congress for a national health insurance policy to be implemented. However, he stated that he believes it will be passed during the 96th Congress.

Sigmund Kempner, of the JYC David Neuman Senior Center, asked why is it that every time Social Security gets a raise, the VA takes it away.

Congressman Eilberg stated that he has been a frontrunner on this issue for some time, and although he and his colleagues haven't won the fight yet, he said they will win it.

Mr. Kempner stated that widowers can collect on their wife's Social Security and he wondered if it is possible for him to collect something on his wife's Social Security.

Mr. Jenks from Social Security stated that these laws are very complicated. He said that if Mr. Kempner's own Social Security benefit is greater than what the widower's benefit would be, he can only receive his own. And, if a widower is receiving a government pension, it is possible for that annuity to wipe out a widower's benefit.

Congressman Eilberg said that he hoped the senior citizens found the seminar to be informative and beneficial. He thanked the panel members for their contribution and indicated his interest in having continuing communication with all the participants.

Congressman Eilberg asked Mr. Ross to preside for the remaining minutes of the meeting.

Molly Weiss, of the David Neuman Senior Centers expressed her interest in the proposal for $1 prescription drugs.

Mr. Ross explained that this is a state matter, not a federal one. Senior citizens should contact their state senators and representatives on this matter, he said.

Mr. Oscar King, of the American Association of Retired Federal Employees, voiced his views regarding the very high property taxes, and mentioned that he wants something done to lower them.

Mr. Ross stated that this is a local matter handled through the Board of Revision of Taxes. He also stated that the best way to fight it is through a taxpayers revolt.

Mr. Ed Maskin, Chairman of the Political Action Committee of Klein Concerned Citizens, voiced his opinion regarding his support of a freeze on wages and prices. Mr. Ross mentioned that, as Congressman Eilberg

stated previously, the Carter Administration is against such controls.

Mr. Ross thanked all the participants for their contribution to the seminar, and mentioned that he, too, thought it was a very informative conference.●

ARROGANT MORALIST OF THE LEFT

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. SIKES. Mr. Speaker, Common Cause, long headed by a Berkeley product named John Gardner, has low-keyed some of its more recent forays into the public domain. Possibly this is due to the resentment aroused in a great many quarters by the extreme position taken on public issues and against individuals. This situation led to Gardner's being dropped as head of Common Cause and, hopefully, a realization that whatever usefulness Common Cause might have had has largely been dissipated by its extreme policies.

I now wish to go into the background of Common Cause. This subject was effectively portrayed by a distinguished Member of the House, Mr. ASHBROOK of Ohio, on February 10, 1976. I shall borrow extensively from his comments. I trust the reedification of the House on this organization and the background of its sponsors will come in good stead.

Mr. Speaker, Common Cause, an organization founded by John Gardner in 1970, has been described as America's largest public interest lobby. Every year this organization pours hundreds of thousands of dollars into lobbying Members of Congress.

During the years of its existence, Common Cause has received too many glowing press reports and too little hard analysis. Consequently I think it is important for us to examine this organization at some length.

An objective analysis will show that Common Cause is politically liberal. Its origins are liberal. Its leadership is liberal. The issues it supports are predominantly liberal. In short, Common Cause promotes liberalism and big government which we all know is not the same thing as promoting good government. It has become impudent and arrogant and attacks all who stand in its path. It is anti-business to the core and has nonetheless attracted many big businessmen to its following which also tells a lot about some of our so-called businessmen. A close study shows it promotes its own interest, not the public interest.

ORIGINS OF COMMON CAUSE

According to John Gardner, Common Cause is "a direct outgrowth of an earlier group known as the Urban Coalition Action Council." The Urban Coalition Action Council in turn served as the lobbying end of the National Urban Coalition. Gardner played a key role in both organizations.

In 1968, after stepping down as Secretary of Health, Education, and Welfare in the Johnson administration, Gardner became chairman of the National Urban Coalition. He subsequently founded the Urban Coalition Action Council to give his organization a lobbying arm. When Gardner established Common Cause in 1970, the same executive committee that governed both the National Urban Coalition and the Urban Coalition Action Council initially governed Common Cause.

This executive committee was dominated by liberals. It included George Meany, president of the AFL–CIO, Leonard Woodcock, president of the United Auto Workers, and A. Philip Randolph, International president emeritus of the Brotherhood of Sleeping Car Porters, AFL–CIO. In addition, it contained the president of the National Council of Churches and leaders of the National Urban League, the Leadership Conference on Civil Rights, and the United Negro College Fund. Also serving were such prominent liberal politicians as John Lindsay, former mayor of New York City and Richard Hatcher, mayor of Gary, Ind.

According to Congressional Quarterly, the Coalition's steering committee included leaders of more than half of the 10 organizations which sponsored the 1963 "March on Washington for Jobs and Freedom." This was a major impetus for the 1964 Civil Rights Act. Many gullible businessmen were enlisted in its early days.

It is hardly any wonder then that Common Cause has a leftist bent. In describing the origins of Common Cause, the December 19, 1972 edition of the Washington Post stated the following:

> The board's basic makeup was shaped even before the first member solicitations began. The first 20 board members had been directors of the old Urban Coalition Action Council, which Gardner had headed. Most of them were on that board by virtue of their leadership roles in labor, civil rights and other social purpose organizations.

The activities of the Urban Coalition Action Council reflect the liberal makeup of the board. The solution to every problem was thought to be massive doses of the Federal programs which had failed in the past. As I stated on the floor of the House on July 16, 1970:

> This group [the Urban Coalition Action Council] has been effectively mounting a crusade for heaping more and more taxes on the back of the already overburdened American taxpayer. Through its spokesman, Mr. Gardner, it has come out against giving any tax break to the average American and has called for massive doses of socialism and spending to cure every conceivable ill.

One of its pet projects was the Family Assistance Act, which would have established a federally guaranteed minimum income for every American. This would have been a budget-busting program of mammoth proportions.

The council also sought to implement proposals of the National Commission on the Causes and Prevention of Violence and the National Advisory Commission on Civil Disorders. Both called for major increases in Federal spending and wholesale revamping of national priorities. The Violence Commission's report alone recommended that at least $20 billion a year be committed to solving social problems. This coincides with Mr. Gardner's expressed view that "a great deal more" Federal spending was needed to help the cities.

The council favored increased funding for urban renewal, Model Cities, and housing programs. It worked for passage of the Housing and Urban Development Act of 1968, which authorized $5.3 billion over a 3-year span. It lobbied for more funds for the Office of Economic Opportunity, the discredited Federal anti-poverty program born out of the Great Society. It called for a massive effort to provide federally funded public service jobs.

When it came to the food stamp program, the council complained about the "barriers to participation." According to Mrs. Fred Harris, who testified on behalf of the council, the procedures could be immediately simplified by permitting recipients to fill out a simple declaration of eligibility and then mailing food stamps to recipients. No checks, no questions asked—just sign up and the Government pays on demand. This position is typical of Common Cause's myopic vision and prowelfare, proliberal posturing.

In summary, the Urban Coalition Action Council lined up behind the liberal big spenders and promoters of big government on issue after issue. The council consistently advocated more Federal programs, more Federal intervention, and more Federal spending as the solution to every real or imagined problem.

LEADERSHIP

After investigating the origins of Common Cause, it should come as no surprise that the top policymakers of this organization are liberals.

John Gardner, the chief policy officer and founder of Common Cause, served as Secretary of Health, Education, and Welfare in the Johnson administration. A token Republican of the eastern establishment type, Gardner resigned his post in 1968 to become chairman of the liberal-oriented National Urban Coalition. He then set up the National Urban Coalition Action Council to give his group a lobbying arm. The council as previously mentioned, was the direct predecessor of Common Cause.

Before moving to Common Cause, Gardner consistently supported liberal efforts to establish massive new Federal programs as well as make major funding increases in existing programs. He also alined himself with the antigun forces in this country. He was a member of the executive committee of the Emergency Committee for Gun Control. This group advocated legislation requiring registration of all guns and licensing of those who own or use guns.

The September 1, 1973, issue of the National Journal Reports, a publication which covers the activities of the Federal Government, described Gardner and his organization in the following terms:

> The popular image of the public interest citizens' lobby founded in September 1970 by Gardner, the former Secretary of Health, Education, and Welfare, and former President of the Carnegie Foundation, resembles that of its founder: white, affluent, liberal, vaguely ministerial and often dull.

Jack Conway served as president and chief operating officer of Common Cause (CC) from 1971 until 1975. According to

the Common Cause report from Washington:

In his four years with CC Conway has played the major role in organizing CC members for effective action.

Conway has a long record of liberal and union affiliations. He was top aid to Walter P. Reuther, president of United Auto Workers, from 1946 to 1961. Conway then served as head of the AFL–CIO's Industrial Union Department. From there he moved to the deputy directorship of the Office of Economic Opportunity. He was also founding chief of the Center for Community Change, a Ford Foundation-funded group devoted to poverty area community organizing.

After completing his 4-year stint as president and chief operating officer of Common Cause, Conway has become executive director of the American Federation of State, County, and Municipal Employees. AFSCME has gained a reputation of being one of the most politically activist unions in the country.

Conway apparently has no intention of severing his ties with Common Cause. He has assured the CC staff that he would remain a CC volunteer and active board member.

Stepping into Conway's shoes is David Cohen. Formerly executive vice president of Common Cause, third ranking in the power structure, Cohen is a Conway protege. Cohen followed Conway into the Center for Community Change and joined Common Cause at Conway's request in 1971.

Cohen, a registered Democrat, likewise has strong union and liberal affiliations. Cohen previously worked as a lobbvist for the AFL–CIO's Industrial Union Department. He also has been a lobbyist for the Americans for Democratic Action, an ultraliberal political organization.

Tom Mathews is described as the "voice" of Common Cause. He is responsible for all information about Common Cause that goes to newspaper, radio, and television reporters.

In 1968 Mathews was Washington press chief for Robert Kennedy's Presidential race. Before joining Common Cause he was with the National Urban Coalition.

ISSUES

The positions taken by Common Cause reflect its liberal origins and leadership. On issue after issue Common Cause adopts a liberal stance. Rarely, on the other hand, does it back a conservative measure.

Let us take a look at the Common Cause legislative report. This report, dated October 24, 1975, includes among others the following positions.

First, Common Cause supports legislation to establish an Agency for Consumer Advocacy. According to the legislative report, "CC has participated in a coalition of groups, led by Ralph Nader and the Consumer Federation of America, working for enactment of such a measure."

This is an extremely bad piece of legislation. It would create another new and costly Federal agency. Our country simply does not need another layer of government bureaucracy. America's businessmen, particularly the small businessmen, are already buried under a flood of Government paperwork, Federal forms and bureaucratic regulations. It would be unwise to add to that burden. It exempts labor unions from its coverage. Liberals adhere to the fiction that labor unions do not affect the consumer.

As I stated on the House floor, the most relevant thing about the proposed Agency for Consumer Advocacy is the admission of failure of regulatory agencies of the Federal Government. For years the liberals argued we needed regulatory agencies to protect the public. They have built up hundreds of red-tape-spawning regulatory agencies and now they come along and say we need the ACA to become involved in the same agencies to protect the public. The liberals have met themselves full circle.

Second, Common Cause supported a 10-year extension of the Federal Voting Rights Act and expansion of the act's coverage to include a wide range of language minorities.

This legislation, which was enacted into law on August 6, constituted another intrusion by the Federal Government into the rights and powers of the individual States. The new trigger mechanism for Federal involvement in State election procedures is jurisdictions where less than 50 percent registered or voted in the 1972 Presidential election and at least 5 percent are members of a single language group.

As a result, States and political subdivisions will be legally required to provide ballots and other election materials in the language of a language minority group. The cost in many cases is prohibitively high. Furthermore, local jurisdictions will lose the right to make numerous decision because of possible consequences to minorities within their jurisdiction. Local actions such as annexation, deannexation, the establishment and location of voting booths and the printing of voter information could become Federal questions, subject to Washington, D.C., approval or Federal court review.

It is unfortunate that liberals are so eager to sanction Federal invasions of State and local prerogatives.

Third, Common Cause is continuing to push for legislation to provide for public financing of House and Senate elections.

This legislation has a high price tag. It is estimated that public financing would increase Federal expenditures by hundreds of millions of dollars. The cost would be picked up by the American taxpayer through higher taxes and more inflation. There also is a serious constitutional question involved. Is it constitutional to force a citizen to subsidize the campaign of a candidate for public office with whom he disagrees? Finally, there would be an opportunity for subversion of a Government-financed campaign by a party in power.

The public financing proposal is indicative of the liberal view that the best way to solve any problem is through Federal money, Federal regulation, and Federal control.

Fourth, Common Cause backs H.R. 25, the Surface Mining Control and Reclamation Act.

Although we need to protect our environment from strip mining, this bill fails to strike a reasonable balance between our energy needs and our environmental concerns. At a time when the United States must increase coal production, the overly strict provisions of H.R. 25 would unnecessarily reduce production.

The Department of the Interior and the Federal Energy Administration estimate that H.R. 25 would cause a production loss of 40 to 162 million tons in 1977 alone. This would mean greater dependence on foreign oil and higher electrical costs for consumers, as well as increased unemployment. The liberal view seems to be environmentalism at any cost.

Fifth, Common Cause supports efforts to terminate funding for the B–1 bomber being developed as a replacement for the B–52 strategic bomber.

Development of the B–1 bomber is of critical importance to our national defense. The B–52 will have been flying approximately 30 years before the B–1 can be produced in quantity. During those years antibomber defenses have become far more effective. The B–1 will be able to fly three times the speed of the B–52, carry more than twice the bomb load and have electronic devices and other equipment that will help assure its survivability. If we are to maintain an effective strategic bomber force we must develop the B–1.

Sixth, Common Cause opposes easing of the Clean Air Act's environmental standards.

Such action will seriously worsen our energy problems. We should temporarily relax the act's restrictions so that industries and powerplants can make better use of our abundant coal resources. We should suspend auto emission standards so as to allow more efficient use of gasoline. Blind environmentalism can destroy our economy and our standard of living.

Seventh, Common Cause advocates an energy program with immediate imposition of petroleum import quotas, a stiff gasoline tax, and an automobile efficiency tax.

These policies are a prescription for national disaster. Rather than increasing domestic energy production, emphasis is on reducing U.S. consumption of oil and gas through quotas and heavy tax assessments.

The quota system would create an artificial shortage of petroleum products. We would experience a self-imposed embargo, just as damaging as if the oil-producing nations chose to limit our imports. In addition, a "stiff" gasoline tax would be extremely onerous for the people living in the more rural areas of our Nation. Mass transit systems and public transportation simply are not available.

It is ironic that the liberals always seem to think in terms of taxes and quotas. Rarely do they propose policies which will assure sufficient supplies for the future. Common Cause calls all of this working in the public interest.

OTHER ISSUES

Other positions taken by Common Cause over the last 5 years are equally or even more outrageous. Again, Common Cause always seems to come down

on the liberal side of the issues. Following are a few examples.

Common Cause has opposed efforts to prevent busing through constitutional amendment. According to the March 1972 Common Cause Report from Washington:

> It (a Constitutional Amendment on school busing) would turn the clock back on 18 years of dogged citizen efforts.

Forced busing to CC is fine, the result of dogged citizen effort. I would say that the latter part of that statement is true but the "dogged efforts" come from a small, radical band of liberals bent on imposing their will on a very reluctant majority.

Forced busing of schoolchildren is another liberal panacea that has failed miserably in practice. It is just one more example of the Federal Government forcing its own view on local school districts.

Common Cause supported the Family Assistance Plan, which would provide a federally guaranteed minimum income. According to Gardner, Common Cause has been "the chief citizen organization" backing the plan.

This radical program would commit the Government perpetually to the worst possible position. It would expand rather than solve the welfare mess. More, not less, people would be dependent on the Government for their food, shelter and clothing. A guaranteed annual income would be a giant step toward a permanent welfare state, a socialized society these CC liberals yearn for.

Common Cause has worked for an expanded food stamp program and has opposed administration efforts to raise the price of food stamps or cut back on the $5 billion boondoggle.

The present food stamp program is becoming a spending nightmare. The program has already topped the $5 billion mark and could grow to $8 billion unless needed changes are made. Too many undeserving people are accorded food stamp privileges such as striking workers, college students, and dropouts. Unfortunately the CC liberals do not seem to want to make the reforms in the food stamp program that are so desperately needed.

Common Cause opposed legislation authorizing construction of the Alaska pipeline bill. In the words of Common Cause, this was "a giant step backward on environmental policy."

This legislation was essential to help alleviate the energy shortage facing our country. When completed, the Alaska pipeline will be able to handle 2 million barrels of oil per day. Although some would block all development of our energy resources, there must be a reasonable balance between our need for energy and our concern for the environment.

Common Cause supported legislation for a new, comprehensive child development program.

Such legislation would authorize Federal intervention in the parent-child relationship. This is totally inappropriate area for the Federal Government. Nationally syndicated columnist James J. Kilpatrick has described the program as a scheme "for the essential Sovietization of the American family." This bill is the culmination of the bureaucrat-sociologist control plan, the liberal planner's dream.

COMMON CAUSE VOTING SUMMARY

The Common Cause voting summary demonstrates the liberal leanings of that organization. The positions backed by Common Cause almost invariably would result in more Federal regulation, more Federal interference, and more Federal spending. The votes also indicate an antimilitary bias.

Let us look for a moment at the "Voting Summary on Common Cause Issues" prepared for the 93d Congress.

Common Cause supported passage of the Land Use Planning Act. This legislation would have authorized a massive Federal intrusion into the uses of private property. Traditional local control of property would have been replaced by Federal rules and regulations.

The bill was a spending nightmare as well. It proposed Federal expenditures of $800 million. Such waste of taxpayers money is totally unjustified.

Common Cause favored enactment of Federal postcard registration. This bill would have established another Federal bureaucracy at a cost of $50 million a year. It also would have provided an open invitation to voter fraud. It makes little sense to set up a new and expensive Federal bureaucracy when voter registration already is being adequately handled by local officials.

Common Cause backed public financing of House and Senate elections. Public financing would lead to more Federal interference in the conduct of campaigns. It also would soak the American taxpayer for hundreds of millions of dollars per election.

Common Cause wanted to block speedy construction of the Alaska pipeline. Further delay would have injured the interests of every American. It would mean less oil, higher prices and more dependence on foreign energy sources.

Common Cause favored creation of a Federal Consumer Protection Agency with very broad information-gathering and enforcement powers. The agency could intervene at the whim in court and administrative proceedings, hold up final determination of an issue and send interrogatories to businessmen on virtually any topic. We hardly need another group of Washington-based bureaucrats interfering in our free enterprise system and harassing our Nation's businessmen.

Common Cause supported an amendment reducing by $733 million the military procurement authorization approved by the Armed Services Committee. The bill was already $486 million below the budget and this amendment would have seriously weakened our national defense.

MEMBERSHIP LIST

Common Cause's handling of its membership list also shows the liberal leanings of this group. In 1971, Gardner publicly admitted that Common Cause had allowed the Democratic National Committee to use part of its membership list for fundraising purposes. This was part of a list swap with the Democrats.

Common Cause exchanged lists with one Republican group as well. And which one was that? You guessed it, the Ripon Society. According to the March 10, 1971, edition of the Washington Post:

> The spokesman [for Common Cause] said the only Republican group whose membership list Common Cause had used is the Ripon Society, an unofficial group of liberal Republicans.

FINANCIAL DISCLOSURE REPORT

When it comes to the question of financial disclosure, Common Cause believes that everyone should strictly comply with the law. Apparently everyone, that is, except itself. Then different rules seem to apply.

We all know how Common Cause takes satisfaction in watch-dogging the reports of candidates and political committees and loudly denouncing election law violations no matter how minor or innocent. Consequently it is ironic that Common Cause was a month late in filing its March 10, 1975 financial disclosure report as prescribed by Federal election law.

This fact was brought to light by my colleague from Ohio, Congressman Wayne Hays, chairman of the House Administration Committee. Congressman Hays stressed that Common Cause should be held to the same standards as are applicable to all other political committees.

As Representative Hays stated on April 16, 1975:

> All other political committees filed reports on March 10, 1975. Why should there be an exception for Common Cause?

That is a good question.

COMMITTEE CHAIRMEN

Common Cause has displayed a liberal bias in attacking the seniority system. Almost invariably it is the conservative chairmen who are the object of Common Cause's wrath.

In previous years, Common Cause has urged the defeat of such conservative chairmen as former Representatives William Colmer of the Rules Committee and Mendel Rivers of the Armed Services Committee. Liberal chairmen, on the other hand, go largely unscathed.

The 94th Congress is no exception. The Common Cause evaluation of House committee chairmen placed Representative Edward Hébert—Democrat of Louisiana and head of the Armed Services Committee—at the bottom of the ratings.

It should come as no surprise that Hébert is a patriot and one of the most conservative members of the Democratic Party. Apparently Common Cause believes there is nothing more obnoxious than having a conservative in charge of a House committee.

Common Cause has a great deal in common with the Ralph Nader band and the environmental zealots. Everything private or business oriented is bad, everything public or antibusiness is good. They all have the same double standard when it comes to labor. Everyone with any business connection is attacked, labor connections do not count. Amendments which knock out labor from coverage of the Consumer Protection Agency do not get a peep out of Common Cause or Nader. Amendments which open the flood gates for labor spending in campaigns do not come under their microscope.

A good example would be two recent pronouncements of Common Cause. They attacked my friend and colleague, BOB SIKES of Florida for his connection to business interests and the military but say not a word about those Congressmen who have received from $30,000 to $50,000 from labor unions for their 1974 political campaign when it came time to vote on a No. 1 labor issue, that of situs picketing. That is not a conflict according to Common Cause, but receiving a $500 contribution from a group of your local real estate agents who are working in political campaigns is bad. This double standard runs through the entire Common Cause arrogance which makes their moral posturing a little sickening.

SUMMARY

John Gardner would have us believe that every action taken by Common Cause is in the public interest. As we have learned after studying the issues, however, the public interest almost always seems to be defined in liberal terms. It should be understood that the positions advocated by Common Cause are neither politically nor philosophically neutral. In the final analysis, Common Cause favors the liberal cause.

James J. Kilpatrick, one of my favorite columnists, hit the nail on the head in referring to Common Cause as arrogant moralists. Here is what he wrote in his February 3, 1976 column. The McCarthy he refers to is former Senator Eugene McCarthy, by all standards a very honest and direct liberal. Note well what Kilpatrick writes:

Back in November, McCarthy received a letter from John Gardner, chairman, and David Cohen, president, of Common Cause. These two eminences, in the high and mighty way, wished to remind McCarthy that many political campaigns had become mere exercises in "image manipulation and issue evasion." Their supremacies told McCarthy that new standards of integrity, responsiveness and accountability must be introduced. Messrs. Gardner and Cohen had prepared such a list of standards. Copy enclosed.

"We will be calling on our members, the public and the media," warned the two exalted ones, "to measure candidates' performance against the enclosed standards." They asked McCarthy for a written response.

The identical letter went to other avowed candidates for the presidency. Their flatulent responses soon came pouring in. Birch Bayh wrote that he had no hesistancy in subscribing in full to the Common Cause checklist. Lloyd Bentsen assured their nobilities that his conduct would be consistent with their goals. Jimmy Carter delivered his wholehearted endorsement. Fred Harris sent three single-spaced pages of agreeable response. Henry M. Jackson said he had directed his staff to see that the goals were achieved. Gov. Milton Shapp declared his strong endorsement and delivered his pledge of adherence. Sargent Shriver sent two pages of fulsome allegiance. Mo Udall sent three.

Alas, the royal highnesses of Common Cause got no such response from McCarthy. Clean Gene turned the letter over to his campaign chairman, Ronald Cocome, who responded to John Gardner by return mail as follows:

"I find this communication insulting. I don't mind telling you that if any citizen controls are needed, they are controls over your arrogance. I don't know who the blazes you think you are. As a campaign we are responsible to the voters directly. We will let them interpret our actions and motives. We do not need you to do so, and we do not believe the people of this country do.

"In short, you can take your enclosed standards and stuff them in your ear!"

Well! Lese majeste! King John was not amused. Gardner delivered himself of a portentous conclusion: McCarthy "must disagree with the standards or he cannot live with them politically." No other possibilities had occurred to El Supremo.

John Gardner has been very successful with his "do as I say not as I do" approach. This is largely due to the fact that the liberal press, notably the New York Times, dotes on his every word. He is the liberal ax they proclaim to speak for the public interest. He also fits the other pattern. Liberal media like the New York Times refer to him as a Republican even though he comes about as close as Khrushchev to the philosophy and platform of the Republican party. Prudent Americans who are worried about the direction of the Federal Government, our Federal tax burdens, huge and mounting deficits, inflation, and grasping Federal bureaucracy should keep an alert eye on John Gardner and Common Cause, arrogant crusaders and moralists of the left.●

PREVENTING TEENAGE PREGNANCY

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BEILENSON. Mr. Speaker, I was opposed to Mr. VOLKMER'S amendment requiring parental notification of the prescription of drugs and devices to unemancipated minors under 16 to H.R. 12370, health service amendments, which passed the House Friday evening. Though the amendment failed, I would like to explain my reasons for opposing it.

It seems to me there are two possible reasons for the amendment proposed by the gentleman from Missouri. One could be the hope that, by requiring parental notification, teenage sexual activity will be curtailed. Or, it could reflect a concern with the status of the family in this country. We are all concerned with the family in America and we all support any effort this Congress can make designed to maintain and strengthen family life. In this case, the idea that parents should be informed about their children's behavior and problems is not objectionable in and of itself. In fact, it is a highly laudable concern. However, here we must first make a decision as to our priorities, and we then have to assess the practical value of any action, no matter how well-intentioned, which we might take.

The fact is that teenagers will continue to have sexual relations even if we require parental notification for contraceptive prescriptions. They will just stop using family planning clinics, and contraceptives—other than those available over-the-counter on supermarket shelves. In essence, they will either turn to the least effective forms of contraception, or they will not use contraceptives at all.

How, may I ask, will the American family be served, or strengthened, if greater numbers of youngsters under 16 become pregnant, and are forced to deal with the trauma of either carrying their unwanted pregnancies to term, or of having an abortion?

The idea that parents should be informed in the case of their children receiving prescription drugs or devices is not offensive to me at all, but the consequences of such a requirements are.

The problem of teenage pregnancy has become alarming. The number of adolescents who are becoming parents, before they become adults, is a serious, and escalating, social, economic, and health problem.

Our Select Committee on Population held 3 weeks of hearings earlier this year on the specific question of adolescent fertility in the United States. Here are some of the committee's findings:

One million American teenagers become pregnant every year;

More than one-third of a million teenagers have abortions every year;

Of the more than 600,000 teenage mothers who gave birth last year, 250,000 were 17 and under and 13,000 were under 15;

Of all of the young women who were 15 years of age in 1973, 40 percent became pregnant at least once before they reached their 20th birthday.

Out-of-wedlock births to teenagers have more than doubled in the past 16 years until, in 1976, more than one-half of all out-of-wedlock births in the United States occurred to teenage mothers, and

Pregnancy is the single most common cause of school dropouts among young girls: Nearly 70 percent of pregnant girls fail to complete high school. Among mothers aged 15 years or younger, 90 percent never finish high school and 40 percent fail to complete even the eighth grade.

Less than one-third of sexually active teenagers regularly use contraception—but the committee found—

the relatively low level of adolescent participation in family planning programs has been attributed to a number of problems associated with providing services to teenagers. These problems include: "barriers" to service delivery such as anxiety about confidentiality, . . . and legal impediments, in the form of complete prohibitions of services to minors, parental consent requirements, or parental notification requirements.

Teenage pregnancy poses a very serious health risk for both mother and child. Infant mortality is two or three times higher for infants born to teenage mothers, and maternal mortality is 60 percent higher for teenage mothers than for mothers in their twenties.

Abortion is one alternative to childbearing that is immoral to some, and distasteful to those of us who see it as a choice that a young woman sometimes feels it necessary to make. The Senate, the House and the administration are all interested in providing "alternatives to abortion."

There is no better alternative to abortion than contraception.

There is no better way to stop the constantly rising numbers of abortions than by eliminating the need for them by providing family planning services to the millions of teenagers, a sizeable portion of whom are under 16, who will be sexually active despite anything we try to legislate here. We should place more emphasis on helping men and women—especially teenagers—prevent unwanted and unplanned pregnancies, rather than forcing them to choose between seeing such pregnancies through to term, or ending them by abortion.

In a recent study of adolescents using family planning clinics, nearly half were attending those clinics without the knowledge of their parents. Of these, only one-fifth said that they would have come if parental notification were required, and less than one-tenth said that they would drop their sexual activity if their parents had to know of it.

Additionally, there is a question as to the constitutionality of requiring parental notification when supplying contraceptives to minors. Some recent Supreme Court cases have indicated that minors have the same rights to privacy as adults.

If we expect teenagers to participate in our programs, they must not be made fearful of losing confidentiality. Such fears would drive away those most in need of the services, with the result that young people who could have gained access to a health care delivery system will not receive the health care they need.

It is ironic that we considered a number of so-called antiabortion amendments yesterday and at the same time considered this amendment which, if adopted, would have erected significant barriers which would deter young people from receiving the means of prevention of unwanted pregnancies. Title X strictly prohibits the use of abortion as a method of family planning. The aim of the program is to prevent unwanted pregnancies, a goal which we should encourage, and not thwart with additional Federal restrictions.●

PROMOTING AMERICA'S EXPORTS

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ZABLOCKI. Mr. Speaker, the Committee on International Relations is issuing today a Library of Congress study on "Export Stimulation Programs in the Major Industrial Countries: The United States and Eight Major Competitors." The study, performed by the Congressional Research Service at committee request, describes the export promotion programs of the United States, Canada, France, West Germany, Italy, Japan, the Netherlands, Switzerland, and the United Kingdom. It offers a good factual comparison of the export incentives used by ourselves and our chief rivals in international trade. It sheds light in an area where there has been considerable confusion and debate, and I commend it to Members of Congress and the public.

I also wish to take this opportunity to offer some general observations about the state of U.S. exports and export policy. As the study notes, the United States has experienced a serious deterioration in its foreign trade balance in recent years. The huge gap between our export earnings and our imports has become one of the most worrisome problems facing our economy. Our trade deficit hit a record $27 billion in 1977. This year it will be even worse.

In bygone years, an unfavorable trade balance could be shrugged off as an irritant which affected a relatively small portion of our economy. Historically the United States, unlike most industrial nations, has produced goods largely for consumption within the United States. But in more recent times, exports have become increasingly important to us. Over the last two decades, the proportion of exports in our GNP has nearly doubled, reaching 7 percent last year. At the same time, our important bills have been climbing even faster. For example, the volume of our exports in 1977 was 2.8 percent higher than in 1975—but our imports were 35.7 percent higher.

One of the most troublesome factors underlying our deficit is the dropoff in productivity and innovation in U.S. industry compared with that of our competitors, whereas we used to be a world leader in this respect.

Obviously, this is an unacceptable situation, and one growing more serious with time. The question is, What can we and will we do about it?

As far as our private sector is concerned, I have faith that our free enterprise system and the basic economic strength of our country will rebound again as it has many times before, and that once again American competitiveness will place U.S. products in a favorable position in the international marketplace.

However our businessmen and farmers will need help of the right sort from the Government—both in active programs to promote U.S. exports, and in efforts to remove impediments to our sales abroad.

One cause of the poor U.S. export performance is Government policies that serve as disincentives to exporting, either through discouraging exports or actually preventing them. These policies include: strategic export controls, nuclear nonproliferation policy, arms sales ceiling, opposition to Arab boycotts, human rights policies, Jackson-Vanik, trade embargoes, Foreign Corrupt Practices Act, and others. Each of these policies, most of which I have supported in principle, are, taken individually, sound policies which seek to further important U.S. goals. We are all opposed to nuclear proliferation, abuse of human rights, the Arab boycott of Israel, bribery, arms races, etc. Unfortunately, the cumulative effect of these policies is a negative impact on the U.S. export position, the dollar, and the U.S. economy. Although no accurate figures are available, it is conservatively estimated that these policies may result in the loss of some $2 to $4 billion of exports annually, and the figure could be considerably higher.

Obviously we are not going to loosen up on our strategic export controls, nor are we going to rush to reestablish trading relations with a regime such as the one in Cambodia. However, we do need to review all of these policies to determine if they effectively meet their objectives. If they are meeting their purpose of furthering a specific policy, then the economic cost may be worth the achievement of that goal. However, if the policy is not being furthered, then we should consider if the cost is justified. To a large extent the answer to this question will depend on whether other nations are following our lead and adopting similar policies. I am afraid that in many cases they are not.

I am pleased to note that in his export policy statement of September 26, 1978, the President has taken a first step toward reducing governmental barriers to exports. The statement includes a directive for all regulatory agencies and government departments to consider the impact of regulations and U.S. foreign policy on exports and to provide clarification of the Foreign Corrupt Practices Act, the antitrust laws, and the National Environment Protection Act requirement for environmental impact statements for certain exports. In regard to the impact of oreign policy on exports, the departments are to consider alternate sources of goods available to countries to which the United States restricts exports; such availabilities, for the most part, depend upon the extent to which other exporters follow restrictive policies similar to those of the United States.

The President's policy also includes improvement in Export-Import Bank lending and terms, greater Small Business Administration assistance to encourage small firms to export, additional funding for Government export development programs, increased assistance to promote agricultural exports, and the negotiation of an expansion of the Organization for Economic Cooperation and Development agreement restricting the use of export credits.

I commend the President for taking the initiative in developing a more vigorous export policy. I hope his policy statement is only the beginning and that the administration will expand it, possibly reviewing some of the other policies I have referred to above that discourage exports. I also hope that the President, through his chief representative in this area, Secretary of Commerce Juanita Kreps, will take steps to impress on the various U.S. agencies the importance of this policy and the need for the thousands of individuals in the bureaucracy who implement the various policies to better their efforts to assist exporters and to minimize any disincentives to exporting. Only with the right kind of Government actions—both in positive assistance and in removing unjustified impediments—can our private enterprise system succeed in overcoming the trade deficit which is such a serious problem for our Nation today.

Congressional interest in and support for vigorous and positive efforts in behalf of American exports certainly will not be lacking. Among other actions, it should be noted that concerned Members of the House have formed an export task force which will be examining,

evaluating and seeking to counter trade barriers to U.S. exports. Review will cover implementation of the President's export policy and ways in which it can be expanded. Our colleague, BILL ALEXANDER of Arkansas, is to be commended for his initiative in setting up this group.

American concern about the trade deficit is long overdue, but never too late. Again, I applaud the President's export policy statement and hope it is not just pious rhetoric but will be followed by action and desired results—an increase in U.S. exports and a reversal of the balance of payments deficit.●

RULES COMMITTEE IMPACT ON ENERGY POLICY

HON. JOHN YOUNG

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. YOUNG of Texas. Mr. Speaker, in my career in the Congress, no aspect has been more challenging than the opportunity to serve on the House Committee on Rules. The role of this committee is little understood and not highly visible to the public. Nonetheless it plays a significant part in the substantive development of legislation, even though it is known as the "procedural" committee of the House. By determining the scope of change the House may bring about through the amendment process, the Rules Committee shapes the outcome of all major legislative policy.

I have been proud to work hard in my committee assignment, as we consider fair and equitable rules of procedure for legislation. I have been particularly interested in assuring that the regional interests of my constituency—which includes great dependence upon oil and gas production as a source of employment—have been granted a fair opportunity to be heard by the House.

The importance of the Rules Committee in this process cannot be overstated. Energy production is a most complicated industry, and few people beyond the producing States understand the nature of the exploration-development cycle and the impact of a proper program of incentives on future domestic oil and gas production.

As I leave the Congress, I would like to express once again my concern about the need to improve communications between the energy industry and Government. I commend the new awareness in energy circles of the serious need to establish a strong and forceful education program about industry problems. But communication is a two-way street, and energy industry officials need to become knowledgeable about the legislative process.

A fine example of the necessary understanding and perspective on the legislative process is revealed by an industry expert's letter appearing in the December 19, 1977, issue of "The Oil and Gas Journal." John F. Bricker, president of the Louisiana-Arkansas Division of the Mid-Continent gave a particularly incisive analysis of Rules Committee action delaying the Outer Continental Shelf bill. This maneuver was engineered by my Louisiana friend and colleague, Congressman GILLIS LONG. I was pleased to collaborate with GILLIS in this successful legislative strategy. Our holding action resulted in greatly improving legislation that otherwise would have greatly impaired the future health and development of a potentially thriving and prosperous offshore economy. Mr. Bricker's letter, which follows, is instructive in many respects, but particularly in his keen awareness of the Rules Committee impact on this legislation.

PROCEDURE POWER CITED

DEAR SIR: Much of what is happening in Washington today concerns the oil patch. Our attention in recent months has been focused on the dramatic action of the legislative committees of the Congress, but the future of our industry also is affected by procedure—a special province of the House rules committee which is a unique character in the legislative process.

People who study such matters have been noting for some time that a relative newcomer to the rules committee and to the hill—Rep. Gillis Long (D-La.)—has been able to influence the course of some national legislation considerably beyond the boundaries normally expected of a third-term representative from a sparsely populated district of the Deep South.

The subtleties of influence, however, are sometimes obscured by the complexities of institutions and by the realities and protocols of power. How does the rules committee work its will, for example, and why has Gillis Long become a key committee factor?

An object answer to both questions lies in action before the rules committee in late October to delay—for this year, at least—a resolution calling for extensive and potentially devastating amendments to the Outer Continental Shelflands Act.

By a 10–5 vote, the rules committee on Oct. 25 elected to deny the measure a rule, thus preventing the matter from being forwarded immediately to the House floor for debate.

Mr. Long, who represents a state which pioneered offshore oil and gas exploration and development, was fortunately among the few members of the House who were both aware of the catastrophic impact of such legislation and in a position to do something about it.

For several weeks prior to the actual vote, Gillis Long had adroitly maneuvered to keep the matter off the rules committee calendar. Finally, however, at the insistence of the administration and of the House leadership, the matter could no longer be delayed.

To his credit, Mr. Long was not caught short. Prior to the vote, and with knowledge of intense White House pressure, Mr. Long secured firm commitments of personal support from three of his Democratic colleagues, and their combined four votes provided the balance to swing the majority of members to the side of prudent delay. The actual vote was expected to be much closer, but one member was absent, and the chairman voted with the majority as a parliamentary gambit to preserve procedural rights.

The rules committee action, though significant strategically in the long history to defeat OCS overregulation, was an even more important tactical victory because the delays inherent in postponement will allow the offshore and ocean-related industries to gather their forces for another few months. Delay at this point, in short, was crucial because the OCS amendments were certain to pass in some form once the matter reached the floor. A companion measure, S. 9, had passed the Senate with overwhelming support on July 15, and current House sentiment leaves little room to doubt the outcome of immediate floor debate.

Without the breathing spell provided by the rules committee and by Gillis Long's careful construction of opposition, coastal states and the energy industry would now be faced with a fait accompli: legislation on the books that would cripple exploration, reduce incentives, increase dependence on imports, and pave the way for creation of a government-owned oil industry.

It is not too late to stop the legislation, but time is growing short because the last procedural delays have been fully exhausted. It is time for people involved in the offshore industries to tell Congress how they feel and to explain their side of the OCS story.

And, incidentally, it is never too late for those of us who care about oil and gas to let our friends in Congress—friends like Gillis Long—know how much we appreciate what they have done in our behalf and for our country.

JOHN F. BRICKER,
President.●

HAZEL POMERVILLE: WOMAN OF ACHIEVEMENT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ANDERSON of California. Mr. Speaker, the spirit of giving through involvement in volunteer organizations thrives in the San Pedro community of my home district. I am proud to bring to the attention of my colleagues today, the works of one San Pedro resident who has been instrumental in keeping this spirit alive—Hazel Pomerville. Later this month, during National Business Women's Week, the San Pedro Business and Professional Women's Club will honor her as their woman of achievement. It pleases me greatly to have this opportunity to share with you a small part of this woman's admirable record of service.

Mrs. Pomerville was born in the famous town which sits on the State line between Texas and Arkansas, Texarkana. After receiving her formal education, she began a career as a teacher, in schools on both sides of the line dividing Texas and Arkansas. In 1926 she moved to California where she met and married Leo Pomerville, a local customs officer. Mrs. Pomerville continued her studies at the University of California at Los Angeles before starting her 34 years of service with the Southern California Gas Co.

It is most appropriate that the Business and Professional Women's Club of San Pedro will honor Mrs. Pomerville, since 43 years ago she helped found the club during a time when the participation of women in business and the professions was neither greatly encouraged nor prevalent. She helped expand and strengthen this organization during her term as president, and is still honored as a charter member.

There are numerous organizations in the south bay area of California which offer opportunities for involvement. A great number of these organizations have had the good fortune to have Mrs. Pomerville as a member. She belongs to the San Pedro First Christian Church,

the Order of the Eastern Star, the Friday Morning Club, and the Women's Division of the San Pedro Chamber of Commerce and Community Development. She has also found time to serve as a volunteer in the excellent Meals on Wheels program, which offers warm meals to the immobile elderly.

Mrs. Pomerville's formal memberships give some indication of this woman's value to her fellow citizens, but in addition to these, she is known by the residents of San Pedro to be a reliable and diligent helper whenever a community project came up short-handed. As her many friends will tell you, "She always seemed to have a finger in every pie."

The residents of San Pedro owe Mrs. Pomerville a debt of gratitude for her constant work for the betterment of our community. Her lifelong dedication and generosity serve as a worthy example for all to follow. My wife, Lee, joins me in extending to Mrs. Pomerville the warmest best wishes for the future. We know that San Pedro can count on many more years of her valuable and inspiring presence.●

THE IMPORTANCE OF MINING

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RHODES. Mr. Speaker, the American Mining Congress recently held an international mining show in Las Vegas, which was attended by 30,000 representatives of the mining industry. It was an impressive display of the latest in technology.

In these times, when apparently many Americans are unaware of the vital role mining plays in maintaining an expanding economy, a column by Las Vegas Sun publisher Hank Greenspun about taking metals from the earth is particularly apt. Hank Greenspun is one of the best known editors and publishers in the West. He is an old friend of many years standing. I thought this column, "Where I Stand," was particularly good, and should be shared by my colleagues in the Congress.

I urge them to take the time to read this reminder that resources are beneficial only when used, and that the extractive industries are still the bedrock of our industrialized economy.

WHERE I STAND

Text of the column is as follows:

(By Hank Greenspun)

Civilization demands that a moral equivalent be found to the environmentalists who insist the good earth must remain forever undisturbed.

The vast treasures of the earth have no value until and unless they are brought above the surface to benefit mankind.

The billions of tons of coal deposits cannot warm one child in the home until it is mined and delivered to the stove to fuel the fires of warmth and good feeling.

The sparkling beauty of the world's precious diamonds would have no radiance if left in the carbon state below the surface of the earth.

The resources of the earth are there to help humankind progress, and it would be a cold world indeed if it never saw the light of day.

So it is with sincere and solemn recognition of the good these people do that we welcome the American Mining Congress to Las Vegas for their annual convention and showing of the marvelous tools which are employed in bringing forth the earth's treasures.

And what more fitting place than Las Vegas for a conclave of mining men?

Silver, gold and other precious metals have formed the basis for one of Nevada's foremost industries from the time the "'49ers" headed for the California gold rush and found the Nevada hills also yielded veins of rich ore. They stopped at Tonopah, Goldfield, Manhattan, Searchlight, Bullfrog and Rhyolite and dug the precious ores from the ground.

Some of the most fabulous strikes in the history of mining were made in Nevada. And it has long been held that San Francisco was built on the riches taken from the earth of Virginia City, Gold Hill, Silver City and environs.

The state was born during the Civil War because the Union needed the silver and gold from the mines of Nevada to preserve it. Our hills are dotted with old tunnels, claim monuments, rusted equipment and prospectors' cabins.

Today there are mines still producing, only it is a far cry from those early times when the high-grade ore was practically on top of the ground and easy to procure.

It takes much more sophisticated equipment to locate the valuable minerals and extract them from Mother Earth's bosom.

It requires the kind of advanced technology and materials that are on display at the American Mining Congress at the Convention Center.

Comparing the old mine on Potosi Mountain to a modern operation like Blue Diamond is a good analogy when we think of the Convention Center as it was in 1960, when the first American Mining Congress gathered here.

Today's convention facilities are almost unrecognizable alongside the old. About all that remains to remind us of the small meeting places 20 years ago is the giant dome.

As I look back, I recall writing about the Mining Congress during their first Las Vegas visit exactly 18 years ago. I urged parents to take their children out to see the modern equipment on display in the outside areas. I doubt if it applies today because everything is dwarfed in comparison.

When I was a lad back in New Haven, living next to a large contracting firm, men with shovels did the work and it would take thousands of men with thousands of shovels thousands of hours to do the amount of work one of these machines can do in a day with the push of a button.

We plan to bring to our readers as complete coverage of the prestigious convention as writing skills and photography make possible.

Eighteen years ago the Mining Congress gathering was preceded by a week with a demonstration of weapons and fire power at Nellis Air Force Base.

It is faintly ironical that recently we saw what could happen if somebody pushed a button and started an all-out war. We watched bombs laid with deadly accuracy on targets as planes zipped through the air with incredible speeds. Thousands of persons were awed by the thought of what could happen, yet comforted in some measure that our government was making every effort to protect us from potential attackers.

The Mining Congress is a more pleasant and comforting matter. Here we look only to the future and progress—to new methods of production; and with high hopes that something on display at the Convention Center might be an aid to revitalizing the mining industry of Nevada, and to bring forth the earth's precious resources to benefit all humankind and again make us proud of our Nevada mining heritage.●

EXPLANATION

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BINGHAM. Mr. Speaker, during the past several months, I was forced to miss several rollcall votes due to illness and other matters. I was recorded paired "for" or "against" on six votes. As to the remainder, I wish to record here what my position would have been had I been present and voting.

Rollcall No. 63, a motion to pass H.R. 9370, for the development of aquaculexecutive agencies, "aye."

Rollcall No. 216, a motion to pass H.R. 3161, an amendment to title 5 of the United States Code to improve basic workweek for firefighting personnel of executive agencies, "aye."

Rollcalls No. 258, 337, 399, 402, 613, and 615, motions for House to resolve into Committee of the Whole, "aye."

Rollcall No. 259, a motion to pass H.R. 11302, to authorize appropirations for environmental research developments and demonstrations for fiscal year 1979, "aye."

Rollcall No. 260, a motion to pass House Joint Resolution 859, making supplemental appropriations for U.S. Railway Association for fiscal year ending September 30, 1978, "aye."

Rollcall No. 311, motion to suspend the rules and pass H.R. 11209, to provide for the establishment, ownership, operation and governmental oversight and regulation of international maritime telecommunications services, "aye."

Rollcall No. 401, an amendment to H.R. 12157, the Export-Import Bank Act of 1945, seeking to permit the Bank to guarantee, insure, or extend credit to South Africa as long as it also extends credit to or is authorized to extend credit to Communist countries, "nay."

Rollcall No. 459, a motion to pass H.R. 12935, making appropriations for the legislative branch for fiscal year ending September 1979, "aye."

Rollcall No. 519, a motion to suspend the rules and pass House Joint Resolution 613, amended to authorize and request the President to issue annually a proclamation designating the first Sunday of September, after Labor Day of each year as National Grandparents Day, "aye."

Rollcall No. 520, a motion to suspend the rules and pass House Joint Resolution 1007, amended to authorize the President to proclaim a week during the first 10 days of May of 1979 as Asian Pacific American Heritage Week, "aye."

Rollcall No. 521, a motion to suspend the rules and pass House Joint Resolution 773, to authorize and request the President of the United States to issue a

proclamation designating the 7 calendar days beginning September 17, 1978, as "National Port Week," "aye."

Rollcall No. 522, a motion to suspend the rules and pass H.R. 13087, to authorize the issuance of substitute Treasury checks without undertakings of indemnity, except as the Secretary of Treasury may require, "aye."

Rollcall No. 523, a motion to suspend the rules and pass H.R. 12106, amended to amend the Independent Safety Board Act of 1974 to authorize additional appropriations, "aye."

Rollcall No. 617, an amendment to H.R. 12432, that prohibits use of funds by the Commission on Civil Rights to influence the passage or defeat of legislation before Congress or State legislatures, except when the committee is requested to give an opinion, "aye."

Rollcall No. 662, an amendment to H.R. 13635, the defense appropriation bill, seeking to reduce appropriations not required by law by 2 percent, "aye."

Rollcall No. 750, an amendment seeking to permit the FBI to place 140 positions in GS 16–18 without regard to provisions placing the limitations on executive level positions, "nay."●

A TRIBUTE TO WHITFORD B. "WHIT" CARTER

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. ROUSSELOT. Mr. Speaker, during these final hours of the 95th Congress, my thoughts reflect not only on the proceedings of this august House but also on the many people who through the quality of their character and the impartation of their learning, wisdom, and devine inspiration have exerted an affirmative influence over the minds and acts of others. Our Nation is richly blest by those whose devotion to God and allegiance to the United States of America has been made manifest in their willingness to work with dedication and fervor for the well being of our society. One such person was our former colleague in the U.S. House of Representatives. The Honorable William M. Ketchum of Bakersfield, who served the people of California first in the State legislature and then in the Federal Government representing the 18th Congressional District a portion of which, Antelope Valley, had been in my own congressional district.

Bill Ketchum passed away in June and, as the Members of this House know, the 18th Congressional District has not had the representation of a Congressman since that time—the seat having to remain open until the coming November elections. In September a constituent of Bill's passed away, Whitford B. "Whit" Carter. Whit, a man of excellent character and civic virtue, was a resident of Lancaster, Calif., for over 50 years. Whit and Bill knew each other well and I like to think that they are continuing their friendship throughout eternity. I am saddened by the knowledge that we will no longer be able to share the companionship and leadership of these two men who contributed so much to the betterment of their communities, the State of California and the entire country. Along with their many friends, I will feel a deep sense of loss but will take comfort in knowing that the good they imparted will be of lasting value to the citizens whom they both served so faithfully.

When the House of Representatives reconvenes for the 96th Congress, it will be difficult to conceive as real the fact that neither BILL nor WHIT will be around. I have been elected to fill the vacancy created by BILL's passing on the House Committee on Ways and Means and I shall be acutely conscious and frequently reminded of his position on tax legislation and mindful of the strong stand he took to preserve individual liberty and economic freedom for all Americans. I will be reminded of WHIT CARTER's many trips to Washington and his persistent efforts to assure that there be sufficient funds appropriated to provide adequate protection for California's magnificient forest lands. In the performance of my duties as a Member of Congress, I shall think about Lola Ketchum and Dorothy Carter and the loving support they gave these ambitious, determined men and shall hope that they will find some contentment in seeing the further unfoldment of the individual and shared ideals of their husbands.

Mr. Speaker, I believe that had BILL KETCHUM had the opportunity he would have liked to have shared with his colleagues some of the story of WHIT CARTER, rugged individualist, sports enthusiast, civic leader, entrepreneur, successful businessman, father, grandfather and beloved pioneer in Antelope Valley, Calif. The following is an article by Bill Gillis which appeared in the Antelope Valley Press entitled, "End of an Era," along with an editorial in the same paper which describes the numerous activities of Antelope Valley's prominent citizen.

WHIT CARTER, AV'S PRIME CIVIC LEADER

Whit Carter, whose funeral will be held tomorrow, will go down in the history of Antelope Valley as this area's prime civil leader.

Between the mid-1920s when he arrived in Lancaster and his death at the age of 75 last Thursday, his contributions were enormous, not only on the local level but in Southern California and throughout the state.

He served on the State Board of Forestry for 16 years, most of the time as chairman. He was the chairman of the Watershed Fire Council of Southern California, the Fire Prevention and Suppression Subcommittee of the Los Angeles Chamber of Commerce, executive vice-chairman of the Conservation Association of Southern California, a member of the executive committee of the Water Coordinating Conference, and a member of the Los Angeles County Watershed Commission.

His interests were diverse. He was a lifetime lover of sports, chairman of the Amateur Athletic Union, and, indeed, continued to do play-by-play radio broadcasts long after most men feel they have reached retirement age.

He was personally involved with forestry, conservation, water, farming, fire-fighting, and a host of civic betterment activities.

It was his pride that all the years he was the Fair Parade starter, the parade always started right on time. In 1977, he was honored in that parade as Grand Marshal.

He poured time, effort, and money into the community throughout his lifetime. He took great pride in helping many generations of young people as they advanced through athletic and academic endeavors. The arena on his ranch has been the location of scores of youth equestrian activities.

He was a charter member of the Benevolent and Protective Order of Elks Lodge in Lancaster and throughout his more than half century in the community he was benevolent and protective.

Lancaster and Antelope Valley have lost their greatest champion, but his accomplishments still stand and today's and future generations will continue to enjoy a better quality of life because of the contribution by Whit Carter.

WHIT CARTER SERVED IN MANY WAYS

(By Bill Gillis)

End of an Era:

There are some of the opinion Whitford B. (Whit) Carter founded Lancaster. That wasn't quite the case. It just seemed that way.

Hospitalized since Aug. 30, Whit succumbed in the Antelope Valley Medical Center Thursday afternoon.

Whit permanently settled in Lancaster in 1924 and his presence was to be impacted through the years.

If he didn't found Lancaster, at least he guided the community through its early years of infancy, including incorporation last November. Business was transacted in his basement office on Lancaster Boulevard.

Never a limelight-seeker, Whit disdained publicity to the extent he was never president of the Lancaster Chamber of Commerce, the Antelope Valley Board of Trade or other prestigious civic groups. He was content to maintain his behind-the-scenes role.

Almost forgotten is that Whit was vitally instrumental in the founding of the 50th Agricultural District Assn., the Antelope Valley Fair, though he never served as a director.

It was largely through his efforts legislation was enacted to create the district, thus qualifying it for state funds.

That was on Sept. 13, 1941, and his death came 37 years later—almost to the day.

From its inception, he was the "starter" for the Antelope Valley Fair Parade, last year rightfully recognized for his efforts by being named the grand marshal.

His accomplishments are numerous: founder of the Valley's first radio station KAVL, founder and first chairman of the Antelope Valley Red Cross and charter member of the Lancaster Elks Lodge, just to list several.

On a state-wide basis, for 16 years he served as a member of the California Board of Forestry, 10 years as chairman, and was a frequent visitor to Sacramento where he expounded on the virtues of Antelope Valley.

He was more renowned in the hallowed chambers of the State Capitol than some of the elected legislators.

At home, though, he continued to maintan his cloak of anonymity to the extent relative newcomers to the Valley probably weren't even aware of his existence.

Whit's passing leaves an irreplaceable void.

Resident of the Valley, and particularly Lancaster, can be grateful that more than a half century ago—in 1924—Whitford B. Carter migrated West from his native Oshkosh, Wis., and settled in the Mojave Desert.●

PRIVATE RELIEF BILL FOR ERNEST BRACE—AN AMERICAN POW HERO

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BAUCUS. The trauma of the Vietnam war is fast receding from public memory. However, many unhealed scars from that conflict remain. I am taking this opportunity to introduce this evening private bills that deal with the suffering of one forgotten Vietnam casualty, Mr. Ernest C. Brace. Mr. Brace is a former Marine Corps officer whom the North Vietnamese captured in 1965 while working as a civilian pilot for a contractor under the U.S. AID program. Mr. Brace spent the next 3 years chained to a small bamboo cage, frequently in solitary confinement, in various jungle camps. Three brief escape attempts redoubled the efforts of his captors to break him. They placed Mr. Brace in a hole and filled it with dirt up to his neck. He endured this torture for extended periods, and consequently, could not walk for 2 years.

The North Vietnamese transferred Mr. Brace to Hanoi where he clandestinely contacted other prisoners of war. Senior American ranking officers designated him as an officer in charge of communications, and his work in training other prisoners in methods of resistance was invaluable. He received the same treatment as the military prisoners, and his courage and guidance earned him the respect of his imprisoned colleagues. After almost 8 years as a POW, in March of 1973, the North Vietnamese released him.

Mr. Brace had previously served nearly 13 years in the Marine Corps, when he was discharged in 1961. Although there may be serious questions concerning his original discharge from the Marines, I believe those circumstances should have no bearing on my request. Accordingly, I am asking Congress to consider and review two alternative private relief measures to provide compensation for the time Mr. Brace served as a POW. Briefly, one bill requires the U.S. Government to pay in lump sum the difference between the amount of money he actually received from his employer for the period of his captivity and the amount that he would have otherwise earned during that same period. The second bill allows the time that he served as a prisoner to be considered as active military service with full entitlement to military benefits.

The War Claims Act of 1948 serves as the precedent for the first bill. After the Japanese invaded Wake Island, they interned several civilian contract employees, and, consequently, Congress bestowed certain benefits, similar to the present proposal, upon these POW's. Mr. Brace deserves consideration of this option by the Congress.

The second bill confronts the consistent refusal by the Veterans Affairs Committee to allow any public legislation granting civilian claims for "time in service" for involuntary detention of civilians by hostile powers. For example, during the 93d Congress, Congresswoman Patsy Mink introduced H.R. 4393, a bill to allow such claims, but it died in committee. In light of this obstacle, Mr. Brace has no choice but to seek a private bill. Therefore, I ask my colleagues to reflect on his long POW status and exemplary behavior and to enable his imprisonment by the North Vietnamese to be considered as active military service.

Let me again stress that these proposals are alternative bills and not a package.

Several of Mr. Brace's colleagues not only praise his attitude and behavior during his internment, but also fully support his efforts toward reinstatement. For example, former POW Maj. Norbert A. Gotner in a May 1, 1973 letter to the Commandant of the Marine Corps wrote:

When I first met Mr. Brace, I was in very bad shape, both physically and mentally . . . It was the outstanding examples of courage, faith and patriotism disp'ayed by Mr. Brace that were responsible for "bringing me over the hump," so to speak, and resulting in my return to the United States. Mr. Brace, at the risk of his own well-being, would defy the NVA guards to their faces to help me. His ingenuity at devising methods to contact me and to share his faith in America completely baffled the guards . . . I realized that it was not only me that owed so much to Mr. Brace.

Major Gotner prefaces his letter by saying:

"I believe that Mr. Brace would make an outstanding contribution to the U.S. Marine Corps and I highly recommend him for immediate reinstatement, even if it calls for exceptions to any regulations."

Ten days later, Captain William P. Lawrence, former POW commander of Mr. Brace, wrote to Commandant Cushman that:

"Ernest Brace made an immeasurable contribution to our country while he was a prisoner. His example of courage and bravery was a great inspiration to us all. I would be proud to serve with him in any capacity and would particularly welcome him under my command.

"I feel it is only fitting that our Government reward Ernest Brace for the great service and sacrifice which he has made."

In addition, the Department of Defense awarded Mr. Brace the Defense Medal for Distinguished Public Service on June 27, 1978. This award, the highest that DOD can bestow upon a civilian, made the following declaration:

ERNEST C. BRACE

For distinguished public service while a Prisoner of War during nearly an eight-year period from 21 May 1965 to 28 March 1973. Employed as a civilian contract pilot in support of our Government's objectives in Southeast Asia, Mr. Brace escaped from his communist captors a total of three times prior to September 1966. After each escape, the rigors of his confinement were increased. In October 1966 he was taken to the citadel prison in Hanoi in such poor physical condition that he was unable to walk. There he lived in isolation as a high risk prisoner, eventually establishing clandestine communication with the American leadership in that prison. Although a civilian and not technically bound by the Military Code of Conduct, by his own aggressive example he was a continual force for the strengthening of the Americans' adherence to that Code. Despite the atmosphere of enemy harassment and brutal treatment, he continued to establish and maintain communications through many unusual and ingenious methods, which resulted in American and Allied prisoners presenting a posture of increased resistance to the enemy's wishes and at the same time improving prisoner morale. His ceaseless efforts in the extremely adverse conditions of the communist prisons of Southeast Asia demonstrated his professional competence, unwaivering devotion and loyalty to his country. Despite the harsh treatment throughout his long years of incarceration Mr. Brace's patriotism, determination and faith in his country are a tribute to the principles that made our Nation great and are worthy of the highest praise and recognition. I take great pleasure in awarding Mr. Ernest C. Brace the Department of Defense Medal for Distinguished Public Service.

HAROLD BROWN,
Secretary of Defense.

FEBRUARY 15, 1978.

Adjournment is just a few hours away; therefore, I cannot expect immediate action on these bills. However, by introducing them, I am proud to acquaint my colleagues with a man who displayed extraordinarily courageous and patriotic conduct under the severest wartime conditions. His actions should stir our pride, and at the very least, the private bills for Mr. Ernest Brace deserve a considerable and thorough review by the 96th Congress.

I wish to end by reciting a poem written in 1967 by Ernest Brace when he was imprisoned in a lonely bamboo cage in the heart of a tropical jungle in Southeast Asia.

PRISONER IN A CAGE

I'm just a prisoner in a cage
I have no name, I have no age
The guards, they don't know what I've done
All they know is I'm a captured one.
They captured me in '65
And I guess its lucky I'm still alive
For I've tried to escape three times in all
And I'd go the fourth, but I'd have to crawl.
They buried me once for seven days
And that was supposed to mend my ways
But I still have this urge to try, you see
Only now I don't have the legs to carry me.
My feet are in stocks, my neck's tied to a pole
What food I get is shoved in through a hole
At night I lie down and my hands are tied
And the rope is stretched to a post outside.
Now I've been sick and almost died
And I've had to crawl to get outside
I wasn't helped in any way at all
In fact I was beaten while held against the wall.
But I'll leave here alive, I know that now
But I don't know when and I don't know how
And I'll see my family once again
But I don't know where, and I don't know when.●

THE SECRET OF MEXICO'S BIG LEAGUE OIL TROVE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McDONALD. Mr. Speaker, the so-called "energy crisis" continues to roll on

with a life whose length cannot be predicted. The doomsayers in the Carter administration and across the country continue to speak of the dire need for conservation, controls, and more Government regulation. However, the world is still far from being out of oil. Columnist William Safire recently let one of the cats out of the bag, namely that Mexico is sitting on a huge pool of oil. This fact has been well known by certain persons in our Government as well as by certain Mexicans, but the lid of secrecy has been on till now. Therefore, I commend his column to the attention of my colleagues. The item appeared in the Washington Star on October 6, 1978. See also my "Special Order on Energy" which appears in the CONGRESSIONAL RECORD of today. The article follows:

THE SECRET OF MEXICO'S BIG LEAGUE OIL TROVE

(By William Safire)

MEXICO CITY.—They called themselves "the guardians of the secret." They were the ultranationalistic group of engineers, geologists, labor union leaders and businessmen who threw the U.S. oil companies out of Mexico in 1938, and—for nearly four decades—kept their secret not only from the world, but from most of Mexico's politicians.

The secret was that Mexico sits on an enormous, largely unexplored sea of oil. The reason for hiding this fact was the fear that a weak Mexican government would fall prey to predatory capitalists and a domineering neighbor to the north.

After the Arab oil embargo, and after the shah of Iran quadrupled the world price of oil, the then-president of Mexico, left-leaning Luis Echeverria, continued to keep the secret: He did not want to disturb the Third World's oil leverage on the West by revealing the potential of a huge supply of oil in North America.

Mexico's new president, political philosopher Jose Lopez Portillo, tells me he was let in on the secret during his campaign for the presidency in 1976. (The "campaign" consists of one candidate rushing furiously around the country for two months, as if he needed every vote. An exhausting enterprise, it is relieved only by the knowledge that he is unopposed.)

Since Lopez Portillo had been finance minister for eight months in a regime that desperately needed foreign credit, the fact that he had been kept in the dark by "the guardians" illustrates how worried the ultranationalists were that Lopez Portillo might be the sort to make the decision for oil development.

The new Mexican president has broken the secret with a vengeance. In his state of the union report last month he reported proven reserves of 20 billion barrels, probable reserves at an additional 37 billion barrels, and possible reserves at 200 billion barrel. That's in Saudi Arabia's league, a responsible U.S. official terms the startling figure as "likely to be on the conservative side."

The Carter administration has known of the Mexican oil potential since its inception. Although CIA projections were discredited when that agency began to provide the White House with whatever energy figures it wanted to hear, Atlantic-Richfield intelligence sources were known to be on target. But the Mexican resources were seldom discussed, for one good reason and one bad reason.

The good reason was that Energy Secretary James Schlesinger wanted to dicker for a fair price for Mexican natural gas, the first energy to be available in quantity. The U.S. wanted to pay a rate similar to our Canadian purchases; Mexico wanted us to pay what we paid for energy from Indonesia, giving Mexico a windfall profit on the savings on transportation. To Mexico's detriment, the deal fell through.

The bad reason was that the Carter administration wanted to sell the notion that the nation faced an energy "crisis" and downplayed the reality of a huge reservoir of oil on this continent in order to further its legislative goals.

Now that the need for the Carter sky-is-falling propaganda is over, and now that the Mexicans have learned the U.S. will not pay exorbitant prices to import energy across the Rio Grande, we come to the central issue: Will Mexico become a major source of U.S. energy in the '80s?

Logic dictates that it must. The old fears of the "guardians of the secret" that politicians or foreigners would rape Mexican resources is meaningless today. Oil brings lofty prices, the profits stay in Mexico, and if the wells run dry in 50 years, that's no big deal—the world will then be running on solar energy, and Mexico is up to its sombrero in sunshine.

With 14 million inhabitants, Mexico City unhappily is becoming even larger than Tokyo. The overcrowding and lack of opportunity has driven some 8 million Mexican illegals across the U.S. border. Mexico needs oil money now, but quickly, to invest in itself massively, as Iran did—but without Iran's need for military buildup. Only the most foolish and stubborn pride would keep Mexico from turning to the U.S. as its major market.

Lopez Portillo—though fierce about independence from yankee domination—strikes me as neither foolish nor stubborn. One litmus test of future cooperation would be Mexican membership in OPEC. The U.S. hopes Mexico, unlike Venezuela will stay out; that would help undermine cartel power. For its part, Mexico does not want to give up its own production independence to the cartel.

Asked about membership in OPEC, the Mexican president goes into a philosophical discussion of the differences in economic history between his country and other oil-producing nations.

The bottom line, I think, is that he plans to stay out, which is good for both Mexico and the U.S.

The time is right for an economic demarche on a strictly business basis. The pressure is on both Mexico and the U.S. to make a massive deal soon—and that's no secret.●

PLO DEDICATED TO UNDERMINING CAMP DAVID PEACE INITIATIVE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. LEHMAN. Mr. Speaker, Steve Hilmes, 31, an American bomb disposal expert working with the Israeli police, was badly wounded on September 5 when a terrorist bomb exploded as he approached it at a gas station in Jerusalem. The PLO in Beirut claimed credit for the bombing.

I was recently informed that Steve Hilmes died of his injuries suffered during that terrorist incident.

A Vietnam veteran and ex-U.S. policeman, Steve Hilmes had successfully dismantled 25 bombs for the Jerusalem bomb squad over the last year and had earned a reputation as one of the most capable and dedicated bomb disposal experts in Israel. He was one of the many Americans who have gone to Israel as private citizens to help that small and beleaguered nation.

Ever since the Camp David summit was announced, terrorist incidents in Israel, especially in Jerusalem, have increased. On the same day as the bomb which killed Steve Hilmes, another bomb went off in an unoccupied tour bus. The previous week a bomb was detonated at the Education Office in Nablus and at a waterworks plant in Jerusalem cutting off water in several quarters of the city.

Let us not forget during these times of renewed hopes for peace in the Middle East that the PLO is determined to undermine the Camp David peace momentum—both by increasing terrorism against innocent civilians and by its dirty work in Lebanon during the recently intensified fighting there. We cannot recognize the PLO terrorists as the true representatives of the Palestinian people. The "legitimate rights" of the Palestinian people will be traded in by the PLO for any chance to maim and kill yet another innocent victim.

In an interview with the Jerusalem Post, published only 4 days before the blast in which he was fatally wounded, Hilmes explained about his work—the day-to-day job of coping with an Arab terror campaign directed against Israels' civilian population.

The story of Steve Hilmes which follows is a story of outstanding courage in the face of insidious Arab terrorism:

FUMBLES ARE FATAL

(By David Richardson)

On Friday, August 25, the Jerusalem Police Operations Room received 141 reports of suspicious objects. One turned out to be a real bomb. This device, which had been attached to the chassis of a taxi parked outside the Ras al-Amud police station on the Mount of Olives, was safely dismantled by a bomb disposal expert, Steve A., a former American. The lanky Vietnam veteran and ex-U.S. policeman has been with the Jerusalem bomb squad for a year and in that time has earned a name as one of the most capable and dedicated sappers in the country.

The police in general, and particularly in Jerusalem, have had to deal with a wave of attempted bombings ever since the Camp David Summit was announced. Fridays, like the eves of festivals and national occasions, are peak days for the bomb squad. Apart from the normal pressures of the job, the men are confronted with a tremendous number of reports and this constitutes an additional burden.

"It doesn't matter that the majority of the items we examine turn out to be harmless. We have to treat each case as if it were a real bomb. You can't afford to relax," said Steve.

He examined nearly 40 suspicious objects and parcels in the course of last Friday morning's shift, starting with the real bomb on the Mount of Olives. The radio in his jeep crackled constantly with reports of suspicious objects and requests by patrolmen that the "professional" personally examine a suitcase, an abandoned car, a watermelon.

The normal procedure on receiving a report is for a patrol car to be dispatched to carry out a cursory examination and keep people out of the area if necessary. In this way the operations room can establish some kind of priority and dispatch the sapper to the place where he is needed most urgently.

"Our job is to dismantle the bomb or detonate it safely, or, if it cannot be moved, try and isolate the blast," said Steve. Gen-

erally there is very little time left by the time he arrives, since the terrorists aim to kill or incapacitate the sappers if possible.

The bomb disposal men are also expected to minimize damage, since the police have to compensate the public. In other words, while it may be quicker to smash the windscreen of a car; the sapper is expected to try and force the lock of the door.

Another of the pressures comes from the laboratory experts, who want a bomb to be kept intact if possible so that they can analyse it for clues and so that other men in the squad can study it.

Steve, who has been in this country since early 1973, volunteered for the bomb squad "because my job as a patrolman wasn't helping people in Israel or myself. What drew me to bomb disposal was not only the excitement and the challenge—and certainly not the money—but a feeling that I'm better qualified for this job than others are. It's difficult to explain, but my basic urge is to help people. I suppose you could call it a kind of Zionism."

Since he has been in Jerusalem, he has dealt with around 25 bombs ("I try not to keep count, because more veteran sappers who kept a tally began to get scared and quit earlier than necessary"), two of which went off while he was dealing with them. Luckily in each case he was using protective equipment and was not injured.

"The shock is tremendous—you just don't believe it's happening and despite all your training and experience you are surprised at the blast," he said.

In an aside about the equipment they use, most of which is classified, Steve said that the bomb squad, like the entire police force, suffers from a lack of resources. "Nevertheless, compared to other police forces, we have benefited by our experience," he added.

Like other men in his profession, Steve feels that his most important tools are good training and constant retraining, as well as a highly developed sixth sense which comes from experience. Some of the experts he works with can even smell and taste certain kinds of explosives.

"Of course I'm scared," he answered in reply to the obvious question. "If I wasn't, I'd be a nut. On my way to the bomb I try not to think about it, I think about a thousand different things, but not the bomb. While I'm busy with it I don't have time to think of anything. It's only afterwards that you begin to realize what might have happened."

He admits that, since he is not a family man, he is relieved of some of the worry that haunts many of his colleagues; but he is also helped by a mixture of fatalism and belief in God.

"If your name is on a bomb, that's it. And you have to believe in something apart from yourself, although I'm not religious in the strict sense," he said.

What disappoints him is the attitude of the public. Recently, a volunteer association announced that it would give money awards for reporting bombs.

"Reporting a suspicious object is in your own basic interest and the money could be much better spent in buying equipment for the police," he added.

He was particularly incensed at people who knowingly send in false alarms, and said that many of these come from the ultra-Orthodox Mea Shearim quarter.

"Even if we know from experience that it's a false alarm, we have to go and check and sort through the rubbish and filth while they stand around and laugh at us."

How can the public help?

"The public are our eyes and ears and without them there would be many more tragedies. I'd rather run a hundred times a day and find nothing than not run and come to pick up the pieces. My salary is not on a commission basis."

A bomb can be disguised in a thousand different ways, from a coffee tin to a watermelon, from a bundle of rags that have been treated with plastic explosive to a load of bread or a tray of eggs.

"Don't be bashful," said Steve. "Call us for anything, because the terrorists are becoming increasingly sophisticated and increasingly devious."

By "us" he means the police number 100 on any exchange in the country.

They use home-made explosives, military and commercial explosives that are stolen from stores or quarries, and shells, mines, mortars and grenades that are smuggled in or found on military ranges, or were perhaps abandoned in the various wars.

One of the most difficult things to manufacture on your own are detonators, but the countries that aid the terrorists have a sufficiently developed industrial base for this. Detonators are by nature quite small; they can be concealed and smuggled into the country without very much difficulty.

The ticking of a timepiece that gave bombs away not so long ago is also no longer a reliable guide in this age of electronic timing devices, silicone chips and semi-conductors.

If an object arouses your suspicion, Steve warns, don't touch it at any cost. It may be booby-trapped and today there are detonators that can be triggered by the slightest tremble. If you can, describe the object in your report to the police. This description can help the sapper to anticipate what he is likely to find, and this is all-important in a job that is, in essence, a race against time.

If you find the suspicious object in a field, surround it with stones; if in a built-up area, keep people away. This is crucial, since the terrorists are increasingly adopting the tactic of placing two or more bombs close together and timed to go off one after the other because they expect a crowd to gather.

Another very important thing is for drivers to clear the way. "Nothing is more frustrating than to sit in a traffic jam or to have to weave between vehicles that ignore your siren."

This frustration or irritation can also be very dangerous, since essential qualities for the work are calm and level-headedness. "You can do nothing recklessly," says Steve. That way lies disaster.

Two Seriously Injured in One of Two Bombings in Jerusalem

(By David Richardson)

Two men, including a police bomb disposal expert, were seriously injured yesterday when one of two terrorist bombs exploded in Jerusalem. The sapper, Steve Hilmes, 31, was reported in critical condition last night.

Also seriously injured was Mordechai Baron, 48, of Jerusalem. No one was hurt in the second bombing explosion.

The explosions took place despite strict security procedures and a general security alert that has been ordered following fears of a stepped-up campaign by Palestinian terror organizations because of the Camp David summit.

In Beirut, a communique issued by the Palestine Liberation Organization claimed responsibility for both explosions and said that they were part of "stepping up" the armed "struggle" against the Jewish state.

Police detained some 15 suspects rounded up in the areas of the blasts.

The first explosion, in which the two men were injured, took place at 9:25 a.m. at a gas storage depot on Derech Beit Lehem in Jerusalem's Baka quarter. An Arab worker in the depot discovered a suspicious looking object under an old car door which formed part of the depot fence. Close to the door was a semi-trailer loaded with balloons of domestic cooking gas.

The worker immediately reported the object to the depot manager, Baron, who called the police. Baron warned police that should there be a blast, it might trigger a much larger explosion because of the gas tanks and an adjacent petrol station.

A police jeep arrived within eight minutes. Hilmes accompanied Baron to the object which looked like a transistor radio wrapped in rags. As the two approached it, the bomb exploded, immediately—according to eyewitnesses—sheering off one of the sapper's legs and seriously damaging the other leg as well as an arm and an eye. Baron suffered burns and his condition at Hadassah Hospital last night was described as "serious but out of danger." The Arab worker who discovered the bomb was still being treated for shock late yesterday afternoon.

Police described the bomb as "not large, but a standard sabotage device—not homemade."

Hilmes, who is hospitalized at Shaare Zedek, was interviewed for a magazine article in last Friday's *Jerusalem Post*. The former American and Vietnam war veteran—where he was also wounded—came on aliya in early 1973 and volunteered for the bomb squad "because my basic urge is to help people and I'm perhaps better qualified for this job than others." Hilmes, who is apparently an orphan with a step-mother in Los Angeles, was also for some time an undercover narcotics agent for the Federal Bureau of Investigation.

Colleagues and commanders in the Jerusalem police described him as extremely and perhaps dangerously dedicated—"he always put the citizens of Jerusalem (where he has been working for about a year) before himself." Like most explosives experts he coped with the constant pressure he was exposed to by developing a kind of fatalism. In his interview with *The Post* he constantly recalled two colleagues killed over a year ago while dealing with a bomb and said how lucky it was, in a sense, that he had no family.

An eye-witness, Meir Eindor (former commander of the Border Police Yeshiva in Hebron), said he heard the explosion and ran to the scene to find people standing around doing nothing for the injured men. He approached Hilmes, who whispered in his confusion that "there's a bomb," trying to warn him. After trying to stop the bleeding, Eindor and other passers-by placed Hilmes on a stretcher and loaded him on a tender. Opposite the Moriah Hotel Hilmes was transferred to an ambulance which took him to Shaare Zedek.

Eindor recalled: "On the way he kept on groaning 'my legs, there's fire on my legs.'" His entire body and his face were blackened by the blast, said Eindor. At the hospital he underwent a series of operations lasting until after 6 p.m. yesterday.

At 12:37 p.m. another bomb went off in an empty bus parked near the Jaffa-Gate outside the Old City. The bus, belonging to United Tours, was one of three carrying members of the International Federation of Travel Writers currently visiting Israel. Members of the group were walking in the Via Dolorosa when the blast occurred. Most of them only learned about the blast later at a luncheon at the Jerusalem Plaza Hotel.

The bomb had been placed inside the petrol intake at the rear of the bus. It exploded about 10 minutes after the driver left the bus. The bus was damaged, but there was no damage to the personal effects of the passengers.

Security has been further stepped up in Jerusalem and other cities following the attacks. Special army and border police units trained in dealing with sabotage have been stationed in Jerusalem.

This brings the number of terrorist attacks in Israel and the administered territories over the past month to 25. This is the highest monthly total since the attacks started in Israel and follows fears that the terror or-

ganizations would increase their activities before and during Camp David.

Slogans protesting the Camp David talks and denouncing Egyptian President Sadat were daubed on walls of certain West Bank villages last night.

Police again stressed that the public's vigilance is crucial in effectively combating terror attempts. They emphasized that time is of major importance and urged people not to delay reporting suspicious objects and on no account to touch the object.●

LEGAL SERVICES CORPORATION

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. IRELAND. Mr. Speaker, many of us have had complaints from our constituents about the activities of representatives of the Legal Services Corporation.

I would like to take a moment to share with you an all too typical example of the type of problem that many of my constituents have been encountering.

Thank you, Mr. Speaker.

EWELL INDUSTRIES, INC.,
Lakeland, Fla., September 22, 1978.

Hon. ANDY IRELAND,
Longworth House Office Building, Washington, D.C.

DEAR CONGRESSMAN IRELAND: We recently erected a ready mix batch plant at Sebring, Highlands County, Florida, as outlined in my letter to you on August 18, 1978. Prior to erecting the plant, we met with city officials to check out zoning regulations and to secure the proper permitting from the city and county officials. We secured all necessary city and county permits and located our plant on a parcel of land that has been zoned industrial since 1940. We also were required to go before the zoning board due to a height limitation, which we did and received approval.

Suddenly, the City of Sebring and ourselves were named in a suit stating that the plant was illegally erected. One neighbor four blocks away had engaged the services of Mr. Garry G. Geffert of the Florida Rural Legal Services, Inc., in Wauchula, Florida. Mr. Geffert had some of his staff going door-to-door in the neighborhood getting signatures on a petition for removal of the batch plant.

I am sure there are many needs for Mr. Geffert's services; however, I do not understand the waste of taxpayers' money by taking on a case such as this. This caused the City of Sebring to defend their actions—more taxpayers' money. Ewell had to engage a lawyer and the court had to listen to all this (more taxpayers' money). I was informed yesterday that the court ruled in the favor of the City of Sebring.

In the meantime, Mr. Geffert has gone to the Department of Environmental Regulations in Ft. Myers, Florida, to see what action could be taken against Ewell utilizing the DER (more taxpayers' money). Unfortunately he uncovered a permitting procedure which we were delinquent in filing.

Once again, Mr. Geffert and his staff went through the Sebring neighborhood soliciting letters of complaint to be written to the DER. The DER received approximately seven letters, all apparently typed on the same typewriter, of which only one was from an address across the street from the plant. All the others were from other parts of the neighborhood. Of the seven letters, one of course was from Mr. Geffert. I have enclosed a copy of his letter.

On September 13, 1978, we received a notice from the DER that they intended to issue us the necessary permit that we had previously overlooked as we were in compliance with that department.

To sum all this up, I do not understand the attack on Ewell by the Florida Rural Legal Services which has wasted tax payers' money on the Federal, State and City level of government. It has also caused us considerable time, money and inconvenience. I want to thank you for your time and interest in this matter.

Yours truly,

WILLIAM L. MCCUE,
President.

FLORIDA RURAL LEGAL SERVICES, INC.,
Wauchula, Fla., August 22, 1978.

FLORIDA DEPARTMENT OF ENVIRONMENTAL REGULATION,
2180 West First Street, Suite, 401 Fort Myers, Fla.

Re: Ewell Engineering and Contracting Co., Inc.

GENTLEPERSONS: This office represents John Farley, Mary Mitchell, Oretha Moore, George Broxey, and Rosie Hibler. Each of these persons resides in the community in which Ewell Engineering has erected a concrete batching plant for which it now seeks retroactive approval and a construction permit. Our clients have requested that we submit the following comments in opposition to the granting of a construction or operation permit to Ewell. These comments are intended to supplement those made by any of the named individuals and submitted to DER over their signatures.

I. EWELL HAS FAILED TO COMPLY WITH FLORIDA ADMINISTRATIVE CODE RULE 17–4.03

"Any stationary installation which will reasonably be expected to be a source of pollution shall not be operated, maintained, constructed . . . without an appropriate and currently valid permit issued by the Department. . . . The Department may issue such permit only after it is assured that the installation will not cause pollution in violation of any of the provisions of Chapter 403, FS, or the rules and regulations promulgated thereunder." Fla. Admin. Code Rule 17–4.03.

The method employed by DER to obtain the assurance required by Rule 17–4.03 is the permit procedure described in Rules 17–4.05 and 17–4.07(1). This procedure requires an applicant for a permit to submit detailed information to show the installation proposed will not cause pollution. Fla. Admin. Code Rule 17–4.07(3). A permit may not be issued if adequate controls are not documented by the applicant. Fla. Admin. Code Rule 17–4.07(1).

The term "installation" is defined as "any structure, equipment, facility, or appurtenances thereto, operation or activity which may be a source of pollution." Fla. Admin. Code Rule 17–4.02(3). We submit Ewell has not applied for permits on all installations at its plant cite as required by DER regulation.

In its after-the-fact attempt to comply with the DER regulations, Ewell submitted applications for construction permits for two installations, a cement silo and a fly ash silo. However, these silos are not the only potential sources of pollution from a plant like the one Ewell has constructed and intends to operate. The Air Pollution Manual of the Environmental Protection Agency identifies several additional sources of pollution from a concrete batching plant. These sources include the cement weigh hopper, the elevator, the gathering hopper and the mixer. Apparently, Ewell's weigh hopper is vented through its silos, but provisions for pollution control in the other portions of the plant do not appear in Ewell's construction permit applications.

A particular installation for which no permit application has been submitted is the one which transfers cement from the plant to the trucks. Ewell may have this problem under control, but they have not submitted the written assurances and technical data required by DER regulations.

The public is entitled to comment on applications for construction permits for potential sources of pollution. Fla. Admin. Code Rule 17–2.09. But they cannot comment on applications which do not exist. Therefore, Ewell's application for a construction permit for its plant should be denied until such time as it makes the additional required submissions, and the public has opportunity to comment on them. In making this request, we would call the Department's attention to the fact that any hardship caused Ewell by a continued period of time in which they cannot operate their plant is solely of Ewell's own making. It was Ewell who chose to construct its plant without regard to the permit and public notice requirements of the DER regulations.

II. THE EWELL PLANT WOULD RESULT IN DUST GENERATED BY TRUCK TRAFFIC

The problem of dust generated by the heavy Ewell trucks as they pass through the residential community should not be minimized. There is no curbing in the area in which the plant is located and in which our clients reside. So, each rain washes more loose dirt from yards onto the street to be kicked up as dust by passing trucks.

Our clients, and others in the community, presently suffer from dust generated by trucks from the packing house located across the tracks from the community in which our clients reside. However, it must be remembered that the packing house is a seasonal operation. It is active only seven or eight months per year. Additionally, truck traffic from the packing house decreases toward the end of the season as the fruit becomes less plentiful. On the other hand, Ewell has stated in its applications that it is not seasonal. Therefore, the granting of the requested construction permits would result in a substantial increase in truck generated dust in the residential community for four or five months each year.

Additionally, the period during which traffic from the Ewell plant would markedly increase present levels of dust pollution is the summer. During this time children are not in school and are accustomed to playing near their houses, in their yards, and in the quiet streets of the neighborhood. The dust generated by Ewell trucks during this period would constitute an extra hazard to these children—not to mention the danger from the trucks themselves.

III. OPEN SAND PILES WOULD RESULT IN AIR POLLUTION DURING WIND STORMS

The applications submitted by Ewell show that Ewell intends to stockpile sand in open piles in its plant yard. One of these piles is to be located on the side facing Zephyr Road, which runs between Ewell's plant and the residential community.

Sand, of course, is easily blown about by wind. Violent winds are fairly common in Florida. Such a wind would result in sand from the open stockpiles in Ewell's yard being blown into the residential community, adding to dust problems.

IV. EWELL'S PLANT WOULD RESULT IN AN INCREASE IN NOISE IN THE COMMUNITY

The community in which Ewell intends to operate its plant is a quiet community, especially in the summer. Trains infrequently come down the nearby railroad tracks. The packing house is across the tracks, and is not a loud manufacturing operation. Additionally, as pointed out previously, the packing

house is in operation only seven or eight months out of the year. Trucks go to and from the packing house only when it is in operation.

The Ewell plant, however, is a year round operation. Certainly it would appreciably increase the noise level in the community during the summer. When the plant operates there is constant noise from the machinery, trucks, and the frequent, high-pitched beeping signal used by the plant. Even during the time when the packing house is open, the loud noises from the plant, combined with its closeness to the residential community would appreciably increase the noise level in the residential community.

We submit that each of the problems discussed above are sufficient reason to deny Ewell a construction permit for its concrete plant, and urge the Department to do so. At a minimum, Ewell should be required to submit additional applications and information as discussed in Section I, and Ewell should be prevented from operating its plant until a thirty day public comment period has elapsed after the provision of the additional information.

Please inform us of your decision.

Respectfully submitted,

GARRY G. GEFFERT,
Florida Rural Legal Services, Inc.●

FUNDING A CAMPAIGN PROMISE

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. BOB WILSON. Mr. Speaker, in April, Vice President MONDALE announced that the carrier *Saratoga* and the three other ships in the Navy's service life extension program would be overhauled at Philadelphia Naval Shipyard instead of at Newport News Shipbuilding in Virginia.

The Vice President said this work was being sent to Philadelphia in order to make up for the administration's failure to keep its campaign promise to keep open the Frankford Army Arsenal.

The administration chose to ignore the Navy's recommendation that the service life extension program be performed at Newport News and Navy studies that indicated that it would cost from $60 to $132 million more to perform the work on each ship at Philadelphia, and that the award of this project to Philadelphia would adversely effect employment at a number of public and private shipyards across America.

The Armed Services Committee adopted an amendment offered by our colleague, PAUL TRIBLE, which stopped the placement of the *Saratoga* in any shipyard until the Navy completes a least-cost study of the project and until the committee has 60 days to review that study. The "*Saratoga* amendment" was subsequently approved by the House and Senate and made a part of the Defense Authorization Act of 1979.

Congressman TRIBLE then requested General Accounting Office to review the Navy's decision. The GAO report indicates that it would cost $119.2 million more to overhaul the *Saratoga* in Philadelphia than in Newport News and suggests that the Navy reevaluate its decision in view of the substantial cost difference and other factors.

I do not believe that the Congress and the American people will allow the administration to waste a half a billion dollars or more on this project. On Tuesday, a Washington Star editorial addressed this important subject and I include a copy of this editorial to be printed in the RECORD for the consideration of all my colleagues:

[From the Washington Star, Oct. 10, 1978]

FUNDING A CAMPAIGN PROMISE

Should every American have to ante up 50 cents so that the Carter administration can pay off a political promise to Philadelphia?

That's what is involved in a squabble over whether to send the aircraft carrier Saratoga to the Philadelphia Navy Yard or to the Newport News Shipbuilding Company for extensive overhaul.

This is no ordinary maintenance project. It's a rebuilding of the carrier under the Navy's Service Life Extension program; it will take three years and cost approximately a half-billion dollars and will extend the carrier's usefulness for 30 years.

The background of the controversy is this: The Carter camp, through Vice President Mondale, promised before the 1976 election to keep the Frankford Arsenal in Philadelphia open, thus preserving the arsenal's 2,000 jobs. Once in office, the administration decided it couldn't keep that pledge, but President Carter told Pennsylvania politicians shortly after taking office that he hoped to offset the jobs lost in the arsenal closing by creating that many more jobs at the Philadelphia Navy Yard.

How to do it? Send the Saratoga to the Philadelphia yard for overhaul. The project was announced last April by Mr. Mondale who linked it directly to "our effort to alleviate the effects of the closing of the Frankford Arsenal."

Virginia's Republican Rep. Paul Trible, Jr., whose district includes Newport News, said, "Hold on." He claimed that the overhaul could be done more cheaply at Newport News and that Navy officials had, in fact recommended doing the overhaul at the Virginia facility until the politicians got into the act.

Mr. Trible got the House Armed Services Committee to amend the Defense Department spending authorization bill to delay awarding of the contract. Virginia's Sen. Harry Byrd Jr. did the same in the Senate.

Meanwhile at the Mr. Trible's request, the General Accounting Office made a study of the Saratoga project and concluded that the government might save $100 million or more if the overhaul is done at Newport News.

The issue has become involved in Virginia political campaigns. Both Senate candidates, Republican John Warner and Democrat Andrew Miller, are plugging for Newport News. And Mr. Trible, a freshman congressman who won a long-time Democratic seat for the Republican party, has made the Saratoga case a centerpiece of his campaign.

The administration's decision—which seems to be on hold as a result of congressional action—not only might cost every American a half dollar (some $100 million in excess costs divided by some 200 million Americans) but it could cost the Democratic party a chance to regain the First District congressional seat.

We're not concerned about Democratic chances in the First—Mr. Trible seems to be doing a good job. But squandering $100 million of taxpayers' money to pay off a campaign promise that shouldn't have been made in the first place is another matter.●

FAMILY-OWNED BUSINESSES NEED HELP

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PANETTA. Mr. Speaker, I am today introducing a bill to help preserve family-owned farms and other family-owned businesses. As my colleagues are aware, this is of the utmost importance, as it has become increasingly difficult over the years for a family to maintain a business or farm through more than one generation.

A major part of the problem has been the inability of families to compete with the huge resources available to large-scale industries, retailers, and farms. In the agricultural sector, for example, family farmers simply cannot compete financially with large nonfarm investors who have great reserves of capital at their disposal. As a result, the rising costs of production, escalating land prices, and adverse weather conditions have forced thousands of small farmers out of agricultural production and thousands of others to give up their right to own the land they work day by day. In fact, in the last 25 years, the number of farms in America has decreased from 5.4 million to 2.9 million, with predictions that another 1 million will cease production by 1980, unless current trends are halted.

In addition, the small family business, which has always lent vitality to both urban and rural landscapes throughout the Nation, is in increasing danger of extinction. This is a tragic situation, because the loss of the individuality provided by our small, family-owned businesses would deprive us of much of the distinctive flavor of our diverse society. Also, of course, consumers would be cheated out of the choice and variety in goods and services they have traditionally enjoyed.

I would say, too, that the importance of the family in our society cannot be overemphasized. The tradition of passing on a farm or a business from one generation to the next runs deeply through our history and has been a source of continuity in families and communities for many ages.

These are not only trends and statistics, though. We are talking about individual families who want to carry on the work of their parents and grandparents. Through no fault of their own, they are being squeezed out of this birthright, and I believe we in Congress can and must help to preserve for them the opportunity to maintain their farms and businesses.

As my colleagues know, the key decision for family on whether or not to continue most often centers on how to pay the estate tax on the farm or business property. Current tax law takes this problem into account, granting alternative valuation of property and time extensions for payment to most small farms and businesses that continue as family operations. However, the estate

tax is still a major burden for these families, and it often is the catalyst in a decision to sell the property. Clearly, this problem must be alleviated.

The bill I am introducing today would exempt families who carry on their farm or business into the next generation from paying the estate tax on that property. I think this would remove a major burden from the shoulders of families in this situation, and it is a very important step I believe we must take to help preserve the family farm and family-run business.

Under my bill, the exemption would apply to the same family farms and businesses that now qualify for the alternate valuation of property. Thus, the farm or business property would have to comprise at least 50 percent of the gross estate, it would have to be passed on to a member of the decedent's family, and the heir would have to continue to run the farm or business. If within 15 years of the decedent's death the heir disposed of the property, the property would become eligible for the estate tax under a formula set out in the bill.

While the bill is directed at family farms and family small businesses, it is difficult to set a specific dollar limit on this exemption at this time. I am, however, introducing the bill in its current form as a vehicle for discussion as to what a suitable limit would be under present definitions of a family farm and business.

When we reconvene in January, I will reintroduce the bill, adding such additional provisions as may be necessary to accomplish the goal of this proposal.

This Nation simply must commit itself to preserving family involvement in the farms and businesses of America. This is a step in that direction.

The following is the text of the bill:

H.R. 14401

A bill To amend the Internal Revenue Code of 1954 to exempt certain real property used in farming or in other businesses from the estate tax

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part IV of subchapter A of chapter 11 of the Internal Revenue Code of 1954 (relating to taxable estate) is amended by adding at the end thereof the following new section:

"SEC. 2058. CERTAIN FARM, ETC., REAL PROPERTY.

"(a) GENERAL RULE.—For purposes of the tax imposed by section 2001, the value of the taxable estate of a citizen or resident of the United States shall be determined by deducting from the value of the gross estate the value of qualified real property.

"(b) DEFINITION OF QUALIFIED REAL PROPERTY.—For purposes of this section, the term 'qualified real property' has the same meaning such term has in section 2032A(b).

(b) The table of sections for part IV of subchapter A of chapter 11 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

"Sec. 2058. Certain farm, etc., real property."

SEC. 2. (a) Subsection (a) of section 2032A of the Internal Revenue Code of 1954 (relating to valuation of certain farm, etc., real property) is amended to read as follows:

"(a) VALUE BASED ON USE UNDER WHICH PROPERTY QUALIFIES.—

"(1) GENERAL RULE.—For purposes of determining the amount of any additional tax imposed under subsection (c), the value of qualified real property shall be its value for the use under which it qualifies, under subsection (b), as qualified real property.

"(2) LIMITATION.—The aggregate decrease in the value of qualified real property taken into account for purposes of this section which results from the application of paragraph (1) with respect to any decedent shall not exceed $500,000."

(b) Paragraph (1) of subsection (b) of such section 2032A is amended—

(1) in subparagraph (B) by inserting "and" after "(C),";

(2) in subparagraph (C)(ii) by striking out ", and" at the end thereof and inserting in lieu thereof a period, and

(3) by striking out subparagraph (D).

(c) Subparagraph (C) of subsection (c)(2) of such section 2032A is amended by striking out "subsection (a)" and inserting in lieu thereof "section 2058".

(d) Subsection (d) of such section 2032A is hereby repealed.

SEC. 3. The amendments made by this Act shall apply to estates of decedents dying after December 31, 1978.●

GOVERNMENT SPENDING MUST BE CUT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. McDONALD. Mr. Speaker, certainly one of the soundest economic minds in America is that of Dr. Hans Sennholz, professor of economics at Grove City College in Pennsylvania. Time after time, he has presented to the public priceless nuggets of economic wisdom in articles and books; needless to say, his views do not reflect administration policy now or for that matter for the last four and a half decades.

Our "leaders" seem to be guided by political considerations. Our news media has also played to the masses while pretending to be the ultimate protectors of all virtue and wisdom.

An example of this two-faced approach by the media can be illustrated daily, but some of the best examples may be found in President Carter's home State of Georgia.

On August 24, 1978, in an editorial entitled, "Spoiler of the Dream," the Atlanta Constitution newspaper states:

Inflation is rapidly changing the American way of life.

And inflation is a disease of our own making; it comes from within.

Use all the cliches you want to describe our current inflation—run-away, wildfire, galloping, double-digit—but it is, for sure, the spoiler of the American dream for millions and millions of Americans."

Further on we read:

The terrible inflation we now have—and continue to face—is mostly our own fault. It is a plague of our own making. Government spending billions of dollars in deficit year after year;

Inflation is messing us up. And it will continue to do so—to correct it will take severe sacrifices of which Americans may no longer be capable.

These are strong words. Yet again on October 6, 1978, we again have strong words from the self-acclaimed defenders of virtue. In the Atlanta Constitution editorial entitled, "Veto Upheld; Public Wins," we read:

It is being called a victory for President Carter, but yesterday when the House of Representatives upheld the president's (sic) veto of the $10 billion public works bill, it was a victory for the entire nation.

While not all the water projects are "pork barrel" provisions, enough of the bill's money was so wasteful that the bill was made unpalatable for anyone who has an ounce of concern for the nation's economy.

My colleagues should note the severe phrase "ounce of concern for the Nation's economy."

Going on the editorial says:

The fight against inflation has to start somewhere, sometime.

At this point my colleagues might say, "three cheers" but the same Atlanta newspapers roundly endorsed the Chattahooche River recreation project which has Federal tax dollars providing recreation for an urban area—Atlanta. The same Atlanta newspapers now strongly endorse the "Great Park" project where highway trust funds are being used to provide Atlanta with yet another recreation area. Most of my colleagues will be astonished to learn that the surface transportation bill before us today uses the trust fund for a recreational area.

It would be difficult to find two greater examples of pork barrel boondoggles. Many Georgians are sadly aware that when it comes to absolute hypocrisy the Atlanta Constitution and Journal are completely shameless.

Fortunately, there are those who are consistent and sincere in their economic insight and advice. Once again the best of such advisers has to be Professor Sennholz.

On the subject of stopping inflation and restoring economic health to our Nation Dr. Sennholz's article in the October issue of Private Practice is excellent. For the benefit of my colleagues, the article entitled: "Government Spending Must Be Cut" follows:

GOVERNMENT SPENDING MUST BE CUT

(By Hans F. Sennholz, Ph. D.)

The case for lower taxes is clear and compelling. Projected federal expenditures total nearly $500 billion in fiscal 1979 and the budget deficit is expected to exceed $50 billion. Government spending has risen to the point where its burden is felt throughout the American economy. The three sources of government revenue clearly reveal the strain:

1. For many taxpayers the levies are higher than ever before, giving encouragement to tax evasion and outright rebellion.

2. The capital markets show signs of utter exhaustion from government demands, causing interest rates to rise and security prices to fall. There is moaning among stockholders and bondholders, whose savings have been devastated in recent years. But in the body politic they are outnumbered and outvoted and, therefore, constitute no threat to the politicians in power.

3. Inflation, the favorite technique of deficit financing, is accelerating again, reducing the real earnings and savings of millions of people. It is potentially more dangerous to the deficit spenders who are re-

sorting to currency and credit expansion in order to finance their favorite programs. But the spenders continue to hide behind the wall of public ignorance that permits them to put the blame for rising prices on merchants and industrialists, on physicians and dentists, on anyone and anything making the news.

THE BURDEN

The public is aware, however, that the tax burden continues to grow. Some taxpayers are saddled with levies that are greater than ever before. They are pleading for tax relief and, in many cases, are organizing for tax protest and rebellion. Many victims have reached the limit of their endurance. Others are submerging in the "subterranean economy," where economic transactions are financed by cash and earnings remain unreported. According to some estimates, more than $175 billion of annual income, or $3,000 per family, are escaping the IRS bite. And this amount is expected to grow as inflation lifts everyone's income into progressively higher income tax brackets.

MORAL STRENGTH

Surely, we feel with the countless victims of government spending that consumes more than one-third of national income. We understand their anguish and sense the enduring morality of the cause of self-defense and man's right to the fruits of his labor. But we doubt that their cause embodies the moral strength for overcoming the spending aspirations of contemporary society. It is haunted by self-interest and projects self as the central figure on the cause of tax rebellion, while government spending continues to draw its political strength from a loud concern for the poor and underprivileged.

Progressive income taxation in itself is an objective of policy in search of social and economic equality. But it is also an inevitable consequence of a social order that bestows expensive benefits on millions of beneficiaries. After all, government has no sources of income and wealth of its own. It depends entirely on its ability to extract the means from its subjects. It must find victims in order to satisfy the clamor for social benefits and programs, government functions and services.

The tax rebellion is a viable political force, but it can become a moral force only with a simultaneous renunciation of the claims to benefits. The public agitation for lower taxes found powerful expression in the overwhelming acceptance of Proposition 13 by California voters—a referendum slashing real property taxes. The California voters gave new life to many other campaigns to secure reduction in federal and state tax rates. But such campaigns skirt the real issue if they focus exclusively on tax reductions. An essential ingredient of genuine relief and a truly successful tax rebellion is a reduction in the size of government. Without it, a tax rebellion could merely result in changes in form that in the end lack substance. It merely would shift the burden of government from some taxpayers to other victims.

TAX CUTS OR SPENDING CUTS?

Some campaigns focus on the potential for increasing government revenues as a result of tax cuts. The Kemp-Roth proposal seems to suggest that no spending reduction is needed as a companion to tax cuts. Its advocates hold out the hope that their particular tax cuts will revive the economy, cause it to expand, compensate for the loss of revenue with new revenue, and simultaneously reduce the relative size of government. They are promising relief for taxpayers, more jobs to workers, higher profits to businessmen, and more revenue to social spenders.

It may well be true that cuts in certain tax rates would spur economic activity and generate increases in revenue despite the tax cuts. A reduction in the capital gains tax, corporate income taxes, and other levies on capital and business undoubtedly would stimulate economic production. But it is unlikely that the relative burden of government would be permitted to shrink.

The temporary loss in tax revenue would immediately be offset by revenue from the capital market, causing interest rates to rise and business activity to contract, or from currency expansion, that is inflation, causing prices to rise. If, nevertheless, the net effort should be expansionary, government, too, will expand. It may even grow faster than the private sector if the deficit is financed by inflation.

Would the political forces pushing for economic redistribution and more government acquiesce in a smaller share of national income? They managed to extract their present share of benefits from a stagnant economy. Is it not likely they would want an even larger share from an expanding economy?

There is no easy escape from the consequences of an ideology of economic transfer and social conflict. A tax cut as a stimulant administered by government surely does not weaken the position of government. It does not even question the transfer function, but instead adds the role of economic stimulator. A tax cut that is accompanied by a spending cut does effectively reduce the burden and size of government. Therefore, explicit limits on government spending are needed to lend substance to a proposal for tax reduction.

THE ROOT OF THE EVIL

It takes great political courage to confront the root of the evil: the appetite for government services and benefits. Most Americans still believe that government owes them certain favors, such as income security, public housing and urban renewal, free education and medical care, etc. Their call for benefits is an implicit demand that financial means be seized from others. They would not be asking for social programs if they were expecting to cover the costs in proportion to benefits.

Few Americans seek no government favors, and even fewer openly reject them on moral grounds. It is much more popular to seek and accept the benefits of redistribution while objecting to the taxation that covers their cost. Most people freely partake in the economic redistribution, but loudly oppose the necessary allocation of costs. Most professors, for instance, live comfortably on government funds from state colleges and universities, seek federal grants and scholarships, send their children to public schools and colleges, while all along bemoaning their income taxes. They consider the things government does for them as social progress, but decry their tax burdens as oppression and abuse. Similarly, most physicians applaud their own benefits as social justice, but lament their tax burdens as social injustice. They accept the principle of redistribution and endeavor to get "their share" of benefits, but bitterly oppose their allocated share of costs.

SOCIAL CONFLICT

A political society that engages in economic redistribution is torn by social conflict. The beneficiaries seek to impose even more levies and restrictions on the victims, who in turn clamor for their share of benefits and lament their obligations and charges. The bitter struggle is waged in the political arena with ever shifting forces and alliances. Victories or reverses are merely temporary, to be followed by new offensives and counteroffensives, in a perpetual war for social benefits. To restore social peace and effect a rebirth of freedom, we must cease from preying on each other through government.●

ACCOMPLISHMENTS OF THE PUBLIC LANDS SECTION OF THE SUBCOMMITTEE ON INDIAN AFFAIRS AND PUBLIC LANDS

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. RONCALIO. Mr. Speaker, here is a record of legislative actions taken pertaining to public lands. This tabulation will be of particular interest to the hardworking members of the Subcommittee on Indian Affairs and Public Lands. As most of us are aware, one-third of our Nation is public land. These lands become increasingly more important as time goes on and conflicting interests between development-oriented and conservation-oriented uses are seeking to be enlarged. Our job as representatives for the people becomes one of walking a tightrope in finding the best balance between those competing uses.

The following is a tabulation of accomplishments of the Subcommittee on Indian Affairs and Public Lands and this Congress on legislation relating to the administration of our public lands.

GENERAL LEGISLATIVE ACTIVITIES

ADMINISTRATION OF PUBLIC LANDS—ALL FOLLOWING HAVE BEEN ENACTED INTO LAW

(1) Alaska Natural Gas Transportation System (H.J. Res. 621; P.L. 95–158; H. Rept. 95–739, Parts 1 and 2; S. Rept. 95–567).

H.J. Res. 621 approved the Presidential decision on an Alaska Natural Gas Transportation System, and cleared the way for the initiation of activities to implement the selected Alcan system.

(2) Public Rangelands Improvement Act of 1978. (H.R. 10587; P.L. 95– ; H. Rept. 95–1122; S. Rept. 95–1237; Conf. Rept. 95–1737).

This bill allocates $365 million over fiscal years 1980–1999 to improve the range conditions on some 170 million acres of public lands in the Western States. It further enacts a statutory grazing fee for the public rangelands, mandates the removal of excess wild horses and burros from the public lands and facilitates the orderly management of these lands.

(3) Grazing Fee Moratorium Act (H.R. 9757; P.L. 95–321; H. Rept. 95–859; S. Rept. 95–761).

This Act imposes a moratorium on any increase in the public lands grazing fee for the 1978 grazing year in order to give the Congress time to consider a mandated fee formula.

(4) Bureau of Land Management Quadrennial Budget Authorization. (H.R. 10787; P.L. 95–352; H. Rept. 95–1121; S. Rept. 95–789).

H.R. 10787 authorizes appropriations for all programs, functions, and activities of the Bureau of Land Management for fiscal years 1979–1982.

(5) Temporary Bull Run Reserve, Oregon (H.R. 7606; P.L. 95–55; H. Rept. 95–401).

This bill temporarily lifted a court injunction involving the Bull Run Reserve, Oregon, to allow for multiple use management of the Reserve for a period of six months until a permanent legislative solution to management problems could be enacted. Such permanent legislation was

subsequently enacted as discussed in the following paragraph.

(6) Bull Run Reserve, Oregon (H.R. 7074; P.L. 95–200; H. Rept. 95–622).

Provides for the management of the Bull Run Reserve in Oregon's Mount Hood National Forest. The Reserve is to be managed primarily to protect the water supply for Portland, Oregon, and its outskirts.

(7) Conveyance of public lands in Mineral County, Nevada (H.R. 4979; P.L. 95–265; H. Rept. 95–530; S. Rept. 95–522).

This law directs the Secretary of Interior to convey approximately 2,620 acres of land to Mineral County, Nevada, to be used for resale to attract industrial and commercial business.

(8) Conveyance of lands to the University of Nevada (S. 917; P.L. 95–278; H. Rept. 95–1006; S. Rept. 95–521).

This law provides for the conveyance of 8,040 acres of Bureau of Land Management land in Grass Valley to the University of Nevada to be used for agricultural and natural resources research and demonstration. The application for conveyance would be considered under the provisions of the Recreation and Public Purposes Act.

(9) Conveyance of lands to the Madera Cemetery District, California (H.R. 2527; P.L. 95–169; H. Rept. 95–192; S. Rept. 95–518).

P.L. 95–169 authorizes the Secretary of Agriculture to convey a 20-acre tract of land located in the Sierra National Forest, California, to the Madera Cemetery District.

(10) Conveyance of land to the Town of Liberty, Washington (S. 2033; P.O. 95–310; H. Rept. 95–1291; S. Rept. 95–519).

This law provides for consideration of a townsite application for 17.4 acres in the Wenatchee National Forest, Washington, by waiving certain requirements of the National Forest Townsite Act of 1958 as amended.

(11) Removal of reversionary clause on lands in Oregon (H.R. 12772; P.L. 95–394; H. Rept 95–1455).

P.L. 95–394 authorizes the Secretary of Interior to remove the reversionary interest of the United States to 160 acres in Oregon in order to facilitate the State to exchange it for private lands which would subsequently be added to the Ocala State Park. The reverter clause would be attached to the newly acquired lands.

(12) Conveyance of homesites in Alaska. (S. 2118; P.L. 95–174; S. Rept. 95–527).

This law authorizes the Secretary of Agriculture to convey eight homesites ranging in size from ½ to 3 acres within the Chugach and Tongass National Forests, Alaska. The National Forest Management Act of 1976 prohibited the transfer of national forest lands except by Act of Congress, thereby unintentionally prohibiting the conveyance of homesites to individuals who had qualified for such conveyance prior to the 1976 Act.

(13) Extend the boundary of the Toiyabe National Forest, Nevada (S. 2774; P.L. 95– ; H. Rept. 95–1614; S. Rept; 95–1298).

This law extends the boundary of the Toiyabe National Forest to include the remaining 35 acres of the Whittell property, and removes the expenditure ceiling for acquisitions authorized by the August 5, 1970 Act.

(14) Relating to land claims along the Colorado River, California (H.R. 7101; P.L. 95– ; H. Rept. 95–1018; S. Rept. 95–).

This legislation amends a provision of law relating to land claims by the United States in Riverside, California, based upon accretion or avulsion of the Colorado River.

(15) Removal of a Federal restriction on State owned lands in Hawaii (S. 1318; P.L. 95– ; S. Rept. 95–515).

This Act removes a Federal restriction on 202 acres of State owned land on Sand Island thereby authorizing the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose.

(16) Validating certain land conveyances and sundry measures. (H.R. 7971; P.L. 95– ; H. Rept. 95–1008; S. Rept. 95–1287).

This legislation contains several provisions relating to specific problems concerning public lands in the Western States.

(17) Extending the boundary of the Cibola National Forest, New Mexico (S. 553; P.L. 95– ; H. Rept. 95–1668; S. Rept. 95–516).

This legislation enlarges the boundary of the Cibola National Forest to include 7,400 acres of land near Albuquerque, New Mexico.

(c). Additions to the National Wilderness Preservation System:

Six separate measures were enacted making substantial additions to the National Wilderness Preservation System as provided for by the Wilderness Act of 1964. They are:

(1) Absaroka-Beartooth Wilderness, Montana (S. 1671; P.L. 95–249; H. Rept. 95–927; S. Rept. 95–624).

P.L. 95–249 added a 904,500 acre Absaroka-Beartooth Wilderness to the Wilderness System.

(2) Indian Peaks Wilderness, Oregon Islands Wilderness (H.R. 12026; P.L. 95–450; H. Rept. 95–1460).

This legislation adds a 70,000 acre Indian Peaks Wilderness to the Wilderness System, and establishes a 36,235 acre Arapahoe National Recreation Area. Both units are contiguous to Rocky Mountain National Park, and portions of both will be studied for possible addition to the Park. It also adds 459 acres to the existing Oregon Islands Wilderness in Oregon.

(3) Wisconsin Wilderness Areas (H.R. 12264; P.L. 95– ; H. Rept. 95–1323).

This bill designates a 5,886 acre Blackjack Springs and 7,315 acre Whisker Lake Wilderness in Wisconsin's Nicolet National Forest.

(4) Great Bear Wilderness, Montana (H.R. 13972; P.L. 95– ; H. Rept. 95–1616).

This legislation adds 60,000 acres to the existing Bob Marshall Wilderness, and creates a 285,700 acre Great Bear Wilderness to protect, among other things, critical grizzly bear habitat.

(5) Endangered American Wilderness Act of 1977 (H.R. 3454; P.L. 95–237; H. Rept. 95–540; S. Rept. 95–490; Conf. Rept. 95–861).

This legislation designates 17 wilderness areas and one wilderness study area in 10 Western States. The areas designated are:

Wilderness Area:	*Acres*
Pusch Ridge Wilderness, Arizona	56,430
Golden Trout Wilderness, California	306,000
Santa Lucia Wilderness, California	21,250
Ventana Wilderness, California	61,000
Hunter-Fryingpan Wilderness, Colorado	74,450
Manzano Mountain Wilderness, New Mexico	37,000
Sandia Mountain Wilderness, New Mexico	30,930
Chama River Canyon Wilderness, New Mexico	50,300
Lone Peak Wilderness, Utah	29,567
Savage Run Wilderness, Wyoming	14,940
Welcome Creek Wilderness, Montana	28,440
Kalmiopsis Wilderness, Oregon	92,000
Wild Rogue Wilderness, Oregon	36,700
Wenaha-Tucannon Wilderness, Oregon & Washington	180,000
Mount Hood Wilderness, Oregon	33,000
Three Sisters Wilderness Addition (French Pete) Oregon	45,400
Gospel-Hump Wilderness, Idaho	206,000
"Spruce Creek" Study Area, Colorado	8,000

(6) Montana Wilderness Study Bill (S. 393; P.L. 95–150; H. Rept. 95–620; S. Rept. 95–163) designates 9 wilderness study areas in Montana.

Wilderness Study Area:	*Acres*
West Pioneer Wilderness Study Area	151,000
Taylor-Hilgard Wilderness Study Area	289,000
Bluejoint Wilderness Study	61,000
Sapphire Wilderness Study Area	94,000
Ten Lakes Wilderness Study Area	34,000
Middle Fork Judith Wilderness Study Area	81,000
Big Snowies Wilderness Study Area	91,000
Hyalite-Porcupine-Buffalo Horn Wilderness Study Area	151,000
Mount Henry Wilderness Study Area	21,000

PRIVATE LEGISLATION

The Committee considered and Congress enacted the following private laws:

(1) Conveyance of lands in Adams County, Mississippi (H.R. 1403; Pvt. Law 95–18; H. Rept. 95–191; S. Rept. 95–517).

Pvt. Law 95–18 authorizes and directs the Secretary of Interior to act on the application of two individuals for conveyance of approximately 1,000 acres of land. The application would be considered under the Color-of-Title Act notwithstanding the acreage limitation.

(2) Correction of a survey in Wyoming (H.R. 2501; Pvt. Law 95–21; H. Rept. 95–295; S. Rept. 95–567).

This law eliminates a conflict between the official cadastral survey and a private survey of the so-called Wold Tract consisting of 160 acres within the Medicine Bow National Forest in Wyoming.

OTHER LEGISLATION

The following bills were considered with various increments of hearings and markup, but were not enacted into law.

(1) H.R. 4461, to assure that weather modification activities and the collection of hydrometeorological information necessary to the management of water resources can be conducted in conjunction with the management and administration of wilderness areas and other Federal lands. Action consisted of a hearing.

(2) H.R. 1907, to designate certain lands as wilderness. This was an omnibus bill of which all areas considered by the Committee were enacted except the Hawaiian Islands Wilderness proposal. Action on this proposal consisted of hearings.

(3) H.R. 6621, H.R. 7970, H.R. 8210, H.R. 9770, H.R. 11338, H.R. 11663, to designate certain lands within the National Forest System in the State of Virginia as wilderness. Action consisted of a hearing.

(4) H.R. 6658, to require that all timber harvested from lands owned by the United States located west of the one hundredth meridian be processed in the United States, that only certain products from the processing of timber harvested from certain lands owned by the United States be exported from the United States. Action consisted of a field hearing.

(5) H.R. 11063, to study certain lands within the Kisatchie National Forest in Louisiana for potential designation as wilderness. Action consisted of a hearing.

(6) H.R. 11157, to provide for the Wyoming High Lakes Addition to the Absaroka-Beartooth Wilderness. Action consisted of a field hearing in Powell, Wyoming.

(7) H.R. 4108, for the relief of William Phillips. Action consisted of Subcommittee hearing and markup, after which further action on the bill was dispensed, and a letter from the Committee to the Secretary of

Interior and Secretary of Agriculture requesting a survey of the boundary and response to the Committee early next session.

(8) H.R. 3121, to convey all interests of the United States in certain real property in Sandoval County, New Mexico, to Walter Hernandez. Action consisted of House passage on June 21, 1978 (H. Ret. 95–1221).

(9) H.R. 4243, to authorize the Secretary of the Interior to convey certain lands in Placer County, California to Mrs. Edna C. Marshall. Action consisted of House passage on April 18, 1978 (H. Rept. 95–1015).

(10) H.R. 10029, to direct the Secretary of Interior to convey certain lands in Clear Creek County, Colorado, to Harold and Doris Harlan. Action consisted of House passage on August 15, 1978 (H. Rept. 95–1429).

(11) H.R. 10160, to provide for the conveyance of title and ownership of 2.58 acres within the Bridger-Teton National Forest, Wyoming, to Ben Boschetto, Jr. Action consisted of House passage on June 21, 1978 (H. Rept. 95–1107).

(12) H.R. 11168, to provide for the conveyance of certain public lands in San Bernardino County, California, to the town of Red Mountain. Action consisted of House passage on September 18, 1978 (H. Rept. 95–1497).

(13) H.R. 11451, to establish the true location of a portion of northerly boundary of the Angeles National Forest located in Los Angeles County, California, on the common line between sections 16 and 17, township 4 north, range 10 west, San Bernardino meridian, and to establish the center quarter corner of said section 16. Action consisted of House passage on September 19, 1978 (H. Rept. 1428).

(14) S. 2101, to modify the boundary of the White River National Forest in the State of Colorado. Action consisted of House passage of an amended bill on September 18, 1978 (H. Rept. 15–1492).

(15) H.R. 12349, to provide for the DuNoir Basin addition to the Washakie Wilderness in Wyoming. Action consisted of House passage on July 25, 1978, Senate passage of an amended bill (H. Rept. 95–1321; S. Rept. 95–1305).

LEGISLATIVE OVERSIGHT ACTIVITIES

In accordance with the committee's jurisdiction and responsibilities in reviewing and reporting legislation the following oversight meetings were held:

Alaska Natural Gas Transportation System. Prior to the introduction of H.J. Res. 621, the Committee held seven meetings on this subject.

Management of the Public Grazing Lands. The Committee held a meeting on this general topic in Price, Utah.

Implementation of the Federal Land Policy and Management Act of 1976. The Committee held four meetings on this subject: Price, Utah; Rock Springs, Wyoming; Elko, Nevada; and Washington, D.C.

STATISTICAL ACCOUNTING

During the 95th Congress, 96 bills pertaining to public lands were referred to the Subcommittee, of which 73 were considered by the Subcommittee, 33 were reported to the House,* and 25 were enacted into law.*

The Subcommittee on Indian Affairs and Public Lands held 69 meetings in Washington, D.C., and 17 field hearings.●

*Figures do not include duplicate bills on the same subject.

FEDERAL EXECUTIVE INSTITUTE CELEBRATES 10TH ANNIVERSARY; PLANS FOR FUTURE

HON. RICHARD C. WHITE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WHITE. Mr. Speaker, in 1968, Congress, in response to a request from President Johnson, authorized the Civil Service Commission to establish an institute for the advanced development of the professional skills of Federal civil executives.

The Federal Executive Institute was established in Charlottesville, Va., on the property of the old Thomas Jefferson Inn, and last week hundreds of graduates of that institution and their faculty and guests, returned to FEI to celebrate the first 10 years of successful operation, and to plan for the future.

Chairman Alan K. "Scotty" Campbell, in his speech on October 1, stated that:

The need for leaders to keep themselves and their organizations attuned to the real world is no less today than a decade ago. Today's executives must have a broad range of skills and abilities . . . among these is the ability to rise above the papers and staff meetings and other daily activities, and relate to the broader concerns of Government and of society as a whole, if the goal of improved Government effectiveness is to be achieved. FEI was established to provide the kind of executive training that will help them to do that. Those who come to FEI are the leaders who link the elected and appointed policymakers with the rest of civil service.

Chairman Campbell further elaborated that one element of President Carter's civil service reform bill that will have the single greatest impact on Federal executives is the creation of the new Senior Executive Service. He emphasized that—

We had an opportunity for the first time to design a total system calculated to produce an enthusiastic, talented, capable career exexutive cadre; career executives who could not only insure the continuity of Government during changes in political leadership, but could join with the new leadership to forge an effective team to reach program goals.

Federal Executive Institute Director Tom Murphy pledged that FEI, in its second decade, will play a major role and an expanded part in fostering and developing the plan of the Senior Executive Service programs.

When the alumni assembled on October 5, their keynote spokesman was our good friend, and my fellow marine, "General Joe" Bartlett, of our House staff, who attended FEI about 3 years ago. I understand one of my colleagues (Mr. GILMAN) has already obtained permission to insert Joe's remarks elsewhere in the RECORD.

As chairman of the Subcommittee on Military Personnel of the House Committee on Armed Services, I have come to have a real appreciation for the comparable development of executive abilities provided to our ranking military officers through the various advanced training programs such as the National Defense University.

The vision of President Lyndon Johnson in establishing the Federal Executive Institute will pay handsome dividends in the management of the public business.

I congratulate all of those who celebrate this first decade of this fine institution, and wish them many happy, useful and productive decades to come.●

UGANDAN TRADE BAN

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. PEASE. Mr. Speaker: Just a few days ago, the Des Moines Register carried an article by my distinguished colleague from Washington, DON BONKER. It is a very concise and persuasive summary of the reasons why this Congress has acted properly in establishing a Ugandan trade ban. I commend Mr. BONKER for his leadership on this important human rights challenge and place his editorial to be reprinted in its entirety:

[From the Des Moines Register/Tribune, Sept. 30, 1978]

WHY UNITED STATES SHOULD IMPOSE AN EMBARGO AGAINST UGANDA

(By DON BONKER)

Since Idi Amin took power over seven and a half years ago, up to 300,000 Africans have been brutally tortured and murdered in Uganda.

This presents a challenge to America's newly asserted human rights policy. Our high-sounding moral pronouncements stand to lose credibility as the Ugandan dictator continues systematically to exterminate sections of his country's population. There are many memories of Munich in 1936 as the perpetrator of these atrocities resorts to maxims about "non-interference" in the internal affairs of sovereign countries, as a diplomatic cover for the genocide that is taking place there.

The sad fact is that after more than seven years of murderous rule, Amin still can wantonly kill people at will and boast to the world of his admiration for Hitler. It is difficut to imagine a more tragic demonstration of the ineffectiveness of the United States and international institutions in dealing with leaders whose brutality mocks fundamental principles of the world community.

In recent years, the United States terminated its aid program to Uganda and closed the American Embassy (the reason given was Amin's harassment of American diplomats).

Yet the United States still allows Uganda to maintain an embassy in Washington, D.C. and a mission in New York. Ugandan pilots and communication specialists receive training here. Americans also supply valuable spare parts and maintenance services to Uganda. In fact, Americans even pilot Ugandan aircraft. Finally, U.S. firms purchase more than $218 million in Ugandan coffee each year. Coffee accounts for more than 90 percent of Uganda's exports; the U.S. imports over a third of this crop, while America's allies import another third.

The performance of relevant international organizations has been even more disappointing. Despite repeated pleas by the International Commission of Jurists and Amnesty International, among others, the United Nations Human Rights Commission refused even to discuss human rights violations in Uganda until this year.

Many African countries, embarrassed by Amin's behavior, seem to feel that international action would shift attention from other trouble spots, such as South Africa. Despite protests by some African countries, Amin was elected chairman of the Organization of African Unity for the 1975–76 term. To make matters worse, Uganda continues to be a full member of the U.N. Human Rights Commission.

In June, the U.S. House initiated efforts to terminate America's Ugandan connection. Following this action, 16 of the roughly 35 American firms purchasing Ugandan coffee voluntarily agreed to suspend their trade with the country. This placed them somewhat ahead of U.S. policy, which could not even support a fairly mild, non-binding resolution on Uganda. That resolution was adopted in the House by a vote of 377–0.

Oddly, the president that first raised our consciousness about human rights now opposes sanctions on probably the greatest perpetrator of human rights violations since Adolph Hitler.

The administration's arguments are not convincing. Its testimony about "free trade principles" and doubts about the effectiveness of a trade embargo sidestep the real issues.

Perhaps the administration fears a congressional precedent of linking human rights to U.S. diplomatic and trade relations; but we already have imposed diplomatic and economic restrictions against Communist countries and against Rhodesia. There is also expressed concern for the 200 U.S. missionaires and others in Uganda who may be targets of Amin's retaliation against an embargo.

For whatever reason, if Carter cannot bring himself to support even mild reprisals against the Ugandan government, it throws into question our ability to deal effectively with human rights violations.

Albert Einstein once wrote: "The problems of the world are not so much attributable to those who would do evil as much as those who do nothing about them."

The United States and its international partners should heed this observation if fundamental standards of human rights are to have meaning, particularly for those faced with extermination at the hands of a ruthless dictator.

Amin's rule demonstrates that America's human rights policy needs less rhetoric and symbolic gestures, and more effective action.●

EXTENSION OF CONGRESSIONAL REVIEW OF RULES AND REGULATIONS

HON. DAWSON MATHIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MATHIS. Mr. Speaker, as one who has openly supported this viewpoint for many years, I want to bring to the attention of my colleagues and the general public this editorial from the October 3, 1978, edition of the Atlanta Journal which supports the position of the House of Representatives in the matter of so-called congressional vetoes.

CITIZENS WIN

Rep. Elliott Levitas has won a major victory in his fight to extend congressional review of rules and regulations issued by federal agencies.

The House of Representatives has rejected a conference committee report in which Senate members had succeeded in watering down his proposal to begin legislative review of regulations promulgated by the Federal Trade Commission.

That means the House is standing by the Levitas position that rejection of a regulation by one branch of Congress should be sufficient to kill it. And the fact that the House is standing by him is especially significant considering that neither the House leadership nor the administration agrees with Levitas on the proposal.

It's not a final victory for Levitas, because the Senate could be just as stubborn as the House. But it does mean his proposal is still alive and is being accepted by House members as an idea whose time has come—an idea they will fight for even against heavy pressure.

As Levitas said, the Federal Trade Commission "is really a mini-legislature, but the people who compose it have never suffered the inconvenience of running for public office." It, like other federal agencies, is a creature of Congress and acts under laws passed by Congress. But when it can act on its own interpretation of the law and amplify the law through rules without any restraint from Congress or the citizens, it is substantially beyond the control of the public.

When such agencies make decisions that govern citizens with the force of law, why shouldn't our elected lawmakers have some recourse other than repealing or amending the basic law itself? If a majority of the House now is willing to stand up and take the responsibility for scrutinizing the laws made by the unelected officials, we may be on the road to bringing the bureaucracy under some measure of citizen control.●

STRAIGHT TALK

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. CHAPPELL. Mr. Speaker, as we rush toward the final adjournment of the 95th Congress this week, many of us are often so busy trying to keep track of the legislation coming up on the floor that we might tend to forget the overall situation in this country—the effect that each and every one of the bills we are considering will have on the total economic picture in the United States. For the RECORD, I wanted to bring to the attention of my colleagues a good summation of that overview, as published in the Colorado Farm Bureau News last month, written by Keith Propst.

Mr. Propst's article makes reference to a book recently published by William Simon, former Secretary of the Treasury. Mr. Simon reveals no startling surprises when he says that Federal spending has gotten out of control, increasing by 232 percent between 1961 and 1975, or that the U.S. Government is deeply in debt. But Mr. Propst goes further than simply repeating William Simon's book; he makes some excellent observations that I want to share with all the Members who will be voting on the last several bills we consider this week.

First, that there is a clear explanation of how we have reached our currently disastrous economic state—as Mr. Propst put it so well, "We as citizens have demanded that the Government try to solve all our problems". He goes on to draw the only obvious conclusion, that "if we are to survive as a nation we as a people must come to our senses and stop demanding so much from that Government".

I submit the article in its entirely, as thought provoking and necessary reading for us all.

The article follows:

[From the Colorado Farm Bureau News, September 1978]

STRAIGHT TALK

(By Keith Propst)

For several years now, most noted economists have targeted inflation as the number one problem facing this nation, and now it seems that the citizenry also express this concern. When polled by Gallup, Harris, or others, they are now overwhelmingly listing inflation as the main problem facing themselves and the nation.

Most economists also agree that the chief cause of inflation is deficit government spending and the huge amount being spent by business trying to comply with oppressive government-sponsored regulatory agencies. Arthur Burns, former chairman of the Federal Reserve, and the present chairman William Miller both agree that inflation must be controlled if we are to survive economically as a country.

Former Secretary of Treasury William Simon in his recent book "A Time for Truth" lists some severe symptoms of a sick nation:

Washington is taking about one-fourth of the national income. On the average, more than four months out of every citizen's year of labor is being confiscated by governments.

The share of the Gross National Product eaten up by government has been inflating feverishly. In 1930 spending by federal, state, and local governments accounted for 12 percent of the GNP. By 1976 it was 36 percent. If the trend continues, it would hit 60 percent by the year 2000.

Federal spending has flown out of control. It increased 232 percent from 1961 to 1975. The Federal Government is spending over 1 billion dollars per day.

The U.S. Government is in hock up to its ears. In sixteen of the past seventeen years, we have rolled up large deficits. From 1965 to 1975 the national debt soared from $313 billion to $533 billion.

But even this is an understatement, for the federal government is obligated in the future by far more than the national debt reflect, for 11 billion is owed by such agencies as T.V.A. and the export-import bank. Government-sponsored agencies, such as Farm Credit Administration and the Federal Home Loan Board, owe $88 billion. Loans totaling 237 billion are guaranteed by the Federal Housing Administration, the Veterans Administration, the Farm Home Administration and others.

But the biggest and still growing obligation is Social Security, estimated at more than $4 trillion.

The interest on the federal debt tripled in the last decade and in 1975 was 38 billion dollars, the third largest budget item in the federal budget.

The President's Council of Economic Advisers estimated in 1975 that regulations cost the citizens $130 billion a year. No one knows how to calculate precisely either the inhibitory or inflationary effects of these agencies. It has become clear, however, that the regulatory agencies are strangling economic activity.

An estimated 130 million man hours is being spent by private business filling out bureaucratic forms at a cost of at least $25 billion. It costs the government another $15 billion to process them.

All of this has resulted in double digit inflation for everyone, lower profit for business, more unemployment by labor.

These are just a few of the scary statistics that William Simon points out in his book as he saw it when he was Secretary of the Treasury in 1975.

How has all this happened? I believe it has happened because we the people have become soft, spoiled, and greedy. We as citizens have demanded that the Government try to solve all our problems. We have over the last 30 years elected to office politicians who have gladly responded to our selfish demands. They have launched massive Federal programs with little or no conception of their eventual cost and have then hidden their cost by continual deficit spending.

It seems to me that if we are to survive as a nation we as a people must come to our senses and stop demanding so much from our government. We should in the upcoming election choose those candidates in either party who are willing to face up to the growing national crisis and who promise to do something about it. In casting these votes we must fully realize that some of our pet government programs may have to go down the drain.

It somehow reminds me of the old saying, "We have discovered the enemy and it is us." ●

DEVELOPMENT OF INTERNATIONAL AVIATION

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. KASTEN. Mr. Speaker, I would like to share with my colleagues a recent address by Knut Hammarskjold, director general of the International Air Transport Association to the International Chamber of Commerce 26th Triennial Congress in Orlando, Fla. His comments are a well-balanced presentation of the development of international aviation and the key problems and alternative solutions. Many have watched with keen interest the development of international air transportation and are deeply aware of the myriad of problems that have arisen.

The address follows:

ADDRESS BY KNUT HAMMARSKJOLD

The leaders of this country always dreamed of international cooperation in all fields of endeavor. From Benjamin Franklin to Woodrow Wilson, whose fourteen points were characteristic of a time and spirit in which our respective cooperative organizations were formed. Through the formation of the U.N. at San Francisco, world monetary cooperation at Bretton Woods—and the first multilateral air transport conference at Chicago. That vision has continued through the Marshall Plan and the OECD to the GATT Kennedy round and its successors.

And that vision is still with us. Only last week, in this nation's capital, the IMF interim committee in charge of formulating policy made a statement to the 135 world member governments. Its message was the need for coordination of the economic policies of the major nations of the world; as the West German Finance Minister noted, "no country, big or small, is exempt from the duty to respect an international code of conduct, in making adjustments to its national policy."

Internationalists—and here I believe I can safely include the business community—were delighted to see the immediate and direct response of President Carter pledging the United States to those imperatives. I quote "Let there be no doubt in your mind about how seriously I take those pledges that have been made on my word of honor and on behalf of the American people. (The United States intends) to achieve still further economic cooperation with other nations to consolidate gains and to foster economic growth in all nations." The President has given clear leadership to the international community. And a clear commitment of the United States to international consultation and multilateral interdependence in economic affairs.

International air transportation—a key element in world commerce—must be handled in the same way. In fact, since the mid-1940s' air transport development has reflected the principles of international cooperation. Following the Chicago conference, the world's most powerful aviation nation found a "modus vivendi" with its trading partners, weakened by the war; it was essential if a world network was to be built. For the U.S. it made sense, politically, economically and psychologically, to compromise on its strongly held views of open entry to markets, unrestrained capacity—and free market pricing.

Over the past 30 years such compromises have enshrined in an extensive network of government bilateral agreements. Agreements which establish the basic rules of procedure for international aviation trade.

And as with other trading procedures in GATT and UNCTAD, they recognized the need for multilateralism to keep the system together. They also recognized that multilateralism in aviation—for very practical reasons—could best be provided by the airlines under government guidelines. As commercial enterprises, airlines were familiar with market conditions, the financial imperatives and the risks. As businesses, they were free from diplomatic constraints and confrontation.

These trade procedures or rules of conduct originally initiated by the United States and the United Kingdom have been accepted in good faith by all nations—large and small.

Ray Young has just outlined a new U.S. aviation policy. The principles are difficult to quarrel with. In the interest of the consumer it is a total commitment to the market place. All of us are in favor of competition—healthy and fair competition—and low consumer prices. And I daresay, when it comes to low prices, air transport has an outstanding record compared to other goods and services. We are also in favor of profitable cost covering international commerce. And a world system that can remain flexible enough to respond to all reasonable customers requirements.

The new policy has been fully aired in open national discussion—seeking consensus before implementation. And here I would like to pay credit to U.S. Transportation Secretary Adams for his efforts to guarantee a fair hearing for the policy in advance of its adoption.

But national discussion and national decisions affect purely national interest. They cannot fully reflect the legitimate interests of other members of the world community.

There has been no multilateral discussion on the new policy. And within the international community many deep concerns are being expressed at the way the United States is seeking to change international aviation procedures. Concerns that a tried internationally accepted process of consensus and compromise is being abandoned without adequately taking into account views of other sovereign nations.

And, above all, concern at the supersonic speed with which the policy is being pursued—and the potential for a massive supersonic boom.

A boom that threatens to shatter the rules of international trading conduct, which could bring aviation nations into sharp confrontation.

A boom that threatens to spread shock waves through the infrastructure of the world aviation system—an infrastructure basic for international trade and financial interchange.

This afternoon I would like to "monitor" these booms and give you some decibel readings.

To many foreign nations it seems that the U.S. is simply forcing its domestic deregulation policy into the international market place. Oblivious to differing economic conditions and philosophies. Oblivious to the sovereignty and national interest of other states. In fact we are back to the blind market faith of pre-Chicago 1944.

This big country—the U.S.—is one large market. There are more passengers on U.S. domestic routes than on all international routes combined. It has one set of labor conditions and one currency. It has a tradition of free enterprise which is unique in the world. Against that background a domestic aviation experiment based upon these principles is entirely understandable. It is

also understandable that the U.S. should be aiming to extend its domestic experiment on to international routes. After all, it has relatively low domestic unit costs—and a dominant aircraft manufacturing industry.

But it is equally understandable that other countries have their own views on international air commerce. The plain fact is that many non-U.S. carriers are regarded as far more than just commercial concerns. They have a much wider brief encompassing national socio/economic policy and presence. They are regarded by their governments as part of the international trading system. And in the final analysis, their product will be dealt with like any other trade commodity—be it steel, textiles, footwear or shipping. And you will understand why I mention these items.

Unless these facts of life in international aviation trading are recognized—a collision course seems unavoidable.

The more so as foreign nations know, that under the admirable banner of "exchange of mutual opportunities" there is a less altruistic policy of "geographic leverage."

As Under Secretary of State for Economic Affairs, Richard Cooper, Chairman of the U.S. Government Interagency Coordinating Committee on Aviation, put it earlier this year ". . . there is one overriding economic force which will aid our attempts to achieve liberal aviation rules—geographic competition."

Chairman Kahn of the CAB with his capability for getting to the heart of issues, put it more succinctly: "Amsterdam is not far from Frankfurt"—playing the prosperity of one nation's aviation market against that of its neighbor.

What other aspect of international trade is carried out in this way? What would happen if GATT were thrown overboard together with its basic rules of conduct? I could hazard a guess. Hundreds of bilateral commodity deals might be developed—each more disruptive than the last. Until some country cried "halt", put up the shutters and started a stampede into protectionism. Fortunately trade procedures are properly coordinated to prevent "beggar thy neighbor" policies. Why is international coordination in aviation trade produces now being cast aside?

And is it an ironic coincidence that we are now witnessing an unprecedented increase in government involvement in all transportation?

There are now inter-government working groups institutionalized on fares and rates.

There are presidential level consultations on dollars and cents issues.

There are endless rounds of bilateral negotiations—the U.S. has about 20 in the pipeline at the moment—deregulation through increased bureaucracy.

And there is an almost naive expectation that if multilateral price negotiations are thrown out of the window, governments will let the market fill the vacuum.

Indeed the vacuum is already being filled by a defacto extension of sovereignty of the CAB. Insisting on its tariff rules on European routes, on its baggage rules throughout the world, on its currency rules in foreign nations, and many more. Only a few days ago one of the principal regulators publicly suggested the U.S. courts as the ultimate arbitrator on international fares in the brave, new-deregulated-world. In a world perspective internationally agreed rules of the game are replaced by the ever present sword of Damocles of U.S. antitrust regulation.

Is it surprising that foreign nations are concerned at these developments?

Let's round out the picture with some economic facts. Facts about the first six months of 1978 on the North Atlantic—the route presently at the center of attention.

Total market demand has increased 12 per cent with large gains in scheduled traffic offsetting the fall-off in charters. This is a healthy but far from unusual annual growth rate.

Surveys indicate that only two per cent of this total increase can be attributed to the new fare levels.

There has been large scale diversion of traffic between markets. For example, traffic via the U.K. and Luxembourg boomed—while Irish and Belgian services reported actual decreases.

U.S. travel to Europe grew less than eight per cent; the number of Europeans flying to America jumped over 19 per cent indicating that currency movements play a major role in market growth.

There are record load factors; offset by record break-even load factors required with the low average fares.

And although no clear over-all financial picture has yet emerged, certain North Atlantic carriers have already filed for fare increases.

In short, all this greatly publicized upheaval has produced only average growth on the North Atlantic compared to other routes. Markets have been distorted but little new traffic generated. And a lot of confusion and uncertainty has resulted, leaving the industry in a fragile equilibrium that can be easily thrown out of balance by, for example, a slight downturn in economic activity.

But the airline industry, which is characterized by innovation, has proven that it can survive almost any upheaval. And I include even the recently expressed intention of one regulator of "scrambling the system so that no one can put it together again." For I believe, in the final analysis, such concepts will remain in their place.

And I firmly believe that this great country will recognize that:

The more radical the policy—the greater the burden to explain.

The larger the nation—the greater the responsibility to consult.

The greater the stakes—the more compelling the need to "hasten slowly"—and only in multilateral concert.

As an internationalist I am convinced that most nations at least have one common aviation objective—to provide the best possible service to the greatest number of people at the lowest economic prices. Different approaches to achieve this objective cannot be resolved unilaterally, or even bilaterally.

Within a community of sovereign nations there is no substitute for multilateral dialogue and consensus.

As President Carter rightly observed at the outset of this Congress: "In an interdependent world, we can only advance when we advance together." ●

PUBLIC'S ANGER AND FRUSTRATION WITH BUREAUCRACY

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. IRELAND. Mr. Speaker, since the passage of proposition 13 in California, elected officials at all levels of government have become more conscious of the public's anger and frustration with the bureaucracy.

I want to take just a moment to share some material with you which shows in a dramatic fashion, just how incredible a situation can be and why the people are getting fed up.

The following material was brought to my attention by my good friend, the Honorable John J. "Toby" Holland, mayor of Palmetto, Fla. I think his letter speaks for itself.

PALMETTO, FLA.,
September 28, 1978

Hon. JAMES E. CARTER,
Office of the President,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I feel that we have something in common in that we are both elected public office holders and because of this I think that you might appreciate and understand the problems of a fellow public servant.

Back in April of this year, a young reporter with the Sarasota Herald Tribune was doing a story on the residency requirements for City of Palmetto employees. I was quoted (and rightly so) using a common figure of speech that "I didn't care where an employee of this city lived as long as they were good God-fearing, taxpaying citizens".

I was rather more than astounded when I received correspondence from the local ACLU labeling my statement "as flagrant an example of discrimination as can be imagined".

Since that time my file has grown with various newspaper articles stemming from the ACLU complaint. Their office evidently complained to every bureaucrat in Tallahassee and Washington that makes more than a dollar a day. I am somewhat exasperated that one of these bureaucrats from Washington threatened to cut off federal revenue sharing to this community because of my statement. In point of fact—every federal dollar the city receives still carries the statement "In God We Trust".

I know with many pressing matters before you (the Far East, problems of the SALT Agreement, inflation, and many other important considerations) that one more little problem from the City of Palmetto would not overburden my president.

I resent the tax dollars being spent to finance such a ridiculous investigation. The time it takes to write letters, send investigators, etc. has no doubt amounted to a healthy sum. I could recommend any number of more worthwhile uses for these monies.

In closing I would like to offer you some advice from one Southern Baptist to another, to be extremely careful in your remarks. I noted in one of your statements to congress that you quoted from the Bible, for which I commend you since I think that everyone should believe in something. But this type of quotation might incite the federal bureaucrats to cut off federal funds for the operation of the White House.

Sincerely,

JOHN J. HOLLAND,
Mayor.

OFFICE OF THE
SECRETARY OF THE TREASURY,
July 24, 1978.

Hon. TOBY HOLLAND,
Mayor, City of Palmetto,
Palmetto, Fla.

DEAR MAYOR HOLLAND: The Office of Revenue Sharing is in receipt of a communication

which alleges entitlement funds have been used by your government in a manner in violation of Section 122(a) of the State and Local Fiscal Assistance Act of 1972, as amended, and Section 207(a) of the Public Works Employment Act of 1976, as amended by the Intergovernmental Antirecession Assistance Act of 1977. Specifically, it is alleged that the City of Palmetto, Florida practices religious discrimination in its employment practices.

The cited statutes provide that no person shall, on the ground of race, color, national origin, or sex, be subjected to discrimination under any program or activity of a recipient government receiving entitlement funds. The statutes further prohibit discrimination on the ground of age as defined under the Age Discrimination Act of 1975, handicapped status as defined in Section 504 of the Rehabilitation Act of 1973, or religion under the Civil Rights Act of 1964, as amended, respectively.

This notice of our receipt of the above cited communication is being provided in accordance with Section 51.61(b) of our Rules and Regulations. This letter does not constitute a notice of noncompliance.

We would like to advise you that, as the primary recipient of revenue sharing funds, you have a responsibility to determine that the bank in which you deposit revenue sharing funds is an equal opportunity employer and lender. At this time, we are not requesting information to document the employment and lending policies and practices of the banks in which revenue sharing funds are deposited; however, you should request and retain on file documentary materials attesting to such, so that it is available when requested.

A staff member will contact you soon in order to discuss the allegation and to initiate the processing of this communication as provided for under Section 51.61 of our Rules and Regulations.

Sincerely,

JOHNNIE M. FRANKLIN,
Civil Rights Division,
Office of Revenue Sharing.●

WOMAN OF VALOR

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. HOLLENBECK. Mr. Speaker, I rise today to honor a very courageous woman, Mrs. Beate Klarsfeld. Golda Meir described her as a "Woman of Valor—a title that has no peer in the Jewish tradition." This brave woman has led a daring crusade to hunt down Nazi criminals and bring them to justice in courts of law in Germany and France.

Born Beate Kunzel, a Christian, in Berlin in 1939, she learned about Nazism and the horrors its leaders inflicted on the Jewish people only after her arrival in Paris in 1960 and her marriage in 1963 to Serge Klarsfeld, a Jew whose father had been a member of the French Resistance and died in the gas chambers in Auschwitz. On a West Berlin podium in November 1968, Beate delivered "the slap heard around the world" to the face of Kurt-George Kiesinger, Chancellor of West Germany. With this public slap, and at the price of her own arrest and prison sentence, Beate Klarsfeld thus focused world attention on the Nazi leader's past and his involvement in Nazi crimes.

She and her husband planned the successful capture and arrest of former SS Captain Klaus Barbie, "the Butcher of Lyon", who had fled to South America. In another daring episode, Beate tried to kidnap Kurt Lischke, former chief of the Gestapo Bureau of Jewish Affairs in France and now a senior bank clerk in Cologne. The plot failed and Beate was herself arrested and sentenced to jail despite the pleas of French President Valery Giscard d'Estaing and other political leaders. Although she was expelled from Germany, one important result was the promise of Chancellor Helmut Schmidt to urge the West German Parliament to ratify a convention allowing German courts to try criminals already convicted in France.●

THE QUOTA GAME

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. WALKER. Mr. Speaker, as my colleagues are aware, I firmly support efforts to promote equal opportunity for all; however, the use of quotas to further the progress of one group at the expense of others is a matter of grave concern to me.

In an article on September 30, 1978, Columnist John D. Lofton, Jr., pointed out the extremes to which quotas can be used. Quotas are discriminatory no matter who implements them, and I commend Mr. Lofton's comments to my colleagues' attention.

The article follows:

QUOTA GAME: COUNT THE INDIAN BASSOONISTS

(By John D. Tofton, Jr.)

WASHINGTON.—You're out for an evening of Bach. Suddenly—halfway through the second movement of the Bradenburg Concerto No. 1 in F Major—it hits you like the proverbial ton of bricks: not one oboe player is an American Indian! Not one violinist is Puerto Rican! The French horn players, the bassoonists, the harpsichord player, they're all (gulp) white, with not one black, Asian-American or Mexican-American among them!

Has this ever happened to you? Well, it hasn't happened to me either, but then admittedly I'm kind of strange. I go to listen to a symphony orchestra, not to analyze its racial and ethnic makeup. Earl Raines, executive director of the Pasadena Community Services Commission, is different, however.

In the spring issue of the U.S. Civil Rights Commission's Civil Rights Digest, in an article titled "Behind the Cello Player," Raines reports on a questionnaire he sent to 135 American symphony orchestras. The American Symphony Orchestra League says there are about 800 symphony orchestras in the United States employing about 10,000 musicians. Of the 89 symphony orchestras answering Raines, he learned that among these 6,800 musicians no orchestra employed more than 10 minority players—including blacks, browns, Indians, and Asians.

Half of the responding orchestras reported that at least one member of an ethnic minority serves on their boards. An additional 38 percent reported no minorities on their boards, although one stated that minorities had been asked, and another reported that minorities had served on the board in the past. The remaining 12 percent either failed to answer the question on minority participation on their boards, or—in one case—reported, "We don't think that way."

Well, I say "congratulations!" to this one symphony that had the courage to tell Raines, in effect, to take his questionnaire and shove it.

NO CONDITIONS TO QUALIFY

In his article, Raines blames, among other things "overt acts of racial discrimination," and complains that symphony orchestras "by no means represent America's population." He says that "a long history indicates that minorities have been bypassed in the orchestras' recruitment and employment programs." In an interview, Raines tells me that this "appalling picture" exists because there has been "rampant racism" in symphony orchestras for the past 50 to 100 years.

When I ask, if he can give me the name of one qualified individual who was either denied a position with a symphony orchestra or was fired from one because of his or her ethnic or racial identity, Raines replies:

"No orchestra in its right mind would admit this. You have to look at the whole picture. No one will admit this exists. We're caught in a vicious circle in this country where there's no system whereby conditions are open for people to become qualified."

When I press him, noting that if this racism is as rampant as he says, it should be no problem to come up with the name of one person so I can investigate his allegation, Raines says he doesn't have such a name "in his head." He suggests that I check with either the Equal Opportunity Employment Commission or the Civil Rights Commission.

Seeing that I am getting nowhere fast asking for the names of specific victims of discrimination, I ask Raines about the racial and ethnic makeup of his ideal symphony. What would be the appropriate percentage of Indian oboe players? Puerto Rican violinists? Asian-American bassoonists? Should a symphony reflect the percentage of these groups in the entire U.S. population? Or their percentage in the area in which the orchestra plays? Should each section of instruments reflect the percentages of these ethnic and racial groups? or just the whole orchestra?

Raines declines to state an ideal percentage for any of these groups, saying that to do so would be "a quota which is undesirable by almost everybody." But, he says contradicting himself, the entire symphony should reflect the percentage of these groups in the country "if they're receiving federal funds." Raines notes that if privately funded symphonies do not adhere to such a system, "we can only say, 'Isn't that a shame?' "

TALENT, NOT QUOTAS

Earl Raines' article is ridiculous. It is an example of the quota mentality run amok. It is methodologically shoddy and a journalistic disgrace in that it is an ax job on the symphony orchestra industry without giving the industry any space to respond. This latter shortcoming is the fault of Civil Rights Digest editor, Suzanne Crowell. When I expressed this criticism to her, Crowell admit-

ted that the Raines piece was "an advocacy article written from a distinct point of view." She refused to characterize it as "fair," saying only that it was "not unfair."

Raines' "innovative" suggestion that federal, county and city governments should all require affirmative action plans before any symphony can get tax dollars is absurd. Symphony orchestras should choose their musicians according to their musical talents, and not on the basis of their membership in certain government-approved racial or ethnic groups.

Footnote: Following Raines' suggestion, I ask Gene Mornell, special assistant to the staff director of the Civil Rights Commission, if he knows of any racial or ethnic discrimination cases involving symphony orchestras. Noting that the commission does not have jurisdiction over such cases, he says he "seriously doubts" that there have been any such complaints to the commission. When I ask about Raines' article, he says he is "not very impressed" with it and never is with prima facie cases of discrimination. When I call the piece lousy journalism, he says: "I'm afraid a lot of articles like this have run in the Digest."●

H.R. 12161—CONRAIL AUTHORIZATION

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MURPHY of New York. Mr. Speaker, an unfortunate ruling by the Parliamentarian foreclosed me from offering amendment No. 1 which appeared on page 35633 of the CONGRESSIONAL RECORD on October 11, 1978. Under leave to revise and extend my remarks, I am inserting my prepared statement in support of my amendment together with a copy of my letter to Chairman O'Neal of the Interstate Commerce Commission protesting that agency's neglect of its duty to guarantee equalization of rail freight rates between and within ports under the amendment which I offered and Congress adopted as section 202(f)(3) and (4) of the "4–R" Act of 1976.

The ICC, rather than enforcing the law, referred the subject of rail rate equalization between and within ports to its Rail Service Planning Office. The unfortunate preliminary report of the RSPO produced a statement by the city of New York which shows that $1.4 billion in public investments—public, State, and local—are being jeopardized by ConRail's refusal to obey the law and the ICC's inability to enforce the law. The statement by the Department of Ports and Terminals of the city of New York follows my prepared statement and letter to Chairman O'Neal:

STATEMENT BY HON. JOHN M. MURPHY, IN SUPPORT OF INTRAPORT FREIGHT RATE EQUALIZATION AMENDMENT

My amendment will give a prompt, effective remedy to enable injured parties to enforce existing law where, as in the case of ConRail in New York, a carrier has a virtual monopoly of rail freight traffic to and from a port. ConRail refuses to obey the law, and the Interstate Commerce Commission has been unable or unwilling to enforce the law.

I supported, and I still support, the creation of ConRail pursuant to the Regional Rail Reorganization Act of 1973, known as the "3R" Act, and the Railroad Revitalization and Regulatory Reform Act of 1976, known as the "4R" Act. ConRail was established to provide the freight rail service in the Northeast formerly furnished by the bankrupt railroads, and we all have a stake in its success.

Unfortunately, in the Port of New York, the only port where ConRail has a virtual monopoly of freight rail traffic, ConRail has refused to give rail service on a non-discriminatory basis to all points in the Port—a service which ConRail was created to provide.

Because New York is the only port where ConRail has a monopoly, it is the *only* port where discriminatory rail rates now prevail between terminals within the port. I do not believe that Congress should vote to authorize the additional $1.2 billion of public funds now sought by ConRail without assurance that ConRail can be required to mend its ways and obey the law.

In the 94th Congress, anticipating our present problem, I offered an amendment which was adopted by the Congress and which is now Section 202(f)(4) of the "4R" Act. My amendment provided that nothing in this Act "shall be construed * * *"

"(4) to affect the authority and responsibility of the Commission to guarantee the equalization of rates within the same port."

That amendment was expressly designed to preserve the rail freight rate parity which has prevailed within the Port of New York for over a century and a half, as I explained to the House at that time. My remarks can be found in the Congressional Record of December 17, 1975, page H 12805. Ironically, only last July, the Interstate Commerce Commission itself reiterated that "the tradition of rate uniformity began shortly after the first railroad lines into New York were constructed. The practice of rate equalization, therefore, ante-dates Federal transport regulation by half a century."

Millions of dollars have been invested in reliance upon rail freight rate parity within the Port of New York, and thousands of jobs depend upon intra-port parity.

Unhappily, it developed at the hearings held on April 17 of this year before the Subcommittee on Transportation and Commerce in connection with the $1.2 billion supplemental authorization now sought by ConRail, that the concerns which gave rise to my amendment have been borne out by events. Even worse, the Interstate Commerce Commission has not exercised its authority, nor has it fulfilled its responsibility under Section 202(f)(4) of the "4R" Act to "guarantee" the equalization of rail freight rates within our great Port.

Specifically, it appeared at the hearings on the supplemental authorization now before us, that ConRail has abused its monopoly power so as to discriminate against points on the New York side of the bi-state port which are served via water by the two surviving New York Harbor terminal railroads: New York Dock Railway and Brooklyn Eastern District Terminal. With the advent of ConRail, New York Dock Railway and BEDT published tariffs extending their rail marine service to all points within the Port, and BEDT took over the operation of ConRail's remaining rail marine facility in the Port at Greenville Piers, thereby relieving ConRail of the obligation to provide the service by water to New York points in the Port formerly rendered by its predecessors, of which there were as many as nine only a decade ago. ConRail, however, far from reciprocating, has adopted or established rates which discriminate against New York points within the Port.

ConRail has also discriminated against the Port and the New York Harbor terminal railways by limiting routes and rates to points on its own line and in one instance, on the Long Island Railroad, thereby carefully excluding points served by the New York Harbor terminal railroads.

Finally, ConRail has limited container service—which now accounts for roughly 80% of all rail export-import traffic in the Port of New York—to its own terminals thereby depriving New York points of direct rail service for container freight. In effect, ConRail has been cutting off New York's rail life-line to the United States west and south of the Hudson River.

The sure result has been to disrupt existing patterns of rail traffic to and from the New York side of the Port. This fosters an increasing resort to trucking freight through the already congested, deteriorating New York City streets, tunnels and bridges which only adds to pollution and a massive waste of energy. Moreover, there has been a massive diversion of rail traffic from the New York side of the bi-state port with accompanying flight of business and a loss of jobs.

The recent rail strike has reminded us all just how essential rail service is to our economy. New York's economy has suffered as rail service to New York points within the Port has deteriorated over the past several years.

This drastic decline is shown by the fact that the number of carloads handled by New York Railway and BEDT across New York Harbor has dropped to one half of their 1973–1974 levels, despite an extension of their carfloat service to the entire Port with the advent of ConRail. The dismal figures are as follows:

Year	New York dock	Bedt.	Total carloads
1973	11,629	17,392	29,021
1974	11,380	18,150	29,530
1975	8,377	12,526	20,903
1976	6,443	9,403	15,846
1977	6,084	8,368	14,452

ConRail's discrimination not only threatens long-standing investments and jobs, it also jeopardizes major investments made by New York City, New York State and the Federal Government. New York State has already committed $9.9 million from a State Transportation bond issue, to improve rail facilities on the Brooklyn waterfront connecting overland with ConRail, with more investment to come. New York City has already spent $58 million to establish the Northeast Marine Terminal, and it has spent $11 million, with $44 million more projected, on an additional terminal at Red Hook, all on the Brooklyn waterfront. These public investments were planned and were underway long before it became apparent that direct rail service to these terminals would no longer be regularly available and that container traffic would constitute such a large share of rail freight traffic.

ConRail has also insisted, in effect, on a surcharge to move rail freight to its own facilities at Cranford Junction, where it connects via the Staten Island Railroad Co. with the new container port at Howland Hook, Staten Island. Such a surcharge jeopardizes a $75 million investment by New

York City and a federal investment of $6.6 million, including, ironically, $2.6 million in EDA funds for rail facilities at Howland Hook. By insisting on such a surcharge, ConRail thereby discriminates against American-flag ocean carriers—United States Lines and Farrel Lines—which are committed to the Staten Island Howland Hook Terminal, in favor of their foreign-flag competitors.

ConRail has been able to act in this arbitrary and discriminatory manner only because it has a virtual monopoly of line-haul rail freight traffic to and from the Port of New York. To repeat, this discrimination exists only in the Port of New York and only because of ConRail's unique monopoly.

ConRail was established by Congress to preserve the service formerly provided by the bankrupt line-haul carriers. In the Port of New York, ConRail has been able to duck its responsibility to provide that service only by virtue of its monopoly power and the failure of the Interstate Commerce Commission to enforce the law. ConRail has thereby frustrated the goals set forth in Section 206(a) of the "3R" Act which led to its creation, namely, "(4) the preservation . . . of existing patterns of service by railroads (including short-line and terminal railroads) . . . and the utilization of those modes of transportation . . . which require the smallest amount of scarce energy resources: . . . (6) the attainment and maintenance of . . . environmental standards . . . and (8) the minimization of job losses . . ."

My amendment, like its predecessor, Section 202(f)(4) of the "4R" Act, is designed to require ConRail, a monopoly created by the Congress, to conform to those goals which Congress established in the "3R" Act, and to establish equal rates for all types of traffic to all points served by rail within the Port as mandated by the "4R" Act.

At the hearings on this bill last April, I.C.C. Chairman, A. Daniel O'Neal, announced a study of the port equalization of rail freight rates by its Rail Services Planning Office. My own views on RSPO's Preliminary Report are expressed in the attached letter of protest to Chairman O'Neal where I concluded: "I trust the final report will reflect the law and the facts. Its first effort does neither." The I.C.C.'s failure to enforce my amendment to the "4R" Act is particularly ironic in view of its recent reiteration, in *S & K Farms, Ind.* v. *Long Island R. Co.*, 357 I.C.C. 562, that intra-port parity has prevailed since the creation of rail service to the Port of New York a century and a half ago.

Where regulation proves ineffective to protect the public interest against the abuse of monopoly power by a common carrier like ConRail, the injured parties should have the right to seek redress in the courts.

My amendment would give injured parties the right to resort to the Federal courts to obtain relief and redress where ConRail fails to equalize rates and to provide full rail service within the Port of New York as required by this amendment and by existing law, particularly Section 202(f)(4) of the "4R" Act. Since ConRail has a virtual monopoly of rail freight traffic in the Port, my amendment would give injured parties the remedies provided in cases of monopolization and restraint of trade under the Clayton Act, i.e., treble damages and injunctive relief—both temporary and permanent. To give an injured party a fighting chance to litigate on relatively equal terms with such a behemoth as ConRail, my amendment provides that if the plaintiff wins, he will be entitled to recover the costs of suit and a reasonable attorney's fee as provided in cases of monopolization and restraint of trade by the Clayton Act.

My amendment provides these additional remedies to redress violations of the Interstate Commerce Act only where, as here, ConRail has a virtual monopoly, over 75% of the rail freight traffic to and from a port.

The existing law, for which my amendment would give redress, provides that it is the duty of rail carriers, under the Interstate Commerce Act, to render non-discriminatory service to all points served by rail within a port. As I have already said, intra-port parity has historically prevailed within the Port of New York since rail service began there a century and a half ago, and it has recently been reiterated by the Congress in adopting Section 202(f)(4) of the "4R" Act. I know of no other port where normal rail services give rise to discriminatory rate surcharges to separate points within the port.

The second sentence of Section (a) of my amendment also gives a remedy where a monopoly railroad breaches the duty imposed by Section 1(4) of the Interstate Commerce Act on all rail carriers establishing through routes to provide reasonable facilities for operating such routes "which shall not unduly prefer or prejudice any participating carriers." This will enable injured parties to obtain redress if ConRail continues to breach its duty to provide full rail service, container as well as break-bulk, on a non-discriminatory basis to all points served by rail in the Port of New York.

Finally, Section (d) of my amendment expressly preserves the authority and responsibility of the ICC to guarantee the equalization of rates within the same port, pursuant to Section 202(f)(4) of the "4R" Act.

The fate of our great Port and City are at stake, together with their ability to surmount their present difficulties and to thrive again as they have in the past. If my amendment is adopted, there should never again be an occasion for us to ask the Congress for help. Given a fair field and no favors, we shall prosper on our own.

WASHINGTON, D.C.,
June 22, 1978.

Hon. A. DANIEL O'NEAL,
Chairman, Interstate Commerce Commission, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to express my deep concern about the conclusions reached in the preliminary report by the Commission's Rail Services Planning Office on its port equalization study.

The preliminary report misreads the legislative history, the clear language, and the express purpose of the amendment I sponsored which is now Section 202(f)(3) and (4) of the Railroad Revitalization and Regulatory Reform Act of 1976. The Rail Services Planning Office's preliminary report states (p. 8):

"A review of the legislative history appears to indicate that Congress intended continued flexibility on the Commission's part on regulating port differential rates."

On the contrary Section 202(f)(4) explicitly imposes on the Commission "the authority and responsibility . . . to guarantee the equalization of rates within the same port." As my statement on the Floor of the House made plain, the purpose of this section of my amendment is to preserve the rail freight rate parity which has historically existed within the Port of New York (p. 41390 of the CONGRESSIONAL RECORD for December 17, 1975).

With respect to intra-port rate parity, my amendment does not give, nor was it intended to give, "continued flexibility on the Commission's part on regulating port differential rates" as the preliminary report misstates. Rather, Section 202(f)(4) imposes on the Commission the affirmative "authority and responsibility" to "guarantee" continued rail freight parity within the Port of New York.

That need is manifest in the light of the hearings before the Subcommittee on Transportation and Commerce which were held on April 17, 1978. There it appeared, as stated in my separate views in House Committee Report No. 75–1175, that ConRail has consistently and deliberately discriminated against New York points served by rail in the Port of New York, particularly those served by New York Dock Railway and Brooklyn Eastern District Terminal on the Brooklyn waterfront and by the Staten Island Railroad Company at Howland Hook. There is no telling how much traffic was diverted from the Port and City of New York as a result of ConRail's persistent discrimination.

ConRail acknowledged that it was required to equalize rates on carload traffic throughout the Port and claimed that it has done so. But, with respect to the "tremendous shift toward containerized traffic"—which, as you testified, constitutes roughly 80% of export, import rail freight to and from the Port of New York—ConRail claimed that it had no duty to maintain rate parity within the Port although discrimination is just as harmful whether the freight is in a car, a trailer or a box.

ConRail stated that it provided container service only to its ramps on the New Jersey shore of the Port, although ramps are needed only for TOFC and not for COFC traffic. Moreover, ConRail insists on a surcharge to move container traffic beyond its ramps in New Jersey to its own terminal at Cranford Junction where the Staten Island Railroad Company connects with the ramps constructed at public expense at Howland Hook Terminal on Staten Island. Furthermore, ConRail was unwilling to give through container service to the Brooklyn waterfront where ramps can be provided, if needed, without a surcharge or, in ConRail's euphemism, "on a basis that will not reduce the contribution of the traffic to ConRail.".

My amendment is expressly intended to empower and require the Commission to preserve the rail freight rate parity which has prevailed historically within the Port of New York against just such predatory discrimination by this publicly funded, monopoly carrier.

In offering my amendment on the floor of the House, (p. 41390, December 17, 1975), I drew attention to USRA's statement in its Preliminary System Plan that:

"Traditionally rates to the greater New York area have been equalized. This equalization was predicted on a premise that New York City and the Eastern New Jersey shoreline were integral parts of a single economic entity."

At that time, I also pointed out to the House that the report of the Joint Agency Committee, consisting of all the public agencies concerned with public transportation in the Port of New York, stated:

"It is essential that surcharges not be imposed which would have the adverse effect of discriminating against the New York side of the bi-state Port. Such a system would place the City of New York in a serious position vis-a-vis competition with other Port areas, and should be avoided at all costs.

"In the Port of New York, the orderly development of commerce and industry and the protection and preservation of existing manufacturing, commercial and rail facilities require the maintenance of the rate parity system.

"This equalization must be maintained. The Interstate Commerce Commission and the Courts have on numerous occasions

recognized the single entity concept and in reliance thereon, the City of New York, the Port Authority and extensive private business and commercial interests have made large investments in Port facilities that need to be protected and fostered."

The Rail Services Planning Office staff fails utterly to take into account in its preliminary report the importance of rail freight rate parity within the Port of New York. If parity is not restored, vast public and private investments will be jeopardized and countless jobs will be lost in this nation's greatest natural port.

Moreover, since the Commission must consider the environmental consequences of its acts, it is surprising that the Rail Services Planning Office staff, in its preliminary report, does not even mention the waste of energy and the pollution and congestion of the already crowded, deteriorating streets of the City of New York which would ensue with increasing use of trucks if the historic rail freight rate parity within the Port is not preserved.

With respect to inter-port parity, the Rail Services Planning Office's report again misreads the legislative history. Congressman John Young of Texas explained that my amendment, as adopted by the conference committee, was designed to preserve "the authority and responsibility of the Commission to guarantee the equalization of rates between ports and within ports," (H 13148, December 19, 1975).

This intent was corroborated on the Floor of the House by the Chairman of the Interstate and Foreign Commerce Committee, the Honorable Harley O. Staggers, who also corroborated Congressman Young's statement that my amendment preserves the authority of the Commission with respect to rate relationships between ports and "its authority and responsibility to guarantee rate equalization between ports and within the same port."

The Rail Services Planning Office's preliminary report misreads the legislative history, the intent and the plain language of my amendment. Ironically, the preliminary report recognizes, (p. 13), "the declining share of general commodities traffic" in the Port of New York, but it fails to recognize that deteriorating rail service to the Port of New York is a principal cause of the "underlying changes in the economic base of the metropolitan New York area," which, in turn, have led to New York's decreased share of traffic. It is precisely this deterioration of rail service to, and within, the Port which my amendment was designed to redress.

Since the report is preliminary, I earnestly hope and expect that the Commission will exercise its authority and responsibility under my amendment in the first instance by directing its Rail Services Planning Office to restudy the equalization of rail freight rates, both between and within ports, in the light of the language and the spirit of the law.

Before reaching any final conclusions, I hope the Rail Services Planning Office staff will review the record of the hearings held before the Subcommittee on Transportation and Commerce on April 17, 1978.

I trust that the final report will reflect the law and the facts. Its first effort does neither.

Sincerely,

JOHN M. MURPHY,
Member of Congress.

RAIL RATE EQUALIZATION TO AND FROM PORTS

SUMMARY OF THE CITY OF NEW YORK'S POSITION

The Preliminary Report of RSPO on equalization of rail rates to and from ports, while informative on a number of points, is seriously misleading, and ignores key problems faced by Northeast ports, especially the Port of New York.

The City of New York strongly favors retaining port equalization for a number of reasons, not the least of which is that the Port of New York is the lifeline to the City's economy. After eight years of decline in the economy of the City and the State the trends have just begun to reverse themselves. We have registered a net increase in jobs for the first time since 1969. Throughout this period the Port has been the City's one bright spot: tonnage in and out of the Port has been maintained and has increased, although the Port has declined on a relative basis to other ports in its total share of tonnage.

The City, along with the State of New York, the Port Authority of New York and New Jersey, and the United States Government, has invested or will invest over the next five to ten years more than $1 billion in port development, industrial parks and our markets—all of which are dependent upon quality rail service. The City cannot permit this massive investment of public funds—and the investment of additional millions of dollars by private concerns—to be endangered through a change in policy. The City must protect its investment and the City must be a full partner in the economic recovery of the entire region.

For these reasons (and others which are outlined in the following pages), the City of New York's position on equalization is the following:

1. Inter-port Equalization of Rail Rates must be maintained;

2. Intra-port Equalization of Rail Rates must be guaranteed by the ICC;

3. Equalization of Rail Rates must be extended to Container traffic from the so-called Equalized Areas—both Inter-port and Intra-port;

In addition to the general position of the City of New York outlined above, the City also makes the following recommendations to the Rail Service Planning Office of the Interstate Commerce Commission:

4. RSPO in conjunction with the relevant Federal agencies, especially the Federal Maritime Commission, should undertake a comprehensive study of import and export traffic which would address at a minimum the following questions:

(a) Quality of Date on traffic in and out of ports—how can the data be improved;

(b) What is the origin of the various commodities that move through ports that are now under the equalization policy;

(c) By what mode do the commodities arrive in the ports (or leave the ports);

(d) In what quantities do these commodities arrive in the ports under the equalization policy;

(e) To what extent have port authorities, municipalities, the States and the Federal government, and private concerns made investment decisions based upon the existing equalization policy and the assumption that equalization would be extended to container traffic;

(f) Based on the data gathered in items 4(a)–4(e), what would be the impact on a change in one aspect of the entire transportation policy with regard to imports and exports—how much investment would be lost, what would be the number of jobs gained or lost, etc.

5. The RSPO report assumes that there is competition among the railroads; for the Northeast there is none, especially for the Port of New York and New Jersey which is served by a quasi-governmental agency, the Consolidated Rail Corporation (Conrail) RSPO should take this factor into account in its final report.

INVESTMENTS IN THE PORT OF NEW YORK

The City of New York has made a sizable investment in its port facilities, particularly, in Brooklyn and in Staten Island. Table I below contains the investments already in place for marine terminals and break bulk piers. Table II contains investments that are already being planned and committed for these facilities for their completion. Table III contains the City's investments in its markets which are dependent upon quality rail service. The loss of rail traffic to the City by removal of equalization would also endanger these facilities. Table IV contains investments already in place and committed by other levels of government in port facilities and industrial parks which also require quality rail service.

TABLE I.—*Recent New York City investments in port facilities*

Facility:	Investment
Northeast Marine Terminal, Brooklyn	$ 52,000,000
Howland Hook Marine Terminal, Staten Island	85,350,000
Pier 36, East River, Manhattan	6,350,000
Pier 42, East River, Manhattan	3,500,000
Red Hook Container Port, Brooklyn	11,000,000
23rd Street Piers, Brooklyn	10,000,000
Total investments in place	168,200,000

TABLE II.—*Investment needed for completion*

Facility:	Investment
Northeast Marine Terminal, Brooklyn	$ 50,000,000
Howland Hook Marine Terminal, Staten Island	120,000,000
Pier 42, East River, Manhattan	3,000,000
Red Hook Container Port, Brooklyn	44,000,000
Total needed for completion	217,000,000

TABLE III.—*Recent New York City investment in market facilities*

Facility:	Investment
Hunts Point Market, Bronx	$124,000,000
Brooklyn Meat Market	35,000,000
Tota. investment in markets	159,000,000

TABLE IV.—*Other investments in New York facilities*

Facility and investor:	Investment
Fulton-Atlantic Ave. Piers, Brooklyn, Port Authority of New York & New Jersey	$100,000,000
Staten Island Industrial Park, Public Benefit Corporation (NYC)	25,000,000
Industrial Parks in New York City (committed), Port Authority	500,000,000
Dredging and Drift Removal, Port of New York and New Jersey, U.S. Army Corps of Engineers	200,000,000
Bay Ridge Rail Connection to the Brooklyn Waterfront, State of New York DOT	28,000,000
Total other investments planned or committed	853,000,000

TABLE V.—*Summary*

NYC Investments—Table I	$168,200,000
Investments needed for Completion	217,000,000

NYC Market Investments	159,000,000
Other Investments in Facilities	853,000,000
Total	1,397,200,000

This $1.4 billion investment—investments which have already been made or are underway—represents a substantial commitment by all levels of government to the development of the port and to facilities that are dependent upon either the port or upon quality rail service.

The removal of equalization of rail rates will be an incentive for Conrail, a monopoly already somewhat unresponsive to the needs of this port, to further reduce service in and out of the Port of New York. The investments planned and committed above have been made on the assumption that rail service would be improved into the City, not reduced. Equalization is needed for the City to protect its investment. Extension of equalization to container traffic is a vital ingredient in the viability of the three container ports under construction or being expanded in New York City: Howland Hook (Staten Island), Northeast Marine and Red Hook (Brooklyn). The planning for these facilities goes back to the 1960s, to the beginning of the traffic in containers. Equalization of container traffic would help guarantee this investment.

The failure of the ICC to extend equalization to container traffic will seriously undercut the City's investment in its three container ports.

The failure of the ICC to guarantee interport equalization for general cargo will seriously undercut the City's investment and the Port Authority's investment in break bulk piers.

The failure of the ICC to guarantee intraport equalization will seriously undercut the entire investment in maritime facilities by the City of New York and the Port Authority.

The failure of the ICC to guarantee interport and intra-port equalization will undercut the State of New York's investment in extending a rail connection to the Brooklyn waterfront—an extension that should have been done by Conrail but is being done at State taxpayers' expense.

The failure of the ICC to guarantee interport and intra-port equalization will seriously undercut the massive investments that have been committed for the City's markets and for the industrial parks, both of which are heavily dependent upon quality rail service. Reduction of service by removal of equalization threatens the viability of these facilities.

COORDINATION OF FEDERAL AGENCIES IN ECONOMIC DEVELOPMENT

It is not the position of the City of New York that the ICC should become directly involved in economic development programs. But it is the position of the City of New York that the ICC cannot ignore the existing and planned economic development programs underway, programs that are based in part on the existing transportation policies of the United States Government. Changing one aspect of this policy without coordinating the changes with the relevant Federal agencies threatens chaos for the economic recovery programs now underway in the City of New York.

The Office of the President of the United States is coordinating an economic recovery program in the South Bronx of more than $1 billion. A change in the equalization policy which would cause a reduction in rail service will seriously undermine the viability of the Hunts Point Market in the South Bronx, the largest wholesale food market in the world. As a major employer in the South Bronx its success is an essential ingredient for the success of President Carter's Program.

Furthermore, the U.S. Army Corps of Engineers (see Table IV) is committing approximately $200 million to dredge and remove hazards to navigation in the New York harbor. The removal of equalization and the non-extension of equalization to containers will minimize the effectiveness of this Program.

The U. S. Department of Commerce's Economic Development Administration has identified Overall Economic Development Plan areas in the City of New York: the South Bronx, Brooklyn, Manhattan and in Staten Island These OEDPs are able to tap Federal funds for various economic development programs, including programs for waterfront development. A change to the detriment of New York in equalization policy will undercut these efforts.

The U S. Department of Commerce also administers the Coastal Zone Management program which the City of New York participates in. The State of New York has received approximately $3 million in Federal funds for comprehensive Coastal Zone Planning. A significant portion of this planning includes the development of the City's maritime facilities and the rail connections to these facilities. A failure of the ICC to guarantee equalization to containers and to guarantee equalization for general cargo will render these Coastal Zone Plans useless and deny the City and the State access to Federal funds under the CZM program.

The Federal Reserve Bank of New York has described the Port of New York as the lifeline to the region. The economy of the entire area is dependent upon the health of its Port. The health of the Port is dependent upon investment of capital funds and upon a rail policy that allows the Port to flourish. The City, despite the tremendous fiscal problems it has faced over the past four years is making a tremendous commitment to the health of its Port. The City is taking the steps necessary to guarantee its economic future.

The Federal government should not work against its own interests. The economic recovery of New York City is in the interest of the nation. It is sound public policy. Any other policy that leads to the erosion of the City's economy is detrimental to the national interest.

DEFICIENCIES IN THE PRELIMINARY REPORT

There were a number of deficiencies in the RSPO Preliminary Report that the City of New York has comments on. These deficiencies involve inadequate discussion of certain issues that make the New York Port a special case and the inadequate data upon which the RSPO is intending to make a decision, a decision that could place the $1.4 billion investment in New York facilities in jeopardy.

1. Data. The Preliminary Report admits that there is not sufficient data upon which a responsible decision on the removal of equalization can be made. The investments of shippers, carriers and governments are made upon the assumption of pre-existing policy. While the data is insufficient to predict the effects of a change completely, common sense indicates that the major effect will be disinvestment in New York City.

Because of the inadequate data, the City of New York has recommended that a study be carried out which would determine the modal distribution of cargo into and out of the equalized ports, the origin or destination of such cargo, and the quantities involved. (See p. 2 of this report).

2. Ocean Rates. The ICC has jurisdiction over inland rail rates. The Federal Maritime Commission has jurisdiction over the ocean rates. The ocean rates are equalized by law. A change in the inland rail rates without a compensating change in the ocean rates will work to the preference of some ports and to the prejudice of the Port of New York and other Northeast ports. It would be irresponsible for the Interstate Commerce Commission of the United States to favor one or two ports over all others in the Northeast by changing only one aspect of an entire transportation policy. Such a change in policy, i.e. removal of equalization on inland rail rates, would be contrary to the intent of the Congress of the United States which prescribed equalization of the maritime rates.

3. Conrail. One of the reasons for the RSPO study is to determine if competition will improve rail services and to determine if equalization of rail rates for import and export is a barrier to competition. The City of New York and the entire Port range of New York is served by one railroad: the Consolidated Rail Corporation (Conrail) which is a creature of the United States Government. Since only one railroad serves the port area the entire region is at its mercy. Conrail has not seen fit to extend the rail connection to the Brooklyn waterfront; hence the State of New York taxpayers are paying for the improvements. Removal of equalization will not promote competition in the New York Port area. If anything, removal of equalization will further reduce rail service to New York. Conrail has tried to avoid any increase in service to New York. Since Conrail is subsidized by the U. S. Taxpayers—including taxpayers in the City of New York—it must provide the services required to make this City economically healthy. The RSPO study does not take this special case into account in a realistic fashion.

4. Intra-Port Equalization. The discussion of Intra-port equalization in the Preliminary Report is almost non-existent. The City of New York's position is quite clear:

(a) There is no argument in favor of Inter-Port Equalization that does not apply equally to Intra-Port Equalization;

(b) The intent of Congress through the so-called Murphy amendments to the 4R Act is to guarantee Intra-Port Equalization;

(c) Intra-Port Equalization must be guaranteed, especially in light of the fact that Conrail is the only rail into New York and opposes extension of equalization to the Brooklyn waterfront.

The discussion in the RSPO Preliminary Report revolves around the question of whether the ICC has the authority to guarantee Intra-port Equalization. First of all, the City of New York believes that the ICC has such authority under the amendments to the 4R Act. Second, in the case of New York, the definition of what is a port becomes strained. The investment in port facilities in the New York City portion of the entire Port of New York and New Jersey is larger than any other Port in the Northeast and at least as large, if not larger, than the investments in the New Jersey portion of the Port of New York and New Jersey. This seems to qualify New York City as a port by itself regardless of tradition. If this is the case, then Inter-port Equalization would apply to New York City.

Hence, in either interpretation, the City of New York port should be guaranteed equalization with all other Northeast ports and with the New Jersey side of the harbor, Conrail notwithstanding.

SUMMARY

The City of New York intends to press its case for both Inter-port and Intra-port

Equalization. The City will also press its case for the extension of equalization to container traffic from the equalized areas. The City will not sit back and allow an investment of $1.4 billion in taxpayer funds to be undercut by a change in ICC regulations.

The Port of New York has an advantage in services since the Port has a large volume of traffic both in and out. Removal of equalization on only a small fraction of tonnage starts the Port on a downward spiral: less tonnage means less ships and less frequent sailings. Less sailings will cause a further reduction in tonnage.

Furthermore, as tonnage declines the labor cost assessment per ton will necessarily increase, thereby forcing total costs per ton to rise. This would make New York non-competitive with other ports which have a geographic advantage.

Hence, the ICC must be cognizant of the complex inter-relations among investments in facilities, decisions on which port to use, and the role of quality rail service in economic development.

For the reasons outlined in the previous pages, the City of New York hopes that the Interstate Commerce Commission of the United States does not reverse its policy of equalization and that the ICC will extend equalization to containers.

LEGEND

1. Port Authority Piers.
2. Red Hook Containerport.
3. 23rd Street Pier.
4. Northeast Marine Terminal.
5. Brooklyn Meat Market.
6. Bay Ridge Rail connection.
7. Howland Hook Marine Terminal.
8. Industrial Park.
9. Pier 36 and Pier 42.
10. Hunts Point Food Center.

In addition, the State of New York, through its Department of Transportation, submitted a statement which shows the import of rail rate equalization between and within ports on the very survival of our greatest port.

The following is a copy of that statement:

RAIL RATE EQUALIZATION TO AND FROM PORTS

The preliminary report of the Rail Services Planning Office on rail rate equalization to and from ports raises issues that have a potentially far-reaching impact on the economic survival of the Port of New York. The State of New York is deeply concerned about the conclusions reached in this report, with regard to both inter-port and intra-port rate parity.

Millions of public and private dollars have been invested in the New York port, for the development of both maritime and industrial facilities. To give an idea of the order of magnitude of commitment made to waterfront economic development, it is estimated that the State of New York, the City of New York and the Port Authority of New York and New Jersey have spent or have programmed expenditures approaching $500 million for the improvement of existing facilities and the development of new facilities. These facilities include the Northeast Marine Terminal and Red Hook Containerports on the Brooklyn waterfront, and the Howland Hook Containerport on Staten Island.

State Rail Preservation Bond funds have been committed to the upgrading of the rail freight system serving waterfront facilities. The first phase of improvements, under a $9.9 million grant from the State and a $4.5 million grant from the Federal Railroad Administration, will include new rail facilities to provide direct container-on-flatcar access to shipping facilities on the Brooklyn Waterfront including Northeast Marine Terminal and Moore McCormack Lines, and will provide a connection between Conrail's Bay Ridge Line and New York Dock Railway's waterfront trackage and waterborne distribution services. The "Bay Ridge Connection" will provide Conrail with an alternate, overland routing to the Brooklyn waterfront in addition to the existing water connection via harbor carfloat operations at Greenville.

New York State has also embarked on a program of removal of clearance restrictions, which currently prevent direct trailer-on-flatcar access to New York City. The State anticipates that within one to two years the rail freight system in New York City will be able to accommodate intermodal and oversize equipment comprising a larger and larger segment of the nation's rail car fleet.

Clearly, New York State, in cooperation with New York City and the Port Authority of New York and New Jersey, is making a substantial commitment to the construction and rehabilitation of a rail freight system which is competitive with systems available to shippers at other ports on the East Coast and at New Jersey locations within the Port of New York.

The capital improvements in the rail freight system will directly benefit Conrail as well. The "Bay Ridge Connection" will provide an alternate, and in some cases less expensive, routing for Conrail traffic from the Northeastern United States. Opening New York City to intermodal and oversize equipment will not only permit Conrail to change its routings, thereby reducing operating expenses, but will also lead to the generation of new rail traffic for Conrail. Conrail already receives a "free ride" on the routing down the east side of the Hudson River, from Poughkeepsie to New York City, since it pays none of the costs of maintenance of track, signals or right-of-way and makes no payment for operating rights to the MTA.

At the present time, New York City shippers are faced with what is, effectively, a monopoly situation with regard to rail freight service. Prior to the period of rail reorganization, numerous competing rail carriers served the Port of New York. In contrast, Conrail now controls the line haul portion of the trip to New York City. New York City shippers have no competing carriers to whom they can turn for relief from discriminatory service.

Thousands of jobs on the waterfront and in related industries depend upon maintaining transportation costs which are competitive with costs of shipping via other ports and via the New Jersey side of the port. Without both inter-port and intra-port parity of rail freight rates, competitive transportation costs cannot be maintained.

The State of New York believes that the Rail Services Planning Office report, in questioning the concept of port equalization, has failed to adequately consider the long history and tradition of equalized rail rates to and within ports, the legislative mandate to the Interstate Commerce Commission to uphold port equalization, and the disastrous economic and negative environmental consequences which would result from denying the principles of inter and intra-port equalization of rail rates. Equally serious is the failure of the report to acknowledge the unique monopolistic situation faced by New York City freight shippers.

The following comments address the eight questions posed in the report.

1. Has the doctrine of port equalization for rail rates been beneficial or detrimental to the commerce of the United States? Who has benefited or been disadvantaged? Identify carriers, shippers, ports or regions.

This question is unrealistically worded. The "doctrine" of port equalization of rail rates has not been practiced, as far as New York shippers are concerned. Equalization of rail rates to and from the Port of New York has been very limited, covering only import/export traffic moving in conventional railcars from the Midwest, and multiple trailers moving from East St. Louis and Chicago.

Conrail has tried to overturn the practice of equalized rates on conventional traffic, by filing tariffs for some commodities which cover only points in New Jersey and exclude destinations in New York. Conrail has also cancelled participation in reduced commodity rates designed to compete with the Gulf ports, thereby diverting traffic from New York to other ports.

With the limited exceptions noted above, all other rail traffic, including TOFC and COFC from other midwestern points, has not been equalized. The adverse impact on the Port of New York on failure to equalize rail rates will be discussed further in response to later questions.

2. Mitigating the effects of natural market competition between ports and rail routes is the basic reason why ports and railroads seek equalization of long-haul rail rate (substitution of service for price competition).

(a) To what extent, if any, should the Commission promote such competitive adjustments?

(b) If the Commission does not promote competitive adjustments, should it, in its quasi-judicial role, (i) act only upon initiation of proceedings by the parties, or (ii) act on its own initiative in both examining the entire current rate structure (import/export) and ordering equalization where warranted?

The report ignores two major issues in formulating this academic question about natural market competition:

(a) There is no opportunity for rail competition in New York because of Conrail's monopoly on New York rail traffic. Natural, competitive market forces cannot operate under a monopoly.

(b) New York's natural locational advantages as a port have been nullified by equalization of international shipping rates. The R.S.P.O. report is proposing to open inland rates to "natural market competition" while ocean rates remain regulated, equalized and not subject to competitive forces.

3. Section 3(1) of the Interstate Commerce Act is the statutory basis for the Commission's authority over rail rate equalization cases. It prohibits the railroads from causing undue and unreasonable preference and advantage to any port or port district. What constitutes undue and unreasonable preference? Should there be any change in the traditional criteria?

If removal of undue and unreasonable preference between ports causes undue and unreasonable preference between shippers, what decision should the Commission reach?

The role of the Commission, and New York's unique situation in being faced with a Conrail monopoly, are discussed further in question 5, 6, and 7.

4. Motor carrier and barge rates are not subject to port equalization. Should they be? Are there disadvantages to the rail industry under this current status? Assuming that Congress provides the Commission with authority to equalize truck and barge rates, which modes rates should serve as the base?

This question is both academic and inaccurate in its assumptions. Motor carrier and barge rates *are* potentially subject to port equalization. However, these rates have not been pursued through litigation to the point of equalization. There is no port equal-

ization case history on water carrier and barge rates equivalent to that of rail, most probably because natural competition has occurred in these two other modes, while such competition has not existed in the rail area.

For New York shippers, rail and trucks serve different market areas. Trucks tend to be the predominant mode for shipments under 400 miles, while rail becomes significant as mileages increase beyond that point. The two modes are more likely to be complementary than competitive.

5. The report stresses that long-haul rail rates are only one factor among many in a shipper's selection of routing (including ports). Does the report provide a fair appraisal of the pertinent routing factors available? Do rail rates play a more significant role than indicated in the report? To what extent does the vast array of accessorial port services and rates influence routing?

This question avoids confronting the major issue, which is whether rail costs are an important factor in the selection of port routing. The answer is a resounding yes! Rail rates are one variable cost considered by the midwestern shipper in determining the choice of routing. Rail rates become an increasingly significant cost factor as the differential on the rates increases between ports (as the differential on container rates, for example, has been widening in recent years between New York, Baltimore and midwestern points) and as other costs associated with shipping via alternative ports tend towards equalization.

As pointed out in a recent Federal Reserve Bank *Quarterly Review* article (Summer, 1978), factors which in the past created other cost differentials in the Port of New York, such as labor costs, terminal operating costs and free time/demurrage regulations, are changing in the direction of equalization with other ports or are under review and likely to be changed in the immediate future. Labor costs and terminal operating costs are no longer significantly higher at New York than at other ports, and a change is being sought in Federal Maritime Commission regulations governing free time/demurrage, which unjustifiably discriminate against the Port of New York.

While there were historical reasons for limiting free time storage at the Port of New York, mainly having to do the lack of adequate dock storage space, these conditions no longer apply, and it seems very likely that Federal Maritime Commission regulations will be changed.

The final aspect of the cost differentials in the Port of New York, that of drayage charges, is really a phantom issue. Currently, Brooklyn, and Staten Island shippers must pay exorbitant drayage fees to move containers from rail heads in New Jersey to Brooklyn and Staten Island marine terminals. The lack of TOFC/COFC facilities east of the Hudson River has, in effect, necessitated this costly movement by truck.

This situation will shortly change for Staten Island and Brooklyn shippers. In the case of Staten Island, Chessie has recently established a tariff to the Howland Hook Terminal which will eliminate drayage charges entirely for containers moving via the Chessie system to Howland Hook. As soon as the New York State Department of Transportation-funded rail connection to the Brooklyn waterfront is completed later this year and the necessary rail rates to the Brooklyn waterfront are in place, drayage charges will be reduced or disappear entirely for Brooklyn shippers.

In summary, the inland rail rate may soon be the only significant variable cost confronting the Midwestern shipper, as other port costs tend towards equalization. Rail rates may become, not just an important factor, but the determining factor, in the choice of port routing.

6. What agencies in addition to the ICC should be involved in port equalization proceedings? Do the Departments of Agriculture, Commerce and State, for example, have an important stake? What interests at the state or local level should regularly participate?

Those parties affected by Interstate Commerce Commission port equalization proceedings will, and should, participate in those proceedings.

Once again, however, the question begs the key issue, which is whether the R.S.P.O. report adequately considers the need for consistency with national policies and programs and whether sufficient consideration has been given in the report to the interaction of port equalization policies with those other policies and programs.

New York State believes that any report on port equalization must consider whether a radical change to unequalized rail tariffs would support or undermine other national policies. A shift away from port equalization would directly, and adversely, affect a number of programs: the multi-million dollar harbor dredging program of the Army Corps of Engineers; the mandate to the City under the Clean Air Act to reduce trucking on local streets as part of the Air Quality Implementation Plan; the national Coastal Zone Management Program, which in New York supports maritime/economic development of the Brooklyn and Staten Island waterfronts; and the Carter Administration's commitment to the revitalization of older urban centers, including New York.

All of the above-mentioned national policies and programs would be undermined by a shift away from the principles of port equalization. In addition, State, local and bi-state policies, programs and investments would also be adversely affected. As noted previously, combined local investments approach $500 million in the Port of New York for rehabilitation of existing and construction of new maritime facilities.

7. Section 202(f)(3) and (4) may qualify the ratemaking flexibilities given the rail industry under the 4R Act by stating that:

(f) nothing in this section shall be construed—

(3) to affect the existing law or authority with respect to rate relationships between ports; or

(4) to affect the authority and responsibility of the Commission to guarantee the equalization of rates within the same port.

Some interests contend that this section should be given strict interpretation, mandating the Commission to equalize at least intra-port areas. Others reach a different conclusion. Inasmuch as the Commission has never guaranteed equalization of all rates within the same port in the past, they argue that Congress did not intend to alter the Commission's discretion and conclude that intra-port rates would be treated in the same fashion as inter-port rates. Which interpretation correctly reflects a policy which best supports the public interest?

The R.S.P.O. report questions the intent of Congressman Murphy's amendment to the 4R Act, Section 202(f)(3) and (4). Congressman Murphy has made it abundantly clear, time and again, that his intent with regard to this amendment was to *guarantee* the equalization of rail rates within the same port, just as the language of the amendment indicates. It is the responsibility of the Interstate Commerce Commission to act on this mandate. Congress felt that it was in the public interest to adopt this amendment, and it is neither appropriate nor effective for the R.S.P.O. report to question either the clear-cut meaning of the amendment or the wisdom of Congress in determining what constitutes the "public interest."

The R.S.P.O. report is, in effect, also questioning a lengthy case history built up over the years in Interstate Commerce Commission decisions which have supported intra-port equalization. *S & K Farms* v. *Long Island Railroad*, was handed down by the Interstate Commerce Commission in June of this year, just a month prior to the release of the R.S.P.O. report. In the S & K case, the Commission ruled that the railroads had violated section 1(6) "because their action destroys all efforts which have been made to as nearly as possible equalize the rates in the New York-New Jersey area." The Commission further reaffirmed the need to maintain the integrity of terminal rate groups, per its previous findings in the *Port of New York Authority* v. *Aberdeen & R. R. Co.*, 321 I.C.C. 738, 746–7 (1964).

In addition to both case history and legislative mandate, a convincing argument can be made for intra-port equalization on both environmental and economic grounds.

Each rail flatcar carrying two containers removes two trucks from congested local streets; every boxcar removes one or more trucks. Reduction of trucking is a major goal of the City's Air Quality Implementation Plan, in order to reduce air pollution. Maintaining, and expanding, the practice of intra-port equalization of rail rates would have clear environmental benefits.

Waterfront development in New York City, both maritime and industrial, has occurred on the basis of traditional intra-port equalization of rail rates. Failure to sustain the principle of intra-port equalization would disrupt long-standing patterns of economic development and concomitant capital investment, and would lead to a disinvestment in the New York side of the Port with subsequent loss of industry, shipping activity and jobs. Any imbalance in rail rates prejudicial to the New York side of the Port would result in a decline in rail traffic in New York City, and would bring the overall economic viability of the City's rail freight system into jeopardy, despite efforts by the State to rebuild the rail system and generate new traffic.

The State of New York remains unconvinced that Conrail incurs additional costs in serving the New York side of the Port. Without a thorough analysis of costs, such arguments must remain meaningless. If such a cost analysis were to be done, the usual mileage standard would prove to be fallacious. Rail costs may in fact be less to New York City for the following reasons:

(a) The greater volume (density of traffic) to New York City.

(b) Differential costs of routings employed. Some routes while longer mileage, may require less equipment or less fuel, for example. Distances between midwestern points and New York City are in fact comparable to distances between the same midwestern cities and existing New Jersey ramps. Additionally, Conrail gets a "free ride" on part of the trip to New York City, from Poughkeepsie south to New York. Conrail pays none of the costs of maintenance of track, signals or right-of-way and pays nothing for operating rights on this route.

(c) New York State Rail Preservation Bond funds are being used to make improvements in the City's rail freight system. These improvements will result in reduced operating expenses for Conrail, will permit the rerouting of traffic to maximize Conrail's division of revenue and will permit a greater variety of rail equipment to enter the City, which

will in turn generate new traffic for Conrail in as yet untapped markets.

8. The report cautions unrestrained port competition and in particular uncoordinated investments by local port management may result in excess port capacity. Nevertheless, port management continues to seek and obtain funds to improve or expand their facilities. Economic and technological trends in the maritime industry suggest a strong movement toward fewer but more highly specialized ports. What are the realities of this issue? What problems, if any, do excess capacity present?

It is not within the purview of the Rail Services Planning Office to prescribe national port development policy. It would seem more appropriate for the RSPO report to consider national port development policy in prescribing methods of achieving port equalization of inland rail rates.

Suffice it to say that New York has already invested heavily in new port and port-related rail facilities, and has programmed investments in other facilities which will shortly come on line. As noted above, failure to maintain both inter and intra-port equalization would have disastrous economic consequences and would seriously jeopardize the viability of both existing and programmed maritime facilities in the Port of New York.

RECOMMENDATIONS

The State of New York recommends that the Rail Services Planning Office go back to the drawing board on this report.

1. The report has been poorly researched. Few of the conclusions reached in the report are supported by adequate data and analysis.

2. The report is inconsistent in its findings with other national policies and programs.

3. The report ignores the environmental impact of a shift away from port equalization principles.

4. The report ignores a clear legislative mandate which requires intra-port equalization of rail rates.

5. The report ignores a lengthy Interstate Commerce Commission case history in support of port equalization.

6. The report carries on an academic discussion of free market competition while ignoring the monopoly situation faced by New York rail freight shippers.

7. The report ignores the disastrous economic consequences of a shift away from port equalization principles.

In summary, the report has raised complex issues which have a potentially far-reaching impact on the viability of many ports, including New York. But the report does not adequately address these issues. Certainly, the report has not established a basis for Interstate Commerce Commission policy-making, with regard to either inter or intra-port equalization of rail rates. In all, if all factors are taken into consideration, R.S.P.O. will clearly see the need to reaffirm the long-standing principles of inter-port and intra-port rail rate equalization.●

PERSONAL EXPLANATION

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. OTTINGER. Mr. Speaker, on Thursday, October 12, I was unable to be present for the vote on the Meat Import Act of 1978 (rollcall No. 907). Had I been present, I would have voted "nay" on final passage.●

SOME CRITICAL OBSERVATIONS FROM THE VIEWPOINT OF ORGANIZED LABOR

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. MAGUIRE. Mr. Speaker, an impressive and unusual speech delivered by Frank S. McKee, treasurer of the United Steelworkers of America, deserves the attention of Members.

The speech is important because it moves beyond facile but false assertions of conflict between jobs and the environment, and between energy conservation and our economic well-being, to identify the congruence of all these goals in a human and policy context.

The speech is excerpted below:

TWENTY BILLION SLAVES—ENERGY AND JOBS IN AMERICA

(By Frank S. McKee)

Faced with an issue vital to its survival, the most industrially sophisticated nation in the world appears incapable of adopting a rational energy policy. The United States of America continues to prolong a dilemma of indecision in face of mounting evidence that its present excessive usage and reliance on foreign energy may result in definite social and economic deterioration of such magnitude that it will overshadow even our gravest depression.

Our current administration's proposals do not contain any hard and realistic strategy. Neither our government and most certainly, not any of the corporate entities whom we entrust to manage our energy is willing to renounce the old habits of the wasteful-business-as-usual policies.

A nation that devours a very substantial portion of all the Earth's available resources and uses more energy on a per-capita basis than any other, does not have either a mineral policy or an energy policy—save for a mish-mash of overlapping, ineffective, often conflicting, contradictory, and feeble regulations that do little to wean the nation from its wasteful habits. Neither do the regulations stimulate development of new and replenishable energy sources. Nor does it curb the excesses of the corporate power giants who operate, distribute and ring the cash registers on the customers in a system that permits both vertical and lateral monopolies of our energy to the nation's disadvantage.

Big business advocates of the energy status-quo, argue that this "nonpolicy" of the Government was responsible for the unrestrained and unhampered private initiative which has, over the years, provided our nation with an abundance of goods and services now totalling over two trillion dollars. They tell us it was this unbridled activity of private enterprisers—like Standard Oil and other—that lifted us up to the highest living standard in the world—while providing us an ever-existing opportunity for growth and the needed tools for defense.

They say it was accomplished by placing energy in the hands of private business with a minimum of restraint from Government—big business forgets that there was a time or two when the lust for greater profit through price fixing and some economic piracy required even a reluctant Government to slap a few wrists.

To be sure, it was a remarkable achievement for a young and free nation. But it was the abundance of its natural resources, a seemingly endless supply of domestic energy, an unlimited use of its land, air and water, and an open frontier for expansion that were the elements in building this so-called American dream. Is it now changing? Are these elements still prevalent in our land? Can we look only at our own situation or must we take into account the rest of the world?

We need necessarily to include in any balanced appraisal the fact that—in climbing to this pinnacle of affluence—we did at the same time a lot of damage. We blighted our cities, our air, water, our land has been poisoned, polluted and scarred. Over 100 billion dollars annually is the price we pay for losses to health, property, and agriculture—not to mention the sheer-senseless waste that this unrestrained and unplanned use of energy causes.

The American dream literally becomes a nightmare in all too many cases. It is time now to examine what we are doing. We must give priority to the well being of people and consideration to sound social values. We must not just measure our progress in terms of all out energy consumption as it affects the profit scale.

It is calculated that for every man, woman and child in our land today there is the BTU equivalent of at least 100 energy slaves working to build our cities—move commerce—transport people, raise and distribute food—shape an endless variety of products and to provide for our manifold comforts even to the point of oscillating our tooth brushes. What we have are at least 20 million slaves working for us. This is another way of dramatizing the extent of our dependence on energy, what it means to us—individually and as a nation—and how dependent on it we have become.

We take much of this for granted. We would be an entirely different nation without these 20 billion slaves—or even with just a third less. Yet—it is in the direction of scarcity that we are now traveling. We may lose many of our energy slaves unless we plan wisely.

Such a simple analogy overlooks reality. Not every single person shares equally in this abundance the slaves provide for us. We still have many who don't share in this affluence and who are struggling to maintain even the very basics of life. One group—our nation's elderly—fall in this category. Many have to choose between heat—a light bulb, or having something to eat. They are being denied the energy they need by a pricing system that favors the big and powerful users over the little people. Indeed—we do have a growing number of people who have yet to be touched by the magic wonders of our slave-created society.

On the whole, we are what we are in the material sense because of the wide use of energy that we enjoy in great abundance—without which our life would be dismal. No other people on earth have been so blessed.

We, are on the threshold of another era that may well be even more profound than was the initial application of energy to the production of goods.

This new era must not be dominated exclusively by the utilities and the heavy industrial users. It must not be a private club: rather—it must be a carefully planned administration that includes all elements in our pluralistic structure. And it must have more than just advisory powers. It also must be sensitive to human values. It will give priorities to people—the human slaves. Social and human values must not be ignored in planning our strategies for an energy policy.

What confronts us today is really not a

shortage of energy. But energy can be dissipated and changed into other states from which there is no practical recovery to meet our specific uses. What we are faced with is a situation where we are running out of a particular source of energy and that is the one which we selected as our major—almost exclusive kind. We settled on using the fossil derived fuels. Oil, coal and uranium. But we are especially dependent on oil pumped from the ground. We have wasted oil and used it recklessly—when there was no need to do so.

We have subsidized it with billions spent to develop and refine it. We pour it into trucks and automobiles so they can roll along on our tax supported highways—or we burn it to make heat for electrical generation—and to warm our homes and buildings.

This discovery of this gushing and seemingly ever-flowing fountain of black gold prompted the wildest of imagination as to its benefits. But had we then been able to recognize the limits of this energy source, we may have been less wasteful in its usage and made ourselves less dependent on it. We even may have started many years ago to develop a better source, one that is cleaner and is self-replenishing. We could have, perhaps, avoided the crises we are in today.

But looking ahead—planning—has not been a characteristic of our system. The so-called "bottom line", as we say today, was and is to make money immediately. The few big energy giants who were busy squeezing the small independents out of business and into their corporate webs, cared little about the possibility of any shortage or crises. To them it was now, not later, and the bonanza looked like a rich world without end.

Just about the time the 1973 blow was to occur, the corporate structure of the energy companies was a tight-fisted, almost exclusive club, controlling not only the sources of energy but its distribution and its pricing mechanism. The law of supply and demand was theirs to manipulate. Regulatory agencies were and still are, in most cases, made up of those whom they were supposed to control.

Moments before the Arab embargo of 1973 came around, the oil monopolies, who possessed the advantage of scientific data, the engineering know-how—were not out preaching conservation or advocating any major changes in our business-as-usual energy policy. Instead—they were plugging for more usage and more waste. Free gifts at the service stations, wide distribution of credit cards, multi-million dollar advertising by the energy companies were telling the people to use more and buy more of everything that uses more. This was hardly rational behavior for a nation about to be stung by a foreign bumble bee.

And our Government, with more than two dozen agencies assigned with responsibilities in the energy field, was equally guilty of not alerting the Nation in advance of the crisis or trying to wean it from its habits of waste and abuse. We were told that nobody knew how much oil there was or how long the supply would last. The president announced that this Nation would become self-reliant on energy and would become independent of foreign oil. This he said while permitting the dredging of our harbors to accommodate even bigger super tankers to bring more foreign oil to the country.

When the 1973 crisis hit, the consuming public was totally unprepared for the shock. Who was responsible? Why weren't plans made for such an eventuality? The long lines at the service stations and other frustrations made for an angry America. Everybody was being blamed and nobody could be trusted. And most certainly not the energy companies, the Government or the politicians.

As a Nation of plenty, it's understandable that we avoid reality and cling to the hope that things will forever remain the same. But they never do, and without planning for the future, we continue to condemn ourselves to horrors of our own making.

As controversies range over every aspect of the energy issue, it is dividing, splitting and polarizing important segments of our Nation into opposing and warring camps. All this at a time when we are pressed to reach a consensus on energy that will satisfy most of the valid concerns of our pluralistic system.

We simply cannot cope with the crisis using yesterday's arguments. It is one of the most complicated and vexing issues of our times. But, like others, it is not without a solution. We have met similar and equally difficult challenges in recent history. We have proven, as a nation, that we have the resilience to adjust to even the most adverse situations and to mobilize ourselves as a people behind a program we can agree is right, fair and equitable.

Some 15 years ago, a seven-pound Russian ball was jettisoned into space, orbiting the earth for all to see. This iron pea, shot from the Urals, shocked our nation out of its feeling of omnipotence. But did we roll over and die? Far from it. Sure, it was a crisis. We were made to look second rate. But,—just as we did a generation before—when we saved the world from barbaric fascism—we overcame. We vowed, through the words of President John F. Kennedy, that America would have a man on the moon. We did it, not once but twice. We restored confidence in our nation and its ability to muster the ingenuity of its people and to allocate the necessary resources to do a job we felt needed to be done. We now must show that same kind of dedication and that same kind of vision. We need to do something equally as spectacular about energy—its conservation and its usage. We need to change from our reliance on sources of energy that are exhaustable to those we can have in abundance and which can be self replenishing. We need an energy which is clean and safe.

There is no total answer today on the shelf. Nobody even has a blueprint. But—neither did we have one for the trip to the moon or one for providing the free world with the arsenal needed for a World War II victory. What we do know is a whole lot more about energy than we knew in 1973. We know what's on hand and what is required in scientific breakthroughs. We also understand something about the variety of options open to us and more and more about the economics of alternative energy sources. sources of energy that are exhaustible to know more about the hazards to safety and health as well as the other considerations that must be included in any energy policy.

My task here today is not that of a scientist—an engineer—geologist—politician—or economist—but as an officer of an international union. The United Steelworkers of America represents working men and women in industires that rely heavily on energy—steel, aluminum, copper, and other nonferrous metals, chemicals, containers and many more. Over one million of our members—their families—their communities—all depend on jobs these industries provide. Without available energy there can be no jobs and no America as we know it.

I cannot play regional politics with our members' welfare. Energy cannot be regulated under a series of regional controls in which one area, one State, or one industry can lay claim to a far greater share of energy just because it used to be that way. Equalization of energy on a national basis is the way of the immediate future—if not right now. People will not freeze in the New England States so that another region is allowed to have "business-as-usual" priority.

But it does not follow that having energy in abundance assures jobs or the full utilization of our human potential. There is, in fact, a substantial body of evidence to point to the very opposite.

Since a period sometime in the 1920's, economists recognized that we have reached a point when the labor shortage that our Nation had experienced since its founding was coming to an end. There now were more people willing and able to work than there were jobs . . . a condition, I might add, evident during the depression of the 1930's and a condition that did not change until the stress of World War II placed over 11 million potential workers into the armed services.

What was happening in America then—and continues to occur to this day—is that machine-driven low cost energy was replacing the human factor in production. Not only was man's brawn being substituted but so were his low level skills. Energy costs were cheaper than human labor costs. It was often more efficient and predictable—machines using energy rarely had ailments and never complained about working conditions. A few drops of oil would correct most squeaks and no demands were ever made on the employer other than that of a capital expenditure.

Subsequent scientific applications even further aggravated the problem so that today, the so-called "capital-intensive" industries are also energy-intensive and are becoming more and more so. They are employing less and less manpower and using more and more energy. This technique extends to the cartels and multi-national arrangements in foreign countries. It is now a world-wide phenomenon. Capital-intensive industries using vast amounts of energy are making bids on the mineral and energy resources of our earth. The sheer economics of this corporate grouping are frightening—not only to labor but to others concerned with our nation. This was—and is—an ingredient in the OPEC cartel. It is this that helps pull down the value of our currency as imports of oil continue to increase, driving higher the prices.

Our balance of payment problem—some 29 billion dollars—is due to the oil crisis. Only solar energy is saving us from an even worse predicament. We export over 10 billion dollars in agricultural commodities grown by solar energy. The big agri-business is also capital-intensive and is employing fewer and fewer people as more new energy is added to the farming process.

We in labor maintain that unless there is a genuine full employment policy in America that will assure every able bodied citizen a job—one that will make the government plan for full employment—joblessness and recessions will continue to plague America regardless of how much power we have. Likewise, energy and the technology it makes possible, is turning once skilled workers into unskilled workers as more and more of their skills are being made obsolete by energy-hungry machinery.

More than any one single factor, the energy practices we employ are the basic causes of not only our re-occurring depressions, but the higher costs of energy, as it becomes more scarce, is perpetuating the state of inflation with prices always going up instead of down even in periods of recession.

A growing number of responsible authorities from various disciplines are now saying that our economic problems are rooted in our committed reliance on dwindling energy sources which cannot be replenished.

The thesis is that higher price for energy—as the supply grows more scarce—has a marked inflationary impact on our economy. Prices and costs shoot upward even for food—which today requires more and more energy to produce and distribute. Labor, obviously, must respond with demands for more wages just to keep its head above water. And, the energy sources we depend on, with a very few exceptions, are being exhausted in an inverse ratio to our increase in their usage. The formula we are living by can only mean a continuation of this vicious cycle of inflation, depression, and unemployment. It also requires billions of dollars just to keep the environment healthy enough so that we don't all choke to death or be poisoned while becoming virtual captives of those 20 billion slaves we created to serve us. As the old philosophical test of omnipotence asks, have we, in fact, created a rock so big we can't lift it? Have we become slaves to our energy god?

As in most debates much is overstatement we tend to magnify the problem without discussing the options open to us. We are not yet out of fossil fuels—even oil. We are not without the know-how to make them environmentally acceptable. It is true that we will be spending more for energy in order to make other alternative sources economically competitive. We do have some time left to alter our thinking about energy. We must institute policy that is based on something other than the deregulation of the pricing mechanism. We don't need any more unrealistic incentives which are maintained because of blackmail pressure from private monopolies. A few legislators—even at this late date—are considering granting more such incentives. We do not . . . I repeat . . . We do not create energy by raising prices. We do not promote conservation by maintaining utility rates that are higher per unit for those least able to pay, while continuing to reward those who use more with a lower unit price. The inverse pricing system is dying fast. . . .

IT SHOULD NOT BE MOURNED

We desperately need more capital devoted solely to the search and development of inexhaustible sources of energy—such as solar, geothermal, nuclear fusion, wind, tides, solar energy transmission through satellites—to name but a few of the sources we should be researching and stimulating their usage.

We must start a meaningful conservation program. Merely raising prices isn't reducing consumption—it is, in fact, only imposing hardships on those least able to pay. The price increase means little to the rich. They can pay the $2 a gallon for their big guzzlers, but the working stiff needs his car to get to work and paying more for fuel means he lowers his standard of living. Gasoline prices are up by nearly 200 percent since 1973, but consumption continues to increase.

We need to think more about co-generation of energy in our factories. We need to make use of heat instead of dissipating this valuable energy source. We must fully insulate every house and every building and we must include the solar energy concept in our architectural designs.

We also need to make use of our wastes, do more resource recovery from our trash, generate energy from our land fills and from our sewers. I suggest expanding the many programs going ahead in America today for saving energy through recycling and energy conversion from sewage and garbage.

As we begin positive and anti-waste programs, we will start being less dependent on foreign energy sources. We must also strongly insist on a trade policy that is fair to our nation's industries. Let us not forget that the tons upon tons of various metals being dumped into this country annually are not only putting American labor out of work but for each pound, each ton, each article of merchandise there is also an energy factor in it. We are literally importing barrels upon barrels of foreign oil which are represented in the products that flood our domestic markets from abroad.

Just as other groups in our nation are often confused by the array of conflicting statistics opposing energy doctrines, we in labor are just as confused. All this makes a consensus within labor as difficult as it is within any other segment of our nation. Businessmen and industrialists are quick to lay the blame on the environmentalists and on consumer groups for the lack of any progress in our economic development, especially in nuclear energy. Labor, in fact, is thrown into the center of this controversy—given a spot between a rock and a hard place and asked to decide which is better—a job or some insignificant environmental concern. There is no needed trade-off between a clean environment and jobs, but that doesn't stop the fear campaigns waged by some industries.

What is becoming more and more evident to us in labor is that a wedge is being driven between two traditional allies—between labor and the conservationists—in which looks like another round of industrial blackmail.

Let me explain—a union launches an organizing drive, the workers are often told by their employer that once the union succeeds, the company will be forced out of business and jobs will be lost. Of course, this seldom if ever occurs. Most of the heavily organized industries are also the most profitable.

Labor is also continually being told that there is a direct relationship between safety on the job and productivity and that too much emphasis on safety regulations only adds unnecessary costs and reflects in less jobs and less capital for labor-creating investments. Safety still is being used to blackmail workers.

When environmental laws were enacted, and up to this very day, workers are told that when companies are forced to comply with such laws dealing with clean air, water, and toxic substances, and are unable to meet the huge expenditure necessary they may be forced to close or to reduce operations. Again, a blackmail threat, using jobs.

Now it is definite that energy is added to the list of such scare tactics used to blackmail working people.

In this ploy, working people are being told that environmental "kooks" are against any proliferation of nuclear energy and are, therefore, the real enemies of progress. Most energy problems are being laid on the environmentalists, who are being labeled at times as idle rich egg heads with an international loyalty, far out leftists, no-growth advocates or weirdos.

Workers are told that it is this environmental movement that stands in the way of progress when there is little or no danger in the nuclear energy production chain, starting with miners exposed to the radon daughter cases in the uranium mine to the operation of the reactor, and finally in the disposal and containment of radioactive waste. Some make it sound like low-level radiation may even be good for you; that sulphur dioxide is not as harmful as we are told it is, that lead, arsenic, asbestos, or any other of the thousands of poisons connected with industrial life—must be tolerated—that the products we come in contact with—the air we breathe—water we drink—or foods we eat—cannot be purified or made safe without endangering our economy.

Workers are being told that the environmentalist and consumer advocates are their real enemies and that they care little for the workers and are "in it for their egocentric kicks". But it was the Sierra Club and not an American industry that sided with labor in the hearing before the Supreme Court in a case involving OSHA inspectors' right to enter a workplace. Most all the responsible environmental groups regard the workplace as a part of the environment and are supportive of labor's efforts to make our industrial environment less dangerous to man. We all need to be nature's allies to work towards making our habitat on Earth more consistent with what God intended it to be.

It is generally agreed in the circles of labor that we must urge Government and industry to make full use of all of our energy potentials but, in doing so, we must carefully consider the implications that such expansions will have on the safety and health of the environment, especially humans in the workplace.

It is definite that we will be making greater use of our coal resources and will be using it not only in the conventional way but will accelerate its gasification and liquefaction for use in the generation of electricity, as well as other industrial and domestic applications. We must insist that rigid standards of safety and health be developed and adhered to so that we don't repeat our errors of the past. As we accelerate coal and other energy production, we can't overlook the miners and other workers who dig and process it. Even at the old production pace, black lung was a killer of thousands. It has not been eliminated. What other new dangers to safety and health of workers lurk in the workplaces of new energy technologies?

The Nation is considering increasing its imports of liquid natural gas, storing it in huge tanks and later expanding it for use. In this process how well will the public be protected from accidents? Even more important—since they will be right on the scene—how will the workers be protected while handling this most volatile energy?

It is not just a concern of environmentalists. It's labor's deep concern. After all, it was the working people who were victims of the cruelties associated with the development of mass production. The packinghouse workers and their families were true environmentalists when they fought to make the stockyard atmosphere livable and keep the rats from biting their children as they slept in rotten shanties provided the workers by the companies. Their cry went unnoticed by industry for years until other people—environmentalists, people with a social conscience, joined labor in its cry for a better life. There are hundreds of similar examples.

Over 150,000 workers annually are injured or maimed on the job. Thousands are absorbing hidden poisons yet unidentified. Others are having their lives shortened by exposure to known carcinogens. How many lives are snuffed by industrial diseases? How much of our atmosphere is so polluted as to cause billions of dollars in losses to property, agriculture, forests and human life itself? And so the list goes on and on.

Labor is horrified when it hears stories of all the new kinds of dangers. Mounting disclosures of accidents in the handling of atomic energy are most disturbing and have prompted our union and others to call for the government to take the nuclear energy from private hands and set up a TVA-type management for its further development so we can be assured a higher degree of safety. It is more than the snail darter that con-

cerns labor and the environmentalists. There are 200 million humans out there who are becoming an endangered specie and who are entitled to better assurance than they get from commercials of the energy corporations that all is well and that they are making America strong.

We need each other. We need to form a consortium representing every segment of our society so that we can democratically find answers to our energy crisis. There is no longer any room for misinformation and blackmail. We must share in the sacrifice and we must share in making the right decisions—decisions that will help us adopt a program we can all live with. I know we can and will do it. All America will rally to the cause. It is the responsibility of the leadership of business, labor and government to point the way while there is still time. Thank God there still is time.

Thank you.●
